"The people do not want war, but what can they do? They cannot even say what they think or there would soon be chains around their necks.

"Yet there is bitter feeling against America. I would be sorry for any American soldier that falls into the hands of the Germans, either the soldiers or the people. That is because the newspapers talk always of the evil doing of America—and the people believe what they read. They began hating America long ago, when they heard it was aiding England. It is not France so much, but England and America that Germany hates."

Sergeant Szadelski had been an American soldier for years before he met and married the little German woman, during a visit to Germany several years ago, but he left just before the war. This led to suspicions that he was an American spy, and so when his wife wished to leave Germany last May she had an immense deal of red tape to untangle. For a month she had to go before the police each day; then she was summoned to Berlin. At the Danish border every scrap of paper but her passport was taken away, and in Copenhagen she was received coldly by the American legation, because they would not believe that the wife of an American soldier would speak only German. After correspondence with Secretary Lansing and others, the legation was finally convinced that she was not a spy, and she was permitted to sail for New York. She will leave in a few days with their three children for Honolulu.

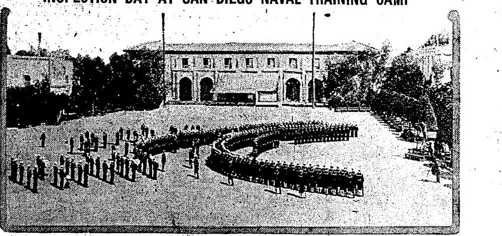
Potatoes Without Vines.

Findley, O.—Fred Neeley is growing some vineless potatoes in his war garden here. When his potatoes failed to come up he started to plant cabbage plants, and found that the potatoes he had planted were developing, but that the vines were absent. They were larger than walnuts.

ENGINEER OFFICER STUDENTS BUILDING A BRIDGE

The young engineering officers whom the government is training at the camp at Belvoir, Va., get not only theory, but actual practice in engineering problems. They are seen here constructing a light pontoon bridge.

INSPECTION DAY AT SAN DIEGO NAVAL TRAINING CAMP



Inspection day at the great naval training camp, San Diego, Cal., at the Plaza de Panama, Balboa park, formerly the Panama-Pacific exposition grounds. These boys are being trained thoroughly.

NOTED AUSTRALIAN COMING

Sir George Reed, high special commissioner from Australia and one of the foremost orators of the British empire, who is coming soon to America to lecture on "Anglo-American Relations."

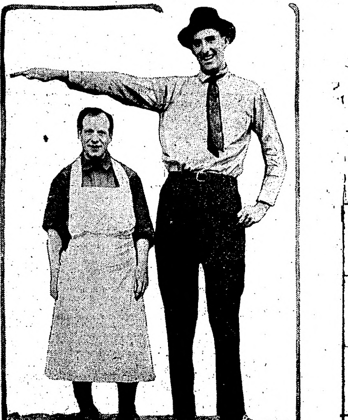
Didn't Appreciate Joke.

L. G. Trixler, politician by trade, postmaster by profession and practical joker in the interim, was the victim of the old-fashioned April fool pocketbook joke the other day when he was on an automobile tour near Hartford City, only the bait was an automobile tire, says the Indianapolis News. The tire, a new one, with the wrapping slightly torn, was in the road. Trixler stopped, but just as his fingers touched the tire it rose in the air and hung by a rope over the limb of a tree. Trixler got the horse laugh from some boys behind the tree, but he appreciated the joke so thoroughly that he waited to see the next victim get stung. The next victim failed to see the joke, and his language is said to have turned the air so blue that Louie had to turn on his automobile lights to get away.

Pearl Was Too Well Heeled.

A dispatch from Elizabeth, N. J., to the New York Commercial says that just because she wanted to be a regular fellow and spend a vacation roughing it, Pearl Holmes, a pretty and youthful bride, carried an outfit of her husband's apparel to the woods near Rutherford and made the switch. Pearl failed to reckon with dainty French heeled pumps and trim ankles and was arrested by Chief Burnho. She returned home after the feminine finery had been salvaged.

LONG AND SHORT OF IT AT CAMP DEVENS



Contrasts at Camp Devens, Ayer, Mass. At left is Bartholomew Lee, Chelsea, Mass., cook of E company, who is 4 feet 11 inches in height; at right, E. H. Turner of Roxbury, the camp giant, standing 6 feet 6¾ inches in his socks.

BRITISH WOUNDED SEW FOR SYRIANS

Convalescent British soldiers quartered in Egypt spend much of their time sewing for the destitute Syrians of Palestine, under the instruction of women of the English V. A. D. A group is shown in the courtyard of the old royal palace.

DAIRY FACTS

FEEDING THE DAIRY CALVES

First Aim Is to Cut Down Whole-Milk Period—Results of Tests at North Dakota Station.

In feeding the dairy calf, the aim is to cut down the period of whole-milk feeding. At the North Dakota experiment station, two lots of four calves each were fed as follows: Whole milk first three weeks, both lots. From then on lot A was fed one-half whole milk and one-half skim milk till six months old. Lot B, after three weeks old, fed skim milk with flaxseed; just enough flax was added to supply as much fat as was given the calves in lot A in their whole milk. Each calf was given two gallons of milk a day.

The whole-milk calves made the best gains the first three months, but during the next three months the skim-milk calves nearly caught up, the four lacking but 15 pounds of weighing as much as the whole-milk calves. Several expert cattlemen who examined the two lots pronounced the calves in lot B in as thrifty a condition as those in lot A. The saving in using skim milk and flax in place of the whole milk amounted to $19 per calf for the six-month period. The grain and hay cost the same for both lots.

DRYING UP A COW DIFFICULT

Milking Habit in Some Is So Strongly Developed They Give Milk Up to Calving Time.

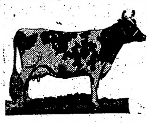
(By W. S. CUNNINGHAM, Assistant Animal Husbandman, University of Arizona Experiment Station.)

Many times certain cows are very difficult to dry up. The milking habit is so strongly developed that they tend to give a large quantity of milk right up to calving time. The proper way to dry up most cows is to cut off all grain in the ration and milk only once a day for a few days. Then lengthen the periods between milkings by milking only once in two or three days until the secretion of milk is nearly stopped. In very persistent cases the feed supply may have to be cut down more severely. However, there is little danger of injuring the udder if reasonable attention is given.

GUERNSEY IS HIGH PRODUCER

In General Appearance Breed Has Plain Attractiveness That Appeals to Dairyman.

The Guernsey shows various colors, so red, light lemon, orange and yellow fawn may be expected, sometimes solid, but more often with white markings. The white color markings are found on the face, flanks, legs and sometimes on the body. In general appearance the Guernsey has a plain attractiveness and an even balance that makes a strong appeal to the dairyman. Larger than the Jersey, but not as large as the Holstein, the Guernsey shows the capacity for work so desirable in the dairy cow. Years, and even centuries, of tethering in the fields of Guernsey islands have given the Guernsey cow a gentle disposition, and in the respect she stands on a par with the Jersey.



Guernsey of Gentle Disposition.

PLENTIFUL SUPPLY OF WATER

One of Most Important Problems That Confronts Up-to-Date Farmer—Factor for Health.

The plentiful supply of good, wholesome fresh water in the home, the stable and the feed lot is one of the most important problems that confront the up-to-date farmer. Its successful solution will be a factor in keeping him and his family in good health and "at home" on the farm.

TO HURRY BUTTER GRANULES

If They Do Not Form After Churning Reasonable Time, Small Amount of Salt Will Help.

When the butter granules do not form after churning a reasonable time, try putting a small amount of table salt in the churn. A little warm water has the same effect of hastening the granules. Too much warm water makes soft butter.

TREATING CALF FOR SCOURS

Reduce Ration One-Half, and If no Improvement Give Dose of Subnitrate, Salol and Soda.

First, reduce ration one-half. If calf does not improve within 12 hours treat as follows: Mix one ounce of bismuth subnitrate, one-half ounce of salol and three ounces of bicarbonate of soda and give one teaspoonful three or four times a day until recovered.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

CLEAN HEALTHY WHEAT SEED ESSENTIAL

SPLENDID CROP OF WHEAT IN COLORADO.

(From the United States Department of Agriculture.)

Sound, clean, healthy seed is the first requisite for the largely increased wheat crop which the United States department of agriculture hopes to see harvested next year. Whatever the source of supply, farmers will find it to their advantage, says the department, to see that only good seed is planted. What has been said is equally true of seed for the rye crop which the department hopes to see much larger than usual next year.

If a farmer has seed from his own crop which is satisfactory so far as variety and general condition are concerned, he should lose no time in getting it into shape for storage until planting time. The fanning mill is the farmer's best friend in this task. The farmer by all means should have such a mill, and if he has not and is unable to obtain one, should borrow or rent his neighbor's mill, or several farmers can join in buying one. A fanning mill removes weed seeds, smut and shriveled grain and leaves only plump kernels, practically every one of which may be depended upon to produce a thrifty plant. After it is cleaned, however, the seed should be treated in order that the smut may be prevented. Scab is more likely to be prevented by seed treatment, but the use of the fanning mill will assist materially in improving the crop grown from seed known to have contained scabby kernels.

Buy Seed From Neighbor.

If the farmer is dependent on outside sources for his seed, he should buy from his neighbor if possible, so that he may be more likely to get seed well adapted to his conditions. It is advisable to buy as soon after harvest as possible, as at this time prices are likely to be lowest. If the farmer delays, his neighbors may dispose of all their surplus grain and he may be forced to plant seed grown under conditions radically different from his own. If the farmer patronizes a seedsman he should insist on getting seed grown as near his section as possible.

If seed is affected by diseases, careful inspection will usually disclose the fact. The presence of stinking smut in wheat is indicated by the odor and the presence of scab by the appearance of the kernels. Purchased seed should, of course, be cleaned and treated for the destruction of the spores of disease-producing fungi, if the examination shows this to be necessary.

Selecting Varieties.

In choosing varieties of wheat, the farmer should be guided by the experiences of his neighbors and the advice of his state experiment station. This is true also of rye, but there are available fewer varieties of rye than of wheat. The stations can furnish comparative statistics on the yields and behavior of a number of varieties of the two cereals.

After the grain farmer has procured a supply of satisfactory seed he should store it carefully, so that it will keep in good condition and will be safe from the depredations of rats, mice and insects. Bins which are supposedly ratproof are available on practically all farms and it will pay farmers to see that they are kept in good condition to keep out the rodents.

ADVANTAGES OF FALL COLTS

Youngster Can Be Weaned in Spring When Grass Is Beginning to Come—Pasture Helps.

A very large proportion of all colts are foaled in the spring. However, some who have raised a fall colt or two each year have found the advantages are not all in favor of the practice of exclusive spring colt raising.

A colt foaled in September or early October will get a nice start before the pasture dries up and winter approaches. Then the mare and colt should receive a plentiful and nourishing ration through the winter. The colt can be weaned in the spring when the grass is beginning to come, and the pasture will help wonderfully to keep it in condition and to keep it going.

PROFIT IN BALANCED RATION

One-Third to One-Half Less Eggs Obtained From Fowls Not Given Right Variety of Feed.

Hens fed unbalanced ration produce only one-third to one-half as many eggs as hens fed a balanced ration during the same time. An unbalanced ration wastes from one-half to two-thirds of the feed. Be sure the ration is balanced.

MOST PROLIFIC OF BERRIES

Very Few Blackberry Bushes Will Furnish Family With All Fresh Fruit It Can Use.

Blackberries are the most prolific of the berries, generally speaking. A very few blackberry plants may furnish a family with all the fresh fruits it can use. And for canning, preserving, caking cordial, wine, etc., the blackberry is unexcelled.

PLOWING TO CONTROL PESTS

Remedies for Effective Check Must Be Applied During Fall and Winter Seasons.

After the corn-root louse, rootworm, grubworm, and wireworm have attacked the cornfield, it will be too late for effective control measures. Remedies for these pests must be applied during fall and winter. These insects feed below ground and are most effectively controlled by fall or winter plowing, clean culture and crop rotation.

The root louse winters as the egg in the nests of the small cornfield ant. By winter plowing these ant nests are broken up and the ants, as well as the louse eggs, are destroyed. The eggs of the Northern rootworm are deposited by the beetle during fall in cornfields and since the grub on hatching the following spring will feed only on the roots of corn, apparently crop rotation is entirely effective. Some of the grubworms and wireworms require two or three years to mature. They winter in the soil where winter plowing will destroy many. They breed largely in sod. Therefore, if a field of sod is to be used for corn in the spring, plow it in late fall, if possible. Should dry weather permit before freezing weather is over, winter plowing will eliminate a great many of the insects which ordinarily attack corn in the spring.

FATTENING FOOD FOR DUCKS

Cornmeal, Wheat Bran and Beef Scraps Mixed With Milk or Water Is Recommended as Good.

A good fattening food for ducks is three parts cornmeal, one part wheat bran and one part high-grade beef scraps mixed crumbly with milk or water and fed at morning and noon. The evening food should consist of cracked corn. No more should be fed at one meal than they will eat up promptly, and then the troughs should be removed.

Skimmed Milk for Calves.

Hand-fed calves are usually fed as skimmed milk.

ROAD BUILDING

GRAVELED ROADS ARE CHEAP

Can Be Built and Satisfactorily Maintained at a Less Cost Than Other Types.

(By E. B. HOUSE, State Agricultural College, Fort Collins, Colo.)

I have heard considerable discussion lately concerning the policy of our state highway commission in constructing the kind of roads it has decided upon, and it is often argued that the only type of road is the so-called permanent road, the one that needs no maintenance.

If one will take a pencil and do a little figuring, he can easily convince himself that the policy of the state highway commission is the correct one. Let us consider first of all the expensive type of road construction, such as concrete, or the best grade of macadam. This type of road will cost approximately $10,000 per mile, and let us suppose that the cost of construction is met by issuing 20-year 4½ per cent bonds. The annual expense on account of this first cost would be about $780 per mile. And these roads will need some maintenance, possibly not much over $50 per mile per year. This brings the total cost up to about $830 annually per mile for the expensive or so-called permanent type of road.

Good Road in West.

Now take a well-constructed gravel road and the cost for this road will run about $4,000 per mile for construction, figuring again on a basis of 20-year 4½ per cent bonds and the annual account for first cost will be about $310 per mile. The cost for maintaining these roads, if properly done, runs up pretty high, and it can be well done with an expenditure of about $240 per mile per year.

This makes a total annual cost then for the surfaced road of approximately $550 annually per mile. A comparison of these two annual costs shows $280 per mile per year in favor of the cheaper roads.

MONEY SPENT ON HIGHWAYS

Over $300,000,000 Expended for Construction and Maintenance in United States in 1916.

More than $300,000,000 was spent on highway construction and maintenance in the United States in 1916. Of this amount 16 Southern states spent approximately $52,000,000. The state of California has voted $15,000,000 to be spent in perfecting the state highway system and not a single county failed to give the empowering measure a majority. Ohio is talking of a $50,000,000 highway bond issue and the state of Illinois will put to its voters at the 1918 election the question of issuing $60,000,000 in highway bonds, the interest and retiring fund for which is to be provided for by an increase in the motor vehicle registration fees.

EXPENSE OF IMPROVED ROAD

Manifest Advantage, as Well as Necessity for Good Roads Seems to Be Educating People.

Within very recent memory the expense of good roads has been bitterly opposed by farmers. The increasing tax rate, due to many causes, has been viewed with the greatest alarm. Within the last year, the manifest advantage, as well as the actual necessity, of better rural highways seems to be gradually educating the public to the viewpoint that good roads are an accompaniment to the changing times in the agricultural world. The only question now is whether or not, with all the vast sums expended for road improvement, we can get good roads soon enough.

Work Drag After Rains.

There are many times when a day's work can be spared on the road. After heavy rains the road may need certain repairs or improvements when the overseer is not ready to call out the hands. Why not individual farmers donate a day's work on the road at such time?

Joy Ride to Town.

A trip to town now to lay in the winter supply of necessities is a joy ride compared to what that same trip will be when the roads get muddy.

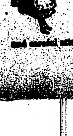
JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.



Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

IMPROVEMENTS ARE NOT TAXED

Western Canada Does Not Tax Stock or Improvements but Collects an Additional Tax From Land Speculators.

Owners of uncultivated lands in Western Canada are loud in their protests against an extra tax on their lands because they are not under cultivation. Western Canada, through its provincial governments, is endeavoring to force the speculative land owner to either sell his land to a settler or to cultivate it himself. At present a surtax of a few cents an acre is levied against all wild land, so that the owner of land held in its natural state, without improvements, is contributing more taxes to the government than the owner of a farm that is cultivated and even improved with buildings and stock to the value of thousands of dollars. In order to encourage the farmer to improve and to go into stock raising, he is not charged one cent of taxes on any of his improvements, implements or stock of any kind.

As a result of this surtax on uncultivated or speculatively held lands, the owners are now trying to sell them to actual settlers, and, in nearly every instance, have been offering on very easy terms of payment, usually a quarter down, and the balance extending over a term of years at prices much lower than their productive value would warrant.

A world-wide shortage in farm stuffs has given a new value to all agricultural products and the margin of profit today is greater than ever in the past. It is true labor and implements have increased in price, but it is now possible to secure 50% profit in farming, and higher. Possibly not on the $100 to $200 an acre farm lands but on land that can now, under existing conditions, be purchased at from $15 to $30 per acre. Western Canadian farm lands are as productive as any in the world and can be as economically farmed. Wheat yields of from 30 to 50 bushels per acre have been common in Western Canada during the past few years, and the farmers have been too busy farming all they can so as to sell as much wheat as possible at $2.00 a bushel, that they have not had time to do any talking or writing. It is doubtful if there ever was such an opportunity to make big profits in farming. The value of each year's crop has been in hundreds of cases more than the market value of the land it was grown on. It is unreasonable to suppose such a condition will last long, as the land now being forced onto the market by surtax on speculative owners will soon become absorbed by those who have learned of these highly profitable wheat lands. The news is spreading gradually throughout the high priced land districts in the United States, where there is a renewed awakening to the realization that the maximum profit in farming is not being obtained when it is possible to secure from forty to seventy per cent return on the investment in Western Canada. Many who have been planning to visit Western Canada for the purpose of personally investigating conditions are leaving this month, when the good weather can be enjoyed. As threshing operations and marketing of grain is under way, no better time could be selected to secure first hand and reliable information from the farmers themselves. The winter months afford ample time for completing moving arrangements, to allow the settler to take up residence in early spring, so as to get something done next year and to make a start on the big and profitable farming operations in Western Canada.—Advertisement.

Wears Short Sleeves.

The woman who wears her heart on her sleeve generally wears short sleeves.

WOMEN SUFFERERS NEED SWAMP-ROOT

Thousands upon thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer a great deal with pain in the back, headache, loss of ambition, nervousness and may be despondent and irritable.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, restores health to the kidneys and is just the remedy needed to overcome such conditions.

Get a medium or large bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper. Adv.

Germany Needs It.

After many tests under government supervision in Germany salt has been found the best preservative for butter.

TO BE NO STOP IN ALLIED DRIVE

Secretary Baker Believes Advantage Gained Is to Be Pushed All Winter.

ENEMY MORALE IS LOW

U. S. Soldiers in France, After Three Months' Training Are in Splendid Condition and Efficient Fighting Trim.

Washington, Oct. 24.—It is the expectation of military experts here that winter will not halt the great Allied drive against the Germans in Flanders.

Secretary Baker's weekly review of war operations discloses the belief of the War department that potency of material and men will enable the British and French commanders to triumph over natural obstacles and continue forcing the enemy backward without waiting for spring.

Sammies in Fine Trim.

The review touches for the first time upon the American expeditionary forces in France, declaring the men, after three months' intensive training, are in efficient fighting trim and splendid physical condition.

The War Secretary declares it apparent that the German high command planned the recent expedition against the Russians in the Riga sector to bolster up morale and meet impending internal difficulties. By extending her lines in the East, he adds, Germany has merely added to the length of her line of communications and increased confidence in the final allied victory.

Text of Review in Part.

Secretary Baker's review for the week ending October 20, in part follows:

"Our men in France, after three months intensive training, are in splendid physical condition and efficient fighting trim.

"They have readily become acclimated and now feel at home in the war zone.

"Our troops have met with the most warm-hearted and enthusiastic reception on the part of the armies and people of France.

"The health of our men overseas is reported as excellent.

"The week just closed has been one of relative quiet on all fronts.

Morale Aim of German Coup.

"The full importance of the battle in Flanders is beginning to be revealed. In order to appreciate the real significance of this engagement and the effect it has had on the morale of the German army and the German people, we must consider briefly the German attacks in the Riga sector, including the capture of Oesel, Dago and other minor islands of the Finnish gulf.

TRANSPORT SURVIVORS LAND

Men from Antilles Praise Officers and Gunners.

A French Port, Oct. 23.—Survivors of the United States transport Antilles, which was sunk by a German submarine last week while being convoyed on its homeward trip by American warships, have been landed here by auxiliary vessels and are being cared for by the American consulate. Some of the men have been lodged in local hotels and a few have left for Paris.

Survivors praise the captain of the Antilles and the members of the gun crew, who stuck to their posts while the officers searched with field glasses for the submarine until the waves closed over the ship.

ALLIES ADVANCE IN THE WEST

British and French Co-operate—Lines Moved Forward.

London, Oct. 23.—In co-operation with the French on his left, Field Marshall Haig has launched a new blow along a narrow front at the German lines northeast of Ypres.

The Allied infantry moved forward near the Ypres-Staden railway and on the outskirts of Houtholst wood on the extreme northern edge of the active front in Flanders. The French advance was along a width of about three-fifths of a mile.

BOMBARD GERMAN AIRDROMES

British Attack Important Objectives in Belgium.

London, Oct. 23.—British airmen have carried out numerous attacks on German airdromes in Belgium and on important objectives near Saarbrucken, northeast of Metz.

The official statement on aviation activities says that nine German machines were brought down and that four others were driven down out of control.

Illinois Miners Back at Work.

Springfield, Ill., Oct. 23.—The strike of the Illinois miners, called to force Fuel Administrator Garfield to announce an increase in the government price on Illinois coal, with a resultant raise in wages for the miners, is ended. All reports to the operators association indicate every mine in the central Illinois field is working. Meager reports from the southern field also indicate the walkout is at an end. The return of the miners in the central field follows a meeting yesterday at which patriotism ran high.

News of the State

Condensed for Busy Folks

Red Wing raised $200,000 in the first day of the two-day Liberty Loan drive to raise its quota of $300,000.

Walter Gutekunst, living near Luce station, was instantly killed when his automobile was struck by a Northern Pacific train.

The Nurses' Alumni Association of the Northern Pacific Railway Hospital Training School for Nurses and the Brainerd Musical club have invested in Liberty bonds.

The Pennington County Bankers' association has offered a silver cup as grand prize for the best exhibit of potatoes at the county potato show at Thief River Falls November 17.

The Jameson residence at Midway, owned by Mrs. Anna Kelly, was destroyed by fire. The loss is estimated at $4,500, with $2,500 insurance. The house was unoccupied, so the origin of the fire is not known.

Preparations are being outlined at Winona for the observation of Liberty day. The stores will close in the afternoon and a public demonstration will be carried out to enable the citizens to rivet all attention on the Liberty Loan drive.

Frank Newcomer and William Dougherty, two Pipestone boys in Uncle Sam's aviation corps, are safe in France, according to letters to relatives. Six weeks ago letters came from the boys, saying they were to sail for France at once.

The Northern Pacific has decided to discontinue two passenger trains on the Fergus Falls division October 31. The trains have been patronized little this summer and have not paid expenses, as nearly all farmers now make their trips by automobile.

The Duluth Log company's mill on the Mississippi at Aitkin burned to the ground last night. The mill had opened only two weeks ago to make shingles, after having been closed all summer. Aside from the building, much lumber and shingles were lost. The loss is estimated at about $10,000.

Paul Valentine Bacon's German text book, used largely in public schools, has been banished from the East Grand Forks schools in accordance with a decision made by the board of education. Several chapters in praise of the German emperor, was the stated cause of the text book being discarded.

The graduating class of 1917 of the Crosby-Ironton high school has purchased a $50 Liberty bond, which they will give to the graduating class of 1942, the year the bond will mature. In the will the present class will give directions for disposal of the bond. So far as known here this move is original with the Crosby-Ironton high school.

The fourth annual live stock show, under the auspices of the Hastings Breeders' association, was held at Hastings. The colt and calf exhibition, in charge of Prof. R. C. Pollock, drew the greatest attention. The display of stock, including swine, was the finest seen for many years, the entries being large. More than 5,000 persons attended the show.

August Fretz is in a precarious condition at a Winona hospital with a bullet wound in his head as the result of examining a gun he did not know was loaded.

The Nurses' Alumni Association of the Northern Pacific Railway Hospital Training School for Nurses at Brainerd and the Brainerd Musical club have invested in Liberty Bonds.

Publicity regarding aliens in possession of firearms, they being violators of the law unless the weapons are surrendered, has resulted in a wholesale deposit of hundreds of guns on the iron ranges with deputy sheriffs. Game wardens have estimated that at least 1,000 deer and moose have been killed, in and out of season, annually by alien "shackers" and hunters.

Because a resolution was passed at a recent school meeting at Pipestone binding the board of education to spend not more than $210,000 for the new high school building here, it has been found impossible to accept any of the bids which were made a few days ago on the structure.

One hundred Minnesota men of the depot brigade at Camp Dodge who were in charge of squads that sold $62,050 Liberty Loan bonds to the Second provisional regiment, composed of Minnesota men, were entertained at dinner at the Des Moines Chamber of Commerce. The men from Minnesota subscribed for an average of $57 each.

Destitute Belgians will be cared for on a large tract of land seventy-five or 100 miles from St. Paul, it was announced yesterday by James Slevin, delegated by the Societe to Colonization Americaine of Paris to make the arrangements in the United States. "On the tract of land which will be set aside in Minnesota for the establishment of the colony," Mr. Slevin said, "we will establish churches and schools, build stores, homes and business houses. I have plans laid for the colonization in Minnesota and will select the site soon.

The county commissioners at Fergus Falls have voted to accept the offer of the United States government aid to construct boundary near Ashby by way of Dalton to this city. The government offered $30,000 provided the commissioners would levy the same amount.

Western North Dakota is coming to the Red river valley for its potatoes this fall. J. H. McNary of Bismarck returned to the North Dakota capital after spending four days in Moorhead contracting for potatoes at $1.25. Mr. McNary contracted for 3,000 bushels at that price.

CARS SHORT, NOT COAL, SAYS M'GEE

URGES CONSERVATION IN USE OF FUEL UNTIL RELIEF FOR PRESENT CONDITIONS COMES.

RAILWAYS MAY ASK INCREASE

Expected to Request State Commission Permission to Raise the Rates for Freight.

St. Paul. J. F. McGee, fuel administrator for Minnesota, last night charged the present threatened coal shortage in this state more to a lack of railway cars than to lack of coal. He also urged that the greatest conservation be observed in use of coal until some means may have been found to rectify present conditions, adding that only such action can prevent a disastrous shortage later.

"Many appeals for coal, particularly hard coal," he said, "have come to me from all parts of the state and even some from North Dakota, in the past week.

"These conditions are not due particularly to a lack of coal but to a very great car shortage which exists at the present. The War Transportation board at Washington has announced that the utmost we can expect, for some time at least, is a 60 per cent car service—that is, we will have only six cars where in normal times we had 10.

"There must be a remedy for this condition and every possible means of increasing the car supply must be resorted to. All cars ought to be unloaded the earliest possible moment after they reach their destination and then be released for further service, instead of being used for warehouse or storage purposes. The Northern Pacific has lost 100 cars a day for the last 20 days. By this I mean a net loss, which means that road has 2,000 less available cars today than it had 20 days ago. Many of these cars were loaded with potatoes at Minnesota points and consigned to Chicago and other Eastern destinations and were not returned when unloaded. The Chicago & Northwestern road has suffered a net loss of 1,500 cars in the same period of time.

★ ★ ★

State Roads May Ask Increase.

Minnesota railroads probably will ask increases in freight rates on specific commodities when hearings before the State Railroad and Warehouse commission are resumed October 31 on the original petition for a horizontal advance of 15 per cent in rates on all classes, commission officials said late yesterday. The prediction followed an announcement in Washington that eastern railroads are preparing to place before the Interstate Commerce commission a program to provide general relief from their financial difficulties.

★ ★ ★

Draft Boards Sole Judges.

District draft boards are the sole judges of both law and fact in each particular case that comes before them, in the opinion of the Second district board for Minnesota, and are not amenable in their decisions to opinions on legal questions from governors, state attorneys general and adjutants general.

This position is affirmed by the district board here in its action reversing the discharge decision of the Thirteenth ward local board in the case of Clifford G. Schultz, secretary of the State Securities commission, and holding him for service.

In its action the district board overrides opinions by Governor Burnquist, Attorney General Smith and Adjutant General Rhinow. All held that Mr. Schultz was a proper subject for exemption under the provisions of the selective service act and the rules and regulations pertaining to it.

★ ★ ★

Capitol Postmaster Resigns.

C. E. Olmstead of Minneapolis has resigned as postmaster at the state capitol, a position he has filled for eight years. The resignation is effective November 1 and has yet to be accepted by Governor Burnquist, who will name a new postmaster at the building. Mr. Olmstead, who is a Civil war veteran and 70 years old, was obliged to resign because of his age and the condition of his health.

★ ★ ★

Receipts Exceed Expenses.

Carlos Avery, commissioner, has issued the annual report of the state game and fish department, showing that receipts exceeded expenses by more than $38,000. The revenue totaled $155,482, and the disbursements $116,871. The largest single items of revenue were $44,937 from small game licenses, and $43,777 from inland fishing permits for the taking of rough fish.

★ ★ ★

Bonds Will Pay Liquor Tax.

Liberty Loan bonds will be accepted in place of other bonds for the payment of the new floor tax on liquor by the internal revenue department, according to a message received by E. J. Lynch, collector of internal revenue, from headquarters in Washington. The floor tax of $2.10 a gallon on liquors originally was payable in thirty days, but on account of the difficulty of getting inventories, liquor dealers were allowed seven months to pay the tax, on condition they put up a sufficient bond.

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

CLOTHES PINS.

"We haven't had a frolic in ever so long," said Peter Gnome.

"Let's have one then," said Billie Brownie.

"Fine idea," said his brother, Bennie Brownie.

"When will we have it?" asked Witty Witch who was paying a call on the Brownies and Gnomes."

"Let's have it tomorrow," said Peter Gnome, for he had an idea of the sort of a party he wanted to make it.

"We'll all be there," said the Brownies and Witty Witch. "Only you must tell us a good place for the party."

"I'll give the party," said Peter Gnome, "and it will be down in the old cave to the right of the one where Mr. Giant makes his home.

"Be sure to tell the Goblins and Fairies and Elves and Bogeys about the party for we want them all to come too. And tell the Olaf family as well," Peter Gnome called after the Brownies, for they had commenced hurrying away in their excitement to tell every one else.

Now Peter Gnome was much excited. "We will give them a great surprise," he said.

"What are you planning to do?" the others asked.

"Listen, and I will tell you," said Peter Gnome. They all gathered around, each gnome taking hold of the back of his right ear and holding it forward a little.

"We are to look like clothespins," he said. The gnomes were a trifle disappointed but they tried not to show it.

"Maybe you don't think that clothespins are so very attractive," said Peter Gnome, "but we will get handsome suits.

"You see we will have to get great long trousers so we will look like clothespins in the first place—and we will have to fasten them almost around our necks—not quite, though. For we must have little red vests and blue buttons in the front. Our trousers are to be bright red and we shall wear flat caps of bright orange."

"How wonderful," shouted the gnomes, "but we won't look very much like clothespins."

"We will look like clothespins dressed up," said Peter Gnome, "for I have seen clothespins painted in just that way, and I am surprised more children who can paint don't ask their mothers for two or three clothespins and give them handsome suits.

"Of course when I saw them I thought at once that we could go to the next fancy dress party as clothespins. I'm sure no one else has thought of such costumes."

The Gnomes were delighted, and they hurried about making their costumes for of course when they were ready they had to think about getting supper.

Peter Gnome was through with his costume first and the others were soon ready. They prepared a fine supper and decorated little tables which were just outside the cave. Mr. Giant helped them and lent them many things such as his fine sandwich cutter, which was made out of a sharp stone and which cut the bread in no time at all!

Dressed Just Like Clothes Pins.

They decorated the cave with autumn leaves and branches of pine trees. Soon it was time for the guests to come.

They all appeared in fancy dress costumes. "We had no idea you would all dress up," said Peter Gnome, smiling as he embraced Billie Brownie first of all.

"Ah, Peter," said Billie Brownie, laughing, "we knew by your smile that you had something up your sleeve—that is we knew you had an idea! So we thought the least we could do was to dress in costumes."

And when all the guests saw every Gnome dressed just alike and looking like a great, enormous set of clothespins, how they did laugh!

Just as soon as every guest arrived, what did Peter Gnome do, helped by Mr. Giant who now appeared at the door of his cave, but get out a great stout rope. It was strong enough to make a swing, and in a few seconds Mr. Giant had fastened his end to an old pine tree and Peter Gnome had tied his to another pine tree.

"Ready, set, go!" said Peter, and all the Gnomes dressed as clothespins hopped on the long rope and said:

"We're all little clothespins out on the line!" And what a jolly party it was!

No Space Left.

Crowd your day so full of worthwhile things that there won't be any space left for the other kind of things.

Keep Yourself Fit

You can't afford to be laid up with sore, aching kidneys in these days of high prices. Some occupations bring kidney troubles; almost any work makes weak kidneys worse. If you feel tired all the time, and suffer with lame back, sharp pains, dizzy spells, headaches and disordered kidney action, use Doan's Kidney Pills. It may save an attack of rheumatism, dropsy, or Bright's disease. Doan's have helped thousands back to health.

A Minnesota Case

Anthony P. Kern, R. R. No. 7, Faribault, Minn., says: "I suffered from kidney trouble from infancy. My life was a burden. I had such dizzy spells that I hardly realized where I was. I was tired and worn out and my back got terribly lame after a day's work. I kept growing worse until I was a total wreck. After I used Doan's Kidney Pills the ailments gradually left me until I was well. Doan's gave me a new lease on life."

Fooling the Motorist.

The motorist had lost his way on a country road. Hailing the first pedestrian he overtook, he asked the way to Blankville.

"I don't know as I can explain it very clearly," replied the pedestrian, "but if you'll take me in your car I'll point it out to you as we go along."

"Good," said the motorist, "Jump in."

"First off," directed the pedestrian, as he took his seat in the car, "you drive straight ahead the way you were going for about two miles."

When the two miles had been traversed, he continued: "Now, if you'll let me out here I can show you the rest of the way without going along. Just turn around and go back three miles and there you are."

"Why didn't you tell me that in the first place instead of taking me two miles in the wrong direction?" demanded the motorist.

"I didn't want to hurt your feelings right away by telling you you were going in the wrong direction," replied the other, "and, besides, I live here."

Outfly the Birds.

Marvelous was the flight of an Italian aviator from Turin to London, 656 miles, without a stop. No bird known to the ornithologists could have made such a flight in seven hours and twelve minutes. Italy is in the van when it comes to airplanes.—Brooklyn Eagle.

Missionaries Slain.

Ten Malekula Christian teachers in the New Hebrides islands, who recently went into the bush to preach Christ to the wild tribes, were attacked by the bushmen and six of them were killed.

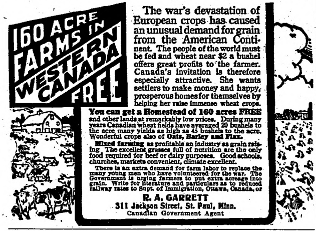
Latest in Torpedoes.

A torpedo with a corkscrew course has been observed. It it misses the port side it turns and strikes the starboard; sometimes on missing there it overturns again, striking the port side. The ship's officer unaccountably omitted to add that after the explosion the fragments reunite and return to the submarine as a complete missile ready to be fired anew.—New York Sun.

Husbands occasionally stay at home and earn money to pay bills of wives who go on vacations.



Canadian Farmers Profit From Wheat

160 ACRE FARMS IN WESTERN CANADA FREE

The war's devastation of European crops has caused an unusual demand for grain from the American Continent. The people of the world must be fed and wheat near $2 a bushel offers great profits to the farmer. Canada's invitation is therefore especially attractive. She wants settlers to make money and happy, prosperous homes for themselves by helping her raise immense wheat crops.

You can get a Homestead of 160 acres FREE and other lands at remarkably low prices. During many years Canadian wheat fields have averaged 20 bushels to the acre many yields as high as 45 bushels to the acre. Wonderful crops also of Oats, Barley and Flax.

Mixed farming as profitable an industry as grain raising. The excellent grasses full of nutrition are the only food required for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent.

There is an extra demand for farm labor to replace the many young men who have volunteered for the war. The Government is urging farmers to put extra acreage into grain. Write for literature and particulars as to reduced railway rates to Supt. of Immigration, Ottawa, Canada, or

JOFFRE'S VALET DID WELL

Amassed Fortune of 25,000 Francs While on American Tour With the Noted Marshal.

When Marshal Joffre went to the United States he took with him a body servant who was to act as his valet. The man formerly had served in the family and there was nothing said about what pay he was to receive until the journey was over, when the marshal asked him what he owed him.

"I couldn't ask for any pay in view of the petite fortune that I have brought back with me."

"What little fortune?" asked the marshal. "You haven't been speculating?"

"Mais non, monsieur de Marechal, but there were times when I could be of service. People who wanted autographs, and those who wanted to see the chambers occupied by monsieur le Marechal, and those who sent notes and messages—"

"I understand," said the marshal, "but, if I may ask, how much did you bring back?"

"Eh, h'en, Monsieur le Marechal, about 25,000 francs."

It is Mme. Joffre who has let the story out. She has told it to some of her acquaintances in the American colony in Paris, who repeat her assurances that it is perfectly true.—Brooklyn Eagle.

To Open Free Music School.

Any man or boy in Atlanta who desires a thorough training in the fundamentals of music will be given an opportunity to receive free training under teachers of recognized ability, says the Atlanta Constitution.

A new free music school will be inaugurated and maintained by St. Philip's cathedral, under the direction of M. Philip Schlich, organist and choir master. The school will be free to all boys more than nine years old and to men.

Japan's Financial Aid to Russia.

A domestic loan of $50,000,000 has been arranged by Japan for Russia, a large part of which will be used to pay for war supplies already ordered by Russia in Japan. At present, $35,000,000 Russian treasury bills held in Japan matured on September 25 and were renewed. The bankers of Japan have so many demands for money made upon them at present to finance new enterprises that they are not disposed to underwrite Russian loans; therefore the government will issue exchequer bonds which may be paid for with Russian treasury bills.—East and West News.

Get Dodd's Pills for Kidney Ills. See 3 D's in Name

No Substitute Assures the Relief You Get From DODD'S KIDNEY PILLS.

Wise persons accept no substitute for the old, genuine DODD'S KIDNEY PILLS; their remedial qualities are too well known to thousands of users who have saved themselves from the ravages of kidney troubles and Bright's disease by the timely use of this famous old remedy.

Upon the slightest backache, pain in loins, stiffness in stooping or lifting, you must take warning of the insidious approach of disease. Immediately, begin preventive measures by the use of DODD'S KIDNEY PILLS. They are recognized to be the most dependable and effective kidney regulators and reconstructors procurable. Thousands use them and praise them.

But you must take no risk of failure through the use of a substitute. You are protected by the name on the box—DODD'S KIDNEY PILLS. Look for Dodd's—the name with the three Ds—for diseased, disordered, deranged kidneys. No article of similar name will do.

Every druggist sells DODD'S under a rigid satisfaction-or-money-back guarantee. Get yours today and start on the road to health.

Church Pension Fund Success.

Final returns sent to J. P. Morgan, treasurer of the $5,000,000 pension fund for the support of retired Episcopal clergymen, show that the fund was oversubscribed nearly 75 per cent, total subscriptions amounting to $8,712,000. Of this $5,164,555 has already been paid.

The church pension fund is the largest of the kind ever raised, and, next to the Red Cross hundred million dollar fund, the largest charitable fund ever gathered in America for any one purpose. It took just a year to do it. While $5,000,000 was the goal originally set, it was announced from time to time that an oversubscription was desired in order to give the fund the soundest backing possible.

Safety First.

Let us not run out of the path of duty lest we run into the way of danger.

Some folks try to get up in the world by throwing stones at men who have reached the top.

It's one thing to wish a man good luck; it's another to do something to help him get it.

RED CROSS HEADS ON WESTERN TOUR

Plan to Visit Cities in Which Division Headquarters Are Located.

RENDER ACCOUNT TO PEOPLE

War Council Proposes to Let Public Know How $100,000,000 Fund for Relief Work Is Being Utilized.

Washington.—At the request of the Red Cross war council, Henry P. Davison, chairman of the council, and Harry D. Gibson, general manager of the American Red Cross, have undertaken a tour through the West, in the course of which they will visit points at which division managers of the Red Cross have been stationed. The purpose of the trip is to meet with representatives of Red Cross chapters, also with those who have contributed to Red Cross funds and with the public generally. It is also the purpose of the war council to render an account of its stewardship, to interest the people in the work of the Red Cross and to let the public know just how the $100,000,000 war fund is being utilized.

Beginning at St. Louis October 22, the schedule for the trip called for large meetings to be held successively at Denver, San Francisco, Seattle, Minneapolis, Chicago and Cleveland.

Purpose of the Trip.

In announcing the purpose of the trip, Mr. Davison authorized the following statement:

"With the division of the United States into thirteen districts, each headed by a successful business man serving this country through the Red Cross during the war, the Red Cross organization in this country is now complete. Also special Red Cross missions, made up of competent and sympathetic American citizens have now arrived and are at work on behalf of the American Red Cross in France, Great Britain, Russia, Italy, Roumania and Serbia.

"Collections to the war fund of the Red Cross up to October 1 amounted to $64,424,232.90, of which $6,269,566.57 has been refunded to chapters to provide for their own Red Cross activities. Up to that time the war council had appropriated from the war fund $25,090,870.41. The Red Cross membership has just become more than four million. Included in that membership are hundreds of thousands of American women who are knitting, making surgical dressings and comfort kits. The Red Cross war council is seeking to render an account of its stewardship to the American people in the most effective manner possible. It is giving frequent announcements of its activities and every fact concerning the work of the Red Cross is available to everybody. We now wish to go a step farther and give a detailed account of our stewardship, as well as to advise with Red Cross workers and supporters throughout the country as to Red Cross policy and methods. We have felt that this could best be done by appearing face to face before audiences of representative citizens, telling the Red Cross story, answering questions, and ourselves gaining a more complete knowledge of public sentiment.

Would Inform Public.

"We are extremely anxious that the people at large should be fully informed as to the methods and policies adopted in handling the great fund with which the Red Cross war council has been intrusted and also that all policies and activities of the Red Cross should be in accord with a fully informed public sentiment. The purpose of this trip is not to solicit subscriptions or to take collections, although we expect to give to the American people the latest advice we have received as to conditions in France, Russia, Roumania, Italy and Serbia.

"Our reports indicate that the American Red Cross has an opportunity to lend a helping hand and to carry a practical message of cheer to suffering humanity such as no philanthropic undertaking in the history of the world has ever had before."

Accompanying Mr. Davison and Mr. Gibson on this trip is Rev. Robert Davis of Englewood, N. J., who has just returned from France, having gone to Paris with the American Red Cross commission in May.

Women Rule Hospitals Now.

In the days before 1914 women were rare in military hospitals. Today, except for the doctors and the patients, the military hospital is almost a nunnery.

This is one of the chief revolutions wrought by modern warfare. The men who used to act as orderlies are required for the fighting line. But something more than this. The women who took their places do the work infinitely better.

In the Third London General hospital at Wandsworth you find something like 500 women attending to the needs of 2,000 wounded men. This number includes 150 trained nurses, 187 probationers, 123 scrubbers, 50 orderlies, 33 clerks, 10 waitresses, 6 messengers and 5 cooks.

The presence of women in a military hospital has a psychological value. Not only does the wounded man react to the tenderness of a woman, but his better nature responds to her finer sensibilities.—London Chronicle.

The United States Government Food Administrator Says:

"Baking Powder Breads of corn and other coarse flours are recommended"

ROYAL BAKING POWDER

ABSOLUTELY PURE

Makes delicious muffins, cakes and coarse flour breads

CORN MEAL MUFFINS

¾ cup corn meal
1¼ cups flour
½ teaspoon salt
4 level teaspoons Royal Baking Powder
2 tablespoons sugar
1 cup milk
2 tablespoons shortening

Mix thoroughly dry ingredients; add milk and melted shortening and beat well. Bake in greased muffin tins in hot oven about 20 minutes.

NUT BREAD

2 cups graham flour
5 level teaspoons Royal Baking Powder
1½ teaspoons salt
1½ cups milk and water
¼ cup sugar or corn syrup
1 cup chopped nuts (not too fine) or 1 cup raisins, washed and floured

Mix together flour, baking powder and salt; add milk and water, sugar or corn syrup and nutmeats or raisins. Put into greased loaf pan, allow to stand 30 minutes in warm place. Bake in moderate oven 40 to 45 minutes.

Our red, white and blue booklet, "Best War Time Recipes" containing additional similar recipes, sent free on request. Address Royal Baking Powder Company, Dept. W, 135 William Street, New York

The Dry Voter.

"The modern babies were sitting around the nursery in attitudes that suggested a clubroom rather than a nursery. They were very modern babies. One of them dragged himself up to the window and looked out.

"There goes Dolly Dimple in her Pierce-Marrow peramubulator," he observed, with a show of interest.

"That's not a Pierce-Marrow," contradicted another, languidly. "It's a Mudson Super Slick."

"I'll bet you the paregoric for the crowd you're wrong!"

"I don't drink hard stuff, and you know it," said the first, for he was ultra-modern. "Make it castoria and you're on."

GREAT FOR ECZEMA AND OLD SORES

I Guarantee My Ointment, Says Peterson.

"If you are responsible for the health of your family," says Peterson. "I want you to get a large 25c box of Peterson's Ointment today.

"Remember, I stand back of every box. Every druggist guarantees to refund the purchase price if Peterson's Ointment doesn't do all I claim.

"I guarantee it for eczema, old sores, running sores, salt rheum, ulcers, sore nipples, broken breasts, itching skin, skin diseases, blind, bleeding and itching piles as well as for burns, scalds, cuts, bruises and sunburn.

"I had 30 running sores on my leg for 11 years, was in three different hospitals. Amputation was advised. Skin grafting was tried. I was cured by using Peterson's Ointment."—Mrs. F. E. Root, 287 Michigan St., Buffalo, N. Y. Adv.

A Question.

"My cousin who lives in Kansas City never drinks, smokes or wildcats around at night," boasted old Riley Rezzidew, who was just back from a visit to the Big Burg. "He never plays a game of chance, never goes to a burlesque show, and—"

"He don't hey?" interrupted Burt Blurt. "Then what difference does it make to him where he lives?"—Kansas City Star.

The Doctor's Call.

Cop—Is there a doctor in the crowd?

Voice—What's der matter? Ain't de guy dead yet?—Life.

Even an old hen may appreciate a toothsome dainty.

You can save yourself lots of trouble by not borrowing it.

An Aztec Grain.

At the time of the Spanish conquest, an ivory grain, finer than mustard seed, was made into paste for molding into religious idols and was an important food in these times of scarcity of maize. This grain, known to the Aztecs as "huauhtli," was among the tributes paid by the pueblos to Montezuma. The botanical identity of the seed was long unknown, but the collection of Dr. Edward Palmer in the states of Sincola and Palisco included fish-egglike seeds of an amaranthus. The plant was found both wild and under cultivation, a paste of the seed and sugar being sold under the name of "suale." Dr. W. E. Safford of the department of agriculture has recognized in these specimens the sacred "huauhtli" of Montezuma's time, and suggests that this amaranthus might be cultivated in favorable situations. Closely allied plants are cultivated in India, Tibet, South America and Africa as grain crops.

And when a man does meet a woman with genuine blond hair he always wonders whether it is genuine.

St. Paul in 11 years has had 49,878 births and 26,219 deaths.

Inconsistent Teachers.

"And how do you find school, Howard?"

"Rather difficult, sir. The teacher's inconsistent. In English composition we are told to be original. In arithmetic we are all expected to get the same answer."

War Declared on Rats by U. S. Gov't.

The government at Washington is preparing a campaign that should be effective in killing the rats that are so destructive both to lives and property. A conservative estimate places the loss of foodstuffs from rats at over two hundred million dollars annually, and in the present scarcity of food, this loss must be prevented. The most efficient way to "Kill the Rat" is by the use of Stearns' Paste, and thousands of dollars worth have been bought by the government. Every housekeeper troubled with rats, mice, roaches or waterbugs should buy a small box of this reliable exterminator for thirty-five cents, and stop further loss of food in her home. Adv.

Removable Rubber Heel.

A rubber heel has been invented that can be slipped over the high heel of a woman's shoe.

If a man is devoted to his wife the neighbors say he is soft; and if he isn't they say he is a brute.

Goodridge, - - - Minnesota

[illegible]

H. W. Smith, Editor & Publisher

Entered at the Postoffice at Goodridge, Minn. as second class mail matter.

Do not forget the editor at this season of the year. Now in a good time to hand him a dollar for sending you the paper the whole year. He has to pay his board bill the same as other people. Paper is going up in price and credit cannot be stretched more than just so far. The devil have his dues,—his pay every Saturday night and still he jumps his job. So remember the editor before he starves to death. Sit down and mail him a check now. Postage is going up. Better do it now before the raise comes November 2nd.

The heavy snow fall has done much to insure a crop of rye next year. A good deal of the late seeded rye was unable to make any headway for lack of moisture, but the snow supplied all that was needed. We did not like to see it come, but after all it may have been a blessing in disguise. Water was badly needed in many localities, and with a few weeks of warm weather the snow will go and fill up the low places for a good supply. Forest and peat fires were also killed and we believe it was for the best.

Of all the disreputable sheets, the one sent out by the fake Non-Partisan League easily caps the climax. It is high time that the farmers and voters wake up and kick the politicians out of the marble palace in St. Paul. One need not be overly keen to see that this rag sheet is backed by emnates right from our state Capitol. A few editors copy this rot in order to get a stand in with the grafters, but the majority have sense enough to keep the polution out of their popers.

The old time politicians are getting desperate. The growth of the Non-Partisan League has simply got their goat. They are tearing their hair in frenzy. Fat jobs are hanging in the balance. Laws and constitutional rights are trampled under foot, Patriotism is the mantel under which they hide their cowardly attacks. Anything to stiffle the growth of this movement that threatens to end their long time graft. Welll may they tremble. Recently an organizer showed us a map of Minnesota with a mark where each member was located. It was an eye-opener. The entire state is dotted ano in some localities there was no more room for dots. Onr own county is fairly well represented, but not nearly as well as in other sections of the state. The election of 1918 will show a strength of more than 100,000 members' each one a campaigner for the cause. No wonder there is consternation at the capitol.

Notary Public, Pennington County, Minnesota

My commission expires Dec. 7, 1917.

Chemists are experimenting with a scheme to make paper out of spinach. There was enough sand in the last dish we had to have made concrete out of it.

An efficiency expert is one who is able to make a dollar buy as much as fifty cents worth.

[illegible] tourist bureau is devoting a 50-foot window in the city of Sydney to an exhibition of native products. First building stone, marble and granite were shown; then grain and farm products; then flour and meal and bread from state bakeries; then wool and cloths made from Australian wools; and then leathers and articles made from them. With frequent changes such a display is of the utmost value and every city in America would find something of the kind profitable.

Eighty or more Dutch ships are to carry grain from New York to the Belgians, and in payment for their services the Dutch will be allowed to receive shipments of food from the United States guaranteed to be for their own use and not to be permitted to go to Germany. The negotiations on the American side have been conducted by Food Administrator Hoover, whose judgment in the matter will be relied on by his countrymen.

A small feature of life as she is lived, noted by household marketers, is that the size of a five-cent market basket has apparently diminished. Pure accommodation, of course, on the part of the manufacturers, who know that people are not carrying home as much in their baskets as they used to.

General Pershing wants the American soldiers to look especially "spruce." They have received explicit instructions on the subject of dress. "Th' apparel oft proclaims the man, and they in France of the best rank and station are most select and generous chief in that."

Putting the hay-fever patient in the icebox, as advocated, won't hurt the icebox, anyway.

Dahomey in Africa has a wonderful little red fruit, shaped like an olive, chewing which for a few moments makes sour things drunk or eaten afterward taste sweet. It might be well for fruit dealers to get some to serve in the spring with each box of early strawberries.

What is said to be the first verdict ever recorded by a jury in England based on the American idea of "the unwritten law" is reported from London. It was only a short time ago that we gave to England our slang and our chewing-gum habit. And now we have bestowed upon her "the unwritten law." Are we not a generous people when it comes to spreading civilization?

Oscar Thoreson was a Goodridge caller Monday.

Ladies Aid Auction Big Success.

The ladies aid of the Norwegian Lutheran church of Goodridge held its annual sale in the church Wednesday afternoon Oct. 31st. C. H. Rossmon acted as auctioneer and managed to obtain a good price for every article. The ladies had been very busy during the year making a large number of of useful articles and can congratulate themselves upon the splendid result of their work as it netted them the neat sum of $80.55. A large crowd attended the auction and kept up spirited bidding until all the articles had been sold. All the members of the aid and of the congregation as well as the large number who are not members, but who attended the sale, deserve great credit for their efforts and their willingness to help a good cause along.

Increased Pensions for Widows.

Congressman Steenerson informs us that Congress on Oct. 6th, 1917 adopted an amendment to the pension law increasing the rate of pension for a widow of an officer or an enlisted man of the army, navy, or the marine corps of the United States who served in the Civil war, the war witn Spain, or the Phillipine insurrection, to $25 per month. Applications are not required from those entitled, and the Commissioner of Pensions has announced that prompt action will be taken in the pension office to make payment of the inreased amount.

Red Cross Seal Campaign.

The date for beginnig the Red Cross Seal Campaign has been advanced from November 15th to November 5th.

Dr. I, J. Murphy of the Minnesota Public Health Association State Manager, announces the following message just received.

"The American Red Cross waives the restriction in the contract that no agent put seals on sale before Nov. 5th We understand that mail to reach the soldiers in France before Christmas must be mailed not later than November 15th and preferably at an earlier date. The advantage of allowing an early sale of Red Cross Seals by local campaign managers for packages going to our soldiers is obvious. Accordingly the American Red Cross waives the restriction in the contract which made November 15th the opening day, providing Red Cross Seals be not placed on sale before November 5th.

Beieg a little rushed with our work this week, we sent some of our news matter to Thief River Falls to have it set by the line type machine. At the eleventh hour we received a phone message saying that the machine had broken dowd and that it would be impossible to get the type to us in time for this weeks paper, so we will have give our readers what little news we have set by hand and publish the other news next week.

WAR TALKS

By UNCLE DAN

Number One

America Must Fight Hard or Germany May Win—Necessity for Military Training.

"Now, Billie," said his mother, "your Uncle Dan is coming tomorrow to spend a week with us on the farm, and if you want to know about the war, here's your opportunity. Uncle Dan is probably one of the best-informed men in the country." Billie clapped his hands and gave such a whoop that he wakened the baby, but what could you expect of a fifteen-year-old boy who is a living interrogation point and wants to know about war?

Uncle Dan arrived in due time and Billie watched for an opportunity. It came that evening after dinner when Uncle Dan had lighted a cigar and taken a seat on the porch.

"I'm mighty glad you came, Uncle Dan. I want to talk to you about the war. We have just put military training in our township high school, but we had a hard time to do it. The Joneses and the Greggs objected. They said the war wouldn't come over here. Grandma Jones said: 'They ain't no use to worrit, it will soon blow over.' Well, we put the training in just the same. You orter heard Judge Brownell, the president of the school board, do the slackers up. He said unless we take off our coats and go to it, Germany may yet win, and if she does, she will take over the great British fleet as a war trophy and compel us to do what ever she wants to; that she could make us pay all the cost of the war; the kaiser could tax us as he pleased and that we couldn't help ourselves. He could make every one pay over a part of what he earns; that he could make the farmers pay rent for their own farms, etc. Now, Uncle, what do you think of that?"

"Well, my boy," said Uncle Dan, "all that Judge Brownell says might easily come true and may unless we go quickly to the aid of the allies with large numbers of men and help them break the German line. Unless we can beat the submarines, they may prevent us from getting enough food to the allies to keep them going. In that case Germany would win. As matters stand today, our greatest need is trained men. If we had had several millions of men with military training in our industries and on our farms when the war came, who could have been called at once for service, I do not believe the kaiser would have forced the war upon us. As it was, he had no respect for us, and now we are in it and must go through with it. But never again must we be caught so wholly unprepared.

"There is only one safe way," said Uncle Dan, "and that is to adopt permanently universal military training, apply it to every young man who is physically fit, say in his nineteenth or twentieth year. The training can be carried forward in the United States training camps that are now being established for training men called by the selective draft. As soon as these men vacate these stations, they should be filled by younger men, and this should be made the permanent policy of the country."

Billie's mother, Mrs. Graham, had overheard the conversation. She came out and said: "Really, Brother Dan, are you serious as to the dangers of our country? If it is as bad as that, it is high time for us to wake up and do something about it."

"Exactly," replied Uncle Dan. "It is better to wake up now than to be rudely awakened later. We may as well understand, sister, that this is our war and we must win it or God help America. Everything that we have or hope to have—our liberties, our blessings, our opportunities are all involved in the great issue before us. Nothing must stand between us and winning this war. It is a question whether the peoples' right or the kaiser's might shall dominate the world. If there ever was a holy war, this is it. We are fighting for world liberty. We are fighting for the freedom of humanity. We are fighting for the right of men to govern themselves instead of being governed against their will by a war-mad overlord. Perilous times are ahead of us. We must be prepared to make any sacrifice, to perform any service that may be required of us."

"Oh, Uncle Dan," exclaimed Billie, "may I bring my chum, Jimmie Collins, when we have our next talk? He is a bug on this war business and just crazy to see you."

"Certainly," said Uncle Dan, with a hearty laugh. "If we are to have more talks, I shall be glad to have Jimmie join us."

Billie clapped his hands and ran to the 'phone and told Jimmie to be over at seven o'clock the next evening.

Attention Farmers

There never was a time when it paid the farmer to do good plowing more than today but good plowing cannot be done with apoor plow. POOR PLOWING invariably means POOR CROPS. Considering the fact that prices for all kinds of farm produce are bound to be high for a long time to come you cannot afford to use anything 2hort of the best plow to be had. In the Emerson Line, whether Walking Plows, Sulkies, or Gangs, we maintain we have the lightest draft, the easiest to handle and most durable plow line on the marmarket. Come in and let us tell you why.

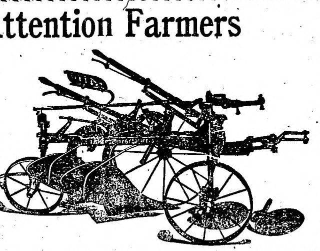
Watchmaker & Jeweler

I am now in shape to give you the best of watch and jewelry repaing at the most reasonable prices consistent, wlth first class work. All I ask is a trial and am willing to let the work speak for itself.

Located in the M. J. Stephenson Building

Goodridge, Minnesota

Attention Farmers



There never was a time when it paid the farmer to do good plowing more than today but good plowing cannot be done with apoor plow. POOR PLOWING invariably means POOR CROPS. Considering the fact that prices for all kinds of farm produce are bound to be high for a long time to come you cannot afford to use anything 2hort of the best plow to be had. In the Emerson Line, whether Walking Plows, Sulkies, or Gangs, we maintain we have the lightest draft, the easiest to handle and most durable plow line on the market. Come in and let us tell you why.

A. C. TVEDT & SON,

Goodridge, Minn.

INTENTIONAL DUPLICATE EXPOSURE

FINDS REMEDY FOR HIGH PRICES

Hoover Says Supplies To Be Cut Off From Retailers Who Insist On Undue Margins.

PROFITEERING TO STOP

Manufacturers And Wholesalers Will Not Be Permitted To Sell To Retailers Who Insist On Excessive Profits

Washington, Oct. 31.—The remedy for high food prices has been found, according to Herbert C. Hoover, food administrator. All dealers who charge excessive prices will find their supplies cut off until the end of the war.

Profiteering by retail dealers in foodstuffs will be made impossible after November 1, the food administration announces. Manufacturers, wholesalers and other handlers of foods, whose business will go under license, will not be permitted to sell to distributors who seek undue profits.

"This is one of the most sweeping safeguards," the announcement said, "against high prices, which will be incorporated in the licensing system, for which complete rules and regulations will be made known within a few days."

This plan, food administration officials believe, will give the administration control of retail prices. Wholesalers and others who continue to sell retailers after they are forbidden to do so by the food administration will be denied the right to sell goods under license.

Excess Profits Forbidden.

Authority for extending control to the retailer is cited in the announcement as follows:

"The small retailers of food of whom there are several hundred thousand in the country, while exempt from the licensing provision, are nevertheless subject to other provisions of the food control act. Every retailer as well as every other handler of food, is forbidden under the law to make any unreasonable charge, to hoard, to monopolize, waste or destroy food or to conspire with any one to restrict the production, distribution or supply or exact excessive prices on any necessities. There are no penalties provided, but the food administration hopes that the arrangement of restricting supplies to violators of the law will be of some effect for the retailer will find himself unable to buy goods from any wholesaler or manufacturer.

Federal food administrators in all the states will be directed to keep watch for violators and send to the food administration the names of retailers asking excessive prices.

GREATEST BATTLE OF WAR

Teuton Attack on Italians Is Tremendous Effort.

Washington, Oct. 31.—The Austro-German blow against Italy is autocracy's most tremendous and most crushing effort to win the war in one colossal stroke. This was the assertion of official cables from Rome. The battle is the greatest of the world's war. In concentrated fury of attack it outrivals Dunajec, Verdun and the Somme, they declare.

The two central powers of the Central Alliance have been preparing for months for this stroke. Thousands of Italian soldiers are accepting certain death to stem the Austro-German rush long enough for Italy's reserve armies to come up and take over the Tagliamento line.

The frank admission is made here that there will be no effort made to establish a line above the Tagliamento. This will mean the abandonment of Udine and a retreat of approximately 20 more miles before the Italian army undertakes to hold a defined line.

In order to hold this front Italy is massing all the soldiers she can mobilize. The Adriatic littoral is being stripped of men. The coast has been left to the navy. The Italian and Austrian navies are about equal in strength, but in this crisis English, French and Japanese warships are co-operating with the Italians.

AUSTRIA HOPES FOR PEACE

Considers Prospects Brightened By Italian Loses.

Zurich, Oct. 30.—Austrian hopes of a "speedy and honorable peace" have been raised by the Austro-German successes on the Italian front, the president of the reichsrat said in an address to the deputies as quoted in Vienna dispatches. He admitted there had been great anxiety in regard to Trieste, which had now been removed.

False War Stories Mean Prison.

New York, Oct. 30.—Government agents are bringing to account enemy aliens who circulate false stories concerning subjects connected with the country's prosecution of the war. It became known that among the Germans recently interned at Ellis Island were several who were charged with giving circulation to such tales. That soldiers at nearby camps are committing suicide almost daily, and that men in the national army cantonments are underfed, were among the falsehoods these persons have told.

AMERICAN AND CANADIAN SOLDIERS HAVE GOOD TIMES TOGETHER WHEN THEY GET INTO PARIS

American and Canadian soldiers fraternizing in one of the boulevard cafes of Paris. They always enjoy themselves in the French capital when on leave.

SHOOT TRUE TO MARK

First American Shell Wipes Out Group of Boches.

Makes Exact Bull's Eye When Aimed By College Boy and Fired By Irish Lad.

Paris, Oct. 30.—With a vigor and purpose that bodes ill for the Hun and his kind, the Americans have entered in actual warfare with the Boches.

The first shell fired by the Americans made an exact bull's eye. It was aimed at a group of twelve or fifteen Boches, landed in the middle and when the smoke cleared and the dust settled there were no Boches.

The gun was aimed by college boys, cool and collected.

A lithe, undersized, but tremendously enthusiastic Irish lad did the firing.

The first man over the top was a young lieutenant, just a fine type of the cool, nervy American who can look death in the face and smile.

The Germans, forty yards away, uncourteously fired upon him, whereupon he whisked out an automotic pistol, killed one, wounded two and then bethought himself to slip back into the trenches.

A moment later he went back over the top and collected the three empty shells from his automatic. One he will keep, one goes to his parents and the other to a certain fair young person whom he left back in the states.

FIRST PRISONERS ARE TAKEN

Pershing's Men Shoot At Fleeing Germans.

With the American Army in France, Oct. 30.—The first German prisoner of war taken by the American expeditionary forces died in an American field hospital, having been shot when he encountered an American patrol in No Man's Land in front of the American trenches. He, with another German, was discovered by the patrol and was called upon to halt. The German ran; the patrol fired and one of the enemy was hit. The prisoner was treated at a dressing station and removed to a field hospital, where the combined efforts of several surgeons failed to save his life.

The prisoner was a mail carrier and letters of some value were found on him. He explained his presence near the American trenches, saying he had lost his way in the dark. He declared that the Grman soldiers did not know that Americans were on the front or in France, the officers telling them nothing.

PLOT TO DESTROY CATTLE

Illinois Yards To Be Guarded By Soldiers.

Chicago, Oct. 30.—A nation-wide German plot to destroy thousands of cattle in stockyards has been received from Food Administrator Hoover in a telegram to Harry A. Wheeler, state food administrator.

The telegram urged the vital importance of guarding all stock yards in the state.

Plans were immediately made to rush the newly formed Eleventh Illinois Infantry to Chicago. Mr. Wheeler announced that he would inform Governor Lowden of the plot and urge that the guard be called. Warnings were sent to all parts of the state. It is believed some of the guard will be sent to yards elsewhere in Illinois.

Germans Sink Boat to Avoid Seizure.

Rio Janeiro, Oct. 30.—The Germans set on fire and sank the German gunboat Eber. 984 tons, which has been lying at the port of Bahia, fearing seizure of the gunboat by the Brazilian authorities. Brazilian torpedo boat destroyers had been ordered to take possession of the Eber.

Slav Railway Demoralization Increases

Petrograd, Oct. 30.—M. Andsberg, manager of the exploitation department of the ministry of ways and communications, in an interview regarding the critical state of the Russian railroads, declared total shipments during July, August and September were less than during last January and February. "Many trains are idle for lack of locomotives, while anarchic conditions on the railroads had reached such a state that the executive heads were resigning and on some of the roads virtually the entire staffs had drawn out.

ITALIAN FRONT IN COLLAPSE

Cadorna's Columns Are In Disorderly Retreat, According To German Claims.

WAR'S BIGGEST BATTLE

Austro-German Troops Standing Before Udine Where Italian Headquarters Have Been Located.

Berlin, Oct. 31.—The war office announces that the entire Italian front is in collapse.

The second Italian army is retreating towards the Tagliamenta. All the roads are covered with columns in disorderly retreat, the crowds comprising both soldiers and civil population.

The Austro-German troops invading northern Italy are standing before Udine, where the Italian headquarters have been located, according to yesterday's army headquarters announcement. Cormons has been captured and the Austro-German troops are approaching the frontier of the Italian coast region.

Great Camouflage.

Zurich, Oct. 30.—The military critic of the Vienna Reichspost says thousands of tons of munitions and equipment for the offensive against Italy were brought to the front over concealed roads, and that guns were placed in position at night time. This is declared to be the greatest piece of camouflage of the war.

Allies To Rescue.

Meanwhile, to aid the Italians, Great Britain and France are preparing to lend immediate aid, and there is a possibility that already troops are being hastened across the western Italian frontier and by way of Turin and Milan to the battle front in the east.

OHIO PACIFIST IS THRASHED

Head of People's Council Horsewhipped in Woods.

Cincinnati, Oct. 30.—Herbert Bigelow, head of People's church of Ohio and leader of the people's council, has been found near Florence, Ky. He had been taken into a woods near there, his clothes had been removed and he had been thrashed with a blacksnake whip by a party of men, dressed in "long white robes resembling those described as having been worn by the Ku Klux Klan," according to a telephone message from a newspaperman at Florence.

Prior to "twelve lashes being applied to his back," one of the party read from a paper he held as follows: "In the name of the poor women and children of Belgium this man should be whipped," according to the report.

Means Cases To Grand Jury.

Concord, N. C., Oct. 30.—The case of Gaston B. Means, charged with the murder of Mrs. Maude A. King of Chicago, will be submitted at once to the grand jury of the Cabarrus county superior court.

U-BOAT TOWS U. S. SHIP ABANDONED BY CREW

London, Oct. 30.—The American sailing ship Fanie Prescott, 404 tons gross, has been attacked by a submarine. She was taken in tow by the submarine after being abandoned by the crew.

Volunteers For France Still Wanted.

Chicago, Oct. 27.—Recruiting of volunteers was by no means concluded with the passage of the draft law and the movement of the men to cantonments, it was pointed out here by recruiting officers of the regular army. A variety of volunteers is still wanted. The Thirtieth engineers, gas and flame fighters, are promised transportation to France within a month. The government wants for this service chemists, steamfitters, gas engineers, mechanics, blacksmiths, plumbers, fire fighters and acid workers.

PLAN TO OUST KAISER

Germans Would Overthrow Emperor for Republic.

Republicans Say Peace Talk Is Farce —Junkers and Pan-Germans Scored By Writer.

Washington, Oct. 30.—The committee on Public Information has made public, with an English translation, an article entitled "Peace, a New Humbug," written by a German and circulated in Germany by German republicans working from Switzerland for the overthrow of the Hohenzollerns and the establishment of a republic.

The writer attacks the Junkers and pan-Germanists for instigating the war and declares that the war lords, having worn out their tales of victories won, now have turned to the farce of peace to instill patience into a starving and war-weary people.

He concludes with a warning of what will happen when the German people see through those who have tricked them and exploited their longing for peace.

ASKS FOOD CONSERVATION

President Makes Appeal To Every Home In Country.

Washington, Oct. 30.—President Wilson wants the families of the land to enroll themselves in the great army of food conservation interests. A statement issued by him asks every one in the country to do their bit towards saving the nation's food supply.

The chief executive's message says:

"The chief part of the burden of finding food supplies for the people associated with us in war falls for the present upon the American people and the drain on supplies on such a scale necessarily affects the prices of our necessaries of life.

"Our country, however, is blessed with an abundance of food stuffs and if our people will economize their use of food, providently confining themselves to the qualities required for the maintenance of health and strength; if they will eliminate waste; and if they will make use of those commodities of which we have a surplus and thus free for export a larger proportion of those required by the world now dependent upon us, we shall not only be able to accomplish our obligations to them, but we shall obtain and establish reasonable prices at home.

"We cannot accomplish our objects in this great war without sacrifice and devotion, and in no direction can that sacrifice and devotion be shown more than by each home and public eating place in the country pledging its support to the food administration and complying with its requests."

WOULD STRIKE ALLIES IN BACK

Constantine's Proposal To Kaiser Obtained By Allies.

Athens, Oct. 30.—Among the messages exchanged between the royal palaces at Athens and Berlin and which have fallen into the hands of the Greek government was one in which King Constantine urged Emperor William to attack the Allies on the Balkan, promising that Greek forces would attack General Sarrail's army in the rear.

In another message Queen Sophie alluded to the Allies as "infamous pigs."

California Seeds For Allies.

Los Angeles, Oct. 30.—For the first time in history, the United States is sending vegetable seeds abroad. Speeding across the continent—bound for "somewhere in France"—is a carload of embryonic Southern California products, the first instalment of 500 tons that will be sent to the Allies.

"Liberty Bonds Educate People."

El Paso, Tex., Oct. 30.—Brig. Gen. George H. Harris, commanding the depot brigade, composed of men from Minnesota, Nebraska, Iowa, and the Dakotas, at Camp Cody, speaking at the Liberty Loan luncheon of the El Paso committee, said: "These bonds issues are educating the American people. We as a nation substitute speculation for thrift, and are a nation of gamblers. We are careless of capital, but deeply concerned as to interest. We are not bond buyers but we are being educated."

LIBERTY LOAN PASSES MARK

Without Exact Figures Treasury Department Confident Maximum Is Reached.

RESPONSE WAS UNITED

Riches of Her Sons and Daughters Poured Into Columbia's Lap To Meet Demands of War.

Washington, Oct. 30.—Several days will probably elapse before the full extent of the nation's subscriptions to the second Liberty Loan is ascertained. The Treasury Department announces that the total amount is still "a matter of speculation."

Several days probably will elapse before the full extent of the nation's subscriptions is ascertained.

The department is without figures showing any change in the estimated totals, other than in the New York district. New York's maximum of $1,500,000,000, reported to have been exceed, it was said might be increased by late returns to as much as $1,750,000,000. Previous estimates had placed the total at approximately $1,650,000,000, or $100,000,000 less than last night's estimate.

Campaign A Success.

The success of the campaign now ended has proved conclusively that it needs only the telling of the wants of the United States to bring pouring into Columbia's lap all the riches of her sons and of her daughters. The manner in which the story of Columbia's need has been brought to every man, woman and child within her domains is perhaps the most astounding thing in the country's history.

Ninth District Shows Loyalty.

"'Every state in our district has exceeded its minimum allotment,' the Minneapolis district reported. 'Many townships have sold bonds to every family. Large manufacturing establishments have sold bonds to every employe. Some of the former rabid German sympathizers, including ministers, are now staunch supporters of the government and for the last week have been soliciting sales. Many communities which first refused to organize now are working of their own accord.'

Soldiers Are Subscribers.

"Indians have subscribed $3,866,780, according to latest reports by Cato Sells, commissioner of Indian affairs."

Figures now in show that the army has subscribed something over $82,000,000. About $50,000,000 has been alloted by soldiers to the Federal Reserve bank at New York. General Pershing cables that $5,784,600 has been subscribed by the American expeditionary forces in France.

ASKS RELIEF FOR ARMENIA

President Appeals For Funds To Go Through Red Cross.

Washington, Oct. 30.—President Wilson has appealed to the American people again to contribute to the relief of the stricken Armenian and Syrian peoples. The situation, among more than 2,000,000 destitute survivors of Turkish atrocities, he said, is "so distressing as to make a special appeal to the sympathies of all."

The president says:

"In view of the urgent need, I call again upon the people of the United States to make such further contributions as they feel disposed, in their sympathy and generosity for the aid of these suffering peoples. Contributions may be made through the American Red Cross, Washington, D. C., or direct to the American Committee for Armenian and Syrian Relief. Cleveland H. Dodge, treasurer, No. 1, Madison avenue, New York city."

SLAVS EXPECT HUN ATTACK

Look For Greatest Blow of Year From Enemy.

Petrograd, Oct. 30.—The year's greatest German blow against Russia is still looked for. Leading Russian military critics are now interested in taking the view repeatedly advanced in these dispatches since the German naval drive in the Baltic, namely, that the recent Teuton retirement on a wide front north of the Dwina had two purposes.

Freezes To Death In Blizzard.

Potomac, Mont., Oct. 30.—Adelora Lefrinire, 15, was frozen to death while hunting near here. When the storm struck the party of which Lefrinire was a member, he was the first to fall. Others in the party carried him until they saw they must abandon Lefrinire to save their own lives. They decided to leave him and push on for help. When they returned with help, the body was dead.

Officer Not Guilty of Arson.

Fargo, Oct. 30.—The case of W. E. Alden of Minneapolis, a naval recruiting officer of the Fargo district, charged with setting fire to the Federal building here recently, was dismissed by United States Commissioner Cupler. Alden, whose recruiting office is next door to where the fire originated, was arrested on a warrant sworn out by the U. S. district attorney. Commissioner Cupler in dismissing the case said that the government failed to show that the fire was set maliciously and was of incendiary origin.

Suffered For Years

Back and Kidneys Were in Bad Shape, But Doan's Removed all the Trouble.

"My kidneys were so weak that the least cold I caught would affect them and start my back aching until I could hardly endure the misery," says Mrs. D. O. Ross, 973 Fulton St., Brooklyn, N. Y. "In the morning when I first got up, my back was so lame, I could hardly bend over and any move sent darts of pain through my kidneys. It was hard for me to walk up stairs or stoop, and to move while lying down sent darts of pain through me.

MRS. ROSS

"The kidney secretions were scanty and distressing and the water remained in my system, making my feet and hands swell. There were dark circles under my eyes and I became so dizzy I could hardly see. I had rheumatic pains in my knees and it was all I could do to get around. For years I was in that shape and I wore plasters and used all kinds of medicine to no avail until I tried *Doan's Kidney Pills.* They rid me of the trouble and strengthened my back and kidneys. When I have taken *Doan's* since, they have always benefited me."

Sworn to before me.

HOLLIS LEARNS VERA'S IDENTITY AND FOR BASCOM'S SAKE THEY AGREE TO TAKE THE SHIP TO ITS DESTINATION

Synopsis—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown, aboard. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool. The yacht is sunk in a collision and Hollis saves McCann, millionaire, and one of the party. Hollis and McCann rescue Vera and leave the ship in a small boat. McCann refuses to submit to the authority of Hollis, and the latter enforces obedience. The castaways are sighted by a ship, the Indian Chief, which takes them aboard. The vessel is badly storm damaged. All officers are dead. Bascom, the owner, says he is taking a cargo of ammunition to Germany. Hollis consents to take charge of the ship and continue the voyage. McCann tries to corrupt the crew and Hollis locks him up.

CHAPTER XIII—(Continued.)

—9—

"Amidship."

"Petty officers' quarters. Well, I prefer having you aft. There is a vacant stateroom below. Walk ahead of me to the cabin, and go down the steps."

"You'll pay for this in the morning."

"Do not worry about the morning, my man. Trust me to take care of your friends forward when the time comes. This is not my first voyage. Move on!"

Sullenly he left the rail, and crossed the deck to the companion, with me trailing a step behind. I was aware that Olson was leaning out over the poop-rail watching our dim figures, wondering, no doubt, what was occurring below. I did not venture to glance upward, or remove my eyes from the prisoner.

"Below there," the mate called, gruffly, "what's going on?"

"It is all right, Mr. Olson," I answered, speaking quietly. "I'll explain later. Open the door, McCann, and go straight down."

He must have realized the utter futility of resistance, for he never even turned his head, marching before me down the stairs, and across the deserted cabin. I threw open the door next to Bascom's stateroom, switched on the light, and glanced within, keeping my grasp hard on McCann's arm. His eyes met mine, black with a coward's hatred.

"By God! if you wasn't armed—"

I swung him about in sudden disgust, flinging him forward, and he fell sprawling on the deck, overturning the stool. The next instant I had closed the door and locked it, dropping the key into my jacket pocket. There had been little noise, scarcely enough to arouse the sleepers below, and it was with a feeling of decided relief, that I returned to the open deck.

I climbed the ladder, joining Olson at the port rail. Two men were at the wheel, which bucked sufficiently to keep them busy.

"You are off a couple of points, lads," I said. "Can't you hold her any closer?"

"Not the way the sea is running, sir," answered a voice I recognized as Simms', "unless we raise a bit more jib, and the mate thought it best not to risk the canvas."

"Right, no doubt, but hold her down the best you can."

"Aye, aye, sir."

The response was cheerful enough, and I crossed the deck to where Olson stood, in somewhat better frame of mind.

"You are not exactly holding to the course, Mr. Olson," I said, but not unkindly, "and Simms tells me you thought it best not to shake out another reef in the jib."

"It would only strain the old hooker to buck these seas, sir," he replied, "and as you had no observation, I hardly thought a point or two would make much difference."

"Nor does it; only I prefer to be consulted on such matters hereafter. You must have had some other reason?"

He glanced about to make sure of our distance from the men at the wheel.

"Well, in a way I suppose I did, sir," he admitted slowly. "The watch forward is sullen, an' I had no desire to stir them up unless there was some real need. It's Liverpool's turn on deck, Mr. Hollis, an' he an' I never was no friends. If I was to give an order, and then had to go forward to make 'em hold, it might start up quite a row, sir."

"Quite a sensible decision. It may interest you to know that I have just cut Liverpool's claws—his friend McCann is below, safely locked up."

"Exactly, sir. That was what occurred on the main deck just now? He was very quiet about it, sir. Is it true what I hear that he is a real New York millionaire? And you are not a real sailor, Mr. Hollis, but just a yachtsman?"

"Has McCann been circulating that yarn forward?"

"He has, sir. Simms just told me the story at the wheel."

"Well, then listen to me, Mr. Olson, and then see to it that the word gets to the crew. I was a member of a yachting party when we suffered shipwreck, but I'm no yachtsman. I've served before the mast, Mr. Olson, and won every grade up to a captaincy in the old Atlas line. I know the sea and its way from forecastle to after cabin, and any time those lads forward there want to take my measure, the chance is wide open. You understand?"

"I do, sir," and I thought there was more respect in the tone.

"Good; there will be no trouble tonight?"

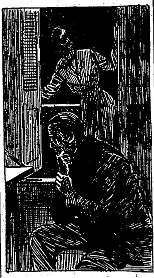
"I think not, sir; but by morning they will begin to wonder what has become of this man McCann, and may grow ugly."

"We can handle them by daylight. It is darkness which gives them an advantage. I'll return to the main deck, Mr. Olson, and leave you in charge here."

CHAPTER XIV.

Vera Strengthens My Resolve.

I believed I had effectually spiked the guns of the conspiracy—at least for the present. I did not underestimate the feeling of dissatisfaction forward, or the influence of Liverpool Red and his more intimate associates; but McCann and his money were, after all, the main incentive to open mutiny, and as long as I could keep that individual securely locked up aft, there remained a good chance of controlling the others.



"Is This Mr. Hollis?"

Once we succeeded in discovering the hidden store of liquor and getting it overboard, and with McCann safely secured, the danger element would certainly be greatly reduced. But was McCann really secured? I could never hope to conceal the fellow, to keep him hidden. The narrow confines of the ship rendered this impossible. Dade and the boy Moon would be certain to carry the news of his imprisonment forward in spite of any threat. I began to suspect that McCann under lock and key might indeed prove a greater danger in the end than he would if left free to roam the deck. The knowledge he now possessed that this ship actually belonged to the very man crippled by his pistol shot would only serve to render the fellow more venomous. Nor could I determine his feelings toward Vera; yet if he once gained ascendancy on board, with such ruffians as Liverpool and White in control, the position of the helpless girl, alone and unprotected, would be desperate indeed. No! I would hold on to the man and then rough it out with the others.

The cabin lamp was turned so low that scarcely the faintest reflection streamed through the glass of the companion, and I was so deeply engrossed in these reflections as to not even notice the opening of the door. Her voice at my side aroused me with a sudden thrill.

"Is this Mr. Hollis?"

"It certainly is," I answered, aware now of the dark outline beside me, and even dimly distinguishing the contour of her uplifted face. "It is some time since I have enjoyed the pleasure of your presence on deck in the night."

"Why refer to that now?" reproachfully. "It is not so delightful a memory."

"The shipwreck—no; but the first evening we met I cannot forget. But you promised to make the mystery of your presence on board the Esmeralda clear?"

"Has it not revealed itself?"

"Not to me."

"But has not Philip Bascom told you who I am?"

I shook my head, not altogether happy at this introduction of his name, but unable to resent it.

"But you knew he recognized me; that we had been friends."

"All the more reason why I should remain silent. As long as you evidently preferred that I should not know—"

"Oh, but I didn't, Mr. Hollis," she interrupted. "It never once occurred to me that you were still in doubt as to my identity. Of course at first I thought it safer to guard my secret; I—I did not know you at all then, only by name; you were merely a guest on board my father's yacht."

"Your father's yacht! Why, of course—how stupid of me.' Vera, Vera, why the name had a strangely familiar sound from the very first, but I could not recall the association; you are Gerald Carrington's daughter?"

"I am Vera Carrington."

"But I supposed you to be in Europe?"

"Did papa say so? You must have misunderstood. Mother would have taken me with her, but I had so much I wanted to do in New York. It is strange you should not have suspected; that no one should have told you. Why, both Mr. Bascom and Mr. McCann knew me."

"Not McCann, surely?"

"Why not? We have met socially in New York. It seems hardly possible, now that I realize the true character of the man. But probably you never asked; never discussed me between you?"

"That is the truth. Of course it was quite impossible for me to question McCann, and I have seen very little of Bascom. Besides, you rather threw yourself on my honor."

"On the Esmeralda—yes. It was necessary then, for I simply had to keep my presence a secret until we were a safe distance at sea. There were several on board who would have recognized me at once, and would have told papa. Mr. Hollis, I realize far more than you can, all that has occurred through the mad whim of a girl. But for me you would not be here on this unlucky ship. You would be with those others rescued from the Esmeralda safely in New York. Mr. Hollis, tell me, is there real trouble on board? Is there doubt of your being able to take the Indian Chief into port?"

"Why do you ask?"

"Because—well, I have heard things; not much, but enough to arouse suspicion. Then you had some trouble just now, and locked a man up in one of the staterooms. It was to ask you about this that I came on deck. Who was the man, and what had he done?"

"Our old friend, Fergus McCann," I answered, deciding to be frank with her. "It was not so much what he had done, as what he proposed doing. He was attempting to corrupt the crew forward by the use of money, and unfortunately, there are some scamps aboard only too willing to make trouble. I felt it safer to nip the scheme early."

"But what—what does Mr. McCann seek? Why should he endeavor to buy up the men? What is his purpose?"

"To have the Indian Chief returned to an American port. I'll do him the credit of saying that, until I told him a while ago, he possessed no knowledge whatever that Bascom owned the vessel, or was on board. He hates Bascom yet, and will be only too glad to ruin him. And he hates me, because of what occurred in the boat. This is what underlies his action, no doubt; then he believes money will accomplish anything, and he has found sailormen forward ready enough to do the dirty work, if he will only pay well for it."

"You know them?"

"The two most prominent are Jim White and a fellow known aboard as Liverpool Red, both typical forecastle bullies. I know how to deal with their sort."

"You—you have decided what to do, then?"

"I have decided to fight it out, at least. I gave you my promise, Miss Vera, to take this ship to Hamburg if it was possible to get there."

"And there is no other way of saving the investment in this vessel and cargo?"

"I know of none."

"Then we must go on, must we not? I—I hope you will, Captain Hollis."

Before I could stop her, or add another word, she was gone, and I was apparently alone on deck.

I remained on deck the greater part of the night, but nothing of an alarming nature took place. The crew remained quiet, and the watch on duty obeyed orders promptly enough to give those of us aft a new feeling of confidence.

The sky cleared, although the wind remained fresh and the sea heavy enough to keep two men at the wheel. The Indian Chief made good weather of it, however, and I possessed faith in Leayord's seamanship. For an hour, perhaps, I loitered about on deck, but all remained so quiet that finally, with a word to the mate to have me called at the slightest sign of need, I went below, and turned in.

I did not remove my clothes, and the new day was barely reddening the east when I was aroused by a trampling of feet on the deck overhead. There was no call, and I was sailor enough to comprehend what was going on above — the watch was about to be changed, and Leayord was using all hands in cleaning ship. The activity, the quietly spoken orders, the low chant of a song as the men toiled at a rope, were evidence that my presence was not required, and I felt it would please both officers to be left alone in charge. I opened the port and looked out at the glorious morning. It was a lonely ocean scene, yet wildly beautiful. Everywhere was the wild desolation of the sea, nothing on which the eye could rest except the restless waves, the constant shifting of colors. Satisfied that no other vessel was within range of vision, I lay down again.

I do not recall a pleasanter meal at sea than our breakfast that morning. All were in excellent humor, and no premonition of trouble entered our minds. The night had passed quietly, both officers reporting the crew docile and cheerful.

Olson was on watch, but Masters joined us at table, and reported all well in the engine room, and together we drank a toast to a pleasant voyage, almost convinced that before us were only the ordinary vicissitudes of the sea. It was not until the men left the table that I was reminded of our prisoner in the nearby stateroom.

"Mr. Bascom seldom takes any breakfast?" I said to Dade, who was polishing the stair rail.

"No, sir; I have orders to take him a cup of coffee at nine o'clock."

"And how about McCann?"

"The gentleman in number six, sir? He's locked in, and I haven't the key."

"That's true; I'd forgotten. I'll look in on the man; and you get his breakfast ready to serve."

I unlocked and opened the door. McCann was seated on the edge of his bunk facing me, and, it was plainly evident at first view that he was in no pleasant humor.

"McCann," I said, as he failed to speak, "let's have an understanding. It is no desire of mine to hold you a prisoner here for the next month. I'll accept your pledge not to interfere with the working of this vessel."

"On what other terms?"

"That you stop holding communications with the crew, and consider yourself a passenger until the end of the voyage. Give me your word to that, and you may have the freedom of this cabin, and the after deck."

"What is the voyage?"

"To Hamburg."

He laughed, and there was an ugly sound to it.

"Pshaw, do you think you ever will get there?" he asked, glaring at me, but making no effort to rise. "Are you fool enough, Hollis, to imagine that the English fleet will ever permit this ship to pass through the Channel? Why, your whole darn cargo, they tell me, is contraband."

"Who tells you?"

"Never mind who. It's the truth, isn't it?"

"Yes, you might as well know—mostly munitions of war, but contracted for months before war was declared. However, that's nothing to do with your status on board. It is nothing to you, is it, who gets the cargo, or where it is finally landed?"

"It is something to me whether I'm safe in New York, or rotting in an English, or French prison," he said sullenly. "Besides, that's not all. I've got a deal on there that means more than a million dollars! I can't afford to drift about here on this rotten tramp."

"The saving of this boat and cargo means more to Bascom than your million dollar trade does to you."

"What's Bascom's affairs to me?" he sneered. "He took his chances, didn't he? You seem to think I owe the man something. I suppose he told you, or else the girl did, that I crippled him for life. Well, he deserved all he got. I pay my debts, let me tell you, and I've got some against you to be settled yet. Don't preach Philip Bascom to me. It's not for his sake you are hanging on here, and trying to get this ship to Hamburg. I'm not so blind as all that."

"What do you mean?"

"Mean! Why that is Carrington's girl, isn't it, you and I pulled out of the yacht? Lord, I knew her when the first streak of daylight came, and I saw your little game, too. There's money enough coming to her to make this a mighty profitable voyage if you can land her in your net before she gets ashore again. By God! I might have done it myself if I hadn't gone crazy in the boat. Now all the part there is left me to play is the villain."

I did not move, or take my eyes from him, and slowly the grin on his face seemed to smooth out, as his sense of humor departed.

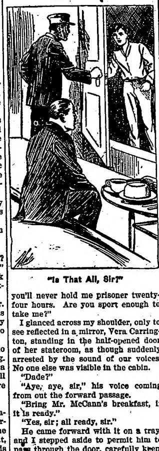
"Well," he snarled, "isn't that about the way of it?"

"If the picture satisfies you, Mr. McCann," I said, "you are perfectly welcome to it. You've said enough to cause me to withdraw my offer of parole. I will accept no pledge you may make."

"You intend holding me a prisoner as long as I am aboard?"

"You have left me no other choice."

He got to his feet angrily. "Well now see here, Hollis, I'm blamed if I have any use for you, or any of your outfit! I wouldn't give you my word even if you agreed to accept it. You are going to discover before you are through with me that Fergus McCann is not quite as big a fool as you take him to be. I'll give you odds that you never take this ship to Hamburg; I'll give you odds you never get the girl; yes, d—— you! I'll make the same proposition, that you'll never hold me prisoner twenty-four hours. Are you sport enough to take me?"



"Is That All, Sir?"

I glanced across my shoulder, only to see reflected in a mirror, Vera Carrington, standing in the half-opened door of her stateroom, as though suddenly arrested by the sound of our voices. No one else was visible in the cabin.

"Dade?"

"Aye, aye, sir," his voice coming from out the forward passage.

"Bring Mr. McCann's breakfast, if it is ready."

"Yes, sir; all ready, sir."

He came forward with it on a tray, and I stepped aside to permit him to pass through the door, carefully keeping my back turned toward the motionless girl, and my eyes fastened on McCann.

"Leave the tray there on the stool, Dade—yes, that's all; you may go back to your work."

He backed out, but stood hesitating, while I closed and locked the door, dropping the key into my pocket.

"Is—is that all, sir?" he asked nervously.

"I told you it was. When I want those dishes removed, I'll come down, and unlock the door for you. No one —not even you—are to speak with the prisoner."

"Yes, sir."

"Now go forward, about your work."

I watched until he vanished in the passage, not altogether satisfied. The fellow had been outwardly respectful enough, but there was something indefinite about his manner which aroused my doubt. I turned, and confronted the young woman, wondering vaguely how long she had been there, and how much of our conversation she had overheard.

The crew begins to show "bad blood," fearing the trip to Europe, and Hollis and Vera find they are in serious trouble. The next installment describes a thrilling incident.

(TO BE CONTINUED.)

Cold Congregations.

Billy Sunday told a story at a Brooklyn luncheon about an apathetic Missourian congregation.

"This bunch's preacher," he said, "has wrastled among 'em for thirty-seven years, and never an encouraging word but one has he got in all that time.

"He told me about it with tears in his eyes. He said he was on the way home to dinner when a deacon hailed him. The deacon shook him by the hand and then actually said:

"'Ah, parson, that was a beautiful text you preached from Sunday evenin'.'"

Don't put on the roof until you investigate

It is poor economy to save money by substituting something inferior, but wouldn't you like to save on cost if you could get something better? You *can* get a better roof for less money if you put on

Certain-teed

Roofing

Before its merits were recognized, roll roofing was regarded as a more or less temporary roof —but now CERTAIN-TEED has demonstrated that it is not only a most durable roof, but also *the* most efficient roof.

It is economical to buy, inexpensive to lay and costs practically nothing to maintain. It is light weight, clean, sanitary, fire-retardent and weather-tight.

It is now used as the preferable type of roof for office buildings, factories, hotels, stores, warehouses, garages, farm buildings, etc., where durability is demanded. CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply.)

***Certain-teed* Paints and Varnishes**

are made for all uses and in all colors. With paint, as with roofing the name CERTAIN-TEED is a guarantee of quality and satisfaction.

***Certain-teed* Products Corporation**

Her Qualifications.

The housekeeper of the Hotel Severin, in quest for housemaids, receives many applicants and not a few requests for a trial at the job through the mail, says the Indianapolis News. One young woman wrote from a small town in an adjoining state that she would like to have a try at hotel housekeeping and offered this inducement:

"I a mtwenty-two years of age, have brown hair and eyes, and weigh 138 pounds. I have never been sick two days in my life. Folks say I am nice looking and have a kind disposition."

"It sounded good," said the hotel housekeeper, "but I wrote the young woman that we were keeping a hotel and not running a matrimonial agency."

Caloric Luncheon.

The Boston Transcript tells of a "caloric luncheon" served at the Women's City club of Boston recently, the well-balanced meal providing 750 calories. The menu was worked out by a food expert, Mrs. Harriet L. B. Darling. On the place cards the caloric value of each item of the menu was given, even to a lump of sugar. The luncheon served consisted of cream of celery soup, chicken en casserole, tomato salad, graham muffins, ice cream, cake and coffee.

New York now schools policemen in law and ordinance points.

Danbury, Conn., hat factories are now "open shop."

LETTERS ARE MIGHTY WELCOME IN TRAINING CAMP

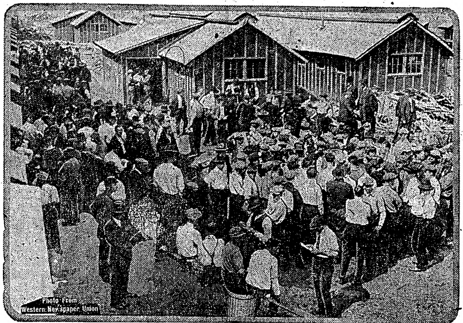

Photo From Western Newspaper Union

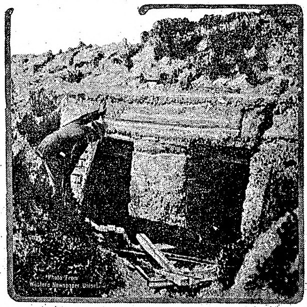
The mail has just come in at this army training camp, and the eagerness of the boys shows how welcome to them are letters from their relatives and friends.

ENTRANCE TO CAPTURED GERMAN DUGOUT



Entrance to one of the many German dugouts near Lens recently captured by the Canadian troops. It is made of concrete and iron girders.

BEAUTIFUL HOME TO BE WAR HOSPITAL

This is Ferncliffe-on-the-Hudson, the $3,000,000 home of Vincent Astor, which he has turned over to the government for use as a war hospital.

FAIR COBBLER OF PARIS

The wife of a Paris cobbler is carrying on business while her husband fights. She is seen putting rubber heels on the shoes of a Canadian soldier, these being better than hob nails while the men are on furlough.

Education Work.

"Help keep the boys in school," is the be the slogan this year of the club women of Massachusetts, Mrs. Herbert J. Gurney, president of the Massachusetts Federation of Women's Clubs, having formed a plan of service that seems admirable, says an exchange. Club women throughout the state will keep in touch with the high schools in their vicinity. When it is discovered that a boy has left school, the club women, informed to that effect by the teachers, will investigate the matter. If it is a matter of money that makes it necessary for the boy to leave, the club women will provide the money from their own funds. They consider it a matter of preparedness to see that the young men of the future have the advantage of the schools of today.

Smuggled Pepper in Bike.

Smuggling pepper into Germany has taxed the ingenuity of the German mind, but a Teuton recently evolved the following method: A bicycle belonging to a workman who was riding into Germany was seized by the Swiss authorities, and on examination it was found that the framework was filled with pepper. Customs officials who later raided the workman's dwelling found large quantities of the same condiment, apparently waiting for a favorable opportunity.

THE KITCHEN CABINET

Let us keep the mind clear and bright, fill it with wholesome thoughts of life, and be kindly in our feelings towards others.—C. B. Patterson.

SEASONABLE DISHES.

For a nice occasion when dainty salad is desired make a cherry salad as follows:

Cherry Salad.—The nice large canned cherries are preferable, fill each with a filbert and arrange eight or ten on a head lettuce leaf for each person. Pour over a little dressing made from the cherry juice, olive oil and seasoning.

Maple Parfait.—Beat three eggs, yolks and whites separately, until light. Scald a cupful of maple sirup and pour it boiling hot over the yolks of the eggs, fold in the whites and set aside to cool. Add a pinch of salt, two cupfuls of whipped cream, a teaspoonful of lemon juice and freeze. Serve after ripening for several hours. Sprinkle each, serving with chopped walnuts or pecans.

Potato Croquettes.—Put two cupfuls of mashed potato through a ricer, add a tablespoonful of butter, two tablespoonfuls of chopped parsley, a teaspoonful of onion juice, and a well-beaten egg, salt, pepper and celery salt to season. Form into croquettes and fry in deep fat, after dipping them in egg and crumbs.

Royal Sandwiches.—Cut fresh brown bread a quarter of an inch thick and cover it with the following mixture: Put three hard-cooked eggs into a dish, add four tablespoonfuls of butter, a dash of red pepper, two tablespoonfuls of cooked ham, chopped, mix and rub through a sieve, then add two tablespoonfuls of whipped cream, spread this on the bread and sprinkle over it finely chopped celery, that has been chilled in ice water, add a teaspoonful of olive oil, a little vinegar and salt, place another slice of bread on top of this and butter the top, sprinkled with hard-cooked yolk of egg put through a sieve, and lightly with chopped parsley. Cut the bread in strips and serve.

Pineapple Salad with Honey Dressing.—Arrange slices of fresh pineapple on lettuce and pour over the following. Beat together three tablespoonfuls of olive oil, two tablespoonfuls of honey, a tablespoonful of lemon juice and a dash of salt. Use at once.

When whipping cream, add a tablespoonful of condensed milk to a bowl of whipped cream, and beat it well just before serving. It will add much to its deliciousness and increase the quantity of the cream.

A half-cupful of good-flavored cheese grated, then added to a dish of creamed toast, makes a highly nutritious dish.

It is a fine thing to have a great thought, but it is a much finer thing to pass a great thought on to others.

God has given us tongues that we may say something pleasant to our fellow-man.

HONEY DISHES.

A most delicious plum butter was that made by our grandmothers using honey instead of sugar; just try it with your plums and see if it isn't worth remembering.

Rice Pudding.—Take a half cupful of rice, two quarts of good milk, a pinch of salt and honey to sweeten, bake for three hours, stirring often the first half of the cooking. Raisins may be added and a little butter if the milk is not rich.

Honey Spice Cake.—Stir together until creamy one and a half cupfuls of honey, one scant cupful of shortening, add gradually two well-beaten eggs, one-half cupful of milk and three cupfuls of flour in which two tablespoonfuls of baking powder have been sifted, a tablespoonful of allspice and a cupful of each of raisins and currants. When well-mixed turn into a deep greased pan and bake in a moderate oven until brown.

Baked Apples.—Core and peel five even-sized apples. Mix one cupful of fine bread crumbs, three tablespoonfuls of honey, one-half teaspoonful each of cinnamon and lemon extract. Fill the centers of the apples with the mixture and bake in a buttered dish.

East Indian Pudding.—Soak three cupfuls of bread crumbs in two cupfuls of cold water for five minutes, then press out the water, mix well with a tablespoonful of melted butter, add a quarter of a teaspoonful of salt, one-half teaspoonful of cinnamon, one-half cupful of raisins, five yolks of eggs, flavored with one-half a teaspoonful of grated lemon peel. Bake in an earthen dish twenty-five minutes.

Honey Ginger Snaps.—Into a double boiler put three-quarters of a cupful of shortening, one cupful of honey and two teaspoonfuls of ginger, cook three minutes after reaching the boiling point, then set aside to cool. When cold stir in enough flour to make a stiff mixture, roll out thin and cut, bake in a quick oven.

Honey added to lemon juice make a most delicious fruit sirup to serve on a fruit cocktail.

What Can We Do?

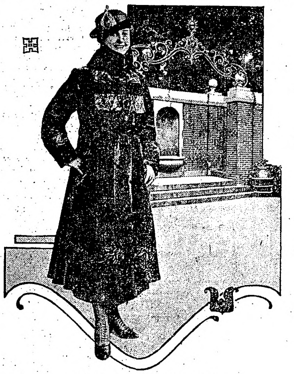
© International Film Service

There is a request from hospitals for scrapbooks made to interest the convalescent soldiers when time hangs heavy on hands forced to be idle. Certainly here is a simple and easy task waiting for those who are anxious to serve the needs of our soldiers in some way, but with little time or money to spare. And convalescents in the hospital are not the only ones who will find the scrapbook something to enjoy and pass along. So, if you are casting about for something to send to the Sammies for Christmas, consider the many virtues of a clever scrapbook.

These books are to be filled with pictures, cartoons, very short stories, good and new jokes (especially those originating in the army). These can be cut from magazines or papers or gathered elsewhere. Old files of magazines might prove a good field for exploration in filling them. Kodak pictures, if good and of general interest, will help out, and those of animals or country life are always interesting, or those made on trips to places of great natural beauty of historic interest. The blank books can be had at the humble and useful ten-cent stores and the pictures pasted in them. There is really more interest in this work, if the books are to be sent to acquaintances who have joined the army, and it is not at all hard to get acquainted with some soldier boy who may have less attention from home than his comrades. One especially nice thing about them is that they can be passed along and another is that the work is interesting in itself.

The pictures and stories should always be cheerful. The boys at the front have no use for "sob stuff," but they don't mind being a little sentimental.' Here is a chance to be immediately seized, to do something worth while for Christmas.

Fads And Fancies Of Fashion



MODELS IN COATS FOR MISSES.

We can achieve smartness in coats that sell at a moderate price, if they are made up in correct lines and in accordance with accepted styles. This is a consummation devoutly to be wished for the mother of the young girl. No one is more sure of what she wants, or harder to change in her convictions, than the miss in her teens, but, thanks be, she is not exacting in the matter of materials. She does not yearn for ermine or sealskin and will gladly wear rabbit fur disguised as either, if only it is made up in the right way.

For her the coat in the picture has been designed. It possesses all the style requisites which she can demand, worked out in materials that are moderate in price—as prices go just now. This coat is evidently an adaptation of styles with the authority of at least two famed Paris houses behind them. It is of bolivia, a heavy wool cloth, banded with a fur fabric that has much the effect of moleskin. The lines are straight from shoulder to hem and there is the coziest and smartest of muffler collars about the neck, a narrow girdle, with long ends of the simplest "throw-over" variety, is finished with hanging ornaments of silk cord. On the original model there were no pockets, but pockets are very practical on winter coats and they have been added without marring this design.

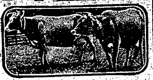
Buttons are used for fastening the coat; three large ones, covered with cloth like the coat, are placed at the front, one above and two below the girdle. Three smaller ones manage the collar and the front of the body. The bands of fur fabric need not be like the coat in color; those in black look well on almost any of the fashionable colors in wool, but the best effects are not in strong color contrasts. Dark brown with brown bandings, taupe with taupe bandings, wine or dark amethyst with black bandings are good combinations for coats. All the neutral or "glove" colors are to be recommended.

Julia Bottomley

Avoid Double Chin.

Facial expression is very bad for beauty. Scowling, frowning, pursing the lips are all detrimental and are not nice to look at. Get your face under control and always keep it that way. Express what you wish with your eyes

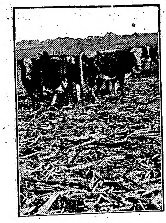
DAIRY



QUIETNESS OF GREAT VALUE

Something That Should Be Insisted Upon and Rigidly Enforced Among the Dairy Herds.

The value of quietness among the dairy herds is something that should be insisted upon and rigidly enforced. The intruding hunter is fast being kept out by signs to that effect; but even then one or two sometimes get in when no one is looking. A cow usually hates a dog, and her hate is even increased when the dog is noisy or runs at her. She may not get over the agitation for a day or two, and in the meantime the disturbance shows its effect in the milk supply. If the manager of a herd has nothing to offer in the way of kindness or love to his animals he can do infinite harm. He may apparently lose control of himself at times and feel justified in delivering severe beatings; but such actions are not good as an excuse. Forbid any kicks in the bellies or any striking over the rumps or backs with clubs. Cases are on record of serious harm being done to cattle by those who do not take some forethought on how to manage with reason.



Contented Members of Herd.

CALVES ON SEPARATOR MILK

Poor Practice to Pour Liquid Into Dirty Trough and Let Animals Drink Their Fill.

If we are ready to admit that a cow's milk is too good for a cow's calf and that it is economically profitable to rob the future cow for the sake of present gains, then it is quite necessary to know how to raise calves on separator milk or other artificial and unnatural foods, says a writer.

The usual practice is to pour separator milk, sometimes cold, into a large trough which is never cleaned, and allow the calves to drink until they are satisfied. This method means potbellied, runty calves, that never make the growth they should, even though they fortunately escape the ravages of indigestion.

COW RELISHES ROUGH FEEDS

Animal Possessed of Large, Roomy Digestive Tract That Is Built for Handling Bulky Feed.

Unlike the hog, the cow has a large roomy digestive tract that is built for the handling of rough feeds. The cow digests her feed to best advantage when her ration is bulky, as the bulky parts of the feed keep the small particles of grain apart and thus allow them to be thoroughly acted on by the digestive juices. The hay and silage should not constitute all the bulk of the ration, as part of it can profitably be supplied by such feeds as corn and cob meal, ground oats, wheat bran and distillers' dried grains.—Iowa Circular 84.

RINGING SELF-SUCKING COW

One Plan Is to Put Brass Ring in Animal's Nose—Gets Ring Instead of Her Teat.

A number of methods of preventing a cow from sucking herself have been suggested, among them being the one of putting a brass ring in the cow's nose large enough that when she opens her mouth to take hold of the teat she will get the ring. If a large ring is used two small ones can be linked into the one that goes in the nose which will answer the same purpose.

FARMER WHO WILL SUCCEED

Profit Over High Cost of Labor and Feed for Meat, Milk, Dairy and Poultry Products.

Advancing prices for meat, milk, dairy and poultry products will bring a profit over the high cost of feed and labor, and the farmer who has kept a good stock of breeding animals is pretty sure to receive handsome returns.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

RABBITS FOR MEAT

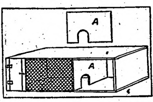
Belgian Hare Is One of the Best for Table Use.

QUALITY OF FLESH SUPERIOR

Much of Excellence of Animals Depends on Rapidity of Its Growth, and Still More on Manner of Cooking It.

By the production of domestic rabbits on farms and in the back yards of villages and even of cities, the meat supply of the country may be considerably augmented. Such rabbits may be easily grown and can be propagated without costly investment in land and buildings.

The Belgian hare is one of the best rabbits for table use. It weighs more than most breeds, develops very rapidly, and the quality of the meat is superior to all the others. The Flemish giant is a cross between the Belgian hare and other breeds, developed especially for large size, with the result that the flesh may be slightly coarser in mature animals. With young hutch rabbits, few persons can distinguish differences in the quality of the flesh of the various breeds. Much of the excellence of the rabbit as food depends on the rapidity of its growth and still more on the manner of cooking it. As often prepared, it is dry and insipid; but in the hands of an experienced cook it becomes all that the most fastidious taste can wish. An especial requirement in cooking the Belgian hare is that none of the natural juices of the meat be lost in the process.



Simple Outdoor Hutch.

The directions herein given for the care of Belgian rabbits are applicable to the management of most other breeds.

Selection of Stock.

If rabbits are bred for food only, the selection of stock is of less importance than when they are bred for show purposes. All that is required is a sizable animal of good, hary stock. However, the points fo rwhich the fancier breeds the Belgian hare include also those most desirable in a food animal, so that if one can find stock with these characters well marked, and at the same time constitutionally sound, he should by all means obtain it. Purebred stock is more profitable, too, because it may be sold for breeding purposes as well as for the table.

General Standards.

Belgian hare fanciers of a few years ago differed somewhat in opinion as to the proper standard of color for this animal. Some aimed at the color of brown. Most American breeders seem to have preferred a deeper reddish brown. In all other respects the standards were the same. The chief requisite concerning color is that it shall be as nearly uniform as possible throughout the upper surface of the animal and that the fur shall have a rich luster. The "ticking," or shading, should be wavy rather than dotted. The belly and the lower surface of tail and hind feet should be whitish, but not pure white. The neck and breast should be somewhat lighter in shade than the back, but not in marked contrast with it, nor should the change in shade be abrupt.

Ears.—The ears of the mature Belgian should be about 5 to 5½ inches in length, varying with the size of the animal. They should be well shaped, strong at the base, and almost transparent at the middle. They must not be pendulous, but should, when the animal is quiet, be inclined backward, resting straight over the shoulders. A narrow black edging at the tip and as far down the front and back as possible marks the best stock.

Body.—The body of the Belgian is longer in proportion to the whole bulk than that of any other breed of the same size. Bucks and the younger females should never have the appendage known as "dewlap." This sometimes develops in the older ones, but is regarded as a blemish in animals intended for show purposes. The back should be only slightly arched, and the forelegs and feet should be perfectly straight and free from white.

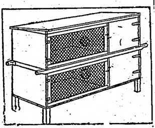
Age of Breeding Stock.—The beginner should always select mature animals about a year old for breeding stock. These may be known by the brisk, alert look, the small white teeth, and the small claws almost hidden in the fur. Coarse, long claws are a sure indication of age. Listless-looking, rough-coated, or pot-bellied animals (except pregnant does) should be rejected, especially those having the whites of the eyes stained with yellow. A hutch rabbit in good health is gentle, neither savage nor overtimid, and does not scream when lifted by the ears.

The Sexes.—The does selected for breeding may be of the same strain and even of the same litter, but the buck should be of different stock, and when possible obtained from another breeder. Hardy young animals with the best characteristics of the breed may be bought at from $1 to $2 each. Often they may be had of nearby breeders, thus saving the expense of carriage on long journeys by express.

Hutches and Pens.

The Belgian hare does not do well when kept wild in open warrens. The common English rabbit is better for this purpose. A good many Belgians have been turned out in various parts of the United States, and in the vicinity of the city of New York and on the western coast this has resulted in some complaints of damage to crops. As a rule, however, and fortunately for the farmers, these animals, when obliged to shift for themselves, fall an easy prey to their enemies and disappear within a few months.

Belgian hares may be managed successfully in two ways: (1) Entirely in hutches, or (2) in outdoor fenced runs, or courts, with hutches for does when having young, and sleeping hutches for other stock. The hutch system with various modifications is the more common and is the only method adopted by rabbit fanciers who raise for show. The use of small runs or rabbit courts to give the animals healthful exercise in fine weather is of advantage.



Movable Outdoor Hutch.

Outdoor hutches should have sloping roofs and overhanging eaves to protect them from rain. The screened door should have a sliding cover of wood or be fitted with a removable cloth cover. Small holes bored near the top of the hutch will afford all necessary ventilation.

Movable hutches have some advantages. They may be carried outdoors in fine weather and taken back under shelter at night or during storms. Long, narrow cleats projecting at both ends of the hutch are all that are needed to convert the ordinary hutch into a movable one.

VALLE OF IRRIGATED LANDS

What Alfalfa Will Accomplish in Matter of Forage Crops—Feed for Cattle and Sheep.

To give one an approximate idea of the value of irrigated land in the matter of forage for cattle, the following figures will show what alfalfa will do on irrigated as compared with common hay on nonirrigated land:

One acre sown to alfalfa and irrigated will produce 10,000 pounds of hay.

One acre in inclosed pasture, 500 pounds.

One acre of range averages 250 pounds.

Or again:

One acre of irrigated alfalfa will feed one steer 400 days.

One acre of inclosed pasture will feed one steer 20 days.

One acre of range will feed one steer ten days.

Or putting it in sheep, it will show: One hundred and sixty acres of irri[illegible] will maintain 1,800 sheep [illegible]

One hundred and sixty acres of inclosed pasture will maintain 80 sheep one year.

One hundred and sixty acres of range will maintain 40 sheep one year.

Move Forward.

The really progressive farmer is thinking of concrete buildings, and things of that sort. That silo which has long been contemplated may still be put up this season.

Harvesting Onions.

Onions should not be allowed to become wet during harvest. It roughens their skin, making them unsightly. Store on shallow shelves and bins in a dry, well aired room.

Keep Onions Dry.

Onions should not be allowed to become wet during harvest. It roughens their skin, making them unsightly. Store on shallow shelves and bins in a dry, well-aired room.

Highway Improvement

NATIONAL SYSTEM OF ROADS

Expert at National Capital Illustrates How Scheme Is to Be Brought to Successful End.

The establishment of a national system of highways is greatly facilitated by the federal aid road law, which compels all the states that would share in its benefits—and that means all of the states—to equip themselves with state highway departments. With these state highway departments devoting their attention to the building of state systems of main, through-line highways, every condition is favorable for the next and crowning act—the establishment of a national system of highways.

By way of illustrating how a national system of highways is about to be evolved by easy and logical stages, an expert at the national capital made the following statement:

"Gradually the state has made itself a compelling factor in the handling of local road problems and, as a logical sequence, the federal government, first through educational activity and later by the financial aid provided by the federal aid law, has made itself a powerful factor in the working out of the state highway problems. The next logical step follows the same course which has been pursued by the state governments, namely, the broadening of federal participation to provide for the establishment of a system of national highways.

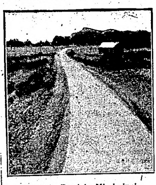
"This policy can be put into effect without disturbance of existing organizations, without providing new means of finance and with but little change in existing laws. The process would logically take a course somewhat as follows:

"1. The state highway departments and the federal office of public roads would make an initial selection from existing state highway systems of those highways which are of interstate importance.

"2. A system thus selected would be approved by congress, with the requirement that federal funds be applied only to such system on and after a specified date.

"3. The federal aid should be extended to maintenance as well as construction, as the national system of highways should have for all time a close relationship with the federal government.

"Some of the states already have made plans for utilizing the aid granted by the federal aid road act on roads which could not properly be included in a national system. But this need not cause extreme conflict, as the federal funds for the first three or four years' operation of the present act could continue to be applied as now planned. The appropriations for the first two years are already available and considerable time necessary must elapse before the national system could be laid out and made ready for the application of federal funds.



Concrete Road in Mississippi.

"In all probability the new scheme would come into effect as an extension of the present federal aid road act."

WHY FAMILY MOVED TO TOWN

Compelled to Make Change Because of Poor Schools and Bad Roads—Remedy for Poverty.

"Why don't they go on to a farm?" is the question with which many men dismiss from their minds the story of some poverty-stricken family. The chances are five to one that that same family was induced to move to town because of poor schools and poor roads in the country. The remedy for much of the poverty now in our towns is good roads and good schools in the country. Why should not country schools be given the same attention given city and town schools? Why should not the children be permitted to go to them over good roads with dry feet, instead of wading through mud and water? Good roads will make the country a better place in which to live.

Cull Growing Flock.

Cull the growing flock of chicks as much as possible, market all that are in any way inferior but in good health, and kill and bury all which seem weak or sickly. It will not pay to keep any but the strongest and best chicks.

Prevent Tuberculosis.

To prevent tuberculosis, all milk and milk products should be cooked before being fed to hogs. To control hog cholera use sanitary precautions and anti-hog cholera serum treatment

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

AMERICANS IN FIRST LINE TRENCHES OPEN ATTACK ON GERMANS

Pershing's Men Fire Opening Gun in Flanders--Artillery Fight in Progress.

OFFICIAL U. S. REPORT

First Statement Issued By American Headquarters Is Made Public.—Helmeted Infantry Given Wild Greeting.

With the American Army in France, Oct. 29.—(By the Associated Press.)—Following is the first official statement issued by the American headquarters:

"In continuation of their training, as a nucleus for instruction later, a contingent of some battalions of our first contingents in association with veteran French battalions, are in the first line trenches of a quiet sector, on the French front. They are supported by our batteries of our artillery in association with veteran French batteries.

"The sector remains normal. Our men have adapted themselves to actual trench conditions in the most satisfactory manner."

First Shot Fired at Germans.

American troops are in the first line trenches on the French front. The artillery fired the first shot of the war at 6 a. m. of a recent day, at a German working party. There has been intermittent artillery fighting since.

The helmeted infantry marched in, without the knowledge of the enemy on the same night, through rain and mud. The French soldiers in the trenches welcomed them enthusiastically.

Casualty List Coming.

The nearest enemy trench is several hundred yards away. The sector is one of the quietest of the front. It has not been taken over, being under the control of troops under the direction of the French.

The Americans have shelled German positions and troops, the enemy sending shell for shell. The first casualty list will be sent President Wilson.

The empty case of the first shell fired will be sent to President Wilson. It is now in the possession of General Sibert. The shot was fired by a red haired gunner as his comrades in the ranks and the assembled officers cheered. Later a luncheon in the field was attended by the American and French artillerists in celebration of the First American contact with the enemy.

Get Benefit of Actual Warfare.

The gun used in firing the first shot was one of the famous French 75s. On the second day the French shelled a German battery position which was located by sound and the enemy replied vigorously, projectiles falling close to the Americans who joined in the artillery duel. All the troops will be relieved after a certain period by others. Thus the American expeditionary forces are getting the benefit of actual war conditions.

Standing in a little, almost deserted shell wrecked village well within hostile gun range and a few kilometers from the trenches, the Associated Press correspondent watched the troops marching up in a driving rain over roads covered with sticky mud. The artillery had been firing all day and as a result the impression was given that there was considerable more activity on this front than there had been for some time.

Missouri Mules There.

It was soon after lulls in the firing and after dark that the first machine guns hauled by Missouri mules, the drivers swathed in slickers and with shrapnel helmets over their eyes came up on the road beside a dark canal. There was a long line of these and then came some infantry rolling kitchens, giving off a savory odor of warm food. All passed in silence. The last gun carriage had sprawled on it the form of a soldier who had been taken ill and who was being held on by two of his walking comrades. Through another street paved with cobbles and its sides lined with gaunt skeletons of shell wrecked houses came the sound of the tread of many hobnailed boots and in the darkness the forms of men could be seen marching.

March As If On Parade.

The cautious flash of an electric pocket lamp disclosed that they were American infantry, packs on their backs, rifles slung on their shoulders, rain glistening on their helmets and coats, the wind whipping the bottom of their coats around their legs, which were moving with machinelike precision.

The Americans swung down the street apparently as proud as though on dress parade, notwithstanding that they had marched miles from the billets where they had been since coming by motor truck and railway from the instruction centers. As the ranks passed every now and then a soldier could be heard whistling softly to himself, his nearby comrade listening silently to sentimental and popular pieces.

Go Into Battle Whistling.

Finally from the rear came the whistled strain of a tune which all knew and from many places in the ranks whistles and voices joined in. The tune was "Tipperary." It lasted briefly as an officer turning, ordered "Stop that noise!"

As the Germans were near by much depended on approaching the scene quietly. The troops turned a corner and disappeared down an ink black screened road. As a major standing there listened he looked continuously at an illuminated watch dial. He said:

"The men from the other direction should now be entering the trenches. I have been standing here waiting to hear if the Germans discovered the movement." He paused, listened and then continued:

"There is no firing yet, although I expect it, for no doubt we are in for a 'strafe' if the 'boche' knows we are going in."

No "strafe" developed although the Germans put over a few customary shells, hitting nothing.

The troops entered the trenches safely, unit by unit passing quickly to the places assigned them. Quietness was essential but the French welcome none the less was heard and it was enthusiastic. Every American was shaken by the hand, some were hugged and even kissed on both cheeks in the French custom. Some of the French troops were those who helped to train the Americans. The trenches were found to be muddy but nevertheless in a condition of excellent construction. Greetings being over, the Americans settled down and at daylight, under low hung dripping clouds, they got their first view of the German lines stretching away in the rolling terrain.

One American battery observed and scattered a marching enemy group with shell fire.

BRAZIL IS FINALLY IN WAR

Congress Declares State of War Exists With Germany.

Rio Janeiro, Oct. 29.—The Chamber of Deputies yesterday, by an almost unanimous vote, declared that a state of war exists between Germany and Brazil. The vote was 149 to 1. The senate unanimously approved the proclamation of a state of war and President Braz has sanctioned the proclamation.

The tribunes of the chamber were filled to capacity. After a debate on the opportuneness of proclaiming martial law, the president of the diplomatic commission spoke in favor of a law worded as follows:

"A state of war between Brazil and Germany is hereby acknowledged and proclaimed. The president of the republic is authorized to adopt the measures enunciated in his message of the 25th of October, and to take all steps tending to ensure national defense and public security."

NEEDS TWO YEARS' TRAINING

Writer Says U. S. Troops Can Be In Field Sooner.

St. Louis, Mo., Oct. 29.—Hamilton Fyfe, war correspondent for the Northcliffe newspapers, a member of Lord Northcliffe's party, speaking here, declared that from what he had seen at the front the American army would do well if it were ready to take the field after two years' training.

"I have been called a pessimist for expressing this opinion," he said, "but I believe it is much better to try to see things as they are than to indulge in false hopes. The German nation prepared for 50 years to win this war and they have not won it yet. How can anyone expect that an army can prepare in a year or 15 months and expect to win it?"

Labor Rebukes Socialist Convention.

Washington, Oct. 29.—The executive council of the American Federation of Labor has issued a statement saying it has declined to participate in an international conference of workmen and socialists of all countries, suggested by the executive committee of the Russian workmen's and soldiers' delegate council, declaring that such a conference at this time would be untimely, inappropriate and not conducive to good results.

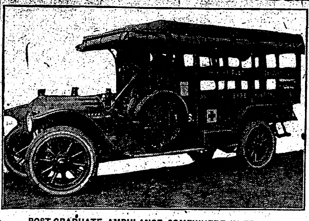
Y. W. C. A. To Protect Morals.

Chicago, Oct. 29.—Young women and girls of this country, and of France and Russia, are to be safeguarded from the moral risks of the war. This is the task before the sectional conferences of the Young Women's Christian association. Delegates from the central and north central fields—Minnesota, Illinois, Michigan, Indiana Wisconsin, North and South Dakota, Nebraska and Iowa—were in session here Saturday, while similar [illegible] are being held in other cities.

Warns of Incendiary Plot.

Chicago, Oct. 29.—Intimation that a widespread conspiracy exists to destroy livestock and grain in stockyards and elevators in the middle west, was contained in a telegram received by Harry A. Wheeler, Illinois food administrator, from Hoover. Hoover urged Wheeler to warn packers and grain men against incendiary fires and other means of destruction and advised him to take up the plan of having all stockyards and elevators patroled by home guards.

"GERM CHASERS" TO KEEP ARMIES WELL



POST-GRADUATE AMBULANCE SOMEWHERE IN FRANCE.

Even germ chasers on wheels have been provided to make life livable for the drafted boys in camp. Sort of sheriff's posses of bug detectives, they are, to pursue the invisible enemy that runs around in soldiers' systems sometimes and unloads double handfuls of disease all over the boys' internal arrangements.

Formally and unsentimentally they're referred to by the advisory committee of the Red Cross council as "laboratory railroad cars which are being prepared for emergency work against possible outbreaks of epidemics in cantonment camps in this country."

Simply Bug Hunters.

As a matter of fact, though, they're bug hunters, pure and simple. Each car will have about five experts aboard to manipulate the apparatus by which every blasted pro-German bacteria will be forced to tell its right name and then walk the plank of materia medica.

Dr. R. M. Pearce, secretary of the medical advisory committee, explaining the plan, said:

"In sudden emergencies such as epidemics of meningitis or diphtheria, either inside a military encampment or in the vicinity, a great deal of highly specialized laboratory work will be necessary for proper control of the epidemic. Although laboratories, these may have neither the equipment nor the staff to meet such emergencies, and to enlarge all of these laboratories would be excessively expensive.

Volunteer Staffs.

"Various large laboratories will furnish volunteer staffs of the most competent men in the country, held in readiness to respond immediately to any call. By this arrangement a fully-equipped laboratory, with an experienced staff prepared to begin work at once, will be immediately available wherever needed."

The United States public health service has such a mobile laboratory unit and Surgeon General Rupert Blue said the Red Cross cars would prove of greatest assistance in the control of civilian sanitary districts. The plan also has been commended by the surgeons general of the United States army and navy.

READY FOR WINTER

Wise Motorist Will Lose No Time in Preparing His Car for Cold Weather.

SOME PRECAUTIONS TO TAKE

May Be Means of Saving Owner of Car Lot of Money and at Same Time Increase Efficiency of Car—Avoid Freezing.

With the advent of fall weather and the prospect of a sharp drop in temperature at almost any time the wise motorist should lose no time in preparing his car for winter driving. A few precautions taken now may be the means of saving the car owner a lot of expense and at the same time increase the efficiency of his machine, writes John G. DeLong in Chicago Tribune.

The time was when the motorist placed his car in dead storage soon after the first frost and left it there until spring. But improvements in the mechanism and the addition of scores of cold weather comforts have made the modern car something that may be safely used the year round. However, there are many things that should be looked after before the machine is ready for the winter campaign.

Motor to Differential.

First of all the car should be given a thorough going over from motor to differential and all necessary adjustments or replacements made. In most cases it is well to drain all of the old oil out of the crank case and replace it with a slightly lighter grade than was used in the summer. The thing of the greatest importance, however, is to take precautions against freezing of the water in the radiator and water jacket, for if Jack Frost once gets in a good stiff punch the car will go down and out for a long and expensive stay in the repair shop, where welding will have to be done, even if it is not found necessary to put on a new cylinder block. And a new cylinder block usually means new pistons and other things that bring joy to the heart of the repair man and corresponding gloom to the heart of the motorist.

Nonfreezing Solution.

The addition of some good nonfreezing solution to the water in the radiator is of the utmost importance and should not be delayed too long. Then, too, the radiator must be protected with a cover which may be purchased at an expense of from $2.50 to $6, depending upon the make and size of the car. This cover not only tends to keep the water from becoming congealed but warms the motor up to its most efficient temperature. If one's car is equipped with a motometer it is comparatively easy to run the temperature up to 150 or 170 degrees, something that adds to the mileage derived from the gasoline. It is a well-known fact that a warm motor runs much better than a cold one.

Radiator Solutions.

Radiator solutions differ somewhat, but all of them should contain a good percentage of alcohol. The use of salts should be avoided, for, while they will not evaporate like alcohol, they have [illegible] on the metal, and also eat the rubber hose connections. Wood, grain, or denatured alcohol may be used, and it may be added to the water alone or combined with a percentage of glycerin, which has a tendency to hold the alcohol and prevent it from evaporating so quickly. Too much glycerin should not be used, however, for it is likely to have a disintegrating effect on the rubber hose.

WHY AUTOMOBILE GETS OLD

Car Which Has Seen 100,000 Miles and Bearings Are in Good Condition Is New Machine.

The life of the bearings of a car determines the usefulness of the entire machine. A car with badly worn bearings is an old car, even though it may have traveled less than 10,000 miles, whereas one which has seen 100,000 miles to use and still has bearings in good condition is, comparatively speaking, a new machine.

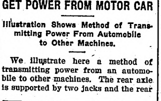
Wear on bearings is determined by four conditions, H. W. Slauson writes in Leslie's. First, the load which that bearing carries; second, the speed at which the bearing surfaces move over each other; third, the nature of those surfaces and their ability to resist wear; fourth, the lubrication which those surfaces receive and its ability to prevent the formation of the destructive heat of friction.

The matter of load becomes a matter of size, for with a given load it is but that with a large surface over which to distribute the pressure, the load on each square inch of bearing surface will be less. This means that the life of bearings will, in general, be in proportion to their size.

GET POWER FROM MOTOR CAR

Illustration Shows Method of Transmitting Power From Automobile to Other Machines.

We illustrate here a method of transmitting power from an automobile to other machines. The rear axle is supported by two jacks and the rear wheels are belted to pulleys on a shaft beneath the floor. The power is taken from a third pulley on this shaft.—Wisconsin Agriculturist.



How Power Is Transmitted.

OLD TIRES ON REAR WHEELS

Danger of Blowout Is Greatest on Front of Car if Traveling at Twenty-Five Miles.

The popular idea that repaired or questionable tires are used to best advantage on the front wheels is a perilous one. The danger of a blowout when traveling 25 miles an hour or better is greatest if the blowout occurs on the front wheels. A serious accident seldom results from a rear tire blowout. Put your old tires on the rear wheels.

News of the State

Condensed for Busy Folks

New Ulm, charged with being the home of a number of "disloyal Americans," oversubscribed its Liberty Loan quota of $250,000. It is assured that subscriptions will total at least $10,000 more than the allotment.

Lloyd G. Pendergast, Civil war veteran and member of the Minnesota legislature from the Sixty-second district, died at Carson City, Nevada. Representative Pendergast was 75 years old. He had been in ill health for some time.

Dates for the Northwest loyalty meetings in St. Paul and Minneapolis have been set for November 16 and 17. The first meteing will be at the Auditorium in St. Paul. Announcement of the dates was made by F. W. Murphy of Wheaton, chairman of the general committee.

Two men were at Moose Lake trying to buy potatoes, but they were unsuccessful. A number of farmers have already disposed of a part of their crop, receiving from 80 cents to $1.10 per bushel. Others have stored their potatoes, awaiting a more convenient time to market them.

Conscience-stricken and weary of being a fugitive, Herman L. Kuebler, 67 years old, appeared at the Winona county jail and gave Sheriff J. W. Parr the names of 18 liquor houses in the twin cities, some wholesale dealers and operators of saloons, upon whom he had passed forged checks in December and January.

Three cases in which the National Elevator company seeks to recover from the Great Northern railway company for wheat alleged to have been lost from cars while in transit, are to be tried at a special term of Beltrami county district court at Bemidji. Much interest is being manifested in the trial of one of the cases, as there are 471 separate causes of action cited.

The great war will have a beneficial effect on the people of the United States, according to Dr. C. H. Mayo, of Rochester. He declares that the people of this country will be amalgamated as a result of being called on to fight the highly scientific and organized Germany. "There can be no question in the world about the outcome of the conflict," Dr. Mayo said. "Germany can't whip us."

Hunters will get the best big game shooting in years, from November 10 to November 30, according to Game Warden J. E. Kreager, who spends most of his time in Northern Minnesota forests. "Never saw so many deer in my life in St. Louis county as I have run across this fall," said Kreager. "And I have never seen deer looking so sleek and plupm. The animals have had a great year—there was plenty of grass and water."

Official notice has been sent by the government to masters and pilots on the Mississippi river that the stretch of river between Burlington, Iowa, and St. Paul would be lighted for the last time the night of October 31.

James M. Elder, 58 years old, interested in mineral and farm lands on the Cuyuna range, died at Owensboro, Ky., following an operation for appendicitis. Mr. Elder was identified with the Democratic party in Minnesota politics and is widely known throughout the state.

J. J. Opsahl, of Bemidji, president of the Northern Minnesota Sheep Growers' association, has received applications from farmers in the following communities for sheep to feed and has orders for eleven carloads: Deer River, two carloads; Grand Rapids, one; Akeley, two; Kelliher, two; Pequot, one; Boy River, one; Grygla, two.

Miss Helen Sandstrom, 18 years of age, who has been working as a domestic in Red Wing for several months past, sent a bullet into her breast at the home of Mrs. William Pumplin, and is at the Red Wing hospital in a critical condition. Dr. A. E. Johnson said the girl had a slim chance for recovery. The young woman gave no reason for her act.

F. S. Schwalen, presiden and cashier of the Triumph State bank, who was arrested and held for trial on $1,000 bail, on a charge of obstructing the sale of Liberty Loan bonds, subscribed $3,000 worth of bonds for the Triumph State bank and $500 worth for himself at an impromptu mass meeting which was addressed by members of the local Liberty Loan committee.

As an indication of the effect the car shortage is having on the coal supply, Judge John F. McGee, state fuel administrator, Tuesday night said one dock company at Duluth and Superior has orders for 468 cars of coal, but haven't a car with which to move the fuel. "This will give the people an idea of what we are up against in Minnesota," Judge McGee said. "Out of the orders mentioned above, two-thirds are for hard coal."

Emil Eisenmenger, a patient in the tuberculosis building at the St. Peter state hospital for the insane, looped his belt strap around his neck, fastened it to the head of the bed, and strangled himself to death. His act was attributed to despondency following the receipt of a letter from his brother.

At a special election citizens of Hawley decided that the electric light franchise should be transferred to the local mill, and the water and light commission is making arrangements to do so. The mill has promised [illegible] day service.

MANY IMMIGRANTS COMING TO STATE

MINNESOTA OUTDISTANCES ALL OTHER STATES FIVE TO ONE FIGURES SHOW.

ROAD BUILDING IS PLANNED

Double Program For 1918 For Combined State And Federal Construction Being Worked Out.

St Paul.

Minnesota outdistanced its nearest competitor by 5 to 1 in the number of immigrants' movables handled during September through the Minnesota Transfer railway, Fred D. Sherman, state immigration commissioner, announces. Of 243 cars handled, Minnesota received 100, North Dakota 20, Montana 19 and Canadian points 15, the balance going to scattering states. During the corresponding month last year, 157 out of 363 cars of immigrant movables were consigned to Minnesota points. "Although the number of cars is small, Minnesota's percentage is good and the showing is very satisfactory," said Mr. Sherman.

* * *

Road Building Program.

A double road building program for Minnesota for 1918 is being worked out successfully by the state highway department. The regular road building program will be carried out and to this will be added the federal aid projects.

C. M. Babcock, highway commissioner is making federal aid apportionments only where a special levy is made by counties to meet their share.

The federal government will contribute $425,865.40 and the state must put up an equal amount for the various projects.

A special law was passed by the legislature permitting the counties to make extra levies in order to be able to secure a part of the federal aid fund. The counties can levy 5 mills on a valuation up to $10,000,000; 3 mills from $10,000,000 to $25,000,000 and 1 mill above $25,000,000.

* * *

Guarding Governor's Home.

Threats against the lives of Governor Burnquist's wife and children in anonymous letters received by Mrs. Burnquist, resulted in the detachment of six men from the Fourth Minnesota infantry being detailed to guard the Governor's home.

"Mrs. Burnquist has received several threatening letters," Gustav Lindquist, secretary to the Governor, said, "and that was the reason for the establishment of a night guard on the Governor's home.

"One letter in particular which caused apprehension was from a person who criticised the Governor for advocating patriotic submission to draft laws and warned Mrs. Burnquist that her life and those of her children might be taken that the Governor would know the sorrow of losing loved ones.

"Many similar letters, some signed with skull and crossbones, and from places as distant as New York and Maine, have been received by the Governor and little attention paid to them," Mr. Lindquist said. "But when they began reaching Mrs. Burnquist it was thought time to take precaution against cranks and fanatics."

* * *

No Fixing of Retail Prices.

There will be no fixing of retail prices in Minnesota by the food administration.

This is the announcement made by A. D. Wilson, food administrator. Professor Wilson says there may be conferences with wholesalers and retailers looking to reductions in prices. He asserts that the food control bill does not even give Mr. Hoover power to fix retail prices.

* * *

Potato Cost Dependent on Cars.

Potato prices are absolutely dependent upon the supply of cars and as soon as there are plenty of cars the prices will come down with a rush, according to H. J. Hughes, chairman of the potato committee of the Minnesota Public Safety commission. Even with plenty of cars, however, there is still 15 to 20 per cent of the potatoes which are a total loss because of storage facilities.

* * *

Appointed Capitol Postmaster.

Edgar Ellis, a Civil War veteran living at Minneapolis, has been appointed by Governor Burnquist postmaster at the Capitol to succeed C. E. Olmstead, Minneapolis, who resigned on account of ill-health. Mr. Ellis was formerly a resident of Kasson, Minn., and formerly postmaster in the House of Representatives.

* * *

To Fight Floods.

The Minnesota valley drainage and flood control district of Ortonville is the first Minnesota organization under the new state law authorizing property owners along the borders of the state to undertake drainage projects with similar organizations in adjoining states. Its articles were presented in the office of the secretary of state. The purpose is to drain thousands of acres in the Minnesota valley by building dikes on the lake and straightening and otherwise improving the Minnesota river.

COLONEL HOUSE, WILSON'S FRIEND NOT A MYSTERY

Unofficial Counsellor of the President Is a Modest But Well Posted Man.

STUDENT OF WORLD AFFAIRS

Now Gathering Data on Economic and Other Problems Which Must Be Solved at the Peace Table—Has Qualifications That Go to Make a Sound Diplomat.

AUTHOR'S NOTE—Men have made a mystery of the life and the doings of Col. Edward M. House, the friend and adviser of Woodrow Wilson. If there has been mystery, it is none of the Colonel's making. I venture the hope that whatever may have seemed to be hidden is disclosed in this article, the material for which was obtained in the only way in which such material can be obtained, by direct personal contact, inquiry and study.

By EDWARD B. CLARK.

(Copyright, 1917, Western Newspaper Union.)

Washington.—Who is Col. Edward Mandell House who is to gather war data for the United States government for service on a future day of peace? This is a question that is being asked by a very large proportion of the people of the United States and in fact of all the allied nations.

Colonel House does not wear the record of his deeds on his sleeve. It is probable that if this unofficial counsellor to the president of the United States were to be elected to congress the autobiography which he would prepare for the congressional directory would read like this:

Edward Mandell House, Democrat of Austin, Texas; born 1858; elected to the ——— congress, November. ———

In this brief, ultra-modest, if you will, way would this Texan be prompted to write an autobiography, justified doubtless from the viewpoint of other men in being extended into many chapters.

Who is Col. Edward Mandell House, who, until the day when the final order "Cease Firing" comes, is to study in behalf of the government of the United States the economic, the geographic, the democratic and the humanitarian problems which the American counsellors at the peace table must seek to solve after a manner which the people of a great democracy can approve?

Consulted by President.

In the Washington dispatches something like this is read several times a year: "Colonel House has been in the city for twenty-four hours as the guest of the president. He will leave for New York tomorrow morning."

Beyond this the reader gets nothing from the dispatches except the word that the president and his visitor discussed Mexican matters, or European matters, or it may be, but in this latter case rarely, political matters.

The public has known little more about Colonel House than that he is a man frequently consulted by Woodrow Wilson and a man in whose judgment on political, economic and legislative matters the president puts confidence. There is a sort of a glamour about men and things which are mysterious. It would seem that because of the attraction which mystery has for the people, as shown if you will in their gluttonous reading of detective stories and the like, that writers of the news of the day in part have chosen to treat the goings and comings of the colonel and his conferences with men of affairs as if they were a deliberate attempt to hedge them in and hide them from public knowledge.

It is just as possible to get at the truth in the case of Colonel House as it is in the case of any other man whose doings are of public interest. It is modesty not mystery which has been the basic difficulty.

Colonel House will not tell you that he is a modest man, as I know from personal contact with him. To claim modesty for one's self is to be immodest. He does go from his present abode in New York city to Washington occasionally or frequently as the requests may come, to give what he can of "the counsel of his views" to the president of the United States. Why should he any more than any other man send a trumpeting herald ahead or a band of cymbal clashers?

He goes to the White House, stays his while and leaves, and because no great noises fill the streets at approach or departure, exclusiveness, seclusiveness and secrecy have been the order of the day's words concerning each visit.

Gives No Word of Work.

It perhaps is not too much to say that if the full record of the results of the conferences which House of Texas has had with Wilson of the United States is to be read it must be sought in some of the accomplished deeds of the present administration. That Woodrow Wilson has been moved to certain courses or strengthened in his purpose to pursue them, by the counsel of Edward M. House is not to be doubted. The impossible task would be to get from the latter a definite word concerning the public work in which his counsel has played a part.

Those who have built up a wall of mystery about the man who is studying matters against the day of peace apparently have not wished to pull down their handiwork. The wall can be demolished by anyone who tries to get at the foundation of the fiction.

Edward M. House lives as open a life as that of any American whose profession or business does not call him daily into the places where men throng. If one wants to know about him through motives other than those of the idleness of curiosity he can see him and talk with him, and the chances are that he will be told everything concerning the subject of his inquiring curiosity that any man of modest mien and inclination naturally would be willing to tell. Colonel House is a genial man who seemingly never has sought to define for personal use the meaning of either of the words, coldness or austerity. He has a sense of humor well developed, and a temperamental warmth.

Secret of His Power.

In Houston, Texas, in the year 1858, Edward M. House was born. He was educated at the Hopkins grammar school, New Haven, Conn., and at Cornell university. He has been active all his adult life in Democratic politics, but never has been a candidate for office.

Add to these admittedly meager details one fact and unquestionably you will have the secret of this man's power to attract other men to him for the purpose of consultation on really high public matters. From the day that he was old enough to undertake serious study, Edward M. House has been deep in the books of politics, economics and legislation. He has marshaled in his mind all the greater events which have happened in these three words. Moreover, he has the men, the things and the motives connected with each case constantly in procession before him. He is quick to trace a cause to an effect, or to go the reverse route. He has been a student of human nature as it has shown itself in many of the great problems of human life. This means that he has in him, or at any rate men believe that he has in him, the qualifications which go to make up a sound diplomat.

Through successive administrations in Texas the governors of the state, one after another, consulted Colonel House on public matters. How deep an impression he has made on Texas legislative history never may be known definitely, but there is enough salient to make Texans know that they are right in attributing to him many of their public welfare acts.

Though not accounted wealthy in these days of huge fortunes, Colonel House is quite well fixed financially and is not engaged in business of any kind.

Has Studied Hard.

I have talked to Colonel House and have learned things which make me feel that I shall not go wrong when I try to put an interpretation upon some of his methods of doing things. He is free enough to say that he has studied hard at economic, political and legislative subjects. He probably, even would be willing to admit that he thinks the results of these studies continued and their results retained, have enabled him to be of some service when men were seeking information concerning events in the past which have relation to events in the present or events expected in the future.

Therefore, there is here a man who has held what he has studied, who has collated and correlated the happenings of history, who has drawn lessons from them, who takes an interest as deep in the living present as he does in the dead past, and who men believe is able to make his knowledge serviceable, for old as it is let us say it, history repeats itself.

Woodrow Wilson did not meet his friend Colonel House until the days when he was holding office as governor of New Jersey. It is said by friends of Mr. Wilson that almost instantly he came to understand why the Texan had been of service along constructive lines to some of the governors of the state in which he has lived most of his life. For six or seven years Mr. House has been the confidant and the counsellor of the president of the United States, and seemingly time enough has gone by and things enough have been proved or disproved to give certainty to the word that Woodrow Wilson has found Edward M. House an advisory asset.

There hardly can be much of real mystery about a man who twice since this great war began has been sent abroad as a special commissioner for the president of the United States. Colonel House has been twice in Berlin, five times in Paris, and frequently in other of the great European capitals. Some day it may be that Woodrow Wilson will write what may be called an autobiographical review of his administration. If he does it is entirely likely that the part taken by Colonel House in the shaping of some of the policies of the president may be given the page place which many men believe that it deserves.

No Mystery There.

While living in New York Colonel House resides in an apartment not very far uptown. It is a homelike place where good books are found and where good friends may come. It is a genial place and no curtain of mystery hangs over the door of any one of its rooms. Men go there and are welcome. They go and they talk. Man learns as much from man as he learns from books and more perhaps if we believe the ancient saying about the proper study of mankind.

I asked Colonel House what his recreations are. He said, "Friends, reading and walking." His library shelves show the kind of books that he has read, still is reading and will continue to read, for those in the book cases are made the companions day by day of the others as they come from the hands of writers worth while.

No man probably can read politics, legislation, economics and history constantly without getting some of Dr. Dry-as-Dust's characteristics. So it is that Colonel House does not read the four formidables constantly. He turns to fiction and here one finds something of possibly more than passing human interest.

George Frisbie Hoar of Massachusetts was one of the scholars in politics. It was said of him that he had read everything from Aristophanes' "Frogs" to Locke's "Human Understanding" and from this latter book of "dismalaties" to the lighter minded reader, down to everything heavy and semi-heavy which was published to the week of his death. Senator Hoar kept his mental condition balanced by turning not merely from the heavy to the light on occasion, but to the actual featherweights of fiction. He read "Nick Carter."

Woodrow Wilson, it is said, turns away from the studies of states, past and present and in prospective to the reading of what the English call penny dreadfuls, and what the Americans in the old days called yellow backs. It is said that the speaker of the house of representatives, Champ Clark, stops frequently his mental digging into all kinds of history to take up for relief purposes books of the kind which make a boy happy.

Reads Good Fiction.

In the library of Colonel House there is plenty of good fiction. He does not turn to Nick Carter, nor to "The Hidden Hand" of Mrs. E. D. E. N. Southworth, nor yet to "Owl Face, The Pawnee" of Beadle dime novel fame, but he manages to keep the mental balance even by an evening lamp hour or two with the writers of fiction who can lay claim to what the book reviewers call literary merit.

Today Colonel House is entering upon the work of preparing material which one day, perhaps far in the future, will be serviceable to the American commissioners at the great peace conference. Another has written this concerning the choice by the president of Colonel House for this work: "He is peculiarly qualified for it by his diplomatic experience of recent years, by his study of political problems which the war has raised and by his integrity of mind and character."

"Sherlock, will you take on the House Mystery Case?"

"Mystery? my dear Watson, there isn't any."

Col. Edward M. House.

OLD PRESCRIPTION FOR WEAK KIDNEYS

A medicinal preparation like Dr. Kilmer's Swamp-Root, that has real curative value almost sells itself. Like an endless chain system the remedy is recommended by those who have been benefited to those who are in need of it.

Dr. Kilmer's Swamp-Root is a physician's prescription. It has been tested for years and has brought results to countless numbers who have suffered.

The success of Dr. Kilmer's Swamp-Root is due to the fact that it fulfills almost every wish in overcoming kidney, liver and bladder diseases, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

Do not suffer. Get a bottle of Swamp-Root from any druggist now. Start treatment today.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

The Etiquette of the Case.

George Pfeiffer, a Muncie druggist, has a daughter of seven years who is having her first experience in school, according to the Indianapolis News. At the supper table the other evening, the child said to her father, "Papa, a little boy in my room asked whether he could take me home from school, this afternoon."

"Well, what did you say?" asked the parent.

"Why, I didn't say nothing," she replied, "but I did what any little girl that hadn't been introduced would do—I slapped him in the face and then bit him on the finger."

THE BEST BEAUTY DOCTOR

Is Cuticura for Purifying and Beautifying the Skin—Trial Free.

For cleansing, purifying and beautifying the complexion, hands and hair, Cuticura Soap with touches of Cuticura Ointment now and then afford the most effective preparations at the minimum of cost. No massaging, steaming creaming, or waste of time.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

"Feminalls" Are Worn.

One of the packing houses in the stock yards in Chicago has persuaded its women employees to wear what it calls "feminalls," another form of overalls. The women at first objected, but as so much machinery with belts and other contrivances that are likely to catch in the dresses of women are used, the managers persuaded five women to try it, and it was then easy for the rest to don the feminalls. In this particular place 7,000 women are employed, about three times as many as last year, and much of the work they do was formerly done by men.

$100 Reward, $100

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work. $100.00 for any case of Catarrh that HALL'S CATARRH MEDICINE fails to cure. Druggists 75c. Testimonials free.

ALL MEN AT HOME SHOULD PREPARE FOR WAR

The first test a man is put thru for either war or life insurance is an examination of his water. This is most essential because the kidneys play a most important part in causing premature old age and death. The more injurious the poisons passing thru the kidneys the sooner comes decay—so says Dr. Pierce of Surgical Institute, Buffalo, N.Y., who further advises all people who are past thirty to preserve the vitality of the kidneys and free the blood from poisonous elements, such as uric acid—drink plenty of water—sweat some daily and take Anuric, double strength, before meals. 60c a package.

This An-u-ric is a late discovery of Dr. Pierce and is put up in tablet form, and can be obtained at almost any drug store. For that backache, lumbago, rheumatism, "rusty" joints, swollen feet or hands, due to uric acid in the blood, Anuric quickly dissolves the uric acid as hot water does sugar. Take a little Anuric before meals and prolong life. Send 10 cents to Dr. Pierce for trial package of Anuric.

NEWS FROM ST. PAUL

St. Paul, Minn.—"I just want to say that Anuric has done for me what many other remedies have utterly failed to do. For over thirty years I suffered with rheumatic pains. At times I would have them in my back, then they would start in my left shoulder and run down into my arms, also in my left side extending down the limb to my ankle. A short time ago I heard of Dr. Pierce's Anuric. I have only taken one bottle of the tablets and today have not a pain or an ache—thanks to Anuric."—JOHN EVENSON, 1069 Greenbrier Ave.

Brainerd, Minn.—"I have been suffering terribly with woman's weakness and a catarrhal condition. I have had backache, severe pains in my side. Dr. Pierce's Favorite Prescription has given me the first real relief in three years."—MRS. CAROLYNE HILL.—Adv.

ARMY FRATERNITY.

We hear a good deal lately about democracy in the army, particularly on the part of officers from the National Guard. The West Pointers are, of course, more inclined to a strict interpretation of the conventions. With all due respect for those conventions and for the keenest discipline, we believe that it is the democratic spirit which will help us most to win. The private soldiers in our army are from all stations in life, says Ohio State Journal. Many of them are young men of greater wealth and more conspicuous social standing than the officers who command them. It is their love of a democratic country which has inspired them to enter the army, without seeking rank—merely to serve. Neither they nor any of the other men in the army need to be patronized to be disciplined. We are told by the best authorities that it is the spirit of fraternity in the French army which has made that organization so indomitable. And that is the feeling that appeals most to Americans. The officer who can command his soldiers with authority in the ranks, but pal with them when off duty is the kind of which big men are made.

The finance minister at Wurttemberg states that thus far Germany has expended in the present war $25,000,000,000, and that the yearly interest on this sum will approximate $1,500,000,000, or something like $100 per capita for the taxpayers in the German empire. This does not allow for expenses that will come after the war for pensions and rehabilitation and the upkeep of local and general government, says Milwaukee Wisconsin. If the war ends without indemnities for Germany, the burden upon German taxpayers will aggregate $200 per capita. On other European countries involved in the war there has been imposed a load of financial obligation as great or greater, and now the United States is accumulating liabilities at an appalling rate. How much scope will be left, when the war is over, for outlay to finance future militarism? Certainly, if the nations pay for what they owe they will have but slender resources for investment in preparation for future war.

Announcement is made by wild game conservation societies in different parts of the United States that game is no longer decreasing, says Christian Science Monitor. With the rapid clearing of forests and with too lax laws for the protection of birds and animals the country apparently faced, until a few years ago, the extermination of wild life. Reforestation and the setting apart of large forest reserves have helped in the work of conservation. The result will be more noticeable from year to year. In many sections of the country, too, laws have been passed supplementing the federal migratory bird provision, which insure valuable and timely protection.

For the twentieth time since the war began, it has been decided by scientists that the war has nothing to do with the weather. About once in two months it appears necessary for learned men to write to the papers and magazines, carefully explaining how it is entirely impossible for any amount of heavy cannonading to bring on thunder showers. And it doesn't do a bit of good; people go right on believing what they like.

The Louisville Courier-Journal says there is no contemporary American literature, which can be distinguished as national or racial. "Surely the novel has exhausted itself. It can only follow after and repeat. Whether of love, or adventure the story has been told. It is 'all in.'" Perhaps the boys who go to Europe will collect material for new books and a literary revival will follow the conclusion of the war.

One thing which the war has killed off in this country is the hyphen. Henceforth, all residents will be either American citizens or aliens. There will be no hyphenated hybrids with a dual allegiance working to the disadvantage of this country.

The petty plunderers of the German army have stripped a whole province of its clocks. This, perhaps, is but carrying out the chancellor's contention that the more time the Teutons get the greater the chances of victory.

Patriotic citizens should beware acting unwittingly as press agents for agitators. All those fellows want is to attract attention. Give them rope enough and they'll hang themselves.

After Nick Romanoff has had a row with the janitor of that flat over the lack of heat on some cold day next winter, he will know what it seems like to deal with a czar.

Cleanliness may be next to Godliness, but there is a lot of dirty work done from soap-box rostrums.

All we can say regarding praise of the new silhouette gowns is that seeing is believing.

The ELEVEN TOWNS
H. W. Smith, Editor & Publisher

Entered at the Postoffice at Goodridge, Minn. as second class mail matter.

We have arranged for a series of six interesting articles, "War Talks, by Uncle Dan," written by Mr. Howard H. Gross, president of the Universal Military Training League, of which this is the first. They tell in a graphic way why military training is of value, both to the nation and to the individual, and our readers will find them of unusual interest.

An Iowa man claims to have discovered a synthetic process by which tan shoes can be made for $2.50 a pair from a composition of cornstalk and glucose that looks as well and will wear as well as leather. This is important, if true.

Now someone has discovered that it is quite possible to graft lilac blossoms onto shade trees. They are making it harder and harder for a man to know when he is in the straight and narrow path.

Mrs. Luther Burbank, wife of the California plant wizard, thinks she has discovered the solution of the servant-girl problem. The way to secure efficient domestic service, she avers, is to set a working day schedule and insist that the maids shall arrange for board and lodgings under another roof. The plan would be impracticable, of course, except in cities, but it is in cities that the difficulties of the old domestic service system are at their worst.

Mortgage Foreclosure Sale.

Default having been made in the payment of the sum of Three Hundred Eighty-eight and 50 | 100 ($388.50) Dollars, which is claimed to be due and is due at the date of this notice upon a certain Mortgage, duly executed and delivered by John W. Sundahl and Coroline Sundahl, his wife Mortgagors, to First National Bank of Thief River Falls Mortgagee, bearing date the 26th day of September 1911, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the County of Pennington and State of Minnesota, on the 9th day of October 1911, at 10:00 o'clock A. M. in Book 5 of Mortgages, on page 255, and no action or proceeding having been instituted, at law or otherwise, to recover the debt secured by said Mortgage or any part thereof.

Now, Therefore, Notice is Hereby Given, That by virtue of the power of sale contained in said Mortgage, and pursuant to the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises described in and conveyed by said Mortgage, viz:

Lots numbers four (4) and five (5) of Block number four (4) of Porters Addition to Thief River Falls, Minnesota, according to the official plat thereof on file and of record in the office of the Register of Deeds in and for said Pennington County and State of Minnesota, with the hereditaments and appurtenances; which sale will be made by the Sheriff of said Pennington County at the front door of the Court House, in the City of Thief River Falls in said County and State, on the 15th day of December 1917, at Ten o'clock A. M., of that day, at public vendue, to the highest bidder for cash, to pay said debt of Three Hundred Eighty-eight and 50 | 100 Dollars, and interest, and taxes, if any, on said premises, and Twenty-five Dollars Attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law, subject to redemption at any time within one year from day of sale, as provided by law.

Dated October 30th, A. D. 1917.

First National Bank of Thief River Falls,
Mortgagee.

The Goodridge Young Peoples' Society met at the home of Mr. and Mrs. Theo Gilbertson Sunday afternoon. A large crowd was in attendance and a collection of $5.80 was taken up. The following officers were elected: Pres., Martin Westby, Vice-Pres., Ellert Wiseth, Sec'y., Anna Gunderson, Treas., Kaia Lund. The invitation for the next meeting to be held the first Sunday in December is still open.

First Potato Contest.

The first Pennington County Annual Potato Show will be held on Nov. 17, 1917, in the Commercial club rooms at Thief River Falls. In order to insure the show being an annual affair the bankers of the county have offered as a sweepstakes prize a beautiful silver cup which must be won three times to become the personal property of the winner. Each year the name of the winner for that year will be engraved upon the cup. The merchants of the county have offered many useful and beautiful prizes ranging in value from $1.50 to $12.00.

Exhibits should consist of from one half bushel to one bushel samples. Those bringing the bushel samples will have the advantage in that they will be able to reduce the sample to a half bushel by discarding the poorest of them after hearing the judge discuss potato points. This will be a decided advantage to those whose samples win honors high enough in the local show to entitle their potatoes a place in the Pennington County exhibit at Brainerd Dec. 6 and 7, 1917.

Exhibits will be taken care of at any time prior to the show if left at the Commercial club rooms, or high school, in care of, or shipped direct to Ross P. White, Thief River Falls, Minnesota.

All who can, should have their exhibits in on, or before Friday, Nov. 16, and all samples to compete in the local show must be in by 9:30 A. M. Saturday, Nov. 17, 1917.

Each potato grower may exhibit as many varieties as he has grown, but not more than one sample in any one variety.

All potatoes exhibited must be the sample of Pennington county soil.

All exhibits which win a place in the county exhibit to be sent to the state show will receive a cash prize of $1.00, besides the regular prizes offered by the business men of the county.

As large an exhibit as possible should be made at the county show so a creditable showing may be made at the state show at Brainerd. Pennington county has raised some good potatoes of high quality this year in spite of the dought and some of the yields are proving to be very good.

Let us show the people of the state what can be done along potato lines in this county. Watch the papers for a list of the prizes.

DEDICATION OF GOODRIDGE CONSOLIDATED SCHOOL

The Goodridge school house, which is now fully completed, was dedicated last Friday evening. An appropriate program was rendered by the school children and others, also short addresses were given by County Superintendent of Schools, E. A. Mostue, Rev. G. L. Parish, of the Methodist Episcopal church of Thief River Falls and Prof. J. H. Hay, Superintendent of Thief River Falls schools. The addresses were interesting all through and was very much enjoyed by all present. After the dedication ceremony was over the school building was thrown open for inspection of visitors.

STAR NOTES.

Halvor Syverson departed Thursday for western Canada, where he contemplates taking a homestead. Mr. Vatne, who has already taken a homestead there, went in company with Mr. Syverson.

Mrs. O. Tharaldson and daughters, Oppie and Evelyn, visited at the Andrew Vake home Thursday afternoon.

Born, to Mr. and Mrs. Zakarias J. Hole, Sunday, a bouncing baby boy—all doing well, and Zakarias wears the smile that enduras.

Those from S. E. Star who took in the Larson auction sale in Reiner township last Thursday were: Knut Danielson, Tollef Hovet, Gust Iverson, Ole Tharaldson, Salve Omlid and Z. J. Hole.

Tharald Tharaldson, accompanied by his brother-in-law, Hr. Lee, left last Friday for the lumber woods.

Mr. and Mrs. H. A. Dahlen and son, Olaf, departed Monday for an extended visit with relatives and friends at Kindred and other North Dakota points.

CHURCH NOTICE.

Rev. Schultz will conduct English services in the Norwegian Lutheran church at Erie next Sunday at 11 a. m. and in Goodridge Church at 8 p. m.

Tuesday evening at 8 p. m. Sam Miller will speak on Indian Mission in the Nowegian Lutheran church at Goodridge. Mr. Miller, himself an Indian, is a Carlysle University graduate and a very able speaker. He has a message for you. Everybody welcome. Don't forget the date Tuesday evening Nov. 13th at 8 o'clock p. m.

NOTICE.

The Goodridge congregation advertised to meet after the ladies aid auction was posponed to November 14th at one o'clock p. m. Every member is urged to be present at this meeting.

Second Number.

The second number of the University Lyceum Course will be given in the school house next Monday evening November 12th at 8 p. m. The Flora Prentiss Company will be the entertainers of the evening. This promises to be a good number and you should not miss it.

Picking Out an Exhibit of Potatoes.

In picking out an exhibit of potatoes for sow purposes it must be kept in mind that the judge will look at the exhibit from the standpoint of market demands and type characteristics. On new soil and under healthy conditions the tendency of nearly all varities is towards wide and flat tubers. Potatoes with a circular cross section are to be avoided and flat wide tubers selected. Wideness is associated with health and vigor. There is a tendency to hollowness in a round potato which will not be found in a flattened one. Flat tubers are the easiest to pare and are the most desirable type for cooking, and consquently are the type demanded by the markets. Large yields have also been associated with the flat type of potato.

The Burbank and Early Rose are both naturally long but have been found to lack vigor in some localities further south but seem to be doing throughout this section of the state. The Rural, Perl, and Cobbler are of ities are taking the place of Early Ohio, Early Rose, and Burbanks.

Different varities have a tendency the short flat type and in many localtowards a different shape but it must be remembered that conditions and seasons modify the shape to a considerable extent. It is therefore impossible to always determine the variety by shape and external points. Frequently it will be necessary to sprout the potato and make a study of the sprout in order to determine the variety.

It is well to remember that uniformity of size, shape,, and color will be looked upon with much favor by the judge. Pick a sample of medium sized to large tubers and then do not spoil it by putting in one or two great big potatoes just because you happen to have them. Uniformity is an important point and must be kept in mind. Keep in mind that there is no market for the overly large potatoes and we are growing potatoes for market. Do not put into your exhibits long run out or knotty tubers for they show an uneven growth and are not typical of any variety.

Extension bulletin No. 20 of the Iowa station discusses tuber shape and color as follows:

Rural New Yorkers are wide, flat types when at their best. End rounded much alike. Stem end usually not recessed. The skins have a bluish violet color and turns purple in a day or two if exposed to sunlight.

Early Ohio: In the best conditions, Ohio tubers are somewhat flattened and slightly tapering, with stem end a least bit recessed. Many corn belt OOhios have flush stems and thick tubers with circular cross section somewhat enlarged towards the seed end. Eyes are evenly distributed as on all unflattened tubers and rather numerous. Skin brownish pink, almost "white" (human flesh color) to red changing on long exposure to light, to a weathered grey brown.

Irish Cobbler: The finest type is flat and wide like good Rurals but there is a very distinct round, rough, deep eyed type formed in poorer conditions, and the two types may not be found in the same field or locality or season, although they are one and the same variety and so prove themselves when grown together. In some cases large tubers are pear shaped and rough like the largest Rurals and may combine the pear shape with the heavy eye brow types of the Rural. Flat Cobblers have been sold under the name, Eureka or Extra Early Eureka. Skin smooth yellowish white, changing in the light to dull olive green with a suggestion of blue.

Burbanks are long, largest at teh center. Best type, shorter, wide and flattened. Poor type spindle shaped. Stem end flush. Eyes shallow or flush. In poor conditions very subject to knots and to tubering above ground. Skin white, changing in light to greenish gray brown.

Mortgage Foreclosure Sale.

Default having been made in the payment of the sum of Three Hundred Eighty-eight and 50 | 100 (388.50) Dollars, which is claimed to be due and is due at the date of this notice upon a certain Mortgage, duly executed and delivered by John W. Sundahl and Coroline Sundahl, his wife Mortgagors, to First National Bank of Thief River Falls Mortgagee, bearing date the 26th day of September 1911, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the County of Pennington and State of Minnesota, on the 9th day of October 1911, at 10:00 o'clock A. M. in Book 5 of Mortgages, on page 255, and no action or proceeding having been instituted, at law or otherwise, to recover the debt secured by said Mortgage or any part thereof.

Now, Therefore, Notice is Hereby Given, That by virtue of the power of sale contained in said Mortgage, and pursuant to the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises described in and conveyed by said Mortgage, viz:

Lots numbers four (4) and five (5) of Block number four (4) of Porters Addition to Thief River Falls, Minnesota, according to the official plat thereof on file and of record in the office of the Register of Deeds in and for said Pennington County and State of Minnesota, with the hereditaments and appurtenances; which sale will be made by the Sheriff of said Pennington County at the front door of the Court House, in the City of Thief River Falls in said County and State, on the 15th day of December 1917, at Ten o'clock A. M., of that day, at public vendue, to the highest bidder for cash, to pay said debt of Three Hundred Eighty-eight and 50 | 100 Dollars, and interest, and taxes, if any, on said premises, and Twenty-five Dollars Attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law, subject to redemption at any time within one year from day of sale, as provided by law.

Dated October 30th, A. D. 1917.

First National Bank of Thief River Falls,
Mortgagee

J. M. Bishop,
Attorney.

Don't fail to see the great photo play "The battle of Gettysburg". The most famous battle of the Civil War. Coming to the Grand Theatre, Goodridge, Thursday evening Nov. 15th.

Coming to the Grand Theatre, Goodridge on Thanksgiving night, Nov. 29, "The Libertine" with a dance arter the show. Music by Thief River Falls Orchsstra and an oyster supper at the Brick Hotel.

Mr. and Mrs. Forest Holten, who have been living on the Hay farm for the past two years, left Wednesday evening for Iowa where they will visit relatives for a few days before they leave for western Kansas, where they intend to locate.

The Goodridge Young Peoples' Society met at the home of Mr. and Mrs. Theo Gilbertson Sunday afternoon. A large crowd was in attendance and a collection of $5.80 was taken up. The following officers were elected: Pres., Martin Westby, Vice-Pres., Ellert Wiseth, Sec'y., Anna Gunderson, Treas., Kaia Lund. The invitation for the next meeting to be held the first Sunday in December is still open.

First Potato Contest.

The first Pennington County Annual Potato Show will be held on Nov. 17, 1917, in the Commercial club rooms at Thief River Falls. In order to insure the show being an annual affair the bankers of the county have offered as a sweepstakes prize a beautiful silver cup which must be won three times to become the personal property of the winner. Each year the name of the winner for that year will be engraved upon the cup. The merchants of the county have offered many useful and beautiful prizes ranging in value from $1.50 to $12.00.

Exhibits should consist of from one half bushel to one bushel samples. Those bringing the bushel samples will have the advantage in that they will be able to reduce the sample to a half bushel by discarding the poorest of them after hearing the judge discuss potato points. This will be a decided advantage to those whose samples win honors high enough in the local show to entitle their potatoes a place in the Pennington County exhibit at Brainerd Dec. 6 and 7, 1917.

Exhibits will be taken care of at any time prior to the show if left at the Commercial club rooms, or high school, in care of, or shipped direct to Ross P. White, Thief River Falls, Minnesota.

All who can, should have their exhibits in on, or before Friday, Nov. 16, and all samples to compete in the local show must be in by 9:30 A. M. Saturday, Nov. 17, 1917.

Each potato grower may exhibit as many varieties as he has grown, but not more than one sample in any one variety.

All potatoes exhibited must be the sample of Pennington county soil.

All exhibits which win a place in the county exhibit to be sent to the state show will receive a cash prize of $1.00, besides the regular prizes offered by the business men of the county.

As large an exhibit as possible should be made at the county show so a creditable showing may be made at the state show at Brainerd. Pennington county has raised some good potatoes of high quality this year in spite of the dought and some of the yields are proving to be very good.

Let us show the people of the state what can be done along potato lines in this county. Watch the papers for a list of the prizes.

DEDICATION OF GOODRIDGE CONSOLIDATED SCHOOL

The Goodridge school house, which is now fully completed, was dedicated last Friday evening. An appropriate program was rendered by the school children and others, also short addresses were given by County Superintendent of Schools, E. A. Mostue, Rev. G. L. Parish, of the Methodist Episcopal church of Thief River Falls and Prof. J. H. Hay, Superintendent of Thief River Falls schools. The addresses were interesting all through and was very much enjoyed by all present. After the dedication ceremony was over the school building was thrown open for inspection of visitors.

INTENTIONAL DUPLICATE EXPOSURE

U. S. GUNS WRECK HUNS' POSITIONS

Artillery Firing Directly Across Canal Into German Territory Is Belief.

ENEMY FIRE RECKLESS

Costly Barrage Resorted to By Kaiser In Effort To Stop Harassing Tactics—Berlin Locates Scene of Raid.

New York, Nov. 7.—American artillery is now firing its shells directly on German territory as indicated by the German war office's location of the first raid on American trenches as along the Rhine-Marne canal.

Presence No Longer Secret.

The Western battle front crosses the Rhine-Marne canal within easy artillery range of the German boundary of Lorraine. By revealing the spot where Teutonic raiders found the American trenches, the kaiser has been compelled to permit the German people to know that America's first bombardment on the European battle fields must have caused demolition of positions upon the German empire's own soil.

German Ground Shelled.

The first announcement that American artillery had been engaged in action in France was made on October 27, while the date of the German raid on American trenches was November 3. For at least a week, therefore, before the Germans sent a patrol to investigate the sudden activity opposite the Lorraine border, American guns must have had German ground under actual or potential bombardment.

This is doubtless the reason why the Germans took such unusual measures to raid the American trench sector by providing a barrage artillery fire and cutting off the American victims from all possible help during the period of the raid. Artillery ammunition is too precious to Germany to be thrown away in this costly manner of attack. The damage, however, that American shells had probably been doing on German soil for at least a week makes explicable the apparently reckless expenditure of barrage fire to assist a party of raiders.

JAPAN'S CLAIMS RECOGNIZED

Report That They Have Received Approval of U. S.

Peking, Nov. 6.—Baron Gonsuke Hayachi, Japanese minister to China, informed the Chinese foreign office that Viscount Kikijuro Ishii, head of the Japanese mission in the United States, and Secretary Lansing signed an agreement November 2 by which the United States recognized Japan's social interests in China and under which Japan and the United States reaffirm the "open door" policy in China.

Governors and other military leaders of Kiang-Si, Kiang-Su and Hupe provinces have sent strong protests to President Feng Kwo-Chang and Premier Tuan Chi-Jui against the proposed Japanese arms loan, carrying control of the Nanking iron deposits and the employment of Japanese military advisers.

Washington, Nov. 6.—Secretary of State Lansing refused to comment on the report from Peking that the United States, by treaty, has recognized Japan's special rights in China.

PROPOSE TO CURB ALIENS

Movement Begun at Conference in New York.

New York, Nov. 6.—Regulations to form a part of a nationwide movement for better protection of the country from its enemies will be adopted here, it was announced, following a conference of representatives of the Deparment of Justice, the United States secret service and the police. The conference was called as a result of suspicious fires on the water front and recent damage done to government property and ships.

It is planned that enemy aliens not only will be barred from the water front here but an order will be issued restricting them from using particular routes on designated ferries.

U. S. AVIATOR IS KILLED

Loses Life In Service Under General Pershing.

Poughskeepsie, N. Y., Nov. 6.—Oakleigh Thorne of Millbrook has received a cablegram anouncing the death in France of his son-in-law, Major Birdseye Blakeman Lewis, who was in the United States aviation service and a member of General Pershing's staff. No details were given.

Foe Hand Seen In Blast.

New Kensington, Pa., Nov. 6.—The kaiser again scored in America when the monster powder works of the United States Aluminum company here was wiped out by fire following a series of explosions. Three dead and 50 or more injured was the human toll, by latest reports. Officials of the company, following a conference, gave out a statement that "there is no doubt that a plot existed" to blow up the works. The plant manufactured illuminating powder for the United States and its allies.

AMERICAN TROOPS SERVING IN EUROPE WILL BE KEPT PLENTIFULLY SUPPLIED WITH ICE

Photo From Western Newspaper Union

The United States intends that its troops in Europe shall have plenty of ice and has ordered a number of portable ice-making machines, the largest of which will have a capacity of 500 tons a day. The one here illustrated makes two tons a day and is operated by an electric motor.

SOPHIE PLEDGED HELP

Former Greek Queen Promised Kaiser Aid of Country.

Teuton Monarch Told By Sister Hellenic Armies Would Help German Cause.

Athens, Nov. 7. — Former Queen Sophie again and again urged that the Germans take the offensive on the Macedonian front, as shown by lengthy telegrams which passed between her and Emperor William during December, 1916, and the early part of this year, similar to others that have been deciphered and are now made public.

Queen Sophie assured the emporer, her brother, of Greek co-operation. Field Marshal von Hindenburg and Foreign Secretary Zimmerman it appears, could not agree, however, on the time the attack should be made while blockade of the Allies, causing a shortage of food and ammunition in Greece prevented Greek action.

On January 10, the queen telegraphed the emperor telling him of this food and ammunition shortage and concluded:

"May the infamous pigs receive the punishment they deserve."

In other telegrams the queen promised that the Greek artillery would be destroyed if there was danger of it falling into the hands of the Allies. She also kept her brother informed of the actions and intentions of General Sarrail, commander of the Allied forces in Macedonia.

PACIFISTS' OFFICER TAKEN

Arrested on Charge of Violating Espionage Act.

Chicago, Nov. 6.—Theodore H. Lunde, identified for some time with the People's Council for Democracy and Terms of Peace, and treasurer of the Chicago branch of that organization, was arrested here by federal authorities charged with a violation of the espionage act. He is in jail, held under bond of $25,000 by Federal Commissioner Foote. Lunde has been active as a peace propagandist and as publisher of the People's Counselor; is said to have carried on a campaign of pacifism. The charges against him are based on articles appearing in his publication.

AIRPLANE FLEET WIPED OUT

Sixty-Six German Flyers Shot Down By French.

Paris, Nov. 6.—The largest fleet of airplanes Germany has sent over its lines to win back air supremacy, has been practically wiped out by French air forces.

The official statement announces that in a battle of unprecedented scope 16 German planes were destroyed, 50 were so badly damaged that they fell behind the German lines and three captive balloons were burned.

The encounter took place over Malmaison. Allied fliers had been prepared for an attack by reports that the Germans would make a desperate effort to restore the former efficiency of their air scout service on the western front.

U. S.-Swiss Relations Firm.

Washington, Nov. 3.—Relations between the United States and Switzerland have been placed upon a more firm basis of mutual understanding in the belief of members of th Swiss mission, who called upon President Wilson to say goodbye. Many misunderstandings, some due to hostile influences, members of the mission stated, have been removed. Switzerland's need for foodstuffs from the United States were discussed with the President, but no specific agreement was said to have been reached.

NEW PERIL FOR ITALY APPEARS

Foe Crosses Tagliamento River And Invasion of Venetia Is Threatened.

CADORNA IS MENACED

Activity On Trentino Front Indicates Massed Attack By Teutons From North On Italian Right Wing.

Italian Headquarters in Northern Italy, Nov. 6.—Austro-German patrols have crossed the Tagliamento, as foreseen, as shown by the report of heavy artillery fire on both sides of the river with chief pressure on the Italian left wing, and the enemy is trying to throw his main body into the plain of the Western Fruili region.

The enemy attack in the Giuidicala valley on the Trentino front also shows clearly his purpose to make a mass attack from the north.

Cadorna's Right Wing Threatened.

Austro-German forces operating against the Italians along the Tagliamento river from the region of the Carnic Alps southward to the Adriatic sea are proving a serious menace.

The invaders of Venetia have driven across the river at Pinzano and are proceeding westward, while on the north on the Italian left wing, intensive operations are being carried out by the Teutonic allies, the two maneuvers probably having as their objective the cutting off of the entire right wing of General Cadorna's army.

Italians Taken Prisoners.

The Berlin war office, in announcing the fording of the river, says 6,000 Italians were made prisoner and that additional guns were taken. The Italian official communication makes brief mention of the operation, asserting the enemy succeeded in bringing some of his forces to the right bank of the stream.

There is no indication whether General Cadorna intends to try to maintain the Tagliamento line. It is not improbable his stand here is temporary while positions of much greater strength are being prepared in the rear. There has been no official statement since the retreat from the Isonzo began concerning the spot chosen by Cadorna for turning against the enemy.

EQUIPS SOLDIERS CHEAPLY.

Kaiser Puts 14.3 Fighters In Field For Cost of One American.

Washington, Nov. 5.—Germany is putting 14.3 soldiers into the field for the same amount of money which the United States is paying for a single fighting man, according to calculations of government experts. They said the same general proportion was true also of maintaining the armies in the field. In other words, America must raise $14.30 where the enemy nations raise only $1 for carrying on the war.

Italian Aviators Feed Friends.

London, Nov. 5.—One lone Italian post on Mont Nero, cut off by the sweep of von Mackensen's army from the remainder of Gen. Cadorna's army, held out three long days against the invaders and then only gave up because ammunition ran out. During these three days, Italian aviators, circling at risk of their lives in the hail of German artillery over the positions, dropped bread and other food to the courageous garrison. The incident was vouched for in authentic dispatches just received here.

FIRST LIST OF U. S. LOSSES IN ACTUAL CLASH WITH ENEMY

Washington, Nov. 6.—The official casualty list of the losses of the American troops in France in their first clash with the Germans follows:

Killed.

Private Thomas F. Enright sister, Pittsburgh; Private James B. Gresham, mother, Evansville, Ind; Private Merle D. Hay, father, Glidden, Iowa.

Wounded.

Private John Smith, brother, Ludington, Mich.; Private Charles J. Hopkins, brother, Stanton, Texas; Private George L. Box, father, Altus, Okla.; Private Homer Givens; father, Cloverdale, Ala.; Private Charles L. Orr, mother, Lyons, Kan.

Captured or Missing.

Sergeant Edgar H. Halyburton, father, Stony Point, N. C.; Corporal Nichols L. Mullhall, mother, Jersey City, N. J.; Corporal Edwin T. Haines, mother, Woodward, Okla.; Private Herchel Godfrey, father, Chicago, Ill.; Private Vernon M. Kendall, father, Boll, Okla.; Private Wm. P. Grigsby, mother, Louisville, Ky.; Private Frank E. McDougal, father, Maryville, Mo.; Private Daniel B. Gallagher, father, Blockton, Ala.; Private John P. Lester, father, Tutweiler, Miss.; Private Harry Laughman, Chicago, Ill.; Private Dewey D. Kern, mother, Mrs. Eya Titon, Collins, Iowa; Private —— Keckon, cannot be identified.

The brief report of the engagement announced by the war department has brought home to America the first casualties in dead and captured resulting from actual fighting between Sammies and Germans.

EVACUATE NEW KENSINGTON

Pennsylvanians Flee As Flames Near Big Powder Mill.

New Kensington, Pa., Nov. 6.—With the explosion of 180,000 pounds of illuminating powder stored at the burning plant of the Aluminum Company of America imminent, the whole town evacuated at noon Monday. The loss of many homes was expected.

There was no way to fight the fire, as water itself will cause the bronze powder manufactured there to let go.

The population is about 13,000. Already the casualty list among the 3,000 employes of the works has mounted to 60. Several are dead and all nearby hospitals are choked with burned and injured.

HOLDS BRITAIN BLAMELESS

Gen. Gurko of Russia Says Kerensky's Criticism Is Unjust.

London, Nov. 5.—General Gurko of the Russian army, who arrived recently in England from Russia, in an interview in the Daily Express says Premier Kerensky showed lack of political sense in blaming the British fleet for not entering the Baltic. He declared such entry was not only impossible, but could not have been carried out in time to prevent the Germans from landing on the islands in the Gulf of Riga.

Uruguay Bans Gold to Argentina.

Montevideo, Nov. 6.—The Uruguayan government has decreed an embargo on gold shipments to Argentina.

3 Chicago Police Indicted.

Chicago, Nov. 5.—Three policemen who are alleged to have opened the pot in a pokergame with their night sticks, and then to have "seen" a raise of $40, were indicted by the grand jury today on graft charges. The indictment was based largely on the testimony of Jimmy Archer, former Cub catcher, and one of the pokerists, who testified he saw the cops accept $40 and withdraw quietly after the raid. The cops under indictment on the graft charges are J. P. Murphy, Harry Lieson and Joseph Goldberg.

GERMANS LOSE 11 SEA RAIDERS

Cruiser and Ten Armed Patrol Boats Sunk In North Sea.

FOE IS OVERWHELMED

"Guns Almost Unworkable Because of Rapidity And Accuracy of British Fire," Prisoner Says—Fight at Jutland Battle Scene.

London, Nov. 6.—The admiralty announces a British sea victory from the North sea in which one German cruiser and 10 armed patrol boats were sunk.

Germans Overwhelmed.

According to Copenhagen dispatches describing the action, the German auxiliary cruiser sunk was the Marie of Flensburg (or Flensborg). She was literally overwhelmed by the deadly accuracy and rapidity of the British fire and sank, aflame, 10 minutes after starting the engagement.

Survivor Talks.

Her commander, Captain Lauterbach, was one of the seven German survivors brought into Copenhagen wounded.

"My vessel's four guns were almost unworkable because of the hail of fire which the enemy destroyers centered on us," he declared. "We were soon a mass of flames."

At Jutland Battle Scene.

The admiralty statement located the sea battle as occurring in the Kattegat—an arm of the North sea, just adjacent to the Skagerrat, where was fought the famous battle of Jutland earlier in the war.

Copenhagen placed it still more definitely as occurring 12 miles north of Kullen or to the north of Gothenburg.

Enemy Life Loss Heavy.

The loss of life on the German vessels must have been very great. Copenhagen reported the seven survivors landed there had said 30 of their crew of 81 aboard the cruiser were killed outright.

The British admiralty mentioned 64 prisoners having been taken.

No British Losses.

The British squadron suffered no losses, it was officially stated. The British fleet was referred to as "our naval forces operating in the Kattegat."

The British vessels destroyed the German cruiser Marie Flenborg, a vessel of 3,000 tons, capturing 54 prisoners.

TEUTON PLOT TO CLOG MAILS

Chain Scheme of Letters Being Probed by Secret Service.

New York, Nov. 6.—A plot, the apparent purpose of which is to clog the mails, both domestic and foreign, is under investigation by the secret service, it is learned.

The scheme, which calls for flooding the mails with millions of letters, each letter a link in one of a dozen or more claims, is said to have originated in Boston.

Some of the letters which have fallen into the hands of the government, it is said, are out-and-out German propaganda documents, while others are on their face harmless affairs, usually prayers for peace, or for the protection of American soldiers and sailors in Europe.

SAYS "I'M PROUD OF MY BOY."

Father of Dead Hero From Iowa Talks To Correspondent.

Glidden, Iowa, Nov. 6.—"I am proud of my boy if he has given up his life for his country," D. Hay, father of Merle D. Hay, one of America's first three soldiers to die for his country, told the United Press, when informed that his son had been killed in France by the Germans.

Mrs. Hay, mother of the dead hero, collapsed when told of her son's death.

Young Hay enlisted in the army the ninth of last May, shortly after the declaration of war, according to his father.

TRAINMEN WANT INCREASES

250,000 To Present Demands Within Three Weeks.

Chicago, Nov. 6.—Demand for a general wage increase averaging 16 per cent will be presented to the railroads of the country by representatives of 250,000 employes within the next three weeks, it has just been announced.

The new scale was completed at the joint conference of the executive committees of the Brotherhood of Railway Trainmen and the Order of Railway Conductors after a four day session. The increases were said to represent only the increased cost of living.

Elgin Butter Board Quits Indefinitely.

Elgin, Ill., Nov. 6.—The Elgin board of trade has suspended its call board indefinitely, at the request of the United States food administration and urged "all members and friends who have used the Elgin weekly prices to accept the prices as made by the food administration from time to time as their weekly basis," in a set of resolutions passed unanimously. The board itself will continue to exist and will resume its call boards at a time the government thinks advisable officers have stated.

"Blue" and Worried?

"Blue," worried, half-sick people should find out the cause of their troubles. Often it is merely faulty kidney action, which allows the blood to get loaded up with poisons that irritate the nerves. Backache, headaches, dizziness and annoying bladder troubles are added proofs that the kidneys need help. Use Doan's Kidney Pills. Thousands thank them for relief from just such troubles.

A Minnesota Case

"Every Picture Tells a Story"

Mrs. Geo. P. Gillette, S. Main St., Zumbrota, Minn., says: "Attacks of rheumatic pains would come on and I would be laid up as long as six weeks at a time. My fingers became swollen and stiff and sometimes I couldn't hold a plate in my hand. I couldn't even fasten my dress, but had to have it done for me. My kidneys didn't act right at all. Doan's Kidney Pills proved to be just what I needed. Six boxes cured me of the attack."

Get Doan's at Any Store, 60c a Box

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

Murder Will Out.

A French woman with a sense of humor once told this story:

She was walking up a flight of stairs in one of these Paris apartment houses with a mirror at the head of each landing.

As she glanced up, panting, she thought she saw a woman descending. She said to herself: "Well, if I were that fat old woman I should know better than to dress in that ridiculous way."

When she reached the head of the stairs she confronted herself.

"Can't Cut Off My Leg," Says Railroad Engineer

"I am a railroad engineer; about 20 years ago my leg was seriously injured in an accident out West. Upon my refusing to allow the doctor to amputate it I was told it would be impossible to heal the wound. I have tried all kinds of salves and had many doctors in the past 20 years, but to no avail. Finally I resolved to use PETERSON'S OINTMENT on my leg. You cannot imagine my astonishment when I found it was doing what over 100 things had failed to do. My leg is now completely cured."—Gus Hauft, 799 Myrtle Ave., Brooklyn, N. Y.

"It makes me feel proud to be able to produce an ointment like that," says Peterson. "Not only do I guarantee Peterson's Ointment for old sores and wounds, but for Eczema, Salt Rheum, Ulcers, Itching Skin and Blind, Bleeding or Itching Piles, and I put up a big box for 25 cents, a price all can afford to pay and money back from your druggist if not satisfied." Adv.

Reads Like Fiction.

One of the most unusual salvages yet recorded in these days of submarine warfare, says Popular Science Monthly, is that of the Norwegian steamship Kongsli, whose cargo of grain swelled to such an extent on the inrush of water through the ragged hole torn in her side by a torpedo, that the hole was clogged up and the water prevented from flowing in and sinking her.

A party of fishermen, clambering aboard to discover the trouble, were amazed to find that the ragged hole on one side and hull plates torn loose opn the other by the force of the explosion had been effectively plugged by the swollen grain. The fishermen were afraid to attempt to tow her because the rush of the water along her sides might have washed away the effective grain seal. Accordingly, they improvised bales made of cotton filled with grain and forced these into the holes. This made the stoppage secure enough to enable the vessel to be towed to a nearby port.

Wireless to Africa.

By the erection of a chain of stations for a distance of 1,860 miles up the Congo river it will be possible to send wireless messages all the way across Africa.

Every man is sure that his wife doesn't realize how hard he has to work for his money.

Save In the Use of Wheat By eating Grape-Nuts

All the food value of the grain is used in making this delicious food; and its blend of malted barley not only adds to its nourishing qualities but produces a flavor of unusual richness.

All Food—No Waste!

"Contraband"

The Best Sea Story of the War That Has Been Written

CHAPTER XV.

—10—

The Measure of Danger.

We were alone, and as our eyes met, she advanced toward me across the deck, her hand extended.

"I was only there for a moment, Captain Hollis," she explained quietly, as though in answer to the silent inquiry of my face. "I was going on deck for a breath of air, and when I opened the door heard my own name spoken. Quite naturally I listened."

"Which you had every right to do. I endeavored to get from McCann a pledge not to interfere with the discipline of the ship, and offered him the freedom of the cabin and after deck, if he would make such a promise."

"And he refused?"

"Emphatically; he even accused me of unworthy motives—you heard that?"

She shook her head. "I hardly think so; I heard him offer odds against your ever bringing the Indian Chief into that German port, and—oh, yes, and something about your not getting the girl—what girl?"

I smiled, decidedly relieved by the lack of embarrassment in her manner.

"Have we so many of your sex on board," I asked, "as to leave that in any doubt?"

"He—he referred to me! Why, I thought it might be something which had occurred on shore—in New York. Whatever was it he said?"

"Why, it seems the fellow guessed who you were in the boat—no doubt had seen you before, and recognized your face as soon as it was daylight. Then, however, it was too late for him to disguise his real self as he had revealed it. His actions had made you despise him, and turn to me for protection. Naturally the man judges my motives from his own standpoint. He is aware that I am not extremely wealthy—indeed not wealthy at all by his standards, and that you are your father's daughter. Because I serve you is, to his mind, proof positive of a mercenary purpose on my part—that is all."

Her eyes widened and there was a glow of color in her cheeks.

"He—he insinuated that you sought to—to win my gratitude for some reward?"

"Yes."

"That my father would pay for your kindness to me?"

"Well, Miss Vera," and I found it extremely hard to choose words, "his thoughts were more direct."

Her face brightened, a sudden gleam of humor in her eyes.

"Oh, that you wanted to marry me! Isn't it too funny! Do you really think he supposes that true?"

"I would not be at all surprised," I answered, not altogether pleased at her reception of this suspicion. "It is wholly in line with his type. To me, now, the wealth of your father would be the greatest barrier between us."

"There was a time when you never knew I had a wealthy father, or indeed any other kind."

"Was I any the less attentive then?" I retorted. "I recall almost an entire night passed on deck in the vague hope of seeing you."

She laughed, but flashed her eyes up into my face.

"Did you, really? I wondered if you were there. But then that was merely curiosity."

"The mystery was attractive, I confess, but I am not at all sure there was not a growing personal interest also. You can scarcely conceive the impression you left on me in the moonlight."

"Please, no compliments. I am so accustomed to those in New York I cannot appreciate them any more. You were going on deck?"

"For a short time; it would seem a beautiful morning."

We emerged from the companion together, but she lingered at the rail, as I clambered up the ladder and greeted Leayord aft of the wheel. It was a broad seaview revealed on every side, nothing in sight but the crested waves sweeping to the distant horizon. The only men I saw were on the forecastle engaged in clearing up some tackle, excepting a fellow high up in the main crosstrees, with binoculars at his eyes.

"You keep a good lookout, I see, Mr. Leayord," I said, peering up at the figure outlined against the sky. "Nothing reported?"

"Not yet, sir. Mr. Olson said it was all quiet while he was in charge."

He moved over to the starboard rail, with a glance at the wheelsman, and I joined him, understanding the movement.

"Your purpose is to avoid vessels if possible, I presume, captain?" he asked, pointing out across the water in pretense of admiring the scene.

"The fewer we meet with the pleasanter our voyage, Mr. Leayord," quietly. "By the way, your language is hardly that of a forecastle hand; seemingly it has changed over night."

He permitted a smile to curve his lips.

"Environment, sir, no doubt. As bosun, I was a bit careless, but now that I've come aft the speech of a gentleman seems more appropriate. The fact is I had two years at Eton, sir."

"Ah, indeed! Well, I'm not sorry for that. It will make our relations aft much more congenial. You are English born then, I take it?"

"Yes, sir; a Bristol man."

"This running of a contraband cargo to Germany can hardly be altogether to your liking?"

He spat over the rail, and drew the sleeve of his jacket across his lips, as his eyes met mine.

"'Twould be more of a pleasure, I admit, captain, to be putting over a trick for the other side," he answered, his fingers nervously gripping the rail, "but I shipped for this voyage fair enough, and I always held it a sailor's duty to stick to his ship. Once I'm through with this job, sir, and I'll do my hearty bit for old England."

"Well said, Mr. Leayord," and I gripped his hand. "So far as I understand this row, my sympathies are all on your side. I may as well explain to you that I have been induced to assume command because of the condition in which I found the owner. As you must know, the man is a helpless cripple, and his entire fortune is represented by the cargo in this vessel."

"He is a friend of the lady's, sir, I heard Dade say."

"Yes, they knew each other ashore when she was a young girl. It was odd enough for them to have met out here again, but stranger still is the fact that this fellow McCann, whom I have locked up below, should have been the cause of Bascom's present condition."

"You don't say, sir."

"That is the story as Miss Vera Carrington tells it. There was a shooting affray in a New York restaurant, over some woman. McCann shot him and bought his way clear."

"He is rich, then?"

"The fellow has more money than you and I will ever see, Mr. Leayord. He's in the only place now where it can do him no good."

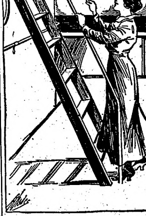
The mate shook his head doubtfully, his eyes wandering toward the men at the wheel.

"I wish I was so cocksure of that, sir," he said soberly. "There's some mighty bad blood forward on this ship, and it's my judgment we're not out of the mess yet by a long ways. Those wolves have got a scent of McCann's gold, and they'll never leave the trail until they get it."

"You don't think they would actually attempt mutiny?"

"They're not calling it that, sir. It's the cargo aboard, and your determination to land it safe at Hamburg, which is going to make the trouble. There is only one German in the crew, sir—the rest are all English and Swedes, except a couple of niggers. The Swedes and niggers will do whatever the others tell 'em to, an' the argument forward, according to Dade, is, that it'll be no crime to capture this ship and run her into an English port. They're not ready yet, but the devil will break loose presently, according to my notions. Wait until they hear what has happened to McCann."

"Well," I said deliberately, "we shall have to meet whatever comes, Mr. Leayord. I talked with McCann again this morning and offered him his freedom aft if he would promise to keep away from the crew. He refused to accept parole, so I locked him up again. Do you suggest any other course?"



She Lingered at the Rail.

"No, sir, I don't," he said slowly, after a pause for thought. "This Miss Carrington now, by any chance is she the same lady these two men got to shooting about?"

"No, she was not involved in the quarrel. McCann had never met her personally until we escaped from the wreck of the yacht together."

"She was a passenger, also?"

"She was the owner's daughter."

"Then she's rich, too?"

"Her father is one of New York's multimillionaires. What difference does that make, Mr. Leayord?"

"Nothing much, likely," he answered, leaning against the rail, his eyes on the distant bank of cloud, "only maybe we might play money against money in this game, with a fair chance to win. I reckon gold, no matter where it comes from, would look good to those devils forward."

"Scarcely a manly act on our part to suggest such a thing."

"Well, I don't know about that, sir," he insisted stubbornly. "I reckon old man Carrington would be willing enough to pay the price, rather than have his girl left in the hands of those fellows. They'll be no lambs if they ever get control of the ship. But maybe you know best, sir."

I left him and walked forward to where I could look down on the main deck. As deeply as I despised the thought of ever resorting to this last suggestion made by Leayord, yet I could not remain entirely indifferent to its possibilities. If matters on board were, indeed, as serious as he pictured them, our situation was far from pleasant. To keep on probably meant a battle to preserve the ship, and involved not only our own rough handling, even possible death in the melee; but also unspeakable horror to the woman left alone, and unprotected, on board. What would be her fate if we failed to uphold discipline, and those unbridled ruffians once obtained control of the vessel? The thought staggered me.

Yet I could reach no other conclusion except to continue the voyage, meeting its problems as they presented themselves. There was no turning back now. All hope lay in keeping McCann prisoner, entirely isolated from his confederates, and dealing with the men forward with a harsh firmness sufficient to strike terror into their souls. The slightest movement of revolt on their part must be my signal for action.

The day held fair, with a stiff breeze blowing over the port quarter, and the expanse of sea about us vacant of either sail or smoke. As noon approached I had Dade fetch the sextant from the captain's stateroom, and took my observation with considerable care, going below to work out my figures alone, as the many years passed ashore had left me a bit doubtful of my facility. No one appeared to take any deep interest in the event, although I noted a group of men forward watching as I disappeared.

With nothing to guide me, or check my figures with on the chart, I went over them twice to be assured of accuracy, finally marking our position as carefully as possible, and determining our future course. Leayord had just been called for his watch, and both officers were upon the after deck, waiting for my appearance. They remained silent as I approached, and, as I turned and faced forward, my eyes observed a largely increased grouping of men about the forecastle, and all staring aft.

"Are both watches on deck, Mr. Leayord?" I asked. "Has there been any call for all hands?"

"No, sir," he answered, his own gaze shifting. "It's the change of watch, and the second mate's men haven't gone below yet. Maybe the cook is slow, or else they are a bit curious to find out where the ship is, sir. Would you mind giving them the figures?"

"Not at all; the wheelsman would spread the news fast enough as soon as relieved. We are at fifty-two degress, thirty-five minutes west longitude, and forty degrees, ten minutes north latitude, approximately."

"And where does that put us from New York?"

"About five hundred miles, a little north of east; Halifax is the nearest port, two hundred and seventy-five miles nor' nor' by west. We are between the North Atlantic steamer lanes and the direct course to the Mediterranean, more in line with the Azores, I should say. That accounts for the deserted sea—we're out of the beaten track."

"How's the coal, sir?"

"All but one bunker full yet; we'll not steam heavy except tonight."

"Personally I don't see any objection to making a try of it," Leayord added, "but I don't know how the crew may feel. This isn't exactly the sort of voyage they shipped for."

"We may as well test them first as last," I said determined to have it over with. "Both watches are mostly on deck. Have the bosun call them aft."

The fellows responded quickly enough, a few slouching along in pretended indifference, but the majority exhibiting a real interest. Liverpool Red stood directly below me, a step in advance of his mates. His cap hid his eyes, but there was an ugly, defiant grin on his face, which angered me.

"Well, men," I said, wasting no time in soft phrasing, "I've called you aft for a straight talk. You shipped on the Indian Chief for a voyage to Hamburg—"

"Who said we did?" a voice interrupted. "The most of us was shanghaied and brought aboard drunk."

"That has nothing to do with me," I replied sharply. "I was not the skipper then; but I am now. Your names are on the papers regularly enough and the only thing I need to explain is the necessity for a change in our sailing course. As most of you know, war has broken out in Europe since this ship cleared from Baltimore. The chances are about a hundred to one that we would be captured, or sunk, if we tried to reach our port through the Channel."

"By whom?" It was Liverpool who spoke.

"English or French warships."

"It's a d—— Dutch cargo then we've got in the hold. That's the way I figured it. Well, now look here, sir. Smitz is the only Dutchman aboard, an' the rest ov us don't take kindly to that sort o' job."

"You're sailormen, and shipped on this voyage before ever war was declared. Now will you listen to me until I get through?"

"Ah, let him talk, Red," someone interjected.

I outlined my plan in as few words as possible, and they seemed to listen respectfully enough, only occasionally interjecting a question. Liverpool did not speak at all, nor Jim White, who had pushed his way forward, until I concluded. Then the latter asked suddenly:

"Would you mind if a couple of us had a glance at that chart? Maybe we'd see it clearer then."

"Certainly, you can all look at it. Mr. Olson, take the chart down there, and point out the lines so the men can see where we are."

They crowded about, endeavoring to gain a glimpse, although probably not half a dozen among them possessed the faintest conception of what the various markings signified. Liverpool and White, however, got down on their knees, and followed Olson's stubby forefinger closely, as he traced the proposed course. White appeared rather the more intelligent, asking a question or two before regaining his feet.

"I was on the Labrador coast once, sir," he said, turning his face toward where I stood waiting, "but that don't help me much to get this thing straight. It's to be a north course tonight then, so as to take us through the steamer lane before daylight?"

"Yes."

"And where would we be about daylight tomorrow morning?"

"I can only guess at that, not knowing the exact shape our engines are in, or the probable speed of the ship. But we ought to be close to fifty degrees west and about forty degrees, twenty minutes north, I should say."

"How far away from land?"

"One hundred and fifty miles to the east and south of Cape Race."

"Cape Race!" broke in Liverpool. "I've heard o' that point—it's south of a harbor called St. John's. Here it is, marked on the chart, Jim."

He pointed it out with a dingy forefinger, and the two stared at the spot for a minute before they got to their feet again. I waited, but neither spoke.

"Is that all, men?" I asked with a glance at their faces. "All right then, you can go forward. If any of you wish to ask any questions later I shall be glad to answer them."

They disappeared without demonstration, talking among themselves, yet to all appearances the conference had not deeply impressed the crew. They seemed a stolid, dull-witted bunch, even Liverpool and White slouching back to the forecastle, with scarcely the exchange of a word. Olson rolled up the chart, and clambered up the ladder to where I stood beside the first mate. For a moment he clung to the rail watching the last of the men disappear.

"Well, I'll be durned," he said almost under his breath.

"What is it, Mr. Olson?"

"That's just what I don't know, sir," he answered slowly. "One guess is as good as another, sir, but I'm mighty near certain of one thing—they haven't no intention of goin' to Hamburg. Even Liverpool and White showed no interest, except in one point."

"You mean where the ship will be tomorrow morning?"

"Just that; and it's going to be tomorrow morning when they show their hand. Till then, sir we'll have a model crew. That's the way I see it."

"Which theory looks reasonable enough," I acknowledged, after a pause, "although it's more my judgment that the arrest of McCann has left them leaderless. I am not really looking for any more serious trouble. However, we'll be ready for it, if it comes."

CHAPTER XVI.

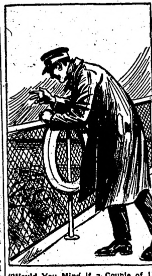
In the Hands of the Crew.

The afternoon brought me increased faith that the imprisonment of Fergus McCann had practically ended the rebellion of the men forward. No doubt the spirit of mutiny still lingered, but without the leadership this had ceased to be dangerous. Unbacked by the New Yorker's display of wealth, Liverpool Red and Jim White were suddenly shorn of power to control the crew. Nor did anything occur during the remainder of the day to lead me to revise this conclusion. The weather held fair, and the men worked cheerfully. Now that the liquor was out of them they proved themselves a fairly efficient crew, obeying the orders of the mates smartly. Apparently the crisis had been passed, and the only problem remaining to confront us was that of navigation. With my mind at rest on this point, I passed the hours of the afternoon largely in my own stateroom, sleeping for an hour or more in preparation for the night's watch on deck, and later carefully figuring out in detail the exact course I should attempt to follow during the period of darkness.

Before the call to supper came, I called on Bascom to explain to him the situation, but found the man stupefied by some drug, taken perhaps to alleviate pain, and scarcely capable of comprehending my meaning. Satisfied that I could gain no assistance from him, I left the man lying helplessly in his bunk, and returned to the main cabin. Vera did not appear until after Leayord and I were seated at table, yet she had been on deck during the afternoon, and had much to say relative to the beauty of the ocean scene through which we sailed.

It was a pleasant hour we passed at the table, Leayord relieving Olson, but the girl and I lingering in rather idle conversation before we went on deck.

In spite of the pleasant day, and that the sun was still visible in the western sky, the air on deck was chill, and I returned below for a heavier coat, and also brought back with me a cloak belonging to the late commander with which to protect Miss Carrington. But for a faint trail of smoke far to the westward, barely visible as the sun sank below the horizon, no evidence was discernible of any other vessel in the wide circle. I hailed the lookout in the maintop, but the wisp of smoke was too far away for his eyes to determine the course of the distant steamer, although as he swept his glasses a bit farther northward, they became fixed and motionless. As I stared up at him, his voice reported:



"Would You Mind if a Couple of Us Had a Glance at the Chart?"

"Sail ho!"

"Where away?"

"About three points off the port bow, sir—a schooner's topsail."

"Very well, keep her in sight—a fishing vessel likely."

Both watches were on deck, clustered in a restless bunch before the forecastle, or overhanging the rail, evidently deeply interested in observing our efforts to get all possible speed out of the Indian Chief. The fading light gave me a glimpse of their faces, and I noticed that both Liverpool and White were circulating freely from group to group. However, the men responded readily enough to Olson's orders, and sang cheerily as they tailed onto the ropes, Liverpool himself leading the way up the ratlines and out upon the mainyard as they sheeted home.

The stars began to pop out in the arch of sky above, silvering the waters, and we could no longer perceive what was taking place forward. The night shades settled about us, and the staunch Indian Chief drove her sharp bows through the black waste of sea in a race to cross the zone of danger before the coming of another dawn. Apparently everything was in our favor, and I stood there, leaning against the rail, chatting with Miss Vera, our conversation drifting idly.

It must have been after nine when the girl left, complaining of being chilled even in the protection of the great cloak. I crossed the deck with her to the head of the stairs, and our hands clasped as we lingered there a moment, the dim light revealing her face uplifted toward mine.

"You are not going below, then, Mr. Hollis?" she questioned. "Surely all goes well?"

"So remarkably well," I admitted "as to rather puzzle me. No, I shall remain on deck until morning; not that I really anticipate trouble, but the entire responsibility rests with me."

"You do not feel that your officers are efficient?"

"Only within their limits of knowledge. I like the men, and trust them, but at that they are only promoted from before the mast in an emergency. Neither possess any real knowledge of seamanship. You can go to your berth, and go to sleep, Miss Vera, assured that the ship will be in safe hands."

(TO BE CONTINUED.)

New Vegetable.

The udo, a Japanese vegetable somewhat resembling asparagus, may be grown in almost all of our states.

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

FOX TERRIERS.

"A little girl named Kate," said Daddy, "once owned a tiny fox terrier puppy. He was so cunning and playful, though, like all puppies, at times he was naughty.

"'You must have his tail cut,' her friends all said.

"'Won't it hurt him?' asked Kate. She couldn't quite imagine such a thing happening without it hurting frightfully. What if someone said her arm had to be cut off, or her foot, wouldn't it hurt?

"'It won't hurt so much if you have it cut when he is still a puppy. Usually these puppies have their tails cut off before they are sold. A fox terrier would look very queer with a long tail. Everyone would think he was nothing but an ordinary dog, and you have a fine, well-bred puppy.' And so her friends talked on.

"Kate felt very badly about it, but still if her dog looked queerly, what was she to do? And they told her it was better to have it done when the dog was little.

"She saw the dog doctor and he said he would call for the dog and take him home for a week.

"'Why do you need him for such a long time?' asked Kate.

"'Well, he won't feel so very well for a few days,' said the dog doctor. 'But he will be all right soon and he'll be a fine-looking little dog when I bring him back.'

"Kate had been told she must do this by her friends and she was letting her little dog go against her better wishes. She kissed one of his soft brown ears and he looked at her out of his brown eyes as though to say, 'Little mistress, do you care more for fashions than you do for me?' For though he did not know what was going to happen, he knew that something was and that it would not be nice. He could tell that Kate was worried, and he was unhappy about that.

"Three days passed and Kate could stand it no longer. She went to the dog doctor and asked for her dog Billy.

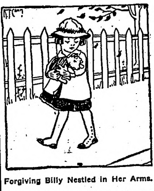
"'I want to take him home with me,' she said.

"The dog doctor brought Billy out. His tail was done up in a bandage and in his eyes she could see that he had suffered.

"'My little Billy,' she said. And shivering, trembling, still feeling the effects of having his tail partly taken off, but glad to see his mistress, and quite, quite forgiving, Billy gave a little bark.

"'You forgive me, Billy, you are finer than a person. I'd never forgive anyone if they did such a thing to me. And I let you suffer for fashion, for foolish, absurd fashion, which has been made by men and women—and against little dogs.'

"Kate had left the doctor's house and was carrying Billy in her arms. She knew that he must have been suffering a great deal more the few days before and how dreadfully she did feel that she had let him go.



Forgiving Billy Nestled in Her Arms.

"'I just gave in,' said Kate, 'and did what people told me to do. I felt it would be painful, no matter what they said, and I was right in that, but I was wrong, so cruel and wrong to let him go.'

"But Billy, the patient, forgiving Billy nestled in her arms, licked her hands, and said, with those same lovely brown eyes.

"'Never mind, little mistress. Don't be sad! I'll be well soon, and I forgive you, for you didn't understand and you do love me so much.'

"Billy grew to be a fine dog and of course he was a fashionable dog with a short tail, the rule having been made by people, not by the dogs! It's always so easy to be brave about other creatures' sufferings!

"Kate was always ashamed that Billy was fashionable. And later on she got another fox terrier and his tail was kept long, I can assure you!"

"Oh, Daddy," said Nancy, "I'm so glad you have told us this story."

"So am I," said Nick.

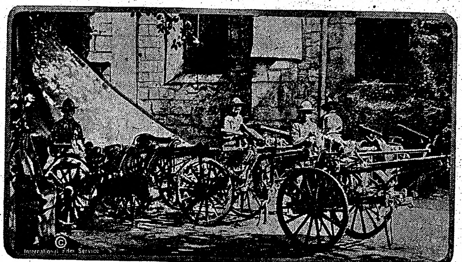
"We were going to have our fox terrier puppy's tail cut tomorrow because we were told it would not hurt much and it was the correct thing to do," said Nancy. "And now we know."

"I told you the story because I knew you didn't understand, and it's a true story too," said Daddy. "But it makes me happy indeed to think we will not have a 'fashionable' dog, for we will know that we never made him suffer for such a reason!"

AMERICAN HOSPITAL IN CHATEAU DE PASSY, FRANCE

The Chateau de Passy, near Sens, built in the eleventh century and now occupied by the Hospital Francais de New York; refugees from the East gathered to offer flowers to Major Culler, U. S. A., the physician in charge, and Doctor Culler himself.

ANCIENT FRENCH CHURCH SHELTERS AMERICAN ARTILLERY



Detachment of American field artillery camped in the shelter of a French church that dates from the tenth century.

AIR FIGHTER FOR FRANCE

International Film Service

Lieut. E. Reno, attached to the French aviation division, is credited with bringing down three German airplanes somewhere within the firing lines. The photograph was made at an Atlantic seaport on his arrival.

Advice to a Young Man.

Give up money, give up fame, give up science, give up the earth itself and all it contains, rather than do an immoral act. And never suppose that in any possible situation, or under any circumstances, it is best for you to do a dishonorable thing, however slightly so it may appear to you. Whenever you are to do a thing, though it can never be known but to yourself, ask yourself how you would act were all the world looking at you, and act accordingly. Encourage all your virtuous dispositions, and exercise them whenever an opportunity arises; being assured that they will gain strength by exercise, as a limb of the body does, and that exercise will make them habitual.—Thomas Jefferson.

Touched.

The Minister—Don't you think I touched them rather deeply this morning?

The Deacon—I don't know. I haven't counted up yet.

CLEARING UP TRENCHES AFTER BATTLE

Photo From Western Newspaper Union

After an attack some soldiers are detailed to clear up the trenches. Two of them are here seen filling sacks with cartridge cases. Trench mortar bombs lie at their feet.

RELIC OF THE GERMAN AIR KING

Here is the only relic left by Boelke, the German air king. It is a piece cut from the canvas of his machine. On the canvas are marked in crosses the machines brought down by him. The relic, which is almost priceless, is now in Paris and a number of bids have been made for it by collectors of war relics.

PLAN TO STOP THE WASTE IN EGGS

Poultry and Egg Shippers to Co-operate With the Food Administration.

HOPE TD SAVE $50,000,000

Shippers Who Purchase Eggs to Pay Only for Those Fit for Human Consumption—Prompt Chilling of Eggs Is Advocated.

Washington.—New methods and equipment to save the $50,000,000 worth of eggs wasted every year in this country and make the poultry industry an effective ally in the cause of food conservation were discussed recently at a conference of representative poultry and egg shippers with the food administration.

The conference was addressed by the food administrator, G. H. Powell, and E. Hearty of his staff, and Dr. Mary Pennington of the United States food research laboratory, Philadelphia and W. F. Priebe of the food administration presided.

The waste in eggs in 1914, according to the department of agriculture yearbook, cost the country $50,000,000. This year it will be fully as large; for although the supply has gone down, prices have increased materially. Wasteful methods in handling poultry were also exceedingly expensive. The food administration made practical suggestions to remedy conditions, all of which received the approval of the conference.

Pay Only for Good Ones.

It was recommended that shippers who purchase eggs pay for only those fit for human consumption. The custom has been to buy eggs by the case without candling before purchase. Candling later was almost always sure to show that a large percentage of the eggs were bad. To get his money back, the shipper then had to throw away the bad eggs and raise his price; which was felt all along the line to the consumer.

Chilling of eggs to 60 degrees Fahrenheit, or below, as soon after purchase as possible, was advocated. Most eggs are fertile, and the life germ will deteriorate fast if not chilled. Even in infertile eggs the bacterial growth develops very soon. Wholesalers were urged to equip their plants with the latest cooling machinery.

All second-grade eggs, heated, shrunken or cracked, should be marketed as often and as near the source as possible. These are usually dessicated or frozen, and are used by confectioners and bakers.

Before shipping, all eggs should be carefully rehandled and those badly "checked"—that is, with shells cracked—should be removed. Packing in standard cases is recommended, to prevent breakage. Eggs should be gathered by farmers daily and marketed at least twice a week.

Cause of Many Scandals.

The practice of selling poultry with feed, sand or gravel in their crops, which is paid for by weight with the bird, is discouraged. This crafty device has caused many scandals in the industry, and several municipal investigations, notably one in New York. Dressed poultry should be sold with the crop entirely empty. All birds should be kept in sanitary coops and yards, and as soon as dressed should be chilled to 40 degrees, or lower, to prevent bacterial growth.

The conference passed resolutions of support for the whole food administration program, including federal license for dealers.

Coin in an Apple.

Albany, Ore.—When the Rev. C. L. Schuster, pastor of the Evangelical church here, started to eat an apple presented to him at a surprise party here one evening recently, he found it contained a sufficient quantity of gold coins to pay the expenses of himself and family on a trip to the minister's old home in Ohio. He had been planning to visit his mother and the congregation, learning of this, decided to pay his expenses.

PARISIENNE'S LATEST FAD

The animal was caught by a brave poilu and is now the companion of its mistress. It is submissive to one person only and that is the young lady found in the photo. Paris has taken to the idea and more than one is seen on the streets of the Parisian capital.

NOW ATTACK RED CROSS

Officers Directed to Trace Source of Pro-German Propaganda.—Spread False Stories.

Washington.—Pro-German propaganda, which has long busied itself against the government of the United States, has at last attacked the Red Cross so nearly in the open that General Manager Harvey D. Gibson has sent a telegram to all division managers in the United States to report to him the source of every attack.

"Rumors and innuendoes critical of and calculated to embarrass the Red Cross are being industriously circulated as part of an unpatriotic propaganda," wired Mr. Gibson. "Many stories, utterly unwarranted in fact, emanate simultaneously from too many parts of the country to be merely accidental."

Mr. Gibson intimates that the source of the propaganda will be found. He says:

"Every criticism or innuendo against the Red Cross should be immediately challenged and followed up."

The stories are of many kinds. One is that the Red Cross sells and keeps the money for sweaters and other articles given for the soldiers. Another is that nearly all money contributed goes for expenses and salaries."

Of course the stories are maliciously untrue. As Mr. Gibson says:

"The Red Cross is run as an open book. It has no secrets. It is making a sincere effort to serve mankind, and is doing it as carefully and economically as it knows how. The utmost effort is being made to give publicity to all its activities."

$200,000 for Housemaid.

Alton, Ill.—Miss Carrie Pointsalot of Alton is named the sole heiress to the large estate of Miss Matilda Lowery of Grand Rapids, Mich., who died in Philadelphia recently. The fortune, estimate at $200,000, was left to Miss Pointsalot after Miss Lowery met her on a cold November day while she was dong housework for a family living in St. Louis.

WOMEN REPLACE MEN IN MACHINE SHOPS

Ogden, Utah.—Women in overalls replacing men who have been called into the draft army or have volunteered for service with Uncle Sam's Liberty army, made their first appearance here when the Southern Pacific railroad employed about a dozen of the fair sex for work in the local repair shops.

The women will get their first experiencing in "sorting" scrap piles, separating the cast iron slugs from the malleable, and removing the steel and wrought iron. Nuts, bolts, screws and other small pieces will be handled by the women, and if they display sufficient strength and ability in this line it is planned to put them to work cleaning cars and other heavier work about the yards and roundhouses.

The "women in overalls" will receive the same compensation as that given the men who have been doing the same work.

SAWDUST IN GERMAN BREAD

Analysis Shows That About Two-Thirds Is From a Wood Product.

Rome.—That German bread is mainly sawdust is now proved by a military attache of the Swiss legation in Berlin, who returned to Rome ill with dysentery. He brought a loaf of German bread to see if it was responsible for his bad health. Berne experts just analyzed the loaf and found it contains corn, 12 per cent, barley, 22 per cent and the remaining 66 per cent was wood sawdust.

Bread tickets also are in force in Switzerland. The daily allowance is 250 grammes, about nine ounces. Sugar tickets soon will be issued, with monthly allowance fixed at 18 ounces, and rice nine ounces. Butter is to be rationed too, the amount differing with districts, but nowhere to exceed three ounces a month.

With the institution of rations in Switzerland hundreds of German and Austrian visitors left for home. One reason was they can no longer send home food by parcel post, and the other, more potent, is that under the Swiss regulations food tickets are only issued after a thorough inquiry about the visitors' nationality and business. A large inflow of people, intent on spying, thus is also stopped.

Now Has Another's Nerve.

Chicago.—Capt. R. Hugh Knyvett, intelligence officer of the Fifteenth infantry brigade, Australian imperial force, is on his way back to the front after being invalided home when a German shell inflicted twenty wounds. For six months he was paralyzed, but today in Chicago he was as vigorous as ever, the result, he says, of the transplanting of a nerve from another man's leg to his own.

Cuba is building a canal 32 miles long in the province of Matanzas to reclaim a large and fertile area.

AMERICANS TELL VERDUN HORRORS

College Students Who Drove Ambulances Won Honors Before Enlisted Men Came.

BATTERED VETERANS RETURN

One Volunteer Describes Havoc Wrought by Shell Dropped Among Stretcher Bearers.—Two Hit While Helping Wounded.

New York.—Some of the American college boys who went over to France last May as ambulance drivers for the excitement of the work behind the firing lines are returning home because the ambulance work has been taken over by the United States army and will be done by regular enlisted men. The following is an extract from a letter written by a Williams boy two weeks ago, who went over with his college unit to drive an ambulance at the front:

The last six weeks we have been serving in the Verdun sector with our base at Biercourt, which is eight miles from the town of Verdun. There are two front posts for the ambulances—Mort Homme hill and Hill 304, which have figured in the news of the new battle of Verdun. For two weeks the French were preparing for the attack, and the roads were only passable at night. The communication trenches were awful to get through, and were made worse by the heavy rains. One night last week two of the boys got lost in the darkness and could not find their way with their ambulance to the post. Finally they sighted two dark objects, which resembled French soldiers walking along with their big overcoats on. After jabbering their peculiar brand of French for 15 minutes without receiving any reply the lost ambulance drivers discovered that the dark moving objects were two American army mules, unable to speak or understand a word of French.

Hit While Helping Wounded.

"Two of our chaps were badly wounded at one of the first-aid stations while helping to load wounded men into the ambulance. One was blown right through the door of the shelter hut and was discovered lying unconscious beside three dead French soldiers. The boys who got them out had to go through a gas attack and a barrage fire. Two of them—each ambulance has two drivers—had no time to get masks and were very sick after it was over, but they were going so fast that there were no fatal results from the gas.

"'Mac,' one of our fraternity, has been wounded in eight places. He lost his right leg and two fingers, while his companion, 'Vet,' will have a stiff leg all his life from the effects of his wounds. They have both got the War Cross and military medals.

"The worst experience of all happened to two of our college boys—Jim Alexander and Taffy Young. While they were driving along a road lined with batteries, which the Germans were trying to locate, with a wounded man lying in the ambulance, a shell burst right beside them.

"Just before that the wounded man sat up and asked for a cigarette, and the shrapnel passed through the car where his head had been resting a few seconds before and struck the stretcher bearer, who was looking out to see where we were. He died that afternoon. Had Jim not ducked he would have lost a leg, and if Taffy had ducked he would have been badly wounded. The ambulance was shot to pieces by the shell, and they had to hold up the dying man for three hours until assistance came. During the attack we had about twenty-four hours sleep out of 184 hours, which was a fair average for all the ambulance drivers in our sector. During the German air raids one shell burst within twenty-five feet of our camp at Biercourt at midnight. The roads are nearly impassable now for automobiles. We have been treated very nicely by the French colonel in command of the branch depot, who feasted our unit with champagne, cakes and cigars, and has given us seats for all the shows gotten up by the French soldiers.

Volunteer Spirit Gone.

"Several colonels and majors of the American Red Cross have visited us to see what we are going to do now. They all admitted that we could do more for our country by enlisting in the regular army in Paris. This is, for all the able-bodied men in the ambulance service. We were asked to enlist, if we preferred, in the ambulance service for the duration of the war, but it would not be the same. Most of the boys declined, and we are going to Paris to join up, including myself. The old volunteer spirit in the ambulance corps has gone forever—so now for the United States artillery or air service in search of adventure."

PUBLIC ROADS

NEED OF BETTER HIGHWAYS

Ohio Farmers Convinced That Improved Roads Are Essential and Promise Financial Aid.

At a recent convention of the Ohio Good Roads association the farmer delegates spoke with the utmost conviction of the need of improved roads, good 365 days in the year, if they were to do their part in the mobilization of the resources of the country in the cause of humanity. Moreover, these delegates from the farms did not ask to have the roads improved for them; they promised their full proportion of financial support for their construction.

Sand Clay Road.

An entirely different condition is reported from New England, New York and New Jersey. There the congestion of railway traffic makes the highways of great value in delivering manufactured materials from one city to another; the motor truck has suddenly become a real necessity in meeting the urgent requirements for transporting the products of the cities. In short, the rational improvement of roads is an essential element of the grave economic problems of the day, to make the valuable products of the farm and shop available to the user at the lowest possible cost.

This subject should be studied at once as an economic problem, the same as the provision of railway and waterway transportation, the increase in cultivated acreage and the improvement of manufacturing facilities.

Crops that cannot be moved from the farms except at enormous expense and manufactured products that must lie in storehouses because of congestion of railways are of little value to a nation which needs such things now.

ROAD SYSTEMS IN NEW YORK

Total Designated Mileage Placed at 11,988 Miles—Work Hindered by Scarcity of Labor.

The total designated mileage of state and county highway systems in New York state at the present time is 11,988, of which 5,926 miles had been completed and accepted on January 1, while contracts in force at that time covered 1,185 miles. This with the contracts awarded during the year 1916, leaves a balance of designated mileage not yet cared for of 4,210. Highway construction during the past two years has been gravely hindered because of the fact that surplus labor has been largely absorbed in munition making and other abnormal industrial activities. In New York state during 1916 it was impossible to secure even at largely increased cost, more than a quarter of the labor actually required for highway work.

ASPHALT IN UNIVERSAL USE

First Pavement of Any Importance Was Laid in Washington in 1876—Wearing Qualities.

The use of asphalt in paving construction has become so universal that one never thinks of it as a comparatively recently developed material. Yet probably the first sheet of asphalt pavement of any importance was that laid in Washington, D. C., on Pennsylvania avenue in 1876 and on Vermont avenue in 1879. The latter is still in existence today, and it is an evidence of the wearing qualities of this type of pavement even when laid, as it was, without the scientific methods of the present day.

Cheaper Than Other Meat.

Chickens and fowls give us a supply of wholesome, quick-grown meat that, at the present time, is as cheap as any other meat we can buy, and far better food than a good deal of meat that is offered.

Clean Up Garden.

Clean up the garden and burn all weeds and trash. You will destroy and make homeless many insects that had figured on eating your next year's crop.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

RABBITS FOR MEAT

Elaborate Lists of Foods Recommended for Animals.

CRUSHED OATS ARE FAVORED

Cornmeal, Barley and Other Grains May Be Given by Way of Change—Green Feeds Are Highly Important in Winter.

The rabbit thrives well on a diversity of vegetable foods. Many writers on the care of this animal prescribe elaborate lists of foods to be followed week in and out. The fact is that a few staple foods are sufficient, but no animal is more adaptable to sudden changes of diet; so that one can feed what is available or cheap, the idea being to produce weight with the least possible outlay of money.

Grain and Hay.

The best grain for rabbits is oats, either whole or crushed, though cornmeal, barley, or other grain may often be fed by way of change. The crushed oats are best when freshly broken, and a hand mill for preparing them is a valuable adjunct to a rabbitry.

Hay is a necessary part of the rabbit's diet, and if possible that of the very best quality should be used. It should be entirely free from moldness, and the unsweated is always preferable. If one has small grounds where suitable grass grows, the mowing may be done at short intervals and the hay thoroughly cured in such small quantities that no sweating takes place. However, if sweet hay is not available the sweated may be fed to the rabbits without injury, unless it be moldy.

Green Foods.

Rabbits require some green foods for winter. Cabbages, kale, spinach, and rape leaves are recommended. Turnips, beets, and mangels are often fed and have been recommended by many rabbit breeders, but they do not keep so well as the foods just named.

Female Flemish Giant.

Turnips, unless kept in the ground, wilt by midwinter and are then of little use. Beets and mangels keep better, and the latter are the main dependence of some English rabbitries; but, on the whole, cabbages are more economical, as well as more satisfactory in every way. They are usually available until green stuff grows in the spring. Whatever green food is put away for winter use must be stored where frost cannot touch it, as freezing unfits it for rabbits. Parsnips left in the ground all winter make an excellent early spring rabbit food after the frost leaves the ground in which they grow.

Feeding.

Rabbits should be fed twice daily. Ordinary stock is fed morning and evening, but suckling does should also have a noon meal or be given more than they will eat at the other meals. The general rule is to feed only as much grain or green stuff as the animals will consume. Hay is put into the hutch to be available at any time, a part of it being left as litter. The exact amount of grain or green stuff for each rabbit at a meal cannot be stated, as the appetite varies greatly at different times. Observations of the quantity left over when the animals quit feeding will soon enable the feeder to adjust the meals to the needs of the rabbits. Overfeeding is a much more common mistake than underfeeding.

Rabbits under three or four months old should be limited in the amount of green food. If allowed too much they are apt to become "pot-bellied." When a young rabbit is seen to grow big about its belly, the use of green food should be discontinued and the animal given plenty of exercise. Under such treatment it will soon recover, but if the green food is continued the disease usually terminates in convulsions and death. Old rabbits are not subject to this trouble.

Breeding.

It is not desirable to pair rabbits until they are at least six months old, although they may be bred earlier. Some breeders do not mate animals under ten months of age. Healthy mature rabbits produce larger and stronger litters than younger stock do.

Methods of Mating.

Different breeders adopt different methods of mating. Some leave the buck in the hutch of the doe for but a few minutes, and others leave him overnight. The older does should be mated in February, but it is well to defer mating a young doe until March. She then has young in April, when there is abundant green food to induce a good flow of milk. This lacteal development once well established, she is likely always to give abundance of milk for her young. If pairing begins in February each doe may be expected to produce four litters a year, the young coming at intervals of about twelve weeks, with a longer rest in midwinter.

Preparing for the Young.

The gestation period of the rabbit is about thirty days. When the doe is nearly ready to bear young, her hutch should be thoroughly cleaned and disinfected, after which a good supply of soft hay or straw (oat straw is best) should be placed in the body of the hutch to enable her to arrange her nest. If the hutch is without a nesting compartment, a box should be placed in a corner. It should be 18 to 20 inches long, about a foot deep, or 10 inches wide, and without a lid. Make a hole in one end large enough for the doe to pass through easily, and turn the box upside down. The doe will arrange her nest a day or two before the young are born. At this time extra attention should be given to her food. She should have milk and warm water regularly, and a pan of clean water should be kept constantly in the hutch. While a doe is heavy with young and for a few days after their birth, extreme care should be taken to see that she is not frightened by cats or dogs or even by strange visitors in the rabbitry. Avoid touching the nest or handling the young, unless it is absolutely necessary.

Diet While Nursing.

During the first week or two after having young the doe may be fed almost entirely on warm milk and bread. This is recommended for the bulk of the morning and evening meals, with a small supply of green food. Green food may be given also in the middle of the day, and the daily proportion gradually increased. Boiled mush made of cornmeal is also an excellent food for suckling does, but most other pasty or watery foods should be avoided as likely to derange the bowels. Milk, and indeed any soft food, should be fed in a separate earthenware dish, especially in warm weather, when it sours quickly. The dish should be washed and scalded often.

Weaning.

The young may be weaned when a month old, but it is better to leave them with the doe two or three weeks longer. Remove two each day until all are transferred to another hutch, which may be large enough to accommodate any number. They do well together until they are three or four months old, when their development will compel separation of the sexes. After this any number of does may occupy the same hutch, but unless thoroughly accustomed to each other, will fight.

MATCHED HORSES IN DEMAND

Decided Advantage in Having Animals of Same Conformation, Color and Pulling Power.

If you own a good draft horse, be on the lookout for another like him. There is a decided advantage in having a matched team of draft horses, especially when it comes to selling them on the open market. There is an increased value of from 25 to 40 per cent in a team that is perfectly matched as to color, size, conformation, and pulling power. A matched team is not only more attractive in appearance, thus furnishing an asset to the city buyer, but they are actually more valuable from the standpoint of efficiency.

It is far better to have teams to sell rather than single animals, as good matched teams will usually bring far more than the individuals will sell for separately. In selling horses it should be remembered that the buyer is guided first by appearance which includes amount of flesh and grooming and it is only after purchasing that he learns efficiency.

DON'T BURN ASPARAGUS BED

In Regions Where Severe Freezes Occur Cutting and Burning Should Not Be Practiced.

In many sections the asparagus plants are cut down as soon as the berries turn red, and after drying sufficiently they are burned to destroy any disease germs or insects that may be present. In regions where severe freezes occur it is doubtful whether the cutting and burning of asparagus tops is advisable. The old tops hold the snow and prevent deep freezing and the blowing of soil. Some growers thoroughly harrow the bed after the tops are removed, others throw a slight ridge over the row, but ridging is not necessary unless there is danger of injury by severe freezing during the winter. Where land is inclined to wash, cultivating and ridging in the fall are objectionable.

Winner Seldom Switches.

The winner in poultry raising seldom switches from the main line of his ambition.

THE DAIRY

LOSS OF FAT IN SKIM MILK

Farmer Using Separator Should Pay Close Attention to Matter—Chief Cause Is Speed.

Every farmer who uses a separator to skim his milk should give close attention to see that he does not lose fat in the skim milk. A small percentage of fat going into the skim milk continuously means a great loss for the year.

If a cow gives 5,000 pounds of milk and four tenths of one per cent is lost, it would mean for the year a loss of about $8 per cow.

There may be many causes to produce such a loss. Probably the chief cause is the speed of the bowl. If a separator is turned too slowly the milk does not skim clean and fat goes over into the skim milk. Another cause might be the temperature of the milk. For close skimming milk should be 85 degrees or above. Still another cause is an unbalanced bowl. See that the separator gets plenty of oil when running and do not neglect it when it gets out of order.

MAKING IDEAL DAIRY RATION

Silo Solves Succulence Problem Best—Roots Should Be More Generally Fed to Cows.

It is very necessary that succulence be supplied if we hope to come anywhere near an ideal dairy ration. The silo solves this problem best. From all points of view silage is to be preferred. The second choice would be roots. These will be very satisfactory, either when fed alone or supplementary to the silage, and should be more generally fed than at present on all dairy farms. Lacking either of these, it will be important to secure similar effects through the grain ration with the aid of alfalfa or clover if available. In this connection oil meal is of great value because of its well-known laxative properties coupled with its high protein content.

BUILDING UP A DAIRY HERD

Care and Feed of Calves Is of Great Importance—Select Best Marked Females.

Select the best marked female calves from the tested and most productive cows. Let the calf remain with the cow for eight to ten days or until the cow's milk is fit for human food. Feed sweet skim milk heated to blood heat; about one to two quarts may be given morning and evening. Have a clean tin feed bucket; disease and no end of germs may be found in dirty buckets. Feed every day and set out in the sun and air.

Feed sweet milk; it should always be fed warm; cold and sour milk will produce scours and diarrhea. After the second week a little oatmeal and a small quantity of flaxseed oil meal after it is boiled may be added to the milk.

Good Foundation Stock.

Tie a little bunch of bright, sweet clover hay in the pen every day for the calf to nibble. After the milk has beed fed put a little meal in the calf's mouth. A little hay may also be given. By this method the calf will soon learn to eat meal and hay.

Whole oats and wheat bran may be fed in small quantities after the sixth week. All stock, young and old, thrive and keep in health when well fed and kindly treated.

CHECK GROWTH OF BACTERIA

Milk Fresh From Cow Should Be Chilled at Once to About Fifty Degrees Fahrenheit.

Cooling milk immediately after milking checks the growth of bacteria and thus prevents the milk from spoiling. Hence milk fresh from the cow should be chilled at once to about 50 degrees Fahrenheit and kept at that temperature until delivered.

SILAGE NECESSARY FOR COW

Thirty Pounds Per Day Is About Right—It Won't Hurt to Give Her All She Will Eat.

About 30 pounds of silage per day is required by the dairy cow, while a beef animal will consume one-third more, or possibly a still greater amount. It will not hurt a cow to feed her all that she will consume if the silage is good and is fed regularly.

Goodridge Hotel and Restaurant
Board by the day or week. Meals or lnnches served at all hours. Good Rooms. Confectionery, Soft Drinks, Cigars, Pipes and Tobaccos

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter
We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

WAR MESSAGE OF WILSON DISTORTED

German People Not Permitted to Read Full Text of President's Address.

EFFECT ON PUBLIC FEARED

Copy Issued by Committee on Public Information Shows Important Passages That Were Suppressed.

The German government did not dare to communicate to the German people the full text of President Wilson's war message of April 2, 1917. It feared the influence which the unabridged text of this message might have upon the opinion of the people. Therefore the official message of the president of the United States was presented to Germany in an abridged and distorted form.

The committee on public information of the United States government has prepared a copy of this message showing the passages which were suppressed in the report of the Wolff Telegraph bureau when the message of the president was published to the whole world. These passages are shown in bold-faced type in the following copy of the message. The Wolff Telegraph bureau is not only under censorship control of the German government, but has been consistently employed by the government for the promulgation of official opinions.

Gentlemen of the Congress:

I have called the congress into extraordinary session because there are serious, very serious, choices of policy to be made, and made immediately, which it is neither right nor constitutionally permissible that I should assume the responsibility of making.

On the 3d of February last I officially laid before you the extraordinary announcement of the Imperial German government that on and after the 1st day of February it was its purpose to put aside all restraints of law or of humanity and use its submarines to sink every vessel that sought to approach either the ports of Great Britain and Ireland or the western coasts of Europe or any of the ports controlled by the enemies of Germany within the Mediterranean. That had seemed to be the object of the German submarine warfare earlier in the war, but since April of last year the Imperial government had somewhat restrained the commanders of its undersea craft, in conformity with its promise, **then given to us, that passenger boats should not be sunk, and that due warning would be given to all other vessels which its submarines might seek to destroy, when no resistance was offered or escape attempted, and care taken that their crews were given at least a fair chance to save their lives in their open boats. The precautions taken were meager and haphazard enough, as was proved in distressing instance after instance in the progress of the cruel and unmanly business, but a certain degree of restraint was observed.**

The new policy has swept every restriction aside. Vessels of every kind, **whatever their flag, their character their cargo, their destination, their** errand, have been ruthlessly sent to the bottom without warning and without thought of help or mercy for those on board, the vessels of friendly neutrals along with those of belligerents. Even hospital ships and **ships carrying relief to the sorely bereaved and stricken** people of Belgium, though the latter were provided with safe conduct through the proscribed areas by the German government itself and were **distinguished by unmistakable marks of identity,** have been sunk with the same reckless lack of compassion or of principle.

I was for a little while unable to believe that such things would in fact be done by any government that had hitherto subscribed to the humane practices of civilized nations. International law had its origin in the attempt to set up some law which would be respected and observed upon the seas, where no nation had right of dominion and where lay the free highways of the world. By painful stage after stage has that law been built up with meager enough results, indeed, after all was accomplished that could be accomplished, **but always with a clear view, at least, of what the heart and conscience of mankind demanded.** This minimum of right the German government has swept aside under the plea of retaliation and necessity and because it had no weapons which it could use at sea except these, which it is impossible to employ as it is employing them, without throwing to the wind all scruples of humanity or of respect for the understandings that were supposed to underlie the intercourse of the world.

I am not now thinking of the loss of property involved, immense and serious as that is, but only of the wanton and wholesale destruction of the lives of non-combatants, men, women, and children, **engaged in pursuits which have always, even in the darkest periods of modern history, been deemed innocent and legitimate. Property can be paid for; the lives of peaceful and innocent people cannot be.** The present German submarine warfare against commerce is a warfare against mankind.

It is a war against all nations. **American ships have been sunk, American lives taken, in ways which it has stirred us very deeply to learn of, but the ships and people of other neutral and friendly nations have been sunk and overwhelmed in the waters in the same way. There has been no discrimination.**

The challenge is to all mankind. Each nation must decide for itself how it will meet it. The choice we make for ourselves must be made with a moderation of counsel and a temperateness of judgment befitting our character and our motives as a nation. We must put excited feelings away. Our motive will not be revenge or the victorious assertion of the physical might of the nation, but only the vindication of right, of human right, of which we are only a single champion.

When I addressed the congress on the 26th of February last I thought it would suffice to assert our neutral rights with arms, **our right to use the seas against unlawful interference, our right to keep our people safe against unlawful violence.** But armed neutrality, it now appears, is impracticable. **Because submarines are in effect outlaws when used as the German submarines have been used against merchant shipping,** it is impossible to defend ships against their attacks, as the law of nations has **assumed that merchantmen would defend themselves against privateers or cruisers, visible craft giving chase upon the open sea.** It is common prudence in such circumstances, grim necessity indeed, to endeavor to destroy them before they have shown their own intention. **They must be dealt with upon sight, if dealt with at all.**

The German government denies the right of neutrals to use arms at all within the areas of the sea which it has proscribed even in the defense of rights which no modern publicist has ever before questioned their right to defend. The intimation is conveyed that the armed guards which we have placed on our merchant ships will be treated as beyond the pale of law and subject to be dealt with as pirates would be. **Armed neutrality is ineffectual enough at best; in such circumstances and in the face of such pretensions it is worse than ineffectual; it is likely only to produce what it was meant to prevent; it is practically certain to draw us into war without either the rights or the effectiveness of the belligerents. There is one choice we cannot make, we are incapable of making: We will not choose the path of submission** and suffer the most sacred rights of our nation and our people to be ignored or violated. **The wrongs against which we now array ourselves are no common wrongs; they cut to the very roots of human life.**

With a profound sense of the solemn and even tragical character of the step I am taking and of the grave responsibilities which it involves, but in unhesitating obedience to what I deem my constitutional duty, I advise that the congress declare the recent course of the Imperial German government to be in fact nothing less than war against the government and people of the United States; that it formally accept the status of belligerent which has thus been thrust upon it; and that it take immediate steps not only to put the country in a more thorough state of defense, but also to exert all its power and employ all its resources to bring the government of the German empire to terms and end the war.

What this will involve is clear. It will involve the utmost practicable co-operation in counsel and action with the governments now at war with Germany, and as incident to that, the extension to those governments of the most liberal financial credits, in order that our resources may so far as possible be added to theirs.

It will involve the organization and mobilization of all the material resources of the country to supply the materials of war and serve the incidental needs of the nation in the most abundant and yet the most economical and efficient way possible.

It will involve the immediate full equipment of the navy in all respects, but particularly in supplying it with the best means of dealing with the enemy's submarines.

It will involve the immediate addition to the armed forces of the United States, already provided for by law in case of war, of at least 500,000 men, who should, in my opinion, be chosen upon the principle of universal liability to service, and also the authorization of subsequent additional increments of equal force so soon as they may be needed and can be handled in training.

It will involve also, of course, the granting of adequate credits to the government, sustained, I hope, so far as they can equitably be sustained by the present generation, by well-conceived taxation.

I say sustained so far as may be equitable by taxation, because it seems to me that it would be most unwise to base the credits, which will now be necessary, entirely on money borrowed. It is our duty, I most respectfully urge, to protect our people, so far as we may, against the very serious hardships and evils which would be likely to arise out of the inflation which would be produced by vast loans.

In carrying out the measures by which these things are to be accomplished we should keep constantly in mind the wisdom of interfering as little as possible in our own preparation and in the equipment of our own military forces with the duty—for it will be a very practical duty—of supplying the nations already at war with Germany with the materials which they can obtain only from us or by our assistance. They are in the field, and we should help them in every way to be effective there.

I shall take the liberty of suggesting, through the several executive departments of the government, for the consideration of your committees, measures for the accomplishment of the several objects I have mentioned. I hope that it will be your pleasure to deal with them as having been framed after very careful thought by the branch of the government upon whom the responsibility of conducting the war and safeguarding the nation will most directly fall.

While we do these things, these deeply momentous things, let us be very clear, and make very clear to all the world, what our motives and our objects are. My own thought has not been driven from its habitual and normal course by the unhappy events of the last two months, and I do not believe that the thought of the nation has been altered or clouded by them. I have exactly the same things in mind now that I had in mind when I addressed the senate on the 22d of January last; the same that I had in mind when I addressed congress on the 3d of February and on the 26th of February. Our object now, as then, is to vindicate the principles of peace and justice in the life of the world as against selfish and autocratic power, and to set up among the really free and self-governed peoples of the world such a concert of purpose and of action as will henceforth insure the observance of those principles.

Neutrality is no longer feasible or desirable where the peace of the world is involved and the freedom of its peoples, and the menace to that peace and freedom lies in the existence of autocratic governments, backed by organized force which is controlled wholly by their will, not by the will of their people. We have seen the last of neutrality in such circumstances. We are at the beginning of an age in which it will be insisted that the same standards of conduct and of responsibility for wrong done shall be observed among nations and their governments that are observed among the individual citizens of civilized states.

We have no quarrel with the German people. We have no feeling toward them but one of sympathy and friendship. It was not upon their impulse that their government acted in entering the war. It was not with their previous knowledge or approval. It was a war determined upon as wars used to be determined upon in the old unhappy days, when peoples were nowhere consulted by their rulers and wars were provoked and waged in the interest of dynasties or of little groups of ambitious men who were accustomed to use their fellow men as pawns and tools.

Self-governed nations do not fill their neighbor states with spies or set the course of intrigue to bring about some critical posture of affairs which will give them an opportunity to strike and make conquest. Such designs can be successfully worked out only under cover and where no one has the right to ask questions. Cunningly contrived plans of deception or aggression, carried, it may be from generation to generation, can be worked out and kept from the light only within the privacy of courts or behind the carefully guarded confidences of a narrow and privileged class. They are happily impossible where public opinion commands and insists upon full information concerning all the nation's affairs.

A steadfast concert for peace can never be maintained except by a partnership of democratic nations. No autocratic government could be trusted to keep faith within it or observe its covenants. It must be a league of honor, a partnership of opinion. Intrigue would eat its vitals away; the plottings of inner circles who could plan what they would, and render account to no one, would be a corruption seated at its very heart. Only free peoples can hold their purpose and their honor steady to a common end, and prefer the interest of mankind to any narrow interest of their own.

Does not every American feel that assurance has been added to our hope for the future peace of the world by the wonderful and heartening things that have been happening within the last few weeks in Russia? **Russia was known by those who knew her best to have been always in fact democratic at heart in all vital habits of her thought, in all the intimate relationships of her people that spoke their natural instinct, their habitual attitude toward life. The autocracy that crowned the summit of her political structure, long as it had stood and terrible as was the reality of its power, was not in fact Russian in origin, character, or purpose, and now it has been shaken off and the great generous Russian people have been added, in all their native majesty and might, to the forces that are fighting for freedom in the world, for justice, and for peace.** Here is a fit partner for a league of honor.

One of the things that have served to convince us that the Prussian autocracy was not and could never be our friend is that from the very outset of the present war it has filled our unsuspecting communities, and even our offices of government, with spies and set criminal intrigues everywhere afoot against our national unity of counsel, our peace within and without, our industries, and our commerce. Indeed it is now evident that its spies were here even before the war began and it is unhappily not a matter of conjecture, but a fact proven in our courts of justice, that the intrigues which have more than once come perilously near to disturbing the peace and dislocating the industries of the country, have been carried on at the instigation, with the support, and even under the personal directions of official agents of the Imperial government accredited to the government of the United States.

Even in checking these things and trying to extirpate them we have sought to put the most generous interpretation possible upon them, because we knew that their source lay not in any hostile feeling or purpose of the German people toward us (who were, no doubt, as ignorant of them as we ourselves were), but only in the selfish designs of a government that did what it pleased and told its people nothing. But they have played their part in serving to convince us at last that that government entertains no real friendship for us and means to act against our peace and security at its convenience. That it means to stir up enemies against us at our very doors, the intercepted note to the German minister at Mexico City is eloquent evidence.

We are accepting this challenge of hostile purpose because we know that in such a government, following such methods, we can never have a friend, and that in the presence of its organized power, always lying in wait to accomplish we know not what purpose, there can be no assured security for the democratic governments of the world. We are now about to accept the gage of battle with the natural foe to liberty, and shall, if necessary, spend the whole force of the nation to check and nullify its pretensions and its power. We are glad now that we see the facts with no veil of false pretense about them, to fight thus for the ultimate peace of the world and for the liberation of its peoples, the German peoples included; for the rights of nations, great and small, and the privilege of men everywhere to choose their way of life and of obedience.

The world must be made safe for democracy. Its peace must be planted upon the tested foundations of political liberty. We have no selfish ends to serve. We desire no conquests, no dominion. **We seek no indemnities for ourselves, no material compensation for the sacrifices we shall freely make.** We are but one of the champions of the rights of mankind. We shall be satisfied when those rights have been made as secure as the faith and the freedom of nations can make them.

Just because we fight without rancor and without selfish object, seeking nothing for ourselves but what we shall wish to share with all free people, we shall, I feel confident, conduct our operations as belligerents without passion and ourselves observe with proud punctilio the principles of right and of fair play we profess to be fighting for.

I have said nothing of the governments allied with the Imperial government of Germany because they have not made war upon us or challenged us to defend **our right and our honor. The Austro-Hungarian government has, indeed, avowed its unqualified indorsement and acceptance of the reckless and lawless submarine warfare, adopted now without disguise by the Imperial German government, and it has therefore not been possible for this government to receive Count Tarnowski, the ambassador recently accredited to this government by the Imperial and Royal government of Austria-Hungary; but that government has not actually engaged in warfare against citizens of the United States on the seas, and I take the liberty, for the present at least, of postponing a discussion of our relations with the authorities at Vienna. We enter this war only where we are clearly forced into it because there are no other means of defending our rights.**

It will be all the easier for us to conduct ourselves as belligerents in a high spirit of right and fairness because we act without animus, not with enmity toward a people or with the desire to bring any injury or disadvantage upon them, but only in armed opposition to an irresponsible government which has thrown aside all considerations of humanity and of right and is running amuck.

We are, let me say again, the sincere friends of the German people, and shall desire nothing so much as the early re-establishment of intimate relations of mutual advantage between us, however hard it may be for them for the time being to believe that this is spoken from our hearts. We have borne with their present government through all these bitter months because of that friendship, exercising a patience and forbearance which would otherwise have been impossible.

We shall happily still have an opportunity to prove that friendship in our daily attitude and actions toward the millions of men and women of German birth and native sympathy who live among us and share our life, and we shall be proud to prove it toward all who are in fact loyal to their neighbors and to the government in the hour of test. They are most of them as true and loyal Americans as if they had never known any other fealty or allegiance. They will be prompt to stand with us in rebuking and restraining the few who may be of a different mind and purpose. If there should be disloyalty, it will be dealt with with a firm hand of stern repression; but if it lifts its head at all, it will lift it only here and there and without countenance except from a lawless and malignant few.

It is a distressing and oppressive duty, gentlemen of the congress, which I have performed in thus addressing you. There are, it may be, many months of fiery trial and sacrifice ahead of us. It is a fearful thing to lead this great, peaceful people into war, into the most terrible and disastrous of all wars, civilization itself seeming to be in the balance.

But the right is more precious than peace, and we shall fight for the things which we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own governments, for the rights and liberties of small nations, for a universal dominion of right by such a concert of free peoples as shall bring peace and safety to all nations and make the world itself at last free.

To such a task we can dedicate our lives and our fortunes, everything that we are and everything that we have, with the pride of those who know that the day has come when America is privileged to spend her blood and her might for the principles that gave her birth and happiness and the peace which she has treasured.

God helping her, she can do no other.

CALLS BOYS TO THE COLORS

President Wilson Asks All Between Ages of Sixteen and Twenty-One to Join Working Reserve.

Young men of the country between the ages of sixteen and twenty-one, not now employed, are called upon by President Wilson to serve the nation by joining the United States Boys' Working reserve. In a letter made public by Secretary Wilson of the labor department, the president says it is the patriotic duty of these young men to use their spare time in productive work and help support the nation in the present crisis. The president's letter follows:

"Permit me to express my great appreciation of the great work undertaken by the United States Boys' Working reserve of the employment service of the department of labor. To give to the young men between the ages of sixteen and twenty-one the privilege of spending their spare time in productive enterprises without interrupting their studies at school, while their older brothers are battling in the trenches and on the seas, must greatly increase the means of providing for the forces at the front and the maintenance of thoes whose services are needed here. It is a high privilege, no less than a patriotic duty, to help support the nation by devoted and intelligent work in this great crisis.

"Let me express the hope that the young men of the country not now permanently employed may eagerly enter the Boys' Working reserve to fit themselves by training and study for good citizenship and productive service. In this way they can show themselves worthy of patriotic fathers who have fought for democracy in the past, sustain their patriotic brothers who are fighting for it today, and command the affectionate pride of the brave mothers who are silently bearing the burdens at home."

University Functions.

What is the matter with our universities is that all the students are schoolboys, whereas it is of the very essence of university education that they should be men, writes George Bernard Shaw. The function of a university is not to teach things that can now be taught as well or better by university extension lecturers or by private tutors or modern correspondence classes with gramophones. We go to them to be socialized; to acquire the hall mark of communal training; to become citizens of the world instead of inmates of the enlarged rabbit hutches we call homes; to learn manners and become unchallengeable ladies and gentlemen. The social pressure which effects these changes should be that of persons who have faced the full responsibilities of adults as working members of the general community, not that of barbarous rabble of half emancipated schoolboys and unemancipatable pedants.

Growing a Character.

Character is what you are. Reputation is what folks think you are. Sometimes they are so well balanced that you can't tell one from the other, says Grit. But more often the one is a libel on the other. Folks exalt virtues that do not exist and condemn follies that are purely subjective and personal. Much depends on who reports you. Friends are always charitable and interpret our lives to best advantage. Enemies can see no good in us and report as they see. So reputation may flatter or condemn. Not so with character. This is something beyond external observation. It is the life itself as lived amidst its motives and obstacles. Few people can know its real value, for even you do not always know just what you are capable of being until the emergency demands display your worth. What you are in the face of severe testing is character.

Just Missed It.

An old gentleman from the country, tremulous with fear after hearing bombs and gunfire, in an air raid emerged from his hotel with his wife, relates the London Chronicle. In the street they inquired of an imperturbable police constable if it was "all over." The policeman, imagining they were eager sightseers, said, "Well, I'm afraid, sir, it is all over; but they may return in 'alf an 'our." Rapid departure of the "sightseers."

THE NEW WAR TAX HELPS WHIP ENEMY

Folks Have to Pay Extra Now for Postage, Travel, Amusements, Etc.

REMEMBER, KAISER TO BLAME

But for Prussia's Mad Ambition and Barbarous Methods, World Probably Would Be at Peace—Don't Forget Income Tax.

Postage.—Three cents an ounce or fraction thereof on letters for other than local delivery; two cents on all postal cards.

Admissions—Ten per cent tax on tickets to theaters, cabarets, and other amusement places.

Dues—Ten per cent tax on dues of clubs exceeding $12 a year.

Tobacco—Graduated taxes on cigars, tobacco, cigarettes, cigarette papers and snuff.

Express—Five per cent tax on amounts paid for express transportation.

Passengers—Eight per cent of the cost of railroad tickets, except local.

Berths—Ten per cent of the cost of berths, staterooms, and parlor car seats.

Oil—Five per cent tax on amounts paid for transportation of oil by pipe lines.

Messages—Five cents tax on each telegraph, telephone, or radio message costing 15 cents or more.

Insurance—Eight cents tax on each $100 or fractional part thereof of each life insurance policy; one per cent of the premium on fire, marine, inland, and casualty insurance policies.

Washington—How does the war tax strike you? How do you enjoy putting up three cents instead of two on all letters sent out of town? How do you like paying the extra charge for movies, railroad tickets, telegrams, long-distance phone messages?

And, by the way, if you are single and earn more than $1,000 a year, you have to pay a two per cent tax on all in excess of the thousand bucks. And if you are married, you have to pay two per cent tax on your annual income in excess of $2,000.

Didn't you know that? Well, it's true, and the tax must be paid by June 1, 1918 for the whole year 1917. If you fail to pay, the government can exact a heavy penalty. But remember, folks, it is all done to help whip the kaiser. If the tax makes you grouchy, cuss the kaiser, don't cuss our government.

All of the new taxes fall upon the average man. They have nothing to do with the "conscription of wealth." They are a part of the program of taxation to make each man, woman and child in the United States feel a direct personal part in the war. They apply to freight, passenger and express transportation, pipe lines, Pullman seats and berths, telegraph and telephone messages, insurance policies, admissions to theaters and "movies" and to club dues. The effect of most of them is felt, therefore, in a slight rise in the high cost of living.

The taxes are expected to net the federal government the following revenues:

Freight transportation.....	$77,500,000
Express transportation....	10,000,000
Passenger transportation..	60,000,000
Pipe lines.................	4,500,000
Seats and berths..........	4,000,000
Telegraph and telephone messages	7,000,000
Insurance policies	5,000,000
Club dues	1,500,000
Admissions	50,000,000

The war tax on facilities furnished by public utilities is now levied as follows:

Three per cent of the amount paid for transportation by rail or water or by any form of mechanical motor power in competition with carriers by rail or water, on freight consigned from one point in the United States to another.

One cent for each twenty cents or fraction charged by express companies for transportation from one point in the United States to another.

Eight per cent of the amount paid for the transportation of persons by rail or water or by any form of mechanical motor power on a regular established line in competition with common carriers, from one point in the United States to any point in the United States, Canada or Mexico where the ticket is issued in the United States. No tax is imposed on commutation or season tickets for trips less than 30 miles, or in cases where the fare does not exceed 35 cents.

Ten per cent of the amount paid for seats, berths or staterooms.

If a mileage book used for transportation or accommodation was purchased prior to November 1, 1917, or if cash fare is paid, the conductor or agent collecting the fare is required to collect the tax.

Five per cent on the amount paid for the transportation of oil by pipe line.

Five cents for each telegraph, telephone or radio dispatch originating in the United States where the charge is 15 cents or more.

The foregoing taxes are paid by the persons paying for the services or facilities rendered. A carrier making no charge for transporting a commodity because of its ownership thereof, or for any other reason, is required to pay a tax equivalent to the amount which would be imposed if it received payment, except in the case of commodities which are necessary for its use in the conduct of its business or the business of another line constituting a part of the same railroad system. Service rendered to the federal and state governments is exempt from taxation. Persons collecting these taxes are required to make monthly returns and monthly payments to the federal government.

The new levies upon insurance take effect in the following manner:

On life insurance, eight cents on each $100 or fraction of the amount of the policy, except industrial insurance policies not in excess of $500 issued on the weekly payment plan, in which case the tax is 40 per cent of the first weekly premium. Policies of re-insurance are exempt.

On marine, inland and fire insurance, one cent on each dollar or fraction of the premium charged under each policy including renewals, but not including policies of re-insurance.

Casualty insurance, one cent on each dollar or fraction of the premium charged under each policy (except indemnity and surety bonds, which are taxable under another title of the bill) including renewals, but not including re-insurance policies.

Policies issued by any corporation exempt from the income tax are exempt from this tax.

The person, partnership or association issuing such policies of insurance is required to make monthly returns and monthly payments to the government.

For every ten cents or fraction thereof you spend on the movies you must turn over to the government one cent. Of course, the movie proprietors may save you the inconvenience of handling pennies by raising his admission price a nickel, as many other persons selling goods affected by the war tax have already done.

Here is the way admission tax and the club dues levies will fall upon the public:

One cent on each ten cents or fraction of the amount paid for admission to any place including admission by season ticket or subscription, to be paid by the person paying for such admission, except in the case of children under twelve, where the tax in every case is one cent. Persons admitted free pay the tax on the basis of the charge made to other persons of the same class, except employees, municipal officers on official business and children under twelve. Where the charge for admission to a cabaret or similar entertainment is wholly or in part included in the price paid for refreshment, service or merchandise, the amount paid is to be computed under regulations to be prescribed by the treasury department.

In the case of persons having the permanent use of boxes or seats, or a lease thereon, the tax is equivalent to 10 per cent of the amount for which a similar box or seat is sold for the performance or exhibition at which the box or seat is used or reserved by or for the lessee or holder.

These taxes are not to be imposed in the case of a place where the maximum charge for admission is five cents or for shows, rides or other amusements in outdoor general amusement parks where the admission is ten cents or in the case of shows, rides or other amusements (the maximum charge for admission to which is ten cents) within outdoor general amusement parks, or in the case of admissions to such parks. Where the proceeds inure exclusively to the benefit of religious, educational or charitable societies or organizations, and in the case of admissions to agricultural fairs, no tax shall be levied, provided none of the proceeds are distributed to stockholders or members of the association.

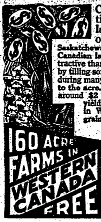
A tax of 10 per cent is imposed on the amount paid as dues or membership fees, including initiation fees, to any social, athletic or sporting club where such dues or fees are in excess of $12 per year, such tax to be paid by the person paying the dues or fees. Dues or fees paid to fraternal or beneficiary societies, orders or associations operated on the lodge system are exempt.

Those collecting admission dues or fees are required to collect the tax and make monthly returns and payments to the government.

Civilization.

Judge Shockney, of the Randolph county court, relates a story of a friend of his who for many years sailed on the high seas, and was at one time shipwrecked and drifted to a tropical island, says the Indianapolis News. After landing on the island his friend began to investigate, and made his way inland, in search of signs of habitation, proceeding cautiously, fearing he would meet cannibals. He wandered around until almost famished, when suddenly he discovered a fire in the distance. He hid himself until dark, when he crept near enough to hear voices. He listened for some time, but could not make out what was said. Suddenly the voices grew louder and an argument arose between the men around the fire. One exclaimed in a loud voice: "I played the jack." Another replied in angry tones, "You're a liar." Shockney's friend at once rushed up to them and cried out: "Thank God for civilization. You are Christians."

Raise High Priced Wheat on Fertile Canadian Soil



Canada extends to you a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta. This year wheat is higher but Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help feed the world by tilling some of her fertile soil—land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think of the money you can make with wheat around $2 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming in Western Canada is as profitable an industry as grain growing.

The Government this year is asking farmers to put increased acreage into grain. There is a great demand for farm labor to replace the many young men who have volunteered for service. The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient. Write for literature as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

R. A. GARRETT
311 Jackson Street, St. Paul, Minn.
Canadian Government Agent

Through and Through.

The two men in blue were exchanging confidences on the veranda of a big military hospital in France.

"Did you go to the big society party they gave for us crocked fellows yesterday?"

"Yes," said the other and shuddered.

"What did you think of it?"

"Believe me, old bloke, I'd rather have another ball go through me than go through another ball."

Gray Matter Counts.

"The author of this story is a clever chap." "That so?" "Yes, it takes brains to sell such rot."—Judge.

Nothing hurts quite so much as the wrong that is done to us unintentionally.

Paxtine
ANTISEPTIC POWDER
FOR PERSONAL HYGIENE
Dissolved in water for douches stops pelvic catarrh, ulceration and inflammation. Recommended by Lydia E. Pinkham Med. Co. for ten years. A healing wonder for nasal catarrh, sore throat and sore eyes. Economical. Has extraordinary cleaning and germicidal power. Sample Free. 50c. all druggists, or postpaid by mail. The Paxton Toilet Company, Boston, Mass.

Worse Than Blue.

Josephine went to her mother in apparent depression of spirits and remarked: "Oh, dear, I feel so purple today."

"Baby, what do you mean?" asked mother.

"Well, don't all little girls whose fathers have gone to the war feel purple?"

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.—Adv.

Electric Furnaces.

The electric furnaces of Sheffield, England, alone can now produce 90,000 tons of steel per year, and it is anticipated that in 1918 the output from these furnaces alone will be 150,000 tons.

CUTICURA STOPS ITCHING

Instantly in Most Cases—Write for a Free Sample.

Cuticura is wonderfully effective. The Soap to cleanse and purify, the Ointment to soothe and heal all forms of itching, burning skin and scalp affections. Besides these super-creamy emollients if used daily prevent little skin troubles becoming serious.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

The Point of View.

The kind-hearted woman stopped to reprove the youngster who had chased a cat up a tree.

"You bad boy, suppose you were a cat, would you like to have anyone chase you in that fashion?"

"Gee! wouldn't I, though, if I could climb like that!" said the youngster, grinning.

You're Flirting With Death! Stop Kidney-Ills Now

Thousands Die Yearly From Ravages of Kidney Troubles for Which Dodd's Pills Give Quick Relief.

Take heed! Never disregard nature's warnings of that great destroyer—Kidney Trouble. You know the signs—backache, shooting pains through the loins, stiffness in stooping or lifting, spots before the eyes, dizziness, rheumatic pains, swollen joints, bed-wetting, nightly arising.

At the first sign of Kidney derangements, get in your preventive work with DODD'S KIDNEY PILLS. Take no chances. Stop thinking "I'll be all right in a day or two." That's the road to dreaded Bright's disease.

Every druggist has DODD'S KIDNEY PILLS. Remember—the name with the three Ds. You don't have to take box after box, and wait weeks for results. The first box is guaranteed to help you. If it doesn't, your druggist will gladly refund your money.

But, to get results, you must refuse substitutes and accept no remedy of similar name. DODD'S do the work—and it's DODD'S you want.

To-day, get DODD'S PILLS and start on the road to Kidney-health. Your drug store has the genuine—your druggist guarantees them. Adv.

Ridiculed His Wife.

Mental cruelty was the ground upon which a woman obtained a divorce in Reno, Nev. The woman said her husband constantly ridiculed her, refused to be seen alone with her at public gatherings and frequently showed his friends a little book entitled "Foolish Things My Wife Has Said."

Housekeepers Can Save $200,000,000 on Food

In these days when the high cost of living pinches nearly every home, no waste should be overlooked. One of the most flagrant and the most easily prevented, is the destruction of food by rats. One rat will often do a hundred dollars' damage of food and property in a single night, and a careful estimate gives over $200,000,000 as the value of foodstuffs destroyed annually by these pests. Exterminate them with Stearns' Paste and save this enormous loss of food. A small box of Stearns' Paste costs only 35 cents and is usually enough to completely rid the house of rats and mice; also effective against cockroaches and waterbugs. Adv.

Music of the Wind.

The wind in the trees sounds poetical. But the hot air that accompanies some family trees does not.

Honest men are almost as scarce as silent women.

Brief Items of State News

Galen Campbell, of Randall was arrested by Sheriff Felix, charged with breaking into the store of Nelson Bros., at Randall in March, 1916, and made a complete confession, according to county authorities.

Fred Harper of Lynchburg, Va., grand exalted ruler of the Elks, visited Stillwater one day recently. An informal reception was held at the Stillwater club, after which Mr. Harper, accompanied by a party of friends, visited the prison.

In district court at Roseau, in the suit of Ethel L. Jones, late of Warroad, against the Missouri State Life Insurance company, to recover on two two policies of insurance aggregating $5,000, the jury returned a verdict against the company for $5,230.

A municipal wood yard at Bemidji to provide cheap fuel for poor people at a nominal cost is expected to result from action of the city council when, following a suggestion by Mayor Charles Vandersluis, the council appointed a committee to investigate the proposition.

Dr. Frank A. Weld, president of ehe Moorhead normal school, has been appointed treasurer for Clay county to have charge of funds collected in the campaign to raise a company fund for the 352nd regiment of the National army stationed at Camp Dodge, composed of the selected men from Minnesota and North Dakota counties, including Clay county.

One family in every two pledged to conserve food along the lines suggested by the food administration, is the goal which Herbert C. Hoover expects to see reached in the food pledge drive. A. D. Wilson, food administrator for Minnesota, believes that this state will come up to that ratio. More than 3,000,000 cards have been signed throughout the United States already, according to reports from Washington. Minnesota's quota is 235,000.

That the closed season on partridge is resulting in a big increase in this game bird is vouched for by Game Warden John G. Green, just in from the north. Last year few partridges could be seen anywhere in Northern Minnesota. "I have seen a large number of partridge coveys this fall," said Green. "Last fall most of us thought that the partridge had gone forever. Hunters will enjoy rare shooting in 1920 when the law will be off."

What is said to be an unusual case of catalepsy occurred at the home of Andrew Wicklund near Fergus Falls when his seventeen-year-old daughter was taken suddenly ill. Almost without warning she fell into a cataleptic state and now lies absolutely rigid and with open eyes. Apparently she recognizes no one and it is necessary for physicians to feed her with a tube. She was taken to a hospital in Fergus Falls and physicians state that recovery is quite possible.

Gen. William Gates Le Duc, pioneer Minnesota, for many years among the best known men in public life in this state, and a national figure in the development of agriculture, died in his home in Hastings, the city which he had laid out in the fifties. Pneumonia from which he had suffered for a week, was the cause of death. He was 94 years old.

Fire completely destroyed two buildings at Baker and threatened the rest of the town, local citizens spending several hours fighting the flames in their successful struggle to keep the fire from spreading. The Odd Fellows' Hall and the Oscar Iverson grocery store were both burned to the ground, causing a loss of over $6,000, about half of which is covered by insurance.

Soldiers in the cantonments at Fort Snelling are experiencing much discomfort from the cold weather. As the cantonments were constructed on post foundations a foot from the ground and with but a single board siding, in the hope that the Northwest would have its usual Indian summer, there are plenty of places for the cold air to creep in. The stoves are too small to heat them.

Steps were taken at a meeting held at Hibbing, of coal dealers from Hibbing, Chisholm, Buhl, and Kinney to co-operate with Judge J. F. McGee of St. Paul, state fuel administrator, in remedying the iron range coal situation. Coal dealers will prepare an estimate of the coal required for immediate use. The coal situation is considered exceedingly bad. There has been no decrease in prices this year.

Game Warden Munch of Crookston, receiving his first shipments of white fish from the fisheries at Red Lake, near Bemidji, was completely swamped by consumers seeking to cut down the high cost of living by buying fish from the fish and game commission at prices less than half of those being charged by the butchers. Ten minutes after the fish were unpacked the game warden was completely sold out.

Lena Lard, aged 22 years, daughter of Edward Lard, a well known farmer near St. Cloud is in a hospital at the latter place at the point of death as the result of injuries sustained when she jumped from a haystack onto the prongs of a pitchfork at the home of her father near Richmond.

The three members of the Minnesota tax commission, Commissioners Arneson, Hale and Lord, will go to Little Falls soon to make an investigation of the assessment of the property of the Little Falls Water Power company with a view to adjusting it in a fair manner.

Supplying the Names.

"So you have twins at your house?" said Mrs. Nabor to little Jack.

"Yessum," he said soberly, "two of them."

"What are they going to call them, my dear?"

"Well, I don't know for sure, but I think their names is Thunder and Lightnin', 'cause that's the names papa called them when the doctor came in and told him about them."—New Puck.

GREEN'S AUGUST FLOWER

has been a household panacea all over the civilized world for more than half a century for constipation, intestinal troubles, torpid liver and the generally depressed feeling that accompanies such disorders. It is a most valuable remedy for indigestion or nervous dyspepsia and liver trouble, bringing on headache, coming of up food, palpitation of heart and many other symptoms. A few doses of August Flower will immediately relieve you. It is a gentle laxative. Ask your druggist. Sold in all civilized countries.—Adv.

At the Post Office.

"What did she do when you told her it would cost 3 cents to send a letter hereafter instead of 2?"

"Umph—she got so angry she stamped her foot."

RELIABLE REMEDY RESTORES KIDNEYS

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. Dr. Kilmer used it for years in his private practice. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it will help you. No other remedy can successfully take its place.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Madras in 1916 exported $440,905 worth of sandalwood.

Brazil in June exported 4,364,979 pounds of crude rubber.

THE LAST EXAMINATION OF WAR'S DRAFT

Many a man has fallen down because a test of his water showed unmistakably that he had kidney disease.

The kidneys are the scavengers and they work day and night in separating the poisons from the blood. Their signals of distress are easily recognized and include such symptoms as backache, depressions, drowsiness, irritability, headaches, dizziness, rheumatic twinges, dropsy, gout.

"The very best way to restore the kidneys to their normal state of health and cure such symptoms," says Dr. Pierce of Invalids' Hotel, Buffalo, N. Y., "is to drink plenty of water and obtain from your favorite pharmacy a 60-cent bottle of An-u-ric, double strength, which is dispensed by almost every druggist." You will find Anuric more potent than lithia, dissolves uric acid as water does sugar.

Send Dr. Pierce 10c for trial pkg. and ask for advice if there is need.

NERVOUS BREAK-DOWN

Minneapolis, Minn.—"About three years ago I suffered from a nervous break-down, had terrible headaches, lost my appetite and could not sleep. I saw an advertisement of the Dr. Pierce's Favorite Prescription and bought a bottle, which I found to be splendid in restoring me to health."—MRS. J. O. JACOBSON, 3109 Findley Place.

Get "Favorite Prescription" today, either in liquid or tablet form, from any dealer in medicines or send Dr. Pierce, Buffalo, N. Y., 10 cents for large trial package. Large pkg. 60c.

Dr. Pierce's Pleasant Pellets are purely vegetable with no calomel.—Adv.

SPOHN'S DISTEMPER COMPOUND

Fall Run of Distemper
MAY BE WHOLLY AVOIDED BY USING
"SPOHNS" A small outlay of money brings very great results. It is a sure cure and a preventive if you use it as per directions. Simple, safe and sure. The $1 size is twice the quantity and an ounce more than the 50c size. Get your horses in best condition for late fall and winter. All druggists, harness dealers or manufacturers.
SPOHN MEDICAL CO., Manufacturers, Goshen, Ind.

Timely Evidence.

"Have you a recommendation from your last place?"

"Yes, mum. Here it is."

"Why, that's a wrist watch."

"Yes, mum. The master of the house—a poor gentleman who's dead now—gave me that for cooking his eggs the way he wanted 'em."

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher
In Use for Over 30 Years.
Children Cry for Fletcher's Castoria

Makes Up for Lost Time.

It takes a kitten nine days to get its eyes open, but then it has nine lives to live to make up for it.

Concealed Art.

The perfection of art is to conceal art, says a prophet. Fashion arbiters please take notice.—Exchange.

The fickleness of some women is what makes them interesting.

Flattery is harmless to the woman who doesn't flatter herself.

Looks That Way.

"You know these war rates?"

"Yes."

"Are they going to hurt matters?"

"I dunno. I fear that 3-cent postage is going to put a lot of poets out of business."

Lacks Appreciation.

Somehow or other a man never appreciates what he has acquired with little effort or cost.

$100 Reward, $100

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work. $100.00 for any case of Catarrh that HALL'S CATARRH MEDICINE fails to cure.

Druggists 75c. Testimonials free.
F. J. Cheney & Co., Toledo, Ohio.

Canada in 1916 produced 82,564,130 pounds of creamery butter.

The average man has more than one kick coming—to him.

When a man begins to burn his money look out for a hot time.

Royal Baking Powder
saves eggs in baking

In many recipes only half as many eggs are required, in some none at all, if an additional quantity of Royal Baking Powder is used, about a teaspoon, in place of each egg omitted.

Try the following recipes which *also conserve white flour as urged by the government.*

Corn Meal Griddle Cakes

1¼ cups corn meal
1½ cups boiling water
½ cup milk
1 tablespoon shortening
1 tablespoon molasses
¾ cup flour
1 teaspoon salt
4 teaspoons Royal Baking Powder
NO EGGS

Scald corn meal in bowl with boiling water; add milk, melted shortening and molasses; add flour, salt and baking powder which have been sifted together; mix well. Bake on hot greased griddle until brown.

(The Old Method called for 2 eggs)

Eggless, Milkless, Butterless Cake

1 cup brown sugar
1¼ cups water
1 cup seeded raisins
2 ounces citron, cut fine
⅓ cup shortening
½ teaspoon salt
1 teaspoon nutmeg
1 teaspoon cinnamon
1 cup flour
1 cup rye flour
5 teaspoons Royal Baking Powder

Boil sugar, water, fruit, shortening, salt and spices together in saucepan 3 minutes. When cool, add flour and baking powder which have been sifted together. Mix well; bake in loaf pan in moderate oven about 45 minutes.

(The Old Method [Fruit Cake] called for 2 eggs)

Send for our new booklet "55 Ways to Save Eggs." Mailed free on request. Address Royal Baking Powder Co., Dept. W., 135 William Street, New York

Middle Aged Women
Are Here Told the Best Remedy for Their Troubles.

Freemont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."—Mrs. M. Godden, 925 Napoleon St., Fremont, Ohio.

North Haven, Conn.—"Lydia E. Pinkham's Vegetable Compound restored my health after everything else had failed when passing through change of life. There is nothing like it to overcome the trying symptoms."—Mrs. Florence Isella, Box 197, North Haven, Conn.

ARTICLES OF INCORPORATION OF THE FARM LOAN SECURITY COMPANY.

We, the undersigned, for the purpose of forming a corporation under and pursuant to the provisions of Chapter Fifty-eight (58), General Statutes for 1913, and any amendments thereof, do hereby associate ourselves as a body corporate, and do hereby adopt the following Articles of Incorporation:

ARTICLE I.

Sec. 1. The name of this corporation shall be Farm Loan Security Company.

Sec. 2. The general nature of its business shall be to buy, sell, lease, let, improve, or deal in lands and tenements; to buy, construct, improve, lease and sell houses and buildings; to acquire, own, sell, and otherwise dispose of, and deal in, stocks, bonds, mortgages, securities, notes and commercial paper of corporations and individuals; to mortgage, pledge, or otherwise change all or any part of the investments of the company or its property and rights; to do each and every thing necessary, suitable, or proper for the accomplishment of any of the purposes, or the attainment of any one or more of the objects herein enummerated, or which shall at any time appear conducive to or expedient for the protection or benefit of this corporation.

Sec. 3. The principal place of transacting the business of this corporation shall be in the City of Thief River Falls, County of Pennington, Minnesota, and such other places as may be decided upon by the Board of Directors.

ARTICLE II.

The time for the commencement of this corporation shall be November 1, 1917, and the period of its duration shall be thirty years.

ARTICLE III.

The names and places of residence of the persons forming this corporation are Lester E. Gesell, Thief River Falls, Minn., Katherine Gesell, Thief River Falls, Minnesota, and Oscar A. Naplin, Thief River Falls, Minn.

ARTICLE IV.

Sec. 1. The management of this corporation shall be vested in a Board of Directors, composed of not less than three and not more than six members.

Sec. 2. The names and addresses of the first Board of Directors are Lester E. Gesell, Thief River Falls, Minn., Katherine Gesell, Thief River Falls, Minn., and Oscar A. Naplin, Thief River Falls, Minnesota.

Sec. 3. The first officers of this corporation shall be: President, Katherine Gesell; Vice President, Oscar A. Naplin; Secretary and Treasurer, Lester E. Gesell.

Sec. 4. All of the above named officers and directors shall hold their respective offices aforesaid until the next annual meeting of the corporation to be held the third Monday in January, 1918, at which time and annually thereafter, a Board of Directors shall be elected from and by the stockholders of this corporation. Immediately after the election of directors, or as soon thereafter as practicable, the directors shall meet and elect from their number a President, and a Vice President, and from their number or from the stockholders a Secretary and a Treasurer. Any office except that of President and Vice President may be held by one person. The directors and officers of this corporation shall hold their respective offices until their successors have been elected and entered upon the discharge of their duties. The first meeting of the stockholders and of the board of Directors shall be held in the City of Thief River Falls on the 3rd day of November, 1917, at 10 o'clock A. M., and 11 A. M., respectively.

ARTICLE V.

The amount of the capital stock of this corporation shall be Fifty Thousand Dollars, which shall be paid in, in money or property, or both, in such manner, at such times, and in such amounts as the Board of Directors shall order. The capital stock shall be divided into Five Hundred Shares of the par value of $100.00 each.

ARTICLE VI.

The highest amount of indebtedness or liability to which this corporation shall at any time be subject shall be the sum of Fifty Thousand Dollars.

In testimony whereof, we have hereonto set our hands, this 20th day of October, 1917.

KATHERINE GESELL
LESTER E. GESELL
OSCAR A. NAPLIN.

In the Presence of
BARBARE VOTAVA
N. W. TARRANT.

State of Minnesota, County of Pennington, ss. On this 20th day of October, 1917 personally appeared before me Lester E. Gesell, Katherine Gesell and Oscar A. Naplin, to me known to be the persons named in and who executed the foregoing Articles of Incorporation, and each acknowledged that he or she executed the same as his or her free act and deed, for the purposes and uses therein expressed.

N. W. TARRANT,
Municipal Judge for the City of Thief River Falls, Minn.
(COURT SEAL.)

State of Minnesota, Department of State, ss. I hereby certify that the within instrument was filed for record in this office on the 22nd day of October, A. D. 1917, at 11 o'clock A. M., and was duly recorded in Book E-4 of Incorporations on page 492.

JULIUS A. SCHMAHL,
Secretary of State.

Office of Register of Deeds, County of Pennington, Minn. I hereby certify that the within instrument was filed in this office for record on the 23rd day of October, A. D. 1917, at 1:00 o'clock P. M., and was duly recorded in Book H of Miscl., on page 232.

Attention Farmers
There never was a time when it paid the farmer to do good plowing more than today but good plowing cannot be done withapoor plow. POOR PLOWING invariably means POOR CROPS. Considering the fact that prices for all kinds of farm produce are bound to be high for a long time to come you cannot afford to use anything short of the best plow to be had. In the Emerson Line, whether Walking Plows, Sulkies, or Gangs, we maintain we have the lightest draft, the easiest to handle and most durable plow line on the market. Come in and let us tell you why.

A full line of Scandinavian story and song books just received at M. J. Stephenson's.

City and Farm Property for sale. Goodridge Land Co. Call at the Farmers State Bank.

Come to the show at the Grand Theatre Saturday and Sunday evenings. Dance after show Saturday eve.

The Goodridge Literary Society will give a Rag Doll Social in the school house, Thursday evening December 6th Ladies please bring lunch for two and a Rag Doll.

There will be a slight change in the program at the Grand Theatre for Thanksgiving night. "War's Women" will be the feature shown in place of Libertine, as heretofore announced. Big dance after the show.

C. W. Nelson of Mavie was a Good-visitor Sunday morning.

Henry Sand returned Wednesday from Canby, Minn, where he had spent the summer.

A cement crew has been busy the past week putting in two bridges across the new ditch on the west line of the village limits.

P. P. Palmer, Abe Johnarud, Charley Palmer and Rurick Johnson spent the first few days of hunting season near Thorhult hunting big game. Charley was successful in bringing down a big buck.

Sam Miller, the Indian missionary, gave a fine lecture in the Lutheran church here Tuesday evening. The church was crowed to its capacity and all present enjoyed it immensely, as learned to know more about the Indians.

Mrs. Martin Olson and Mrs. A. O. Halvorson will entertain the Goodridge Lutheran Ladies aid in the church next Friday afternoon, Nov. 23rd.

H. Christianson went to Thief River Falls Wednesday to have some dental work done.

Mrs. H. Christianson spent from Saturday till Monday visiting friends in Thief River Falls.

Misses Teresa Giefer, Ruth Anderson and Marion Murray went to Thief River Falls Wednesday evening to attend the annual convention of the Northern Minnesota Terchers' Association.

Born to Mr. and Mrs. Rosaire Morin on Thursday morning November 8th, a baby boy.

Mrs. Sylvester McGuire returned to her home at Grand Forks Monday after spending a week here visiting her sister Mrs. Resaire Morin.

Literary Program.

The following program will be given at the next meeting of the Goodridge Literary Society to be held next Thursday evening Nov. 22nd,

The country's greatest problem is not to get courageous men to fight, but the lazy scoundrels to work.

WAR TALKS

By UNCLE DAN

Number Two

Jimmie Collins Tells What He Saw—What Military Training Does for Boys.

"Well, here we are!" exclaimed Billie, presenting his chum, Jimmie Collins.

"Very glad to see you, Mr. Collins," said Uncle Dan with a smile.

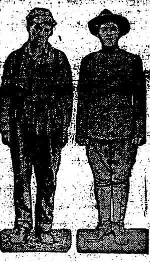
"Aw," said Billie, "Just call him Jimmie. That's the only name he knows. He's the pitcher of our baseball nine, and he's some pitcher, too. Just feel of his arm."

"Well," said Uncle Dan, feeling, "That's a mighty good arm!"

"Now, boys," said Uncle Dan, "what do you want to talk about?"

"Well," said Jimmie, "I was down to Galesburg a few months ago when the boys came home from the Mexican border. They looked fine. Everybody was surprised to see how straight they stood and how manly they were. The boys seemed proud to wear the uniform. I tell you their muscles were as hard as nails. I heard Banker Haskett say that the training and discipline the boys had had was exactly what every boy in the country ought to have, and that now these boys could get a better job at higher pay than they could have had before. Do you think that's so, Uncle Dan?"

Uncle Dan replied: "I have a friend who employs hundreds of young men. He always gives boys having had military training the preference; he says it pays to do so. He finds they are more alert, more prompt, more courteous; they know how to carry out orders; they are quicker to think and to act than those without training. He said from his experience he believed that six or eight months of intensive military training would add at least 20 per cent to a man's earning capacity, and that it was the best investment any young man could make.



AFTER FIVE MONTHS.

The two pictures are of the same young man. The first was taken the day he enlisted and the second after he had had five months' military training. His home is in North Carolina.

"Billie, if you will go up to my room and bring my small handbag, I will let you see two photographs of the same young man, showing what only five months of intensive training on the Mexican border did for him."

The bag was brought. Uncle Dan, showing the pictures, said: "Well, here they are. They tell their own story and it is a mighty interesting one. The young man, before training, has a discouraged look; he has seen but little of the world. There was very little in his surroundings to bring him out. When he joined the colors and Uncle Sam took him in charge, life for him took on a new meaning. He saw a chance to do something and be something. He woke up. His captain says he is twice the man he was when he joined the army. This may be one of the extreme cases," said Uncle Dan. "I can tell you, though, that war or no war, no one thing will do the young men of this nation so much good in so short a time as a few months of intensive military training. It fits a man to fight his own life battles in the business world as well as to defend his country and its flag.

"Nearly every civilized country gives its boys military training. It is compulsory. It is based upon the fact that it is the duty of everyone to help defend his country; and as war is now carried on, no one can do much unless he is trained. Also, the records show that the killed and wounded among untrained troops is nearly three times as great as it is with well-trained men who know how to fight and how to protect themselves. By this plan a nation has trained men to defend her and the serviceman is a stronger and better man for the training.

"If the Chamberlain Bill for Military Training is passed by congress, as it ought to be, the same thing would be done for millions of other young men throughout the land. Everybody ought to demand of his congressman and senators the passage of this bill."

"All right, sir, exclaimed Jimmie, we will see Judge Brownell, Mr. Haskett, and Professor Slocum, and get them busy."

WRITES THRILLING WAR TALE

Randall Parrish, Lecturer, Civic Expert and Author, Turns Out New Sea Story That Makes Hit.

"The most unusual story of the war," is what the literary editors and book reviewers have said of the novel "Contraband," by Randall Parrish. And having just finished the tale ourself, we take sides with them and declare that "Contraband" is a rip-snorting crackerjack of a yarn. It contains more man-size action and heart-warming romance to the chapter than anything in the way of fiction we have read since the year of the Big Wind.

Briefly, "Contraband" is a recital of the adventures of a young man who tries to sneak a ship load of copper across the ocean into Germany a few days after war was declared.

Of course there's a girl in the story—a wonderful girl with tender eyes and soft hair and grace and charm and sweetness and courage. If it hadn't been for her, the hero would have left the ship, crew, copper and Germany to their fate—but she made the difference.

Now here's a secret—we are going to run "Contraband" as a serial in this paper soon. Keep your eyes peeled for further announcement.

On Guard at the Reading Gate.

It is a fine thing to guard our homes against alien soldiers of whose purposes we are all aware. But it is also very important to guard them against other insidious foes that creep in under the disguise of friendly entertainers to plunder and destroy the cherished ideals, the lofty standards, the clear views that have given the home its character.

If you will familiarize your young people [illegible] best reading, they will not be likely to crave what is inferior and demoralizing. The Youth's Companion is a powerful influence in awakening a taste for what is best in reading. It is on guard at the reading gate. Nothing cheap, mean or hateful passes its challenge. But neither does the crabbed and dull and austere. Cheery idealism is The Companion's countersign. Put it on guard at your reading gate.

The Companion is $2.00 a year. If you do not know it, by all means send for sample copies giving a forecast of what the next volume will bring. By adding 25 cents you can also get McCall's Magazine, the best fashion authority for women and girls—both publications for $2.25.

Our two-at-one-price offer includes:

1. The Youth's Companion—52 issues of 1918.
2. All the remaining issues of 1917.
3. The Companion Home Calendar for 1918.
4. McCall's Magazine—12 fashion numbers of 1918.

All for only $2.25.

Mortgage Foreclosure Sale.

Default having been made in the payment of the sum of Three Hundred Eighty-eight and 50|100 (388.50) Dollars, which is claimed to be due and is due at the date of this notice upon a certain Mortgage, duly executed and delivered by John W. Sundahl and Coroline Sundahl, his wife Mortgagors, to First National Bank of Thief River Falls Mortgagee, bearing date the 26th day of September 1911, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the County of Pennington and State of Minnesota, on the 9th day of October 1911, at 10:00 o'clock A. M. in Book 5 of Mortgages, on page 255, and no action or proceeding having been instituted, at law or otherwise, to recover the debt secured by said Mortgage or any part thereof.

Now, Therefore, Notice is Hereby Given, That by virtue of the power of sale contained in said Mortgage, and pursuant to the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises described in and conveyed by said Mortgage, viz:

Lots numbers four (4) and five (5) of Block number four (4) of Porters Addition to Thief River Falls, Minnesota, according to the official plat thereof on file and of record in the office of the Register of Deeds in and for said Pennington County and State of Minnesota, with the hereditaments and appurtenances; which sale will be made by the Sheriff of said Pennington County at the front door of the Court House, in the City of Thief River Falls in said County and State, on the 15th day of December 1917, at Ten o'clock A. M., of that day, at public vendue, to the highest bidder for cash, to pay said debt of Three Hundred Eighty-eight and 50|100 Dollars, and interest, and taxes, if any, on said premises, and Twenty-five Dollars Attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law, subject to redemption at any time within one year from day of sale, as provided by law.

Dated October 30th, A. D. 1917.

First National Bank of Thief River Falls,

A Mouthful of Concrete Will Discourage Any Rat

He will stop trying to get into your corn crib, granary or chicken house when you build foundations and floors with our

Universal Cement

Every rat on your premises is costing you, according to government estimates, the price of at least one bushel of grain per year, and more if he feeds on eggs and chicks.

When rats cannot steal grain they will be driven to your traps or poison—not otherwise.

Concrete foundations, walls, floors, sidewalks and steps give rats no harbor. Rat-proof your buildings with concrete. We have the UNIVERSAL cement and everything else you need to build.

INTENTIONAL DUPLICATE EXPOSURE

WILSON PLEADS FOR LABOR'S AID

Tells A. F. of L. United Support of All is Needed to Win War

GERMANY IS ACCUSED

Imperial Government Started War, President Declares—Pacifists and Critics Scored—Samuel Gompers Is Lauded.

Buffalo, Nov. 14.—A personal and eloquent appeal for the full support of organized labor for the government for the conduct of the war has been made by President Wilson. Speaking before the annual convention of the American Federation of Labor he declared the war could not be won unless all factories unite in a common cause, sinking their differences.

Tribute To Gompers.

The President paid warm tribute to Samuel Gompers, president of the American Federation of Labor, and virtually called upon the federation to give him united support. He denounced pacifists and critics. He appealed for co-operation.

"Between Power and Freedom."

Discussing Germany the President declared flatly that Germany had started the war and that he was willing to await the verdict of history on that statement.

The creation of new instrumentalities for better co-operation between labor and capital was one suggestion by the President which was of prime interest to the delegates to the convention.

The President alluded to the present war as "The last decisive issue between the old principle of power and the new principle of freedom."

Tremendous crowds gathered at the railroad station and in the auditorium to greet the President.

The text of the President's speech follows:

"Mr. President, Delegates of the American Federation of Labor, Ladies and Gentlemen:

"I esteem it a great privilege and a real honor to be thus admitted to your public counsels. When your executive committee paid me the compliment of inviting me here, I gladly accepted the invitation because it seems to me that this above all other times in our history is the time for common counsel for the drawing not only of the energies but of the minds of the nation together. I thought that it was a welcome opportunity for disclosing to you some of the thoughts that have been gathering in my mind during the last momentous months.

Would Banish Thought of Office.

"I am introduced to you as the President of the United States, and yet I would be pleased if you would put the thought of the office into the background and regard me as one of your fellow citizens who has come here to speak, not the words of authority but the words of counsel, the words which men should speak to one another who wish to be frank in a moment more critical perhaps than the history of the world has ever yet known, a moment when it is every man's duty to forget himself, to forget his own interests, to fill himself with the nobility of a great national and world conception and act upon a new platform elevated above the ordinary affairs of life, elevated to where men have views of the long destiny of mankind.

"I think that in order to realize just what this moment of counsel is, it is very desirable that we should remind ourselves just how this war came about and just what it is for. You can explain most wars very simply, but the explanation of this is not so simple. Its roots run deep into all the obscure soils of history, and in my view this is the last decisive issue between the old principles of power and the new principles of freedom.

Germany Started War.

"The war was started by Germany. Her authorities deny that they started it. But I am willing to let the statement I have just made await the verdict of history. And the thing that needs to be explained is why Germany started the war. Remember what the position of Germany in the world was—as enviable a position as any nation has ever occupied. The whole world stood at admiration at her wonderful intellectual and material achievements and all the intellectual men of the world went to school to her. As a university man I have been surrounded by men trained in Germany, men who had resorted to Germany because nowhere else could they get such thorough and searching training, particularly in the principles of science and material achievements.

A Leader in Industrial World.

"Her men of science had made her industries perhaps the most competent industries in the world and the label 'Made in Germany' was a guarantee of good workmanship and of sound material. She had access to all the markets of the world and every other man who traded in those markets feared Germany because of effective and almost irresistible competition. She had a place in the sun. Why was she not satisfied? What more did she want? There was nothing in the world of peace that she did not already have and have in abundance.

Such Methods Unlawful Here.

"You have only to ask any man whom you meet who is familiar with the conditions that prevailed before the war in the matter of international competition to find out the methods of competition which the German manufacturers and exporters used under the patronage and support of the government of Germany. You will find that they were the same sorts of competition that we have tried to prevent by law within our borders. If they could not sell their goods cheaper than we could sell ours at a profit to themselves they could get a subsidy from the government which made it possible to sell them cheaper anyhow and the conditions of the competition were thus controlled in large measure by the German government itself. But that did not satisfy the German government.

"All the while there was lying behind its thought, in its dreams of the future, a political control which would enable it in the long run to dominate the labor and the industry of the world. They were not content with the success by superior achievement; they wanted success by authority. I suppose very few of you have thought much about the Berlin-to-Bagdad railway. The Berlin-to-Bagdad railway was constructed in order to run the threat of force down the flank of the industrial undertakings of half a dozen other countries so that when German competition came in it would not be resisted too far—because there was always the possibility of getting German armies into the heart of that country quicker than any other armies could be got there. Look at the map of Europe now. Germany is thrusting upon us again and again the discussion of peace talks about what? Talks about Belgium, talks about Northern France, talks about Alsace-Lorraine. Well, those are deeply interesting subjects to us and to them, but they are not talking about the heart of the matter.

Germany After World Dominance.

"Take the map and look at it. Germany has absolute control of Austria-Hungary, practical control of the Balkan states, control of Turkey, control of Asia minor. I saw a map in which the whole thing was printed in appropriate black the other day and the black stretched all the way from Hamburg to Bagdad—the bulk of German power inserted into the heart of the world. If it can keep that she has kept all that her dreams contemplated when the war began. If she can keep that her power can disturb the world as long as she keeps it—always provided, for I feel bound to put this proviso in, always provided the present influences that control the German government continue to control it.

"I believe that the spirit of freedom can get into the hearts of the Germans and find as fine a welcome there as it can find in any other hearts. But the spirit of freedom does not suit the plans of the Pan-Germans. Power cannot be used with concentrated force against free peoples if it is used by free people.

Central Power Fears Germany.

"You know how many imitations come to us from one of the central powers that it is more anxious for peace than the chief central power; and you know that it means that the people in that central power know that if the war ends as it stands they will in effect themselves be vassals of Germany notwithstanding that their populations are compounded with all the people of that part of the world and notwithstanding the fact that they do not wish in their pride and proper spirit of nationality to be so absorbed and dominated.

"Germany is determined that the political power of the world shall belong to her. There have been such ambitions before. They have been in part realized. But never before have those ambitions been based upon so exact and precise and scientific a plan of domination.

To Compound With Foe Is Disastrous.

"May I not say it is amazing to me that any group of people should be so ill informed as to suppose, as some groups in Russia apparently suppose, that any reform planned in the interest of the people can live in the presence of a Germany powerful enough to undermine or overthrow them by intrigue or force?

"Any body of free men that compounds with the present German government is compounding for its own destruction. But that is not the whole story. Any man in America or anywhere else who supposes that the free industry and enterprise of the world can continue if the Pan-German plan is achieved and German power fastened upon the world is as fatuous as the dreamers of Russia.

"What I am opposed to is not the feeling of the pacifists, but their stupidity. My heart is with them, but my mind has a contempt for them. I want peace, but I know how to get it and they do not.

Win War to Get Peace.

"You will notice that I sent a friend of mine—Colonel House—to Europe, who is as great a lover of peace as any man in the world, but I did not send him on a peace mission. I sent him to take part in a conference as to how the war was to be won. And he knows, as I know, that that is the way to get peace if you want it for more than a few minutes.

"All of this is a preface to the conference that I referred to with regard to what we are going to do. If we are true friends of freedom—our own or anybody else's—we will see that the power of this country and the productivity of this country, is raised to its absolute maximum and that absolutely nobody is allowed to stand in the way of it.

Labor Must Be Free.

"While we are fighting for freedom we must see, among other things, that labor is free, and that means a number of interesting things. It means not only that we must do what we have declared our purpose to do—see that the conditions of labor are not rendered more onerous by the war—but also that we shall see to it that the instrumentalities by which the conditions of labor are improved, are not blocked or checked. That we must do. That has been the matter about which I have taken pleasure in conferring from time to time with your president, Mr. Gompers. And I want to express my admiration of his patriotic courage, his large vision and his statesmanlike sense of what is alongside of a mind that knows how to pull in harness. The horses that kick over the traces will have to be put in a corral.

"Now to 'stand together' means that nobody must interrupt the processes of our energy, if the interruption can possibly be avoided without the absolute invasion of freedom. To put it concretely, that means this: Nobody has a right to stop the processes of labor until all the methods of conciliation and settlement have been exhausted, and I might as well say right here that I am not talking to you alone. You sometimes stop the course of labor, but there are others who do the same. And that I am speaking of my own experience not only, but that I am speaking of others, when I say that you are reasonable in a larger number of cases than the capitalists.

Parties Must Come Together.

"I am not saying these things to them personally yet, because I haven't had a chance. But they have to be said, not in any spirit of criticism, because I would like to see all the critics exported, but in order to clear the atmosphere and come down to business. Everybody on both sides has got to transact business, and the settlement is never impossible when both sides want to do the square and right things. Moreover, a settlement is always hard to avoid when the parties can be brought face to face.

"I can differ with a man more radically when he isn't in the room than I can when he is in the room, because then the awkward thing is that he can come back at me and answer what I say. It is always dangerous for a man to have the floor entirely to himself.

"I always like to remind myself of a delightful saying of an Englishman of a past generation, Charles Lamb. He was with a group of friends and he spoke very harshly of some man who was not present. I ought to say that Lamb stuttered a little bit. And one of his friend said: 'Why, Charles, I didn't think that you knew so and so.'

"'Oh,' he said, 'I don't. I can't hate a man I know.'

Can Get Together If We Want To.

"There is a great deal of human nature, of very pleasant human nature, in that saying. It is hard to hate a man you know. I may admit parenthetically that there are some politicians whose methods I do not at all believe in, but they are jolly good fellows. If they only would not talk the wrong kind of politics with me I would love to be with them.

"And, so it is all along the line in serious matters and things less serious. We are all of the same clay and spirit and we can get together if we desire to get together.

"Therefore my counsel to you is: Let us show ourselves Americans by showing that we do not want to go off in separate camps or groups by ourselves, but that we want to cooperate with all other classes and all other groups in a common enterprise, which is to release the spirit of the world from bondage. I would be willing to set that up as the final test of an American. That is the meaning of democracy. I have been very much distressed, my fellow citizens, by some of the things that have happened recently. The mob spirit is displaying itself here and there in this country. I have no sympathy with what some men are saying, but I have no sympathy with the men that take their punishment into their own hands, and I want to say to everyone who does join such a mob that I do not recognize him as worthy of the free institutions of the United States.

Protests Against Unlawfulness.

"There are some organizations in this country whose object is anarchy and the destruction of law, but I would not meet their efforts by making myself a partner in destroying law. I despise and hate their purposes as much as any man, but I respect the ancient processes of justice, and I would be too proud not to see them done justice, however wrong they are. And so, I want to utter my earnest protest against any manifestation of the spirit of lawlessness anywhere in any cause. Why, gentlemen, look what it means. We claim to be the greatest democratic people in the world and democracy means first of all that we can govern ourselves.

"If our men have not self-control, then they are not capable of that great thing which we call democratic government. A man who takes the law into his own hands is not the right man to co-operate in any form or development of government and institutions. And some of the processes by which the struggle between capital and labor is carried on are processes that come very near to taking the law into your own hands. I do not mean for a moment to compare them with what I have just been speaking of, but I want you to see that they are mere graduations of the manifestations of the unwillingness to co-operate and the fundamental lesson of the whole situation is that we must not only take common counsel, but we must yield to and obey common counsel. Not all of the instrumentalities for this are at hand. I am hopeful that in the very near future new instrumentalities may be organized by which we can see to it that various things that are now going on shall not go on.

"There are various processes of the dilution of labor and the unnecessary substitution of labor and bidding in different markets and unfairly upsetting the whole competition of labr, which ought not to go on—I mean now on the part of employers—and we must interject into this some instrumentality of co-operation by which the fair thing will be done all around. I am hopeful that some such instrumentalities may be devised, but whether they are or not, we must use those that we have, and upon every occasion where it is necessary to have such an instrumentality, originated upon that occasion, if necessary.

"And so, my fellow citizens, the reason that I came away from Washington is that I sometimes get lonely down there—there are so many people in Washington who know things that are not so, and there are so few people in Washington who know anything about what the people of the United States are thinking about. I have to come away to get reminded of the rest of the country. I have to come away and talk to men who are up against the real thing. And say to them: 'I am with you if you are with me.' And the only test of being with me is, not to think about me personally. But merely to think of me as the expression, for the time being, of the power and dignity and hope of the American people."

GERMAN PRISONERS HELP CARRY OFF BRITISH WOUNDED DURING THE BATTLE OF MENIN ROAD

© Underwood & Underwood

German prisoners captured during the battle of Menin road in the Flanders drive are shown in this British official photograph helping their captors carry the wounded from the battlefield. They are seen helping bear the stretchers, and as the shell in the background bursts too near for comfort they instinctively duck to avoid the flying splinters. In the foreground a few other German prisoners are seen crouching to avoid injury from their own shells.

ARMIES IN ITALY IN HEAVY DUEL

Italians and Austro-Germans In Battle Array Along Both Sides of Piave River.

ITALIANS HOLDING LINE

Teutons Fail In Encircling Movement After Several Attempts—Berlin Claims Capture of Prisoners.

London, Nov. 14.—Along the Piave river from the hilly region in the north to the Adriatic sea, the Italians and Austro-German armies are in battle array, the Italians on the western side and the enemy along the east bank.

The main army of the Austro-Hungarians and Germans has taken the place of the advanced guard, which has been scattered along the stream for several days and throughout the entire region the guns of both sides are engaged in duels. Thus far the enemy is using only five-inch guns, having been unable as yet to bring his heavier pieces into action. The guns of the Italians consist in considerable numbers of those they were able to bring back with them during the retreat from the Isonzo front.

Encircling Moves Fail.

The Italians are holding the line along the Piave and also in the region running westward through the hilly country from the vicinity of Feltre to the Sette Comuni. Several attempts made by the enemy to pierce the north front and encircle the Italian left wing have failed.

CHINA PROTESTS AT PLAN

Objects To Pact Made By United States and Japan.

Washington, Nov. 13.—Formal protest against the agreement between the United States and Japan regarding China has been lodged at the state department by Dr. K. Wellington Koo, the Chinese minister, on instructions from his government.

The text of the document left by the minister was not made public, but it is understood that China objects to any such action affecting its interests without reference to the wishes of the Chinese people themselves.

News that a similar protest had been filed at Tokio has reached here unofficially.

SAMMIES "GASSED" BY ENEMY

Face Suffocating Bombs For First Time.

With the American Army in France, Nov. 13.—The infantrymen in the trenches and artillerists in the gunpits have had their first real experience with gas shells.

The Germans have let loose many during the last two days, making the use of gas-masks necessary. Shrapnel also has been freely used by both sides.

During a recent night the enemy machine guns were again turned on the American trenches, the Americans replying with an equal vigorous fire.

Solons Amazed at War Work.

With the British Army in the Field, Nov. 13.—The American congressional delegation has left the British front behind with a frankly expressed feeling of amazement at the magnitude of the British establishment. They left with openly asserted wonder at the terrific difficulties which had been overcome by the British in handling of the multitudinous problems of armies stretched hundreds of miles and the making of these armies into a single piece of machinery working in closest harmony.

KILLING BABY BY DRUGS

Chicago Physician Has Another Baby Bollinger Case.

Parents Administer Drugs Knowing Death Will Come Within Two Months.

Chicago, Nov. 14.—With the full knowledge that they will cause his death within two months, Paul Hodzirna, four years old, is being administered deadly drugs by his parents.

The drugs are being given the little boy under instruction of Dr. Harry J. Haiselden, who declares the child is suffering from an extremely small head, impaired breathing and other incurable ailments and would be a hopeless idiot if permitted to live.

"The child's mother has endured great mental agony since his birth and if he lived the suffering eventually would kill her," said Dr. Haiselden. She has had no rest for months because of the constant crying of the little one, who suffers intensely all the time.

Parents Give Consent.

"Some minor ailments might be cured by an operation, but it would not restore his mentality. The treatment I am directing will result in his death within two months. Opiates in the medicine prevent the child from suffering meanwhile. The parents agree with me fully and are administering the medicine I give them.

"Euthanasia, or painless killing by drugs, relieves pain and removes the horrors of death. The patient passes the dreamy existence of a lotus eater. Indian hemp and other milder drugs lessen a desire for food and the patient passes into the next stage within a month."

Dr. Haiselden became nationally famous through similar action in the Baby Bollinger case. He said today he had recommended the same treatment in a number of cases.

QUEEN LILIUOKALANI DIES

Was Eighth And Last Ruler of Hawaii.

Honolulu, T. H., Nov. 13.—Queen Liliuokalani of Hawaii, whose death has been expected for several days, has passed away.

The queen had been in bad health for many months. A week ago she began to fail rapidly and last Thursday physicians announced that the end was near.

The queen's death was announced by the tolling of bells and the half-masting of flags. Her old subjects among the natives, including chiefs of the old regime, immediately gathered together to mourn.

TAR AND FEATHER I. W. W.

Band of Twenty Receive Application At Tulsa.

Tulsa, Okla., Nov. 12.—Twenty members of the I. W. W. were taken from the police by a band of masked men dressed in black robes, who took them to the Osage hills, applied the lash, a coat of tar and feathers and warned them to quit the country. Placards were placed conspicuously throughout Tulsa bearing the warning:

"I. W. W.'s, don't let the sun go down on you in Tulsa."

They were signed "The Vigilance Committee."

Minneapolis Aviator Meets Death.

Minneapolis, Nov. 13.—Walter A. Jones is the fourth Minneapolis man to give his life in war service. He was instantly killed at Hicks Field, Fort Worth, Texas, when an airplane he was driving fell 800 feet. Either through loss of control of the machine, or through some mechanical trouble, the plane did a spinning nose dive, killing Jones, but only slightly injuring a passenger he had with him. Mr. Jones was 21 years old and for the last two years had been a student at the University of Minnesota.

KERENSKY LEADS ARMY IN BATTLE

Meets Rebels In Bloody Encounter Near Gatchina, But Result of Fight Is Unknown.

REBELS HOLD CAPITAL

Suffer Heavy Losses In Petrograd Street Fighting In Which Small Force of Cadets Is Wiped Out.

Stockholm, Nov. 14.—According to advices from reliable sources which have reached Ira Nelson Morris, the American minister, a bloody encounter has taken place near Gatchina between soldiers from the front, headed by Premier Kerensky, and Bolsheviki forces from Petrograd. The result of the battle was not reported to Mr. Morris.

Petrograd, Nov. 13.—Petrograd is still in the hands of the Bolsheviki after desperate street battles Sunday in which a handful of military cadets were exterminated or captured by members of the Bolsheviki, upon whom the inflicted heavy losses.

The Committee of Public Safety agents have gone to Gatchina to try to arrange a compromise between the Kerensky forces and the Bolsheviki.

The military cadets or "junkers", encouraged by the reported proximity to the capital of the forces of Premier Kerensky, made an ineffectual attempt to retain control of the city. This resulted in almost constant street fighting in various quarters.

DEMANDS PEACE TABLE PLACE

A. F. of L. Report, at Buffalo, Asks Representation.

Buffalo, Nov. 13.—Demand for "adequate and direct" representation of wage earners at the world peace conference is made in the annual report of the executive council of the American Federation of Labor, submitted to the federation in convention here. The report declares that the world war "must wipe out all vestiges of the old conceit that the nation belongs to the ruler."

Questions raised by the war occupy virtually the entire report. No room is left for doubt that the United States has the unanimous support of organized American labor in the war, and it is asserted with equal emphasis that the vital interests of the average citizen demand that he have a voice in the readjustments to come with the dawn of peace.

TURKS HALT FLIGHT; PREPARE FOR STAND

London, Nov. 13.—Turkish troops which have been retreating before the British in Southern Palestine are organizing for defense in the vicinity of Hebron, about 20 miles southwest of Jerusalem, says an official statement. British mounted troops are continuing to push forward to some sectors.

I. W. W. Threaten Russ Methods.

Omaha, Nov. 13.—A general convention of the Industrial Workers of the World has been called to meet in Omaha, according to circulars distributed here. Local leaders of the I. W. W. claim that between 4,000 and 5,000 members of the organization will attend. The circular, dated November 5, says: "We must prepare to use methods not unlike those used by Russian labor, for they are surely being forced upon us. If not allowed to do business openly we will do it otherwise, for we will never lay down."

"CONTRABAND"

By RANDALL PARRISH

A War Sea Story Abounding in Adventure and High Romance

Copyright A. C. McClurg & Co.

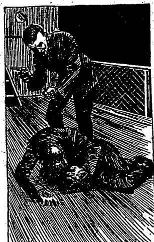
CHAPTER XVI—Continued.

—11—

"I know it will, if you remain on deck," she answered earnestly. "I—I have learned to trust you."

The hours of the night gave me ample opportunity for thought, and careful consideration. The wind held steady, and while the sea roughened somewhat this slight change was not sufficient to diminish our progress, or cause any swerving from the course set. All remained quiet forward, the watch on deck finding little to do other than their routine duties, and no member of the crew had any occasion to come aft, except those detailed to the wheel. There seemed no reason why I should remain on deck, yet the responsibility rested upon me, and the importance of the night's run prevented my having any wish to retire below. However, I found no occasion to interfere with the operation of the ship, and remained mostly on the main deck, where my watchfulness assured me there was no communication passed between forecastle and cabin.

The fog grew steadily more dense, until at dawn, we were steaming recklessly through a thick cloud of vapor, barely able to observe the surface of the sea, dull, sodden gray, a few yards in advance of our bow. The dense, watery folds swept along our sides, and the rigging dripped moisture onto the glistening deck planks. It was a gloomy, dreary morning enough and, even as the light of early dawn strengthened, I could scarcely distinguish a thing forward of the main mast. However, there was no slowing up of speed or sounding of siren. Convinced that we were now safely to the north of the usual course of ships, I preferred to take the chance of possible collision.



"Lie Still, D——You!"

My eyes were heavy from lack of sleep, and long staring out through the black night; my senses dulled by hours of inaction, during which nothing unusual had occurred to arouse me to realization of impending danger. I no longer even suspected trouble, or any active hostility forward. With the dawn the density of fog enwrapping us seemed to increase, and completely blot out every glimpse of sea and sky. Even Leayord leaned over the rail just above me, could scarcely be distinguished as a man, and evidently his eyes could not make me out at all; for he hailed doubtfully:

"Are you still on deck, Mr. Hollis?"

"Yes," I answered, staring up at his shadow. "A bad fog."

"It is, sir. Would we better reduce speed?"

"No, not yet; I am counting on open water, and would rather chance striking a stray than risk being overhauled by a British cruiser. The sun will split this mist before noon, and meanwhile we must make all the northing possible."

I heard his "aye, aye, sir," as I crossed to the port rail. I had reached a point nearly opposite the broken stump of the foremast when I was suddenly confronted by two blurred figures emerging noiselessly from the deeper shadow cast by a quarter boat swinging in davits. The fellows must have known who I was, and the path of my approach; no doubt had been close enough aft to overhear my conversation with Leayord. At least they were on me before I truly realized their near presence—the one gripping the arm I flung up in startled defense; the other driving his fist straight into my face, a sledge-hammer blow which sent me crashing back full length on the deck. Stunned, dazed as I was by this vicious attack, I made an instant's struggle, but was quickly crushed back, a merciless hand gripping my throat. Almost at the same moment the revolver was removed from my pocket, the cold muzzle thrust against my cheek.

"Lie still, d——you!" muttered a tense voice, and I knew the speaker for Jim White, "or I'll blow the whole top o' yer head off."

I retained sense enough to obey, White's knee pinning me to the deck, but some sound of my fall must have carried aft, for Leayord sang out through the fog:

"Forward there! What's all that racket about?"

White's fingers choked me into helpless silence, his knee crunching hard into my breast. It was Liverpool Red who answered sullenly:

"I knocked over a capstan bar, sir; never saw it in the bloomin' fog."

Leayord growled something, the words failing to carry to us against the wind, but a moment later, satisfied that no further investigation was to be made, Liverpool thrust White aside and lifted me to my feet, his eyes glaring into mine.

"One whimper from you, an' yer overboard," he muttered hoarsely. "Take it from me we know what we're about. Come on now, an' don't attempt nuthin'. There's nobody forard here ter give yer a hand. Take him by the collar, Jim."

With White's hand gripping me, and my own revolver at my head, any attempt to break away would have been simply suicide. The thick fog hid the scene from those on watch aft, and that the two men were reckless and desperate, their plans well laid, was evident. The gray light revealed their faces, and there was no mercy in the scowling eyes.

"Forward yer go, sir!" growled White, his fingers twisted in the jacket collar. "It's little more yer'l hav' ter say aboard this hooker."

"What do you propose doing? This is mutiny, men."

"Then it'll have to be mutiny. It's war, an' we're Englishmen; this ship's loaded with war stuffs, bound fer Germany. That sort o' talk means nuthin'—so come on, and stow that gaff."

They forced me around the bulk of the windlass to the head of the forecastle steps, slid back the door in its grooves and thrust me staggering down into the murky depths below. A slush light, swinging to a blackened beam in the deck above, cast a ghastly yellowish glare over the interior, revealing to me at least two-thirds of the crew, clustered about, evidently awaiting some such event. White held to my collar, but Liverpool closed the entrance, shutting out even that faint breath of pure air, before speaking a word.

"Well, we've got the main guy, lads, an' no shindy," he said cheerfully, "an' a gun came with him. Now a few o' us will see if we can persuade the first mate into taking a trip forward."

"Where's Billy Olson?" asked a voice.

"Oh, he's asleep below; there's plenty o' time to attend to him, an' we'll let the engine-room gang alone till we get control o 'the deck. Simms, you an' Harris better come along with Jim an' me on this job. Leayord is a husky buck, an' we might not get him foul like we caught Hollis here. We don't want to hurt nobody unless we have to. Where's the nigger Watson?"

"Right hyar, sah."

"Come on, then; it's your trick at the wheel in five minutes; the rest o' you fellers know yer business."

The five men slipped out cautiously, sliding the door shut behind them, and I stared about into the faces of those left with me, still dazed by the rough handling to which I had been subjected, yet fully aroused to the fact that the attack upon me had come from no sudden impulse, but was the first step in a carefully formed plan to gain possession of the ship. My duty was to warn the men aft of the approaching danger. How should I act? In a vague way I knew most of the faces of those grouped about me, but I could recall only a few names. They were a rough lot, typical foremast hands, many of pronounced foreign appearance, yet there was nothing especially vicious about them. Ordinarily they would obey orders without a complaint, but now they were evidently under full control of their leaders; yet the expression of their faces bespoke curiosity rather than hatred. Determined to test them I straightened up and placed a foot on the lower step.

"None o' that now," a voice growled as a hand gripped my arm. "You don't want ter git hurt none, do yer?"

I faced the speaker, a big, two-fisted giant with a red face and a slow drawl in his voice.

"You mean to hold me here?"

"Sure; we've gone too far on this job now fer to back down. Thar'd be a row ov a time if we turned you loose."

"You're an Irishman?"

"Twould be hard for a Dugan to deny that, sor."

"Well, Dugan, look here—you and your mates. You are sailormen, and know the rules of the sea. This is mutiny, and a mighty serious affair to be caught in, lads."

"We're not lookin' at it that way, Mr. Hollis. We shipped fer a peaceful voyage, not to run no cargo o' contraband fer the Dutch. This yere Indian Chief is chock-full o' munitions o' war—ain't that the truth, sor?"

"Yes," I admitted, "but shipped before war was declared. The sick man back there in the cabin has his whole fortune in this venture."

"Devil take him an' his fortune. The point is we're not Dutchmen, an' in wartimes it's no mutiny fer a crew to capture an inimy's ship."

"Who told you that?"

"Never mind who told us; it's the truth, ain't it?"

"Under some circumstances it might be," I said, casting my eyes about the ring of faces. "But the present conditions do not justify any such action. Now look here, Dugan; you fellows are in a mighty bad boat in this matter. You're merchant seamen; you've signed on for a peaceful voyage, and it is no business of yours what's below hatches. That's for the warships to find out. The Indian Chief is under American register. She's a neutral boat, and your act is mutiny on the high seas. You know what that will mean to you and your mates, don't you, if you're ever caught?"

"Who says that?"

"I do; and I know more of sea law than any of those fools who are steering you into this trouble. You kill a man on board here, and it is murder, and the whole bunch of you can be made to swing for it. Men have got life for less than you have done now. But I'll give you a chance."

"What chance, sor?"

"To stand by the ship. Set me free now, and back up the officers in maintaining discipline aboard, and not one of your names goes into the log."

"An' sail the bloomin' hooker to Hamburg?"

"Of course; that's the port you signed for."

There was an uneasy shuffling of feet, and a muttering of voices. The light was too poor to enable me to decipher the expressions on the faces of the men, yet I felt that my words were wasted. Dugan, however, voiced the prevailing sentiment.

"Not a d—— one ov us is fer making that voyage," he said grimly. "So stow yer tongue, mate." He winked at me facetiously, then glanced about at the others. "There's bigger wages comin' to us now than ever we signed on for."

CHAPTER XVII.

Held a Prisoner.

These words, and the laughter with which they were greeted, made clear to my mind the whole truth of the uprising. It was not so much the destination of the ship, or the nature of our cargo, which accounted for the widespread spirit of mutiny aboard, as it was the McCann money. These other things had been used to influence the men, to convince them that they had a right to seize the vessel, and refuse to continue the voyage, but it was the glitter of the McCann gold which had won converts to this theory.

One thing was certain—no argument of mine, no threat of punishment, would have any present effect on the fellows. While there might be among them some who would listen to reason, this big Irish brute of a Dugan had control, and he could only be overcome by physical force.

The one and only hope lay in my escape; in my raising an alarm in sufficient time to warn Leayord of danger. He was a fighting man, and armed; one cry would put him on his guard, and his position on the poop would enable him to put up a strong defense. These thoughts flashed through my mind as I stood there, staring into Dugan's face. I dared not glance about, or seem to harbor any plan of escape, yet I knew that all was clear between me and the three steps leading to the deck, and that the sliding door was not hooked. The fellows were gathered closely about us in a half-circle, Dugan alone being within reach of my arm. The only weapon I saw was a sea boot beside a chest to the right. The fellow must have felt some vague glimmer of my purpose, for he gripped my shoulder, his iron fingers pinching the flesh.

"None o' that now," hoarsely. "You can't fight the whole—"

I struck him with all the force I could throw into the swift blow, and he went staggering back into the ring of men, his hands clawing at the air. But for their bodies the fellow would have measured his length on the deck. The force of his fall, the unexpected suddenness of it, for the instant stunned the others, and gained me opportunity. With one leap I had the heavy boot in my hand, and swung it crashing against the face of the fellow between me and the lower step. He went over like a stricken bullock. A hand gripped for me, but missed its hold; there was a roar of anger, a rush of bodies, and above all other sounds Dugan's voice howling madly:

"Stop him, yer tarriers! Crack him on ther head."

I stumbled over the body on the lower step, yet had reached the door before the first man gripped my leg. I broke loose from his fingers, yet the instant of delay blocked escape. They were on me, their faces barely visible in the dim light, and I fronted them, fighting for life, striking fiercely with the great sea boot [illegible] a terrible weapon. Twice men fell, but there were too many of them, nor could I protect my rear. They swarmed to either side, and clambered up behind me; the low beams of the upper deck permitting no swing to my arms; one fellow gripped my feet, and another leaped at my throat. I was tripped and flung headlong, the full weight of a man's body crashing down on top of me. Then came oblivion.

How long I remained unconscious I never knew, but it must have been some hours, for when I struggled back to a vague sense of life once more, I was alone, lying on a mattress in a bunk. My head throbbed with pain, and I managed to lift one hand, assuring myself that my hair was matted with blood. Where was I? Had I met with some accident? It was only gradually that the vision began to reflect upon my mind—the attack on deck; the struggle in the forecastle; and then Vera Carrington. It was her face, her memory which aroused life, and gave me back the strength to struggle. The fate of the ship was of small importance to me, but the girl left alone and helpless among these ruffians, was a thought so filled with horror as to draw me back from the very gates of death.

I forced my eyes open, finding at first the light blinding, and for an instant stared up through a red mist. Gradually normal sight came back, and I realized that I rested in a bunk, gazing upward at the white-painted bottom of another. There was a splash of sunshine on the side wall, and I slowly turned my head toward the open port through which it streamed. Then I knew where I was lying—in the captain's stateroom. Why had I been brought there? What object could those villains have for giving me these quarters if they were really in control of the ship? Perhaps they were not; perhaps Leayord and Olson had been warned of danger in time to overcome them, and still retained command. That would account for my presence—but, if this was true, why was I left alone, uncared for? Why had they brought me here? Gradually the conception of their purpose dawned—a navigator; the need of a navigator. Without me they were helpless; without my knowledge and skill not one on board could tell where they were, or how to shape the course of the vessel. I was a necessity to them; in a way I held the villains still in my power; they dare not let me die—not yet! I cannot explain the new life this thought brought to me. I seemed to feel the strength of it injected into my veins, and I rose up on one elbow, and then, encouraged by this effort, swung my feet over the edge of the bunk and rested them on the deck. The hands of my watch told me it was after eleven. I got to my feet, clinging to the berth, and swaying weakly at first, but gaining strength with every movement. The chart still lay on the desk, our course pricked on it up until the day before, and the telltale compass told me the ship's bow was still pointed northward. I clawed my way across to the door, and tugged at the latch. It was locked.

This discovery vanished the least doubt. The men had won, and were in full possession. Fergus McCann was in control by virtue of his money, and his chosen lieutenants were Liverpool Red and Jim White. What their object might prove to be remained to be learned—but they must seek some obscure port, or some safe spot for shipwreck, sacrificing everything else to their own safety—and, to accomplish this they must use me. Lord! I gripped that idea strongly enough, my brain clearing as I realized the important part I must still assume in this odd sea tragedy. Perhaps I could not save the Indian Chief, but there was hope yet that I might be instrumental in preserving the lives of those whom my carelessness had imperiled.

How Long I Remained Unconscious I Never Knew.

There was water in the chocks of the iron washstand, and I bathed my face, scrubbing as best I could the congealed blood from my hair. The wound on my head had bled freely, but was not serious, and the application of cold water lessened the pain, and helped to restore my faculties. A fine breeze swept in through the open port, and I sat down on a stool to gather together in my mind every detail which might prove of future value. I was still sitting there, but by then alert and ready, when a key turned in the lock, and the door was cautiously opened. McCann's face appeared in the opening, but his eyes were upon the bunk, and he failed to observe me where I sat beyond the desk. He took a step within, still staring at the rumpled blankets, and I had a glimpse of the inflamed countenance of Liverpool just beyond his shoulder.

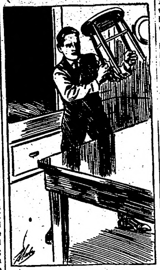
"Blow me!" he ejaculated in startled voice. "The fellow's not here; he's got away!"

Red laughed, and pushed past, but still blocked the door with his great body.

"Got away! Where could he have got to with the door locked? He's here all right."

I stood up and faced the two, the desk still between us, but took the precaution to grip the stool by one leg.

"I am certainly present," I said coldly, "if your reference is to me; but I advise you both to keep your distance. I'll brain the first man who attempts to lay hand on me."



"I'll Brain the First Man Who Attempts to Lay Hands on Me."

Red must have felt the challenge of my words, and I could tell he was in liquor by the vivid flame of his face. An oath broke from his lips.

"You tried that before; 'twill pay yer to be civil now."

"There were some of your ragamuffins who tasted the weight of my blow," I answered, "and I only hope it may be your turn next, you dirty dog of a mutineer."

"You'll git no chance to ever break your stool on me, d——yer," he roared, jerking a revolver from his jacket. "Do you see that? Well, we've got the ship—"

McCann grasped his sleeve.

"Let up on that, Red," he said shortly, his voice having a tone of command in it, which surprised me. "We didn't come here to beat Hollis up, but to talk with him. This is my game."

The other did not resist, only to mutter behind his teeth. The gun still glistened in his hand, but I felt no fear of the fellow, and returned the stool to the deck.

"Tell me what you mean, and be brief about it."

McCann's eyes met mine, and I read in them uncertainty. He was not yet quite sure that he had my measure; how far I would resist, or what form my opposition would take. Perhaps for a moment money did not seem to him quite so important a weapon as he had found it elsewhere.

"I'm sorry the crew beat you up the way they did," he began apologetically. "They are a rather rough set—"

"Don't waste your time over that," I interrupted in disgust. "I can deal with an out-and-out fighter, and still respect him, but your kind only engenders disgust. There is no love lost between us, Fergus McCann, so state your purpose plainly, and without lying."

"By God! I will," he snapped, "and I'll put it straight enough this time to satisfy you. The only reason I don't let Liverpool kill you is that you are more valuable to me alive. I've hated some in my time, but there never was a cur I despised worse than I do you."

"Thanks," I said quietly, "I am honored."

"And more than that, I pay my debts," his temper now entirely ruined by my pretense of indifference. "So I advise you to keep a civil tongue in your head—you're no longer in command of this ship."

I smiled at the two of them, calmly sitting down on the stool. I was not certain yet what hand I held, but determined to play the cards coolly.

"So you fellows are in control; and you come to me now with some sort of proposition. All right; what is it?"

"We need a navigator for a few days; one who will lay out the course we decide on."

"And I am the only one on board."

"You are by far the most competent," he confessed. "But you need not think from that we are helpless without you. I have no doubt I could figure the matter out fairly well if I had to, and I am perfectly aware that Miss Carrington possesses some knowledge of navigation. I imagine you might prefer doing this yourself, rather than having her compelled to show her efficiency."

"Where is Miss Carrington?"

"In her own stateroom; I have not seen her since we took possession of the ship."

"And the others—Bascom, and the officers?"

(TO BE CONTINUED.)

Somehow or other we can't help feeling glad to wear garments that can be seen through.

RUINED CITIES OF FRANCE

Many of Them Have Taken on a Character of Permanency, So Endless Does War Seem to People.

There is a new kind of city on earth today, a strange, nightmare kind of a city that has taken on for the people of northern France almost a character of permanency, so endless is this war. People have lived through so much sinme August, 1914, that they seem to themselves to have been always at war, and, looking forward, they see nothing but long years of warfare. The ruined cities such as Arras have become a part of the natural order of things, and the strange life in them has come to seem a natural sort of life. Towns like this are found by the score where the slow pressure of the allies is forcing the Prussian back, says a war correspondent.

They are the towns that have been bombarded and bombarded again, taken and retaken, assaulted and captured, and cannonaded by those who held them the day before, until it is a marvel that one brick remains on another. They are full of ruined houses and shattered quarters of all degrees of destruction, and, stranger than all, they have blocks and sections that by some miracle escaped.

Here is a row of houses that might be in the far South, 200 miles from the battle front. The shutters are up and the streets are deserted, as though the people were late in rising. Here is a public square pitted with shellholes, one side fronted by a row of buildings, whole save for broken windows, the other bounded only by shapeless masses of brick and stone. Here and there a slow smoke curls upward from some gnawing fire. A hundred yards away there may be a stubborn family still occupying its old home, but nobody puts out the fire. The civilians are too hopeless and the soldiers are too busy.

And here is a house with the front sliced off by a shell and the rooms still all in order—a strange spectacle—with beds and bureaus and chairs and tables all in order, as though some enterprising furniture dealer had undertaken a new and ambitious form of window display. For the most part the noblest buildings, the churches and public halls and the towered relics of the Gothic period are gone—they furnish too easy a mark for the rangefinder. And ever and again a dull crash tells of another shell carrying on the barbarous work.

Blind Belief.

Swedish Consul Gustavus Swan said, in discussing the war:

"The exposures from Buenos Aires show that Germany believes all's fair in love and war. Germany duped my own government no less than the Argentine government.

"Germany, it is clear, believes all's fair in love and war as blindly as scientists believe in facts. Hence she goes horribly wrong, like the eminent New England scientist wrote to Tennyson one day:

"'Dear Sir: I find in a recent poem of yours, entitled "The Vision of Sin," the following unwarranted statement: "Every moment dies a man and every moment one is born." I need hardly point out that this calculation, if correct, would tend to keep the sum total of the world's population in a state of perpetual equipoise, whereas it is an established fact that the said population is constantly on the increase. I would, therefore, suggest that in the next edition of this poem the erroneous calculation to which I refer should be corrected as follows: "Every moment dies a man and one and a sixteenth is born." I may add that the exact figures are 1.167, but something must, of course, be conceded to the laws of rhythm.'"

Architects Go to France.

It is gratifying to learn that many architects have reponded to the call of the signal corps of the war department for volunteers from the profession to go to France and assist in the construction of aviation camps there, says an exchange.

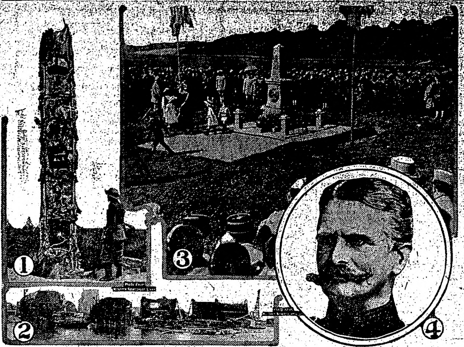
These men enter the national service as first lieutenants, as so many members of other American professions have done. They will provide the government with expert aid in the carrying out of a task which promises to rank among the most important of the war. The entente campaign in the air will be vastly increased next year if present plans hold. The number of machines to be put into service is expected to reach far into the thousands.

Chestnuts to Aid War.

British children all over the country wherever the chestnut tree grows are gathering horse chestnuts as told in the Christian Science Monitor. It is their particular contribution to the winning of the war, for ripe horse chestnuts have been discovered to provide a good substitute for the grain which is used in the making of munitions. It will be quite valuable service, for the computation is that every ton of chestnuts will save half a ton of grain. The gathering is organized by committees in connection with the schools, and woods and lanes see bands of young patriots enjoying their "war work" hugely.

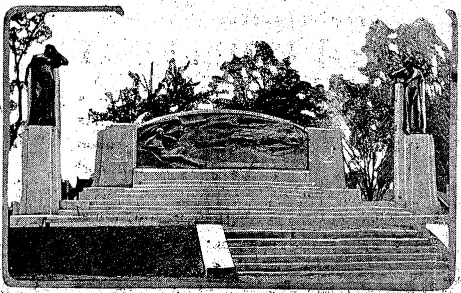
Vermont Increases Food.

The hope that the appeal for the production of more food might result in some increase of wheat-growing in the East has been justified in Vermont. It is estimated that 81,000 bushels of wheat were grown this year, against 25,000 bushels last year. The Vermonters have also done well along other lines, for the estimated yield of corn, wheat, oats, barley and potatoes in 1917 is 10,666,000 bushels, compared with 7,847,000 bushels in 1916.



1—German observation post in the hollow trunk of a shell-shattered tree. 2—Wooden ships in process of construction at the shipyards at Orange, Tex. 3—Scene at the unveiling ceremonies of the monument to Pegoud, famous French aviator, at Belfort. 4—Field Marshal von Mackensen, who directed the invasion of Italy by the Austro-German forces.

MEMORIAL TO INVENTION OF THE TELEPHONE



Brantford, Ontario, the town where Alexander Graham Bell invented the telephone in 1874, has erected a monument to commemorate the momentous event. Doctor Bell, the duke of Devonshire, governor general of Canada, and many other notables attended the unveiling. The figures in bronze on either side of the monument represent "Humanity" sending and receiving messages. In the large bronze panel in the center "Man" is represented surmounted by a figure symbolic of "Intelligence" and three floating figures representing "Knowledge," "Joy" and "Sorrow." The memorial is the work of Walter S. Allward, a noted Canadian sculptor.

ONE RESULT OF AN AIR RAID ON LONDON

This mass of ruins and destroyed dwellings is but one of many such mementos of "air raid week," in which the Germans paid visits of destruction to London. The German aviators dropped bombs throughout the Metropolitan district.

MOVING BAR OF FRENCH AVIATORS

This mobile bar, mounted on the wheels of a smashed airplane, is used exclusively by the men of the French flying squadron. Their bartender is an Annamite.

SIR JOHN SIMON'S BIT

Sir John Simon, the noted British barrister, has given up a practice of $150,000 a year to accept a secret commission, and it is understood he will devote his brilliant abilities to formulating and co-ordinating the terms which the allies will impose on the central powers when the time comes. Sir John, it is said, will have the rank of a colonel in the intelligence bureau of the general staff.

Tokyo Stock Exchange.

On the Tokyo stock exchange all margin money is held by the exchange itself and not by the broker, and the exchange may demand more margin whenever fall in prices makes this necessary.

She Will Learn.

Butcher—"Excuse me, mum, but I forgot to give you the bill for that there duck." Mrs. Newlywed—"Oh, no, you didn't. It was on the duck. I saw it when you wrapped up the parcel."—Judge.

OFF COME THE SHOES OF GERMAN WAR PRISONERS

Photo From Western Newspaper Union

The first thing a German prisoner of war does is to take off his shoes and rest his feet. A group of boches captured by Canadians is here shown reposing in comparative comfort.

State Guard Is Eliminated In The New Army Plan

Identity of State Organizations Is Lost While This War Lasts.

SUGGESTED BY GEN. PERSHING

Reorganization Wipes Out Identity of Some Famous State Regiments—National Defense Act May Restore It After Conflict.

Washington.—War department officials, general staff officers and army officers generally frankly admit that the National Guard, as it was before the United States entered the war, is being gradually eliminated, certainly as far as this war is concerned.

The fact is that since Gen. John J. Pershing was sent to France a decision has been reached to reorganize the regular army and National Guard from top to bottom. This decision was made on General Pershing's urgent recommendation.

General Pershing's recommendations were the result of conferences in Paris between the American and allied commanders, and the new organization follows closely the lines of the present French organization, built up after three years of active fighting.

The recommendations of General Pershing were an entire surprise to war department officials and the general staff. The latter balked at first, but ultimately followed the plan recommended by the American field commanders on the theory that Pershing was on the ground and in a position to know what the British and French have found most effective in battering their way through the German lines.

That is the whole story. It is hard on National Guard organizations, especially the crack regiments, whose members have always taken great pride in them and striven to improve and perfect them.

For Keeping Identity.

At the outset the general staff plan provided for mustering into the federal service state units as such, each of them to be given a new regular army number, but to retain its identity.

When General Pershing urgently recommended that regiments be increased from 1,500 to more than 3,000, even crack National Guard infantry regiments, which had been recruited to full war strength were far below the required number. As finally perfected, the new organization provides for a regimental maximum strength of 103 officers and 3,652 enlisted men.

This explains why it has been necessary to merge one National Guard regiment with another. It has been stated repeatedly that the National Guard would next go to France. By combining two Guard units the general staff figured the war department would have a maximum of men in the enlarged regiment who had had some military training and experience.

On the other hand, if the recommendations of governors, senators and representatives and National Guard officers were followed and the ranks of Guard units filled up with drafted men from the same states, the majority of every regiment, with a few exceptions, would be composed of wholly untrained men. This would mean a much longer training period. As reorganized, army experts are confident the National Guard troops will be ready for service after a minimum training period in this country.

Superior Fighting Machine.

However disappointing the new organization may be to either National Guard or regular army troops, officials feel that there can be no doubt that every officer and man in both branches, as well as those now in the National army camps, want to see the most efficient fighting machine possible. Army experts devoted most earnest study and thought to the reorganization. They think they have perfected an organization which has no superior as a fighting machine.

In the reorganization New York's Guardsmen have suffered disintegration. For instance, the men of the First New York Cavalry and Squadron A find themselves today mere "dough boys," as in the past they termed the infantry. They are bidding final farewell to their horses, and the parting is a sad one, for many of the former cavalrymen have had the same mounts for several years.

The officers and men of the old First Cavalry are being split up among three units. The One Hundred and Sixth Machine Gun battalion will claim 550 of the enlisted personnel and the One hundred and Second Trench Mortar battery, the first of its kind to be organized in this country, takes One Hundred and Eighty One. The One Hundred and Second Ammunition Train will also claim a number of officers and men of the old regiment. Squadron A, too, has lost its mounts and the organization is now the One Hundred and Fifth Machine Gun battalion.

In the Spartanburg camp of the Twelfth and Seventy-first regiments, there are not enough men left to make a decent sized company. The historic commands have been drained of their men that more fortunate regiments in the first line might get their war quotas.

In some instances units from two states have been combined or are about to be thrown together. These are extreme cases, and they tend to stir up even keener resentment than the combining of units within a single state.

Missouri Protests.

The Fourth Missouri and Third Kansas furnish a striking illustration. Both of these regiments were below the strength required by the new organization. Both contained a large number of veterans.

When it was decided to combine them, Missourians immediately rose and protested the case in person to Secretary Baker, pointing out the injustice to both states and the damaging effect on the morale of the officers and men.

He said this was true, also, of the Second Missouri, which was slated to be carved up and transformed into machine gun battalions.

Governor Gardner used all of the arguments he could muster, but wound up by declaring emphatically that if the government could not do otherwise Mr. Baker could count on Missouri supporting him and doing its duty to a man. This case has not yet been finally disposed of, but it is entirely probable that Governor Gardner will lose.

Mr. Baker personally regrets the necessity for breaking up state units. Ohio, his own state, has some crack regiments, and the Buckeye state is being treated exactly as every other state. The first consideration is a military one. The government wants the best possible military machine and only efficiency was considered in perfecting the organization plans.

After the War.

If there are any definite after-the-war plans for the National Guard they have not been revealed. Military experts who discussed the matter declared that after the war the National Guard naturally will revert to its status under the national defense act, which was passed with a view to federalizing the Guard and making it more responsive to national authority.

But what will be left of the National Guard if the war lasts a long time, it is asked? When the Guard was shaken together after its service on the border it numbered approximately 150,000. Since that time many thousand Guardsmen have been discharged on account of dependent relatives. Its strength at the time the United States entered the war may be put at 125,000 officers and men.

Men who have enlisted since that time did so "for the period of the war, and will be automatically discharged when it ends. Meanwhile, it is fair to assume that many of the veteran Guardsmen will appear on casualty lists. At best, therefore, the National Guard proper at the close of the war will be nothing like as large as at present—378,000 men. Of course, many of the men who go through the war safely will re-enlist for peace time service.

For "Period of War."

What is true of the National Guard in this respect also is true of the regular army, two-thirds of which is composed of men who volunteered their services for the period of the war, and cannot be held after peace is declared. The terms of thousands of other men will have expired and they also must be released.

It will be recalled that the formal announcement of the war department, in defining the new organization, specifically stated that it was for "overseas service." It is but fair to assume that this organization is not now intended to be permanent and that there will be no disposition to maintain National Guard units as now organized after peace comes.

In fact, Secretary Baker has repeatedly informed the newspaper men that all plans for the army are temporary, or "for the period of the war." Congress took particular pains to specify that the selective draft law applied only to the war period and was not to be considered as an approval of the principle of universal military training as a permanent policy.

It is freely predicted that the men who do the fighting in France will see to it that congress provides for a permanent system of universal military training. When the National Guard troops returned from the border they were almost a unit in demanding universal legislation as a matter of common sense and elementary justice.

Even with a system of universal military training in vogue, it was pointed out, the National Guard would not necessarily be eliminated.

"SLAFETY FLIRST," SAYS WOO

Chinese Carrying $1,000 at New Haven, Conn., Tells Why He Goes Armed.

New Haven, Conn.—"Slafety first allee tlime."

This, according to vice squad officers, is the motto of Woo Yick, Chinese.

Woo, who is the proprietor of a laundry, was arrested for carrying concealed weapons. Vice squad policemen said they found a revolver on his person.

"What are you carrying a revolver for?" Hauser asked Woo.

"Tloo many tough gluys in Cleveland," he replied.

"Have you got any money?" queried Hauser, thoroughly interested.

"Sure," replied Woo.

Searching his pockets, the officers were surprised to find $1,000, $500 of which was in gold.

Corset Saves Her Life.

Houghton, Mich.—The life of Mrs. Frederick Landroche of Hancock was probably saved by a corset stay. Her husband, arraigned in court on a charge of non-support, asked for permission to speak to his wife. This being granted, he pulled a revolver and fired twice. One shot went wild, the other was deflected by the corset stay.

ST. VITUS' DANCE GOOD FOR SERVICE

New York.—Little things like walking in one's sleep or being afflicted with St. Vitus' dance have naught to do with a man's ability to fight in the new National army, ruled a local examining board recently.

When a stalwart candidate informed the board he was afflicted with both "ailments" members winced. Then they considered the case and decided that he was "fit" for service.

"But I might get up some night and walk right into the enemy's camp," argued the applicant.

"Then the St. Vitus' dance will come in handy," said a board member. "You can jump right out again."

ROAD BUILDING

HURRY GOOD ROADS BUILDING

Country to Profit in Future From Highways Built as Necessity of Warfare and Defense.

It is the general opinion of motorists arriving in Washington from all parts of the country that the war with Germany is acting as a sharp prod to speed up road building.

Whatever the war costs the nation in dollars and lives, it will result in the building of thousands of miles of usable roads in all sections, for these highways are now rated as one of the necessities of warfare and defense, says Washington Star.

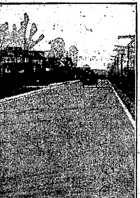
Possibilities of an invasion are remote, but now that it has been decided to send an expeditionary force abroad, it is certain that other thousands will follow, hence the mobilization of troops on the seaboard is something not to be overlooked.

Railroads are up to their ears in other work and have shown their lack of equipment to meet ordinary demands of a period of fast growth and an attendant increase of consumption. So other means may have to be relied upon to hustle the boys in khaki to the ports, whence they will sail for the front. For this purpose the motor vehicle is ready, and all it needs to add to its wonderful record of efficiency in a pinch is a system of roads which can be traveled in safety and at speed during all seasons.

Here on the East, where the troops will be massed before sailing, good roads are considered as of vital interest to the nation just as the raising of vegetables in fields and yards which heretofore have produced nothing.

Throughout the Atlantic area the road builders are hard at it, and, in spite of the urgency of the calls for men for other purposes, help is being enlisted in the cause.

An immense amount of road building work is being done in the South, and in the Central West thousands of miles of roads are under way, these forming the connecting link and making possible hurried trips if such are needed. Experts point out that automobiles can take an army of 100,000 men from the Middle West to New York in less time than can the railroads, and, when the highways are improved a great cut will be made in the running time of the motor cars.



Concrete Road in Maryland.

The West is not overlooking anything in the way of road building. There is not a state in which it is not one of the big movements, even in a part of the country which is least affected.

What Virginia is doing is being undertaken in greater or less degree by many Eastern states.

HIGH VALUE OF GOOD ROADS

Estimated Cost of $900,000,000 to Get Surplus Farm Products to Market or to Railroad.

After careful inquiry it has been found that the average haul of the American farmer in getting his product to market or to the nearest shipping station is 12 miles, and the average cost of hauling over the common country roads is 25 cents a ton per mile, or $3 a ton for a 12-mile haul. An estimate places the total tons hauled at 300,000,000 a year. On the estimate of $3 a ton for 12 miles this would make the total cost of getting the surplus products of the farm to the local market or to the railroad no less than $900,000,000—a figure greater than the operating expenses of all the railroads of the United States. If anything could make an argument for good wagon roads this statement surely may.

Litter in Hen House.

Litter kept on the floor of the poultry house should be removed whenever it becomes damp and filled with droppings that do not dry. Whitewashed walls make the poultry house lighter and more sanitary.

Patching Old Gravel Road.

Patching done in the proper manner when the road is wet, followed by a road drag, will maintain an old gravel road surface as good as new until it is so badly worn that an entirely new surface is required.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

RAISE RABBITS TO INCREASE MEAT SUPPLY

GROUP OF DOMESTIC RABBITS WHILE AT LUNCH

At four months the young Belgian hare should be ready for the table, and if it has been properly fed should weigh about six pounds or even more. This weight is about the best for market rabbits, and immediate sale is more profitable than keeping to maturity. Some breeders sell at 10 to 12 weeks and aim to have their stock weigh about 5½ pounds at that age. To do this requires that the animals be kept in small hutches where they can have but little exercise and that they be fed heavily from the time they are weaned. Under this treatment they grow very rapidly and are really superior for the table.

Market Returns.

It is not easy to state what a breeder should realize for market rabbits. Much depends on local conditions and especially upon the familiarity of the public with the excellence of hutch rabbits for the table. If the animals are new to a market, a demand for them will have to be built up, but as a rule they soon will become popular. Better prices usually can be had by selling directly to the consumer, thus saving the middleman's profit. One may make arrangements to deliver regularly or periodically to hotels and restaurants, but often a poultry dealer will agree to take a certain quantity at regular intervals. If members of the family look after the rabbits, so that there is no outlay for labor, and if the hutches are built at home, the cost of rearing may be greatly reduced and much of the income will be net gain. Although it must be admitted that rabbits require more care than usually is given to poultry on our farms, their management has the advantage that it is more interesting, especially to the younger members of the family.

Disposing of Surplus.

After selecting the best stock for breeding purposes it is well to dispose of the remainder as rapidly as conditions warrant. If those to be sold are to be marketed alive, all that is needed is to crate them properly and forward them to their destination. This is the better plan in hot weather, as the carcasses do not keep well. If carcasses are to be delivered the methods of killing and packing are important considerations.

Killing.

There are two excellent ways of killing the animals. The easier and probably the more humane is to dislocate the neck. Almost all gamekeepers know this method and can show the novice quickly how it is done, but probably a description will be understood. Take the two hind legs of the rabbit firmly in the left hand, place the thumb of the right hand just behind the ears where the neck joins the skull, the palm resting on the left side of the face and the fingers holding firmly under the jaws. Then stretch out the animal quickly and with force, pressing in the right thumb and bending the head backward. The dislocation will be felt distinctly. This method requires considerable strength, but when the knack of it is learned it entails less suffering than any other. Another excellent way of killing is to hold the rabbit up in the left hand, as in the first method, and then to strike a sharp blow on the back of the head with a round stick, stunning the animal. As soon as the neck is dislocated or the rabbit stunned the jugular vein should be cut with a sharp knife and the animal hung head downward to bleed.

Dressing.

The next step in preparing a carcass for market is to remove the paunch and entrails, as their presence would soon taint the meat. With a sharp-pointed knife make a longitudinal cut down the middle of the belly, dividing the skin and the thin abdominal walls, but being careful not to cut the intestines. Turn out the paunch and the intestines, but leave the lungs, liver, heart, and kidneys in place. Next make a slit between the large tendon and the bone of one hind leg and slip the other leg through the cut, so that the carcass may be readily hung up. It should hang long enough to stiffen before being packed.

Packing.

For packing the rabbits for market a basket or hamper of the ordinary shape and having movable flat slatted trays to enable one to pack the carcasses in separate layers is recommended. Such a hamper permits free circulation of the air not only on the edge but also throughout the package, and the carcasses packed in this way reach their destination in an attractive state, instead of in the messy condition so often seen in the wild rabbits marketed in America.

Cooking and Serving.

The cooking of domestic rabbits does not differ greatly from that required for domestic fowls, and an experienced housewife can prepare them in a variety of savory ways. As the meat is naturally somewhat dry, as much as possible of the juices should be retained in cooking it.

SKIMMED MILK FOR CALVES

Undoubtedly Good Feed, But Unless Fed With Care It Will Probably Be Injurious.

There is no doubt that skimmed milk is a good feed for calves but unless it is fed with care it will probably be injurious. Taken alone it is not a balanced ration. However, it is usually fed this way and the result is that the calf is liable to get indigestion, as shown by a bloated condition, capricious appetite and diarrhea. Most of this trouble can be avoided by adding a handful of oil meal, cornmeal or cottonseed meal, to supply, in a way, the fat that has been removed in the skimming. The milk should be given to them warm and never when it is frothy. Never allow a calf to drink all of the milk that it wants at one meal. It is bad practice to allow several calves to drink out of one trough, some of them will get too much. Care in feeding calves is of vastly more importance than "cures" for calf scours.

Feeding Also a Factor.

It is not breeding alone that is going to determine the future usefulness of the cow, but it must be supported by liberal feeding, daily care and careful observation.

PUT MACHINES UNDER COVER

Prices Have Advanced Greatly and Proper Care of Farm Implements Will Pay Well.

Word is being sent out to farmers over the country to take special pains this fall and winter to protect their machines. Prices have advanced greatly, and care of farm machinery will pay doubly well this year. So the word is going out:

To put machines under cover as soon as the season's work with them is over.

To go over every machine carefully as soon as opportunity will permit, tightening bolts, replacing broken parts, and oiling carefully to prevent rusting.

To paint machines, as painting lengthens the life of a machine. Bridge paint is suggested as the best for iron parts.

Sugar Beets for Feed.

Sugar beets make a very good feed for the cattle, but grain, clover and alfalfa should go along with them.

SCALES AND ACCOUNT BOOK

Demonstrate That Dairy Cows Are Very Responsive to Neglect or Shortage of Feed.

The scales and the account book show that dairy cows are very responsive to neglect or a shortage of feed during the changeable fall weather; and that it is far more difficult to return them to a gaining basis than it is during other seasons of the year. Cows are naturally declining in milk yields during the fall months, so it is important that they have good care and liberal feeding to counteract the natural tendencies.

Healthy Sow and Litter.

Pasturing the brood sow and her litter keeps them all in good health. The pigs will make satisfactory gains and there will be a decided saving of grain.

Separate Male Fowls.

It is better to separate the male fowls from the hens during the molting season.

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

PARROT TEA-ROOM.

"I was the first parrot to come here," said the green parrot who was always called Greenie.

They Talk a Great Deal.

"I came next," said the blue and yellow macaw who was called Yellow Tail.

"And I came third," said the blue and red macaw who was called Blue Wings.

The other parrots chatted among themselves and tried to remember the order in which they came after the green parrot and the macaws.

"It's one of the greatest honors I know of," said Greenie. "The shop was named after me. They call it the Parrot Tea Room, and I was the only parrot in it at first. They had me sitting in my cage in the window to attract passers-by."

"Why do you call it a shop as well as a tea room?" asked Yellow Tail. "How can it be both things?"

"Yes, how can it?" asked Blue Wings.

"It's a tea room, true enough," said Greenie. "The people come to this room to drink tea and eat biscuits with jam. They eat a great deal and they talk a great deal—I'm not sure whether they eat more than they talk, or whether they talk more than they eat. It's hard to know. You see they do so much of both!"

"You do too," said Blue Wings.

"To be sure," said Greenie, "but we all do that. I do think it was a good thing though to call this place the Parrot Tea Room, for we're suitable birds to have around an afternoon tea party. We chatter and talk and we like to eat. Those are the things they do at a tea party, you know."

"How wise you are," said Yellow Tail. "But you have not yet told us why you call this place a shop too. Half the time you say it's a tea room and half the time you say it's a shop. And the people do the same thing. We find that we copy them."

"Yes," said the other parrots, "we copy them."

Greenie laughed hard at this. "Parrots always copy people," he said, "and I copied these people first. It was not an idea of my own to call this place both a shop and a tea room. But I heard some people calling it by both names—so I did too.

"It was just my nature, I presume. You know, the nature of a parrot."

All the parrots nodded their heads. "They call it a shop," said Greenie, "because they sell cakes and glasses of jams, and rolls and buns here. People buy them and take them home. A shop is a place where they sell things for folks to take home with them—or else to have sent home after them."

"They take home the tea and the cake they eat, don't they?" asked one of the little parrots. All the others laughed.

"To be sure they do," said Greenie. "But it's different when they eat the things."

"You mean it's different when they eat them here and when they eat them at home," said the little parrot. "That makes the difference between a tea room and a shop. And this place is both. Yes, it's a very fine place to be in."

"I've always thought it one of the greatest of honors," said Greenie, "to think that a tea room and shop were named after me. They do not call it the 'Parrots' Tea Room,' but the 'Parrot Tea Room.' Just one parrot, and that parrot is myself!"

Greenie Laughed at This.

Greenie swung himself around the bar of his cage and looked at the others.

"It's a great honor, Greenie," they said. They knew they must be polite to Greenie, for he was the special favorite and if he did not like them they would be sent away. They were all treated quite fairly by their mistress, but they knew Greenie was the one she loved best.

They certainly did not want to leave the tea room for they had such good times and it was splendid to have people feed them sugar.

"Well," said Greenie, "the most exciting time in my life was when I saw them painting a parrot on the window. They painted my very picture and then I stood on the bar of my cage in the window and the people began to come in! I was a great attraction. I'm a regular business parrot—I help make money for the mistress. And another thing, they have a parrot made out of wood hanging over the front door, as of course I could not go there, but they want to have something like me in as many places as possible."

May Be So.

Mistress—I should like to know what business that policeman has in my kitchen every night in the week?

Pretty Servant—Please, mum, I think he suspects me of neglectin' me work or somethin'.

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter
We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

ALMOST HELPLESS

Mr. Reuter Went Through a Terrible Siege of Kidney Trouble. Doan's Brought Back His Health.

"After an injury I was in terrible shape from kidney trouble," says D. Reuter, North St., West Chicago, Ill. "I couldn't stoop because of the awful pains in my back and the steady, dull misery almost drove me frantic. I had to be helped out of bed mornings, the pains across my kidneys were so bad and nobody knows the agony I went through. I couldn't do anything and was almost helpless; it seemed I would never get well.

Mr. Reuter

"The urine passed far too often and burned like scalding water. The passages were scanty and I had no control over them. At times everything in front of me grew dark and I couldn't see for several minutes. I perspired profusely and I was thirsty all the time. For two years I suffered, trying medicine after medicine without relief. I was just about discouraged and didn't think I would ever be able to work again.

"Hearing about *Doan's Kidney Pills* I used them and four boxes cured me. My kidneys became normal, my back got well and strong and all the other troubles disappeared."

Sworn to before me,
JAS. W. CARR, Notary Public.

TYPHOID is no more necessary than Smallpox. Army experience has demonstrated the almost miraculous efficacy, and harmlessness, of Antityphoid Vaccination. Be vaccinated NOW by your physician, you and your family. It is more vital than house insurance. Ask your physician, druggist, or send for "Have you had Typhoid?" telling of Typhoid Vaccine, results from use, and danger from Typhoid Carriers. Producing Vaccines and Serums under U. S. License The Cutter Laboratory, Berkeley, Cal., Chicago, Ill.

FLORIDA—Get Special Offer on Splendid Land Near Jax. Especially adapted to trucking, fruit and poultry culture. Write Jacksonville Heights Imp. Co., Jacksonville, Fla.

New Cause for Worry.

"With beef so high," says the Billville deacon, "we could compromise on chicken meat, but chickens air too destructive to raise where farm gardenin' is goin' on. Now, turkeys air more reasonable, an' we've had good luck with 'em, but who wants to live on turkey? Ef we tackle turkey week in an' week out, how kin we enjoy Christmas?"—Atlanta Constitution.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative, three for a cathartic. Ad.

His Wish Gratified.

"Ah," sighed the convalescent soldier at a base hospital, "what wouldn't I give for one breath of my native air!"

"Where d' you come from?" asked an ambulance driver.

"Frae Aberdeen."

"Aberdeen, eh? I came down from there before crossing. Wait half a jiff, and I'll see what I can do for you."

A little later there was a noise of throbbing engines, and a powerful motor car drew up before the veranda where the soldiers were sitting.

"Now, then," said the obliging driver. "Bend down to this wheel, while I unscrew the valve of this back tire. I pumped it up in Aberdeen before I left. Put your mouth right over it and take a good sup when I let her go."

Accommodating.

A real estate man was trying to sell a small farm by mail to a possible purchaser, a very precise and particular person. One day a friend asked him how he was making out on the deal.

"Oh, I've quit," he said in a tone of marked displeasure. "You see, he wrote for so many details and kept insisting on having more, that I got tired at last and wrote telling him if he would pay the freight both ways I would ship the darn farm down to the city for him to look at, and he never answered my letter."—Puck.

The Franco-Prussian war of 1870 cost $1,580,000,000.

"In most cases of Dyspepsia Coffee Does Not Agree"—

says a well known authority.

Many who use coffee—not knowing that it aggravates stomach troubles—could still enjoy a delicious hot table beverage and escape coffee's effects by a change to the wholesome, pure cereal drink—

POSTUM

"There's a Reason"

News of the State

Condensed for Busy Folks

Sergeant Joe Hope of Battery B, stationed at Waseca, died at Owatonna, died from injuries received in a railroad accident.

Archie Cyrs, 17, son of G. W. Cyrs, living near Ten Strike, was drowned in Grill Lake by breaking through the ice, while setting traps for muskrats.

David Benson, a pioneer of Renville, 79 years old, was seriously injured when he fell 15 feet from a ladder which he was using in pruning trees.

Lake Minnetonka carp were offered for sale by the state Wednesday, the first consignment of this fish to be placed on sale in Minneapolis as a state food conservation measure.

Lake Park's fourth annual colt show was held with several hundred farmers from the districts contiguous to the village in attendance. Cash prizes amounting to $170 were distributed.

If the coal situation does not improve shortly it is likely that a severe fuel shortage will be felt at East Grand Forks this winter. It is practically impossible to get a good shipment of coal regularly.

Pitching from the seat of a wagon, Louis Burke, Winona county farmer, was killed near St. Charles. His neck was broken. The physician says he probably was seized with a stroke of appoplexy which caused the fall.

Every soldier who is in the service from Renville will receive a box of candies for Christmas, which will be purchased by the school children. For the next ten days the children will contribute 1 cent each day to the fund.

Southern Minnesota's oldest sportsman has gone to the north woods in quest of big game. H. T. Doud, of Winona, in his eighty-third year, is on his thirty-first annual hunting expedition. Never has he returned without a deer.

A Red Wing sportsman was fined for "pursuing" ducks. He tried to coax or "shoo" the birds, within gunshot of a blind, where his companion was hiding. A state game warden arrested him. It was the first instance of a gunless hunter being arrested for illegal hunting.

Lawrence Altepeter, son of Mr. and Mrs. Henry Altepeter of Crookston, has been declared the county boy pig raising champion and will be entitled to a free trip to the Minnesota State fair next fall. All boys who entered the pig raising contest fed and cared for a pig for four months.

State Dairy and Food Inspector Peter Schletty of St. Paul filed complaints against a Brainerd restaurant and against a woman conducting a dairy, charging them with selling milk below standard, being less than the required amount of butter fat. Both were found guilty and sentence suspended.

A bulletin board, containing church announcements, which appeared on the outside of St. John's German Lutheran church at Red Wing was ripped off by a vandal. "It was undoubtedly because the bulletin bore the word 'German' that it was destroyed," Rev. J. R. Baumann said. Members of the church are loyal Americans and have taken an active interest in war relief work.

Tolls on the high bridge may be eliminated at Red Wing shortly and the big steel structure spanning the Mississippi river, thrown open to public traffic free of charge. Under terms of agreement between Red Wing and Trenton townships tolls are to be eliminated on the high bridge as soon as the Wisconsin channel bridge is completed and thrown open to the public.

Denied the right to assist the government in the prosecution of the war because of an exceptionally low stage of water in the Mississippi river, steamboat men have found a new service and it has been offered to Uncle Sam. It probably will be accepted. Steamboats of the various lines probably will be used to aid in solving the housing problems at points along the river where war work is in progress.

Fred Gates, Winnebago, a lineman living at Blue Earth, was killed when he fell from a pole.

Mayor Neil Kelleher and the entire city administration were re-elected at East Grand Forks.

The monthly report of the Lake Park Creamery association shows that $4,879.73 was paid out to 160 patrons, or an average of $30.50.

At the next regular meeting of the Washington county commissioners considerable time and attention will be devoted to road matters in all sections of the county.

The plans for the reconstruction of the Great Northern viaduct over Sixth street at Crookston, to replace the present structure, have been agreed upon between the Great Northern engineer and the city engineer and are now being completed by the Great Northern Railway company to be presented to the city council at the December meeting.

Seizing of the wood on timber lands of the Grand Rapids section belonging to the state or non-residents of Itasca county, is under discussion. That an emergency exists under which whatever steps are deemed necessary for protection of residents of this section can be taken. The plan is to relieve an acute fuel situation.

Running for mayor without opposition John Long was elected at Cloquet to succeed Mayor Harry Dixon. A. J. Hunter was elected treasurer. Aldermen elected were: First ward, Tom O'Meara; Second ward, Ed. Solen; Third ward, George Solomon.

STATE OFFICIAL TO AID IN CAMP WORK

CHILD WELFARE DIRECTOR TO ASSIST FEDERAL GOVERNMENT AT TRAINING CAMPS.

CROPS SHOW BIG INCREASE

Wheat Yield Over Twice As Great As Last Year According To Estimates—Record Yield of Potatoes.

St. Paul.

W. W. Hodson, director of child welfare under the State Board of Control, now in the East on state business, will remain there temporarily to aid in Federal work in connection with training camp activities. Chairman Ralph W. Wheelock of the board of control has announced that leave has been granted Mr. Hodson at the request of the Natonal War Camp committee. It is probable the director will continue his state work with that of the federal commission while in the East.

Big Crops In State.

A summary of preliminary estimates of crop production for the state of Minnesota, as compiled by the Bureau of Crop Estimates, United States Department of Agriculture, is as follows:

Corn—Production this year, 86,900,000 bushels; last year (December estimate), 94,420,000 bushes.

Wheat—This year, 66,476,000 bushels; last year (December estimate), 27,555,000 bushels.

Oats—This year, 123,025,000 bushels; last year (December estimate), 88,112,000 bushels.

Barley—This year, 38,232,000 bushels;; last year (December estimate), 26,125,000 bushels.

Rye—This year 6,438,000 bushels: last year (December estimate), 5,025,000 bushels.

Flaxseed—This year, 2,600,000 bushels; last year (December estimate), 2,338,000 bushels.

Potatoes—This year 34,500,000 bushels; last year (December estimate), 16,300,000 bushels.

All Hay—This year, 5,197,000 tons; last year (December estimate), 6,384,000 tons.

Apples—This year, 482,000 barrels of 3 bushels; last year (December estimate), 422,000 barrels.

* * *

Home Guard To Get Rifles.

Minneapolis Home Guard units will be equipped with Krag-Jorgenson rifles within a few days, it is an- F. Rhinow. More than 1,250 rifles nounced by Adjutant General Walter F. Rhinow. More than 1,250 rifles have been requisitioned and are expected to arrive shortly. Announcement is made of the following promotoins:

Park Rapids—Company D, Tenth battalion, captain, David B. Lynch; first lieutenant, Anson E. Pimley, and second lieutenant, Allen W. Stone

Elmore—Company E, Sixth battalion, captain, William O. Dustin; first lieutenant, John T. Ingalls, and second lieutenant, Roy Woolery.

Biwabik—Company C, Eighth battalion, captain, David B. Cavan, and second lieutenant, Joseph E. Lunn.

Charles E. Caine, Morris, was commissioned to be first lieutenant and surgeon of the Ninth battalion, and Jesse A. Van den Berg, Albert Lea, to be second lieutenant in Company D, Seventh battalion.

* * *

Official Gets Verdict.

John P. Gardiner, assistant state labor commissioner, has been awarded $500 damages from W. A. Cameron of Cameron & Co., contractors, for assault and false arrest, by a jury in District Judge J. C. Michael's court.

It was the second trial of the case, a verdict of $1,353 in the previous trial having been set aside as excessive.

The case grew out of a dispute between Mr. Gardiner and Mr. Cameron

* * *

Fire Warning Issued.

Warning against the fire danger from defective flues has been issued by George H. Nettleton, assistant state fire marshal. A defective flue, he said, caused the recent fire that almost wiped out the town of Freeport, near St. Cloud, and the same cause is blamed for numerous fires reported now that heating plants are being put into operation for the winter. Careful inspections were advised to avoid the fire danger.

* * *

Coal Supply Short.

This winter's coal supply for the Northwest still is short more than 5,500,000 tons with but approximately navigation on the Great Lakes, accordingg to a statement to railroads received from the railroads' war board.

* * *

Draft Interference To Be Tested.

A case to test the constitutionality of the 1917 Minnesota law, prohibiting and penalizing interference with conscription has been set for hearing in the state supreme court December 7. The legal questions involved were raised in a demurrer to the joint indictment accusing C. H. Holm and Frank Holm with interfering with the draft by circulating anti-conscription literature. The Ramsey county district court overruled the demurrer and certified the case under a special law for review by the supreme court.

THE KITCHEN CABINET

Sooner or later your good work or your bad work will find you out, and you will either get promoted or be given a seat on the toboggan.

NUT OMELET.

Put through a meat grinder, nuts to make a half cupful when ground. Beat three eggs very light, season to taste with salt and pepper and add three tablespoonfuls of cold water, add the nut meats and mix well. Put a little butter in the omelet pan and pour in the omelet mixture, lift the edges until it is firm all over, being careful not to scorch it, then fold and send to the table on a hot dish.

Unusual Cabbage Salad.—Shave or shred very fine one small firm head of cabbage, add a half cupful of chopped almonds that have been blanched, four or five ripe bananas also finely cut, mix with a cupful of sour cream, salt, pepper, and a dash of vinegar, if the cream is not sufficiently acid. Serve with crackers and cheese.

Different Dried Beef.—Put three tablespoonfuls of bacon fat on a frying pan, and add a half pound of dried beef picked in small pieces or cut in shreds with the scissors. Frizzle for three minutes, then put the beef on a hot platter. Place three bananas cut in halves crosswise and in quarters lengthwise, let them stand over the heat long enough to become thoroughly hot, five minutes will be sufficient time. Arrange around the beef and serve all piping hot.

Chili Con Carne.—Take all the seeds from two pods of chili pepper. Soak the pods in warm water until soft, then scrape the pulp from the skins, discarding the skins, saving the pulp and the water. Cut two pounds of round steak into small pieces and cook them in the frying pan in melted butter or sweet drippings until brown, and four tablespoonfuls of flour and stir until the flour is brown, add a clove of garlic in which two gashes have been cut, then the chili pulp and water, of which there should be a pint. Let simmer until the meat is tender, adding more water if needed. Season well. Soak a cupful of kidney or Mexican beans in soft water over night. Let simmer until tender, drain, and add to the meat, or they may be heated in a little hot fat and served in a dish apart from the meat.

The character of all work depends upon the intelligence of the person who performs it.

POPULAR DISHES.

The following dishes never lose their prestige, as they are choice and deserve their popularity:

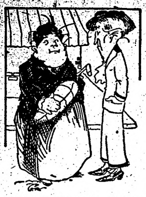
Chop Suey.—Cut tender, lean pork and chicken, one or both, into very thin pieces an inch and a half in length and a half inch wide. Saute these in fresh pork fat, have ready an equal amount of celery, cut fine, an onion cut in bits, add the vegetables to the meat, cover the whole with chicken, veal broth or boiling water and simmer until tender. Then add a few peeled mushrooms, as few or many as taste or convenience pleases, which should be cooked in a little fat before adding to the mixture. For a quart of the mixture stir in a tablespoonful of corn starch mixed with cold water, then add to the hot mixture. Continue stirring until the mixture boils, then add one or two tablespoonfuls of dark molasses, a teaspoonful of salt and a tablespoonful of china soy. The soy gives it the color and characteristic flavor. A substitute may be made for it by using a tablespoonful of kitchen bouquet and a little Worcestershire sauce.

Nesselrode Pudding.—Cook twenty large chestnuts or double the number of the smaller ones, in sugar sirup until tender. Cut six of the nuts in small pieces, the rest put through a sieve. Cook two tablespoonfuls each of currants and sultana raisins in the sirup until tender, then add the same amount of preserved pineapple and cherries or other fruit, to the pieces of chestnut and let them cool in the sirup. Cook the beaten yolks of four eggs, mixed with three-fourths of a cup of sugar in a pint of thin cream, cook until the mixture coats the spoon. Add the sifted chestnuts and pass the whole through a fine sieve. Cool and partly freeze, then add a cupful of whipped cream and finish freezing, add the fruit and nuts drained from the sirup and pack in a mold. Press the cover in place over a piece of wrapping paper and let stand in ice and salt an hour. Serve with whipped cream sweetened and flavored with fruit juice or with the following:

Pudding Sauce for Nesselrode Pudding.—Beat the yolks of three eggs until thick. Add three tablespoonfuls of sugar and beat again. Stir over the fire in a double boiler until the mixture thickens a little, then pour into a cold dish and beat until cold, light and creamy. Flavor to taste and then mix lightly with a cupful and a half of cream, whipped stiff. For deliciousness this pudding is hard to equal, but the fruit combination must be carefully blended.

Nellie Maxwell

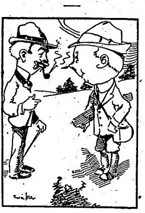
UNKIND



Mrs. De Fatt—My husband loves me dearly; he says that when I am away the house seems empty.

Mrs. De Slim—That is not love; that is a tribute to your size.

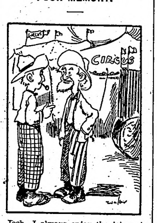
UNUSUAL



Dinks—What's been your luck fishing lately?

Winks—Remarkable. Everyone has been believing the stories I've been telling.

POOR MEMORY.

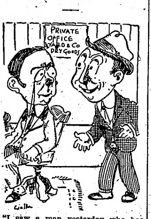


Josh—I always enjoy the jokes circus clowns get off.

Bosh—Because why?

Josh—Because I can't remember them from one year till the next.

SMARTY.



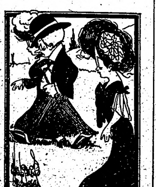
PRIVATE OFFICE YARD & CO DRY GOODS

"I saw a man yesterday who has been driving customers away from your store."

"Who was he?"

"A cabman."

NOTHING DOING.



Mrs. Newwed—There is Ella. She intends to marry old Gotrocks for his money.

Mr. Newwed—Well, she'll have to see him to get him to part with it.

Last in place But First in Choice
Certain-teed Roofing

The roof is the last to go on your building; but the selection of an efficient and economical roof is of first importance. If you will use

Certain-teed

Roofing

on your building you will get the most efficient roof, and will cut down the cost of the roof materially.

CERTAIN-TEED Roofing is economical to buy, inexpensive to lay, and it costs practically nothing to maintain. It is weathertight, fire retardant, clean, sanitary and gives the utmost roofing service over a period of years. CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply.)

There are many roll roofings, but only one CERTAIN-TEED. As it costs no more to lay a CERTAIN-TEED Roof than it does to lay a poor roof, it will pay to get the best, and save on renewals and upkeep. You can't tell the quality of roll roofing by its appearance, or by feeling of it; your only safety is in the label. Be sure it is CERTAIN-TEED.

Certain-teed
Paints and Varnishes

are made of the best quality materials and mixed by modern machinery to insure uniformity. Made for all uses and in all colors and sizes. Any dealer can get them for you. With paint and varnish, as with roofing, the name CERTAIN-TEED is a guarantee of quality and satisfaction.

Certain-teed

U. S. WAR BOARD IN PARIS COUNCIL

Col. E. M. House Heads Commission Now in Europe for Conference.

LANSING OUTLINES POLICIES

More Complete Co-ordination of All the Activities of Nations Engaged in Conflict Will Be Sought.

Washington.—With the announcement of the safe arrival in Europe of the American commission which will take part in the allied war council in Paris, the personnel of the commission and the objects which are to be sought by the American delegation are made public for the first time.

The participation by the United States in this council of the allies marks one of the most important steps taken by this country since America entered the war.

Henceforth the United States will have a voice in determining the actual strategy of the war.

Its officers will be party to the determination of where the enemy is to be attacked, where supplies are to go, what course is to be pursued with neutrals—in short, every phase of the war will, from this time on, concern the United States.

From this point to a single command of all the war forces of the allied nations is only a step.

Col. House Heads Board.

Col. E. M. House, who is recognized as the chief unofficial counselor of President Wilson, heads the war board now in Europe.

With him are representatives of every branch of the war government—army, navy, treasury, war trade board, shipping board, food comptroller and priority.

The delegation naturally divides itself up into departments, thus:

Colonel E. M. House, chairman, will act as spokesman for President Wilson on all diplomatic and political questions and matters of general policy.

Admiral William S. Benson, chief of naval operations, U. S. N., will participate in discussions of allied naval operations.

Gen. Tasker H. Bliss, chief of staff, U. S. A., will discuss military operations and give information on military support United States can give.

Oscar T. Crosby, assistant secretary of the treasury, will represent United States on questions of loans and credits.

Vance C. McCormick, chairman war trade board, will assist in forming uniform policy on exports, licenses to shippers and rationing the neutrals.

Bainbridge Colby, member shipping board, will report United States progress in shipbuilding and discuss distribution of ship tonnage.

Dr. Alonzo E. Taylor, representative of Food Administrator Hoover, will co-operate with allied commissioners in matter of food control.

Thomas Nelson Perkins, member priority board, will take up priority of shipments to our allies.

Gordon Auchincloss, son-in-law of Colonel House and assistant to Counselor Polk, will serve as chief secretary.

Essentially "War Conference."

Secretary of State Lansing, in a statement regarding the purposes of the commission, emphasized the fact that the conference is essentially a "war conference," although it is thought possible that the question of possible peace terms may come up for consideration.

Secretary Lansing's statement follows:

"The government of the United States will participate in the approaching conference of the powers waging war against the German empire, and has sent as its representative Edward M. House.

"The conference is essentially a "war conference," with the object of perfecting a more complete co-ordination of the activities of the various nations engaged in the conflict and the more comprehensive understanding of their respective needs in order that the joint efforts of the co-belligerents may attain the highest war efficiency.

"While a definite program has not been adopted, it may be assumed that the subjects to be discussed will embrace not only those pertaining to military and naval operations, but also the financial, commercial, economic and other phases of the present situation which are of vital importance to the successful prosecution of the war.

"There will undoubtedly be an effort to avoid any conflict of interest among the participants, and there is every reason to anticipate that the result will be fuller co-operation and consequently a much higher efficiency and a more vigorous prosecution of the war.

"The United States, in the employment of its man power and material resources, desires to use them to the greatest advantage against Germany. It has been no easy problem to determine how they can be used most effectively, since the independent presentations of requirements by the allied governments have been more or less conflicting on account of each government's appreciation of its own wants, which are naturally given greater importance than the wants of other governments.

General Survey Important.

"By a general survey of the whole situation and a free discussion of the needs of all, the approaching conference will undoubtedly be able to give the demands of the several governments their true perspective and proper place in the general plans for the conduct of the war.

"Though the resources of this country are vast and though there is every purpose to devote them all if need be to winning the war, they are not without limit. But even if they were greater, they should all be used to the highest advantage in attaining the supreme object for which we are fighting. This can only be done by a full and frank discussion of the plans and needs of the various belligerents.

"It is the earnest wish of this government to employ its military and naval forces and its resources and energy where they will give the greatest return in advancing the common cause. The exchange of views which will take place at the conference and the conclusions which will be reached will be of the highest value in preventing waste of energy and in bringing into harmony the activities of the nations, which have been unavoidably acting in a measure independently.

"In looking forward to the assembling of the conference it cannot be too strongly emphasized that it is a war conference and nothing else, devoted to devising ways and means to intensify the efforts of the belligerents against Germany by complete co-operation under a general plan, and thus bring the conflict to a speedy and satisfactory conclusion."

House Is Real Envoy.

Colonel House is the actual representative of the United States government on this commission; the others are merely his cabinet of advisers. He had been preparing for this mission for weeks before there was an inkling that the president meant him to represent the United States at the conference, and it is understood that he personally chose the delegates from the various departments.

There is no time set for the adjournment of the war conference. The very nature of the purposes that bring the representatives of all the allies together borbids a period being put to their labors.

In some form the congress will remain during the entire war, for until Germany is beaten there will be the necessity of co-operation that can only be obtained by a permanent board.

If there had been such a board in existence, for it means the direction of the war by a central body in authority over all forces, Italy would not be struggling for her life, it is declared. Such a board would have vetoed the advance of General Cadorna so far into Austria that the Teutons could trap him, or if the strategy appeared sound, they would have arranged for supplies and support that would have protected him in the positions he won against the divisions Germany brought from the Russian and Roumanian fronts.

In short, such a board will make it impossible for Germany to pursue successfully the Napoleonic plan of meeting her foes separately, and thus nullify the advantage they have in numbers and resources.

Stone Houses of Aleppo.

The stone houses of Aleppo are imposing and not without beauty. They are well preserved and tended, in contrast to the buildings of most eastern towns. The bazaars, and the khans, or wholesale establishments, are housed in stone buildings strong as forts. These are relics of older times, for Aleppo has been a city of traders for 20 centuries. The great iron studded doors have resisted the batterings of many a mob eager for the rich wares within. Some of the shops fronting these narrow streets house a stock of goods drawn from every corner of the earth. Steamer, railroad, wagon train, pack horse, caravan—the local merchant packs his goods for any form or settlement known to man. The shops are mean and insignificant looking enough from the outside, the traders have never heard of the Aleppo practice of making a window display in narrow frontage on the street, a door where he may squat and smoke, and behind him long rooms and galleries packed with rich wares; such is the usual arrangement for trade in Aleppo. And yet the city has been a commercial center since the days when Europe was a wilderness.

THE "KITE" BALLOON

A MOST ESSENTIAL UNIT IN MODERN WARFARE.

USEFULNESS LITTLE KNOWN

Government Offers Splendid Opportunity to Young Men Who Aspire to Become Air Craft Pilots.

Omaha, Nebr.—A branch of Uncle Sam's big army that the public has not yet heard a great deal about but which is to play a most important part in the war is the "Kite" or Stationary Balloon section for which about 1,500 men are now being trained at Fort Omaha preparatory to their departure for the front.

The usefulness of the "kite" or stationary balloon is not generally known. One familiar with its employment says that at the balloon schools an applicant for officers' commission must first qualify as a pilot of spherical balloons. Then they are taught to become pilots and observers in the "kite" balloons.

This balloon is allowed to ascend to a height of about 3,000 feet with a wire attached to it by which it is drawn down when desired by motor power.

In war, these balloons are located from three to five miles from the first line of trenches, and from the basket, two men, a pilot and an observer give the range and results of firing by telephone to the artillery. For this reason the section is known as the "eyes of the artillery."

On the western front, they are placed from one-half to a mile apart according to conditions, and are provided with parachutes attached to the men in the basket; in event of accident to the balloon the men parachute safely to the earth.

Applications for the Officers' Reserve School for this important and interesting branch of the service are still being received. Applicants must be citizens of the United States, not under 19 years of age or over 35. They must have a good education and three letters of recommendation.

After passing the examination required the applicant is enlisted as a first class private in the Aviation Section of the Signal Enlisted Reserve Corps, and assigned to a school for training, the time of training depending upon the man's ability.

If he qualifies as an observation balloon pilot a lieutenant's commission is issued.

From the time of his entrance into the school until he is commissioned he receives $100 per month, quarters and food allowance. As 2nd lieutenant $1,700, lieutenant $2,000 annually.

Anyone wishing to apply for admission to this branch of the army should make their request for application blanks at once to the President Aviation Examining Board, Fort Omaha, Nebraska.

IGNORE FLAG OF TRUCE.

Teutons Fire on Life Boats In North Sea Engagement.

London—An appalling story of cold blooded massacres by Germans of crews of British North Sea convoys in a recent battle is told by the Norwegian newspapers.

The Tidenstegn said the German cruisers were observed at 6 o'clock in the morning and were thought to be British vessels, but at 7 o'clock, when there was more light, they suddenly began shooting and the convoy was terrified to see the British destroyer at the stern of the convoy begin to sink, although it fought to the end. The German cruisers, after signalling the vessels to stop, advanced on each side of the convoy, which they swept with all their guns at a range of less than 200 yards.

The German destroyers came up and helped to spread death and destruction on the defenseless ships, shells falling thick and fast. The Germans were not content to sink the ships, but shelled the life boats, and every living thing coming their way was mercilessly slaughtered. The survivors owed their lives to the high sea which was running, making the boats a difficult mark.

In the midst of the massacre, another British destroyer came up and immediately attacked, but soon was sunk in the unequal struggle. The German flotilla then cruised backward and forward along the sinking steamers, pouring a fresh and terrible rain of shells at a range of 100 yards. One shell went through the Swedish ship Wirndar, exploding in the life boat on the other side and killing all its occupants, 12 men and three women.

The other life boat rowed back to rescue the captain and two waitresses from the wreck. A shell struck the boat and killed five of its occupants, only the mate escaping by swimming. The Wirndar was a mass of flames and the two girls jumped into the sea. The captain was saved by clinging to wreckage. As the two young women were sinking, an English ship hoisted the white flag. The answer from the Germans was a shell which killed both girls. Twelve men of another ship had just got into the life boat when a shell killed them all.

THINGS WORTH KNOWING

An automobile tire pump has been invented that is slipped over the crank shaft of a car and operated by its engine.

Pressing a lever with the foot locks the ignition in a new automobile thief defier and a special key is required to unlock it.

To permit loads to be carried the full length of an automobile running board a folding carrier of the lazy tongs type has been invented.

It is believed that, to an enormous extent, the bed of the ocean is covered with lava and pumice stone.

The rearrangement of England's coal traffic has been the means of saving 700,000,000 ton miles.

During 1916 there were 882 applications for patents in New Zealand. This shows about eight applications per thousand population, as compared with 3.7 for Great Britain, 4.4 for Australia, and 5.7 for the United States. Applications for improved milking machinery took the lead.

BOSCHEE'S GERMAN SYRUP

will quiet your cough, soothe the inflammation of a sore throat and lungs, stop irritation in the bronchial tubes, insuring a good night's rest, free from coughing and with easy expectoration in the morning. Made and sold in America for fifty-two years. A wonderful prescription, assisting Nature in building up your general health and throwing off the disease. Especially useful in lung trouble, asthma, croup, bronchitis, etc. For sale in all civilized countries.—Adv.

Recalled a Poem.

Billy was sitting with his mother by the fireside one night. Suddenly he announced, "Mother, you remind me of a beautiful poem."

"What is it, dear?" she asked, much touched.

"'Shoot, if you want to, my old gray head,'" said Billy with pride.

$100 Reward, $100

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work. $100.00 for any case of Catarrh that HALL'S CATARRH MEDICINE fails to cure.

This is a sour world for the man with a sour disposition.

Unreal pleasures of life are the most expensive.

Wished Nearer Relation.

Ralph lived in the city, but is fond of his grandfather, a farmer, and often visits him. One day after one of his visits he sat for a long time in a deep study, and with a homesick look on his face, he finally said: "I wish grandpa was nearer related to me."

Mechanical Result.

"Every crank has his day."

"Yes, and so the world goes 'round."

For each bachelor who sighs because he is alone fully a dozen married men sigh because they are not.

Women are fast replacing men in the British printing trade.

ACID POISONING!

The most eminent physicians recognise that uric acid stored up in the system is the cause of gout and rheumatism, that this uric acid poison is present in the joints, muscles, or nerves. By experimenting and analysis at the Invalids' Hotel and Surgical Institute in Buffalo, N. Y., Dr. Pierce discovered a combination of native remedies that he called An-u-ric, which drives out the uric acid from the system, and in this way the pain, swelling and inflammation subside. If you are a sufferer from rheumatism, backache, pains here or there, you can obtain Anuric, double strength, at any drug store and get relief from the pains and ills brought about by uric acid; or send Dr. Pierce 10c for trial pkg. Anuric which you will find many times more potent than lithia and eliminates uric acid as hot water melts sugar. A short trial will convince you. Send a sample of your water to Dr. Pierce and it will be tested free of charge.

Anuric is a regular insurance and life-saver for all big meat eaters and those who deposit lime-salts in their joints.

A Minnesota Woman's Advice

Minneapolis, Minn.—"I suffered for many years with woman's weakness and kidney trouble. I would have dreadful backaches and pains through my side and stomach. I became very weak and nervous, could not sleep nor eat. I would have fainting spells and would fall right over. My doctor told me nothing but an operation would help me. I began at once taking Dr. Pierce's Favorite Prescription and this medicine restored me to good health, which I am still enjoying to this day." —MRS. L. LARSON, 247 21st Ave. N. —Adv.

Notice to Sick Women

The Experience of These Women Prove That There is a Remedy for Your Illness.

Aberdeen, Idaho.—"Last year I suffered from a weakness with pains in my side and back. A friend asked me to try Lydia E. Pinkham's Vegetable Compound and I did so. After taking one bottle I felt very much better. I have now taken three bottles and feel like a different woman. Lydia E. Pinkham's Vegetable Compound is the best medicine I have ever taken and I can recommend it to all suffering women."—Mrs. PERCY PRESTIDGE, Aberdeen, Idaho.

Kingfisher, Okla.—"For two years I suffered with a severe female trouble, was nervous, and had backache and a pain in my side most of the time. I had dizzy spells and was often so faint I could not walk across the floor. The doctor said I would have to have an operation. A friend asked me to try Lydia E. Pinkham's Vegetable Compound. After taking ten bottles I am now well and strong, have no pain, backache or dizzy spells. Every one tells me how well I look and I tell them Lydia E. Pinkham's Vegetable Compound did it."—Miss NINA SOUTHWICK, R. F. D. No. 4, Box 33, Kingfisher, Okla.

Davy's Philosophy.

Old Davy Skinner, a fisherman on the Cape Cod coast, was noted for unfailing self-poise and economy of words. No one ever knew Old Davy to become in the least excited, nor did he ever waste a word.

One summer day he was rowing along in his boat, when a dory containing five or six young summer people was captized near him. Naturally there were screams and wild confusion, in the midst of which Davy rowed over to the scene of the disaster and said placidly to the young people who were clinging to the boat, screaming for help:

"Hadn't you better git in?"

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root, a physician's prescription for special diseases, makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

A Costly Joke.

When Mrs. Ellen Butler of Manchester, being about to embark at Douglas, Isle of Man, for Liverpool, was asked what nationality she was, she replied three times in a loud voice: "German." She afterward said she did it for fun, but the magistrate fined her a guinea ($5) and costs.—London Observer.

Money doesn't make the man, but a little thing like that doesn't worry the man who makes the money.

It wouldn't be so bad if people who have nothing to say would let it go at that.

S. B. Hanks, dead in Winona, Minn., was a cousin of Abraham Lincoln.

Not Much Relation.

Betty had two brothers, Charles and David. "You know," said she, "dad and David were born in England and mother and Charles and I were born in America, so you see there isn't such a close relationship."

In Denmark large numbers of women are employed by the state as steamship pilots.

R. C. Morton of Columbus, O., has retired after serving one railroad 50 years.

ARTICLES OF INCORPORATION OF THE FARM LOAN SECURITY COMPANY.

We, the undersigned, for the purpose of forming a corporation under and pursuant to the provisions of Chapter Fifty-eight (58), General Statutes for 1913, and any amendments thereof, do hereby associate ourselves as a body corporate, and do hereby adopt the following Articles of Incorporation:

ARTICLE I.

Sec. 1. The name of this corporation shall be Farm Loan Security Company.

Sec. 2. The general nature of its business shall be to buy, sell, lease, let, improve or deal in lands and tenements; to buy, construct, improve, lease and sell houses and buildings; to acquire, own, sell, and otherwise dispose of, and deal in, stocks, bonds, mortgages, securities, notes and commercial paper of corporations and individuals; to mortgage, pledge, or otherwise change all or any part of the investments of the company or its property and rights; to do each and every thing necessary, suitable, or proper for the accomplishment of any of the purposes, or the attainment of any one or more of the objects herein enummerated, or which shal at any time appear conducive to or expedient for the protection or benefit of this corporation.

Sec. 3. The principal place of transacting the business of this corporation shall be in the City of Thief River Falls, County of Pennington, Minnesota, and such other places as may be decided upon by the Board of Directors.

ARTICLE II.

The time for the commencement of this corporation shall be November 1, 1917, and the period of its duration shall be thirty years.

ARTICLE III.

The names and places of residence of the persons forming this corporation are Lester E. Gesell, Thief River Falls, Minn., Katherine Gesell, Thief River Falls, Minnesota, and Oscar A. Naplin, Thief River Falls, Minn.

ARTICLE IV.

Sec. 1. The management of this corporation shall be vested in a Board of Directors, composed of not less than three and not more than six members.

Sec. 2. The names and addresses of the first Board of Directors are Lester E. Gesell, Thief River Falls, Minn., Katherine Gesell, Thief River Falls, Minn., and Oscar A. Naplin, Thief River Falls, Minnesota.

Sec. 3. The first officers of this corporation shall be: President, Katherine Gesell; Vice President, Oscar A. Naplin; Secretary and Treasurer, Lester E. Gesell.

Sec. 4. All of the above named officers and directors shall hold their respective offices aforesaid until the next annual meeting of the corporation to be held the third Monday in January, 1918, at which time and annually thereafter, a Board of Directors shall be elected from and by the stockholders of this corporation. Immediately after the election of directors, or as soon thereafter as practicable, the directors shall meet and elect from their number a President; and a Vice President, and from their number or from the stockholders a Secretary and a Treasurer. Any office except that of President and Vice President may be held by one person. The directors and officers of this corporation shall hold their respective offices until their successors have been elected and entered upon the discharge of their duties. The first meeting of the stockholders and of the board of Directors shall be held in the City of Thief River Falls on the 3rd day of November, 1917, at 10 o'clock A. M., and 11 A. M., respectively.

ARTICLE V.

The amount of the capital stock of this corporation shall be Fifty Thousand Dollars, which shall be paid in, in money or property, or both, in such manner, at such times, and in such amounts as the Board of Directors shall order. The capital stock shall be divided into Five Hundred Shares of the par value of $100.00 each.

ARTICLE VI.

The highest amount of indebtedness or liability to which this corporation shall at any time be subject shall be the sum of Fifty Thousand Dollars.

In testimony whereof, we have hereonto set our hands, this 20th day of October, 1917.

[illegible] by inheritance and tradition, so that the diversion of labor to industrial pursuits has been an almost impossible task confronting the British government, the National Geographic Magazine observes. The supply of agricultural labor constantly outruns the demand, thus keeping the wage scale extremely low. Caste also prevents people from leaving crowded districts and going to sparsely inhabited regions, of which there are many.

In time of distress the restrictions which caste throws about rescue and relief work would be exasperating if they were not so tragic. For example, in the terrible Orissa famine thousands of Santals perished, in the midst of ample supplies furnished by the government, before it was discovered that there is a peculiar tenet of their faith which forbids them to touch food cooked by Brahmins. It was also discovered that skilled weavers would not go to the ordinary relief work camps for fear that the hard labor would cause them to lose the delicacy of touch which they value so highly.

The Tempermental Artist.

The Art World Magazine is willing to admit that the public taste and preferences in art is not to be despised, and it thinks artists should consider those preferences. It says:

"An artist only honors himself when he never loses for one moment the thought of pleasing that great world-public. He should seek forever to captivate it, not merely by pleasing it, but by pleasing it so much that it will be delighted to take off his hat to him, thank the giver of all good things for having created him, and honor itself by nailing his name high up in the temple of fame. Thus he will win a niche in the heart of mankind, which means the immortal love of the race. . . . The truly wise and great artist digs down deep into the heart and soul of man, there to sense if he can what the race is feeling, thinking and longing to have expressed for itself—in the hope of being enraptured by the nobility of the forms in which the artist expresses the things which he finds there."

This being the era of pretexts, with war as the basis, the suggestion comes that our literary folk economize in the matter of adjectives. These and their associates, the adverbs, are looked upon as diseases of the vocabulary, the excess adipose tissue, so to speak. The authors of the ancient classics were not given to elaboration of substantives. It is a matter of regret that the tendency toward the use of adjectives is found in the war dispatches. That the superlative is being constantly appealed to is also regrettable. If our language, spoken and written, emerges from the conflict looking like the warriors, lean, lithe and limber, it will be a compensation for other losses.

From vacant lot and back-yard gardens a crop valued at not less than $350,000,000 will be taken before the season's end. So runs the estimate of the national emergency food garden commission, and its figures, it insists, are conservative. Considering that 1,175,000 acres above the normal acreage usually devoted to home gardens have been sown to vegetables this year by enterprising home gardeners, it is quite likely that the estimate is all that the commission claims for it.

The report from Berlin that it has been ordered that bronze statues be expropriated to be melted down for munitions sheds new light on the straits to which Germany is reduced by reason of the cutting off of her imports of raw materials. Even in Germany, however, there may be bronze statues that might well be applied to this use in the interest of art.

The National Automobile Chamber of Commerce has recommended the elimination of the muffler cutout. Now, if it only will make a rule not to sell cars to the kind of men who use the muffler cutout life will be much safer and more pleasant.

A picture supplied by an international syndicate and printed in a number of newspapers in the country shows a royal personage of ancient lineage and an American soldier in close proximity. The soldier was a private of the United States regiment of engineers that lately passed through England en route to France that was inspected by his majesty, George V. There was a very marked contrast in the appearance of the two men. Attention is called to the contrast not to emphasize the virtues of democracy, not as it is exemplified in government, at least. The British are about as democratic as we are in their political institutions, says Nashville Banner. They keep the king through a queer conservation that possesses them and a love of old forms and usages. He is no more the ruler of Great Britain than is the American soldier with whom he graciously condescended to talk.

Wealth means independence. It means freedom to do big things and fine things. It makes youth hundred-handed, like Briareus. Old age with a competency petitions no old people's home, holds out no trembling and supplicating finger for a penny from a son. Young man, don't be a money bug, a financial interrogation, a mere accumulation point. But make money, and be decent and honest in the doing of it. Make money and keep enough of it for the day of opportunity and need. Poverty is not a virtue. Neither is honest wealth a crime.

An English inventor has perfected a scheme for treating the edges of paper money so that when run through a phonograph they testify to their genuineness by uttering words. Of course we all know that money talks.

DO NOT DELAY
Take advantage of this dear, season able weather
Fix that roof— We have the shingles
Build a storm house— Either Pine Flooring or Fir Ceiling
Make a room in the attic— Use Beaver Board and panel strips
A Machine Shed saves money— Build with Drop Siding
Bank your house, sure— Tar paper and Lath will do
Do Something! WINTER is almost here!
We have a good line of Storm Doors and Storm Windows

Mrs. Emil Sigrud entertained the Ladies Aid at her home last Wednesday.

Star Notes

RENSLA-KOMPELIEN

At the home of the bride's parents, Mr. and Mrs. Peter Rensla, in Deer Park township, Wednesday the 14th, were joined in the holy bonds of matrimony Miss Bella Rensla to Olaf Kompelien. A vast number of the happy couple's relatives and friends were present to witness the ceremony, and the wedding reception was given in the Erie Hall where both young and old enjoyed themselves from early in the evening till late the following morning, stepping to the tune of the "light fantastic." Miss Rensla is known as one o eastern Pennington's most popular and charming young ladies and Mr. Kompelien is the prosperous owner of the farm on which Erie village if located.

The young couple departed via Twin Cities for Lyon county to spend their honeymoon and have the congratulations and best wishes of their host of friendh for a happy and prosperous journey through life.

Edd Torgerson was a combined social and business caller at the homes of Fust Iverson, Toller Havet and Kistle Brekke Thursday evening.

Mrs. Ole K. Lien visited with Mrs Mrs. Knut Sundsdahl Tuesday.

The East Star Ladies Aid met with Mrs. Hans Svare Wednesday.

Peter Meyer was a transient caller in S. E. Star Monday.

Lnut Suddsdahl combined business with pleasure on a trip to Oklee and McIntosh, visiting relatives in the latter vicinity.

Halvor Syverson writes home from Western Canada that he likes the country out there first rate—"Its just like as if I had come to the old country"

Misses Diana Wold, Oppie Olson and Tedma Hoyt visited at the home of Mr. and Mrs. Z. J. Hole last Tuesday evening.

Mr. and Mrs. Theodore Sunsdahl visited at the Knut Sucsdahl home Sunday.

Some smart aleck had lugged a few bales of hay into the Vake school house entry the other evening. If such guys are so anxious to show off their carrying strength, why not errry in a few armsful of wood for "Miss Pedagouge" instead. The school heating apperatus is not a hay burner at any rate. Or probably it was that "pork burglar" of last winter's fame who had it in mind to make amends with a few hay bales,

Mrs. Birgit Danielson last Sunday entertained the families of H. K, Bjorneraa, Oluf Omlid, Ole and Olof Sunshabl, O. K, Lien, Ole Tharaldson, Taddeiv Havet, Andrew Vake and Z. J. Hole at her ranch in south-east Star.

Mr. and Mrs. G. A. Iverson and son Alfred visited Saturday and Sunday at the home of Mrs. Iverson's parents, John Bamerud's, south-west of Rhoda.

K. Sunadahl and H. Iverson drove to Oklee on a business mission Tuesday.

The "Strongface Sisters" gave a rehearsal at "Clover Nook" last Wednesday afternoon.

Miss Dina Wold, teacher in district No. 1, spent the week end at her home near Kratka.

THIEF RIVER FALLS, — MINN

First Potato Show.

Pennington held its first potato show at Thief River Falls Saturday November 17th. Tnh show was a great success from every standpoint. There were 76 enteries, as follows: Ohio 30; Burbanks 12; Rurals 7; Early Rose 6; Cobbler 5; Triumph 4; Carmon 4; Sunflake, Early Six Weeks, Vermont Gold Coin, Russet and Early Harvest, each one, unnamed enteries 3.

A large crowd of actual farmers as a great number of townspeople were present in the auditorium where excellent speeches were delivered by Congressman Steenerson. S. B. Cleveland, representing the State and Fedtral government in a movement to place an agricultural agent in every county; Prof. McCall of the Agricultural College at Crookston and T. A. Hoverstad, agricultural expert of the Soo line.

Following the speaking an organization to be known as the Penninton County Potato Growers Association was perfected and the following officers were elected: Pres., Hans Anton, Vice-Pres., A. E. Anderson, Sec'y., Ross P. White, Treas., F. B. Conklin, Directors: William Korstad, Joe Oski, Dr. F. H. Gambell.

The following are Prize winners:

Swespstakes-Rev. R. L. Barackman.

Ohio—First, Rev. R. L. Barackman; second, Carl Jensen; third, Albert Johnson; fourth, F. B. Conklin.

Rurals—First, Hans Anton; secnnd; B. C. Linfeta; third, Ed. Aubol; fourth A. E. Moengen.

Burbanks—First, Ben Rosenthal; second, S. J. Johnson. third, K. O. Gigstad; fourth, August Swenson.

Irish Cobblers—First, Dr. F. H. Gambell; second, Henry Randorf; third, J. A. Jacobson; fourth, Gust Iverson.

All other varieties—First, Carl Jensen (Triuphs); second, John Lundquist (Russets); third, Peter Paulson (Early Rose); fourth, O. Fishberg (Carmon); fifth, Jerry Race (Sunflakes); sixth, Carl Jensen (Carmon).

Second Annual Poultry Show

The Pennington County Poultry Association will hold their second annual show at Thief River Falls, December 6th and 7th, 1917. Mr. C. E. Brown of the Crookston School of Agriculture, who gave the interesting and instructive talk last year at the poultry show last year will be with us again to act in the capacity of judge. He is an able speaker and will give some more points on the subject of raising more and better poultry and should be heard by all those who are interested in poultry and poultry products.

A splendid list of cash prizes amounting to nearly two hundred fifty dollars have been arranged for and every effort possible is being made by the officers and directors to make this the best showing of its kind ever held in this section of the state. This year the visitors will be impressed by the uniformity of the coops as well as by the splendid birds they contain.

Those planning on entering exhibits should notify the Secretary of the Association, Thief River Falls as the association is planning on purchasing uniform coops and the committee in charge would like to know as soon as possible about how many coops will be necessary.

Parent-Teachers Association.

Wednesday November 21, was parents day in our local school. A goodly number of ladies were present, but the men folks were conspicious by their absence. The ladies seemed to enjoy the visit and certainly the teachers and the pupils did. The former only hope that the parents will come more oftener even though no parents' day be designated. While ehe coffee and and the war bread sandwiches, prepared by and ferved by the booking class, were partaken of, Prin A. O. Halvorson proposed that a parent-teachers association be organized. The ladies present expressed themselves very much in favor of the movement. Frikay evenidg December 14th was set as the time for the first regular meeting, when permanent officers wiii be elected and other business nebessary in the association will be considered. The evening was chosen as the most suitable time of the day in order that the gentlemen might have a chance to attend. Mrs. R. H. McDonald was elected temperary chairman, and Mrs. M. G. Thoreson was elected temporary secretary. It was decided that the regular meetings be held at intervals of six weeks.

An association of this kind will be of of great benefit for the pupils, the teachers and the parents. It will go a great wrys towards solvidg many of the problems that arise in every school and especially a consolidated one. All parents in Consolidated School District Eight are urged to be present in the school house at the regular meeting on Friday evening December 14th. Be there and become charter members of this association.

More Money For Your
SCRAP IRON
There will be a car on the track at Goodridge on November 28, 29 and 30 at which place $7.50 per ton will be paid for all scrap iron. Boilers $2.50 ton less. I will also buy your cattle hides at the highest Market price. Save for me.

STILL TIME TO FORWARD GIFTS

War Department Will Transport Christmas Packages for Boys in France.

LAST SAILING DATE DEC. 5

Official Statement Issued by Post Office Department to Eliminate Confusion Regarding Regulations.

By EDWARD B. CLARK.

Washington.—From all over the United States queries come to Washington concerning the exact rules governing the sending of parcels to the members of the expeditionary forces in France. Confusion seems to prevail everywhere. It is due to a number of causes, the principal one of which seems to be that the instructions were sent out piecemeal and that some of the first rules were amended.

Here is the official statement on the subject which I have just secured from the post office department:

Western Newspaper Union.

Gentlemen: In answer to your inquiry with reference to parcel post packages for the American Expeditionary Forces, I beg to advise you as follows:

Parcel post for soldiers and civilians connected with the American Epeditionary Forces in France, when carefully packed and properly addressed, will be accepted by all postmasters for direct transmission through the mails. Such parcels may weigh up to seven pounds. Parcels for the soldiers and civilians connected with the American Expeditionary Forces may contain anything that is admissible to the domestic parcel post except perishables which may spoil on the long journey to Europe.

Parcel post for the American Expeditionary Forces need not be packed in wooden boxes, but should be carefully packed in the strongest kind of pasteboard box to assure its safe arrival at the front.

In addition to this parcel post service to the troops, the war department will undertake to carry Christmas parcels for the American Expeditionary Forces provided such parcels are sent "care the Commanding General, Port of Embarkation, Pier 1, Hoboken, New Jersey," and are packed in wooden boxes not more than two cubic feet in volume, well strapped, and with a hinged or screw top. Such Christmas boxes may be sent to the Commanding Officer, Port of Embarkation, either by express or through the mails, and must not exceed 20 pounds in weight. The army will inspect the contents of each box and undertake its delivery from Hoboken to the addressee. The war department will receive Christmas packages up to December 5th.

Yours very truly.
OTTO PRAEGER,
Second Assistant Postmaster General.

Parcel Post Limit Seven Pounds.

It will be noted that parcels weighing seven pounds but no more can be sent through the post office department all the way to France.

The twenty-pound parcels which are intended for Christmas gifts and which are to be delivered on Christmas day are sent by the war department from its port of embarkation at Hoboken, N. J. These parcels, which must not exceed twenty pounds in weight, can be sent to the address given in Hoboken in any way that the sender chooses.

Of course the post office department has been handling the smaller Christmas packages all the way through to France, but in order to insure their delivery on Christmas morning it was necessary to mail them by November 15. However, the fact that the mailing was too late for delivery on Christmas day does not mean that packages cannot still be sent by parcel post. They can be sent any day in the year at the rate of 12 cents for each pound sent, and this rate holds from whatever point in the United States the package is sent.

How Packages Must Be Addressed.

Packages for the soldiers must be addressed to the individual, with his company and his regiment and then must be added the words "American Expeditionary Forces." It is not necessary to add the name of the country.

It will be noted that in the instructions given above and prepared in the second assistant postmaster general's office nothing is said specifically concerning the kind of things which may be sent to the soldiers and civilians connected with the expeditionary forces. It is perfectly proper to send sugar, provided it is properly wrapped. The reason sugar is spoken of here is because there seems to have been some misunderstanding about it.

Matches must not be sent in any circumstances. Neither must anything inflammable, except, of course, ordinary packing material, be included, nor must there be any chemical or fresh fruit in the packages. Candy can go if properly protected from mashing up and ruining other things in the mail. Jars of fruit properly sealed and protected against breakage can be sent. Nothing of an explosive nature must be put into the parcels.

It is necessary that the parcel post packages weighing up to seven pounds shall be wrapped so that the post office authorities may examine their contents. The rules for the packages which the war department sends are given explicitly in the above official communication. It is desired to accentuate the fact that parcels up to seven pounds in weight can be sent by ordinary parcel post at any time of the year, but that Christmas boxes which are to go by the way of the war department at the address given above will not be forwarded if they are received at Hoboken later than December 5.

BRIDGE BLOWN UP BY THE RUSSIAN ENGINEERS TO CHECK THE ADVANCE OF INVADING GERMANS

Copyright, Underwood & Underwood

This remarkable photograph is one of the very few made during the war showing a bridge actually being blown up. The span can be seen buckling under the strain of the explosion, and water spouts all about, showing the effect of the mines planted in the river, can also be seen. The blowing up of this bridge was one of the episodes in the Russian retreat. Russian engineers mined the river and destroyed the bridge as part of the usual military tactics for delaying a pursuing enemy. They also blew up a neighboring village that had been used as a munition depot, to prevent its falling into the hands of the Teutons.

WINS WAR WORK GOAL

Campaign to Raise $35,000,000 Is Success

Early Reports Indicate That Quota Is Probably Exceeded By Country.

New York, Nov. 21.—George W. Perkins, chairman of the finance committee of the war work council announces that the war fund of $35,000,000 with which the Young Men's Christian association will provide care and comfort for the soldiers and sailors of America and her allies, has been raised.

While final figures will not be available for a day or two, Mr. Perkins stated reports from various parts of the country left no doubt the full amount and probably more, had been contributed. The campaign was begun a week ago.

Everywhere a Success.

"Reports received from every state in the country," said a statement issued by A. H. Whitford, campaign director, "indicate that the campaign is a great success. Many states have announced their intention of raising an amount larger than their allotment.

"It is clearly understood that the principal limitation in the work in the association among the enlisted men has been largely a lack of funds. The larger the fund the more efficient and the more extended will be the work as represented by the Red Triangle."

Minnesota Passes Quota.

Minneapolis, Nov. 20.—Passing the $1,000,000 goal, Minnesota reached the $1,047,500 mark at noon yesterday, in the National army and navy Y. M. C. A. campaign, E. W. Peck announced last night.

At least $1,200,000 will be collected in Minnesota, Mr. Peck believes.

UNIFIED CONTROL ESSENTIAL

President Cables to Col. House in Europe.

London, Nov. 20.—Col. Edward M. House, head of the American mission, has received a cablegram from President Wilson stating emphatically the United States government considers that unity of plan and control between all the Allies and the United States is essential in order to achieve a just and permanent peace.

President Wilson emphasizes the fact that this unity must be accomplished if the great resources of the United States are to be used to the best advantage, and he requests Col. House to confer with the heads of the Allied governments with a view to achieving the closest possible co-operation.

President Wilson has asked Colonel House to attend the first meeting of the supreme war council, with General Tasker H. Bliss as military adviser.

Gets Five Years For Making Threat.

Detroit, Nov. 20.—Jacob Yellin, a Detroit youth, was convicted by a federal court jury here of sending a threateneing letter demanding ransom to Edsel Ford, son of the automobile manufacturer. Yellin was sentenced to five years in Leavenworth prison and also was fined $1,000.

Girls Destroy Kaiser's Picture.

Boston, Nov. 20.—Portraits of the German kaiser and Prince Bismarck hanging in the dining hall of the German class at Wellesley college have been destroyed by girl students. This action followed an agitation by a former student.

Deed of Daring by Flyer.

Washington, Nov. 20.—The dispatches tell of the bestowal of the highly prized Italian gold medal on officers for deeds of heroism. Lieut. Castruccio, the dispatches say, was on board an airhip disabled by the enemy's guns and about to fall in enemy territory. Castruccio climbed over the gas bag and, creeping along in the direction of the prow, with his weight caused the airship to regain its balance. In great personal danger he remained there over an hour, allowing the airship to land within his lines.

LLOYD GEORGE IS TRIUMPHANT

Crushes Opponents in Ringing Speech of Defense in the House of Commons.

U-BOATS PERIL BEATEN

Premier Asserts Cause No Longer Exists to Fear Submarines of Enemy—Asquith Leads Opposition.

London, Nov. 21.—Defending himself against the first serious attack his administration has faced, Premier Lloyd George spoke in the House of Commons and his defense seemed highly successful. The prime minister's admirers call it a triumph.

The attack was focused upon two points—the character of the war council which the premier announced in Paris and the condemnation of the Allies' past strategy, which he pronounced in his Paris speech.

Lloyd George sent a thrill of jubilation through parliament when in the midst of an eloquent defense of the inter-Ally war council he suddenly switched to the submarine question and announced triumphantly,

"Five U-boats were destroyed last Saturday alone. There is no longer any ground for fear of the submarine peril."

Tumultuous cheering swallowed the second sentence. The House of Commons resounded for several minutes with an ovation such as has not been heard there since the fall of Bagdad.

Asquith Leads Opposition.

Former Premier Asquith was spokesman for the opposition. His speech was not an attack, but a sharp criticism of the new plan for Allied control of the war and a vindication of his own government, for which he remarked that he himself and the present premier had each had his particular share of responsibility.

It was keyed in a much milder strain than the first hostile outburst from the newspapers and sections of the Liberal and Conservative parties which greeted the premier on his return home.

TWO WOUNDED SAMMIES DIE

Others Cited By French Commander for Bravery.

With the American Army in France, Nov. 19—Two of the Americans who were wounded in the recent shell bursts have died at the field hospital.

A few infantrymen and engineers were wounded by shells and shrapnel. The first American artilleryman was wounded by a fragment of a German shell, which glanced off the gun the Sammy was serving. He was slightly injured about the head.

Three American officers, four noncommissioned officers and eight privates who participated in the recent trench fight were yesterday cited for bravery by the French commander.

Villa Moves on Juarez.

El Paso, Texas, Nov. 20.—Soldiers of the United States border patrol have reported sighting numerous bands of armed Mexicans moving toward Juarez, both from the east and the west. These are believed to be Villa followers moving up for a general attack on the town.

55 Deaths in Camp in Week.

Washington, Nov. 19.—Fifty-five deaths occurred in national guard and national army camps during the week ended Nov. 9, it is officially announced. A mild form of measles is epidemic at Camps Sevier, Greenville, S. C.; Pike, Little Rock, Ark.; Wheeler, Macon, Ga.; Bowie, Fort Worth, Tex., and Shelby, Hattiesburg, Miss. Pneumonia was responsible for 30 of the deaths. Northern soldiers developed much less sickness than men from other sections. Meningitis was reported from several camps.

BRITISH CAPTURE JAFFA

Ottomans Continue Their Flight Before English.

Italians Hold Austro-German Armies in Check Along Piave River.

London, Nov. 20.—Jaffa, the important city on the Mediterranean coast, has been taken possession of by the British army in Palestine, the Turks who apparently are continuing their withdrawal northward, offering no opposition. The text of the official statement making this announcement reads:

"Jaffa was occupied by Australian and New Zealand mounted troops without opposition. The enemy appears to be continuing to the north."

All along the Piave river the Italians are holding the German and Austro-Hungarian armies in check. Nowhere have the invaders been able to cross the stream, and at several places where they previously had gained access to the western bank they have been brilliantly counter attacked and forced to withdraw to the river's edge.

SHOW THEMSELVES WORTHY

Secretary Baker Pays Tribute to Sammies.

Washington, Nov. 20.—Hardening of the Italian defense and the precision with which British and French re-enforcements are being delivered in the Italian war theater lead Secretary Baker in his weekly war review last night to contemplate the future in that field with confidence.

Further Allied offensives on the western front, after the lull of the past week, Mr. Baker says, are indicated by increased artillery fire and the nervousness exhibited by the Germans. The only reference to the sector of this front, where American troops occupy the first line trenches, is that the men have shown themselves worthy of the best traditions of the American army.

FIVE CONGRESSMEN FIRED ON

Have Narrow Escape While Visiting Belgian War Zone.

British Front in Belgium, Nov. 19.—(By the Associated Press.)—Five members of the party of American congressmen and private citizens while visiting in the Belgian war zone had a narrow escape from death or injury whin they were caught in a sudden burst of German machine gunfire while inspecting the front line trenches near Dixmude.

The Americans in danger were Congressmen C. C. Dill of Spokane, Wash.; Congressman Charles B. Timberlake of Colorado; Congressman John F. Miller of Seattle, Wash.; Congressman Albert Johnson of Washington, and former Representative Stout of Montana.

RODIN, SCULPTOR, DIES

Paris, Nov. 19.—Auguste Rodin, France's great sculptor, is dead. The 77-year-old sculptor had been ill for only a brief time of congestion of the lungs. Auguste Rodin was born in 1840, in Paris. But it was not until he had struggled 40 years that he achieved anylike recognition from the art world.

Scouts Sell $100,000,000 Bonds.

New York, Nov. 20.—The success of the Boy Scouts' efforts in the second Liberty Loan was even more than anticipated. Boy Scouts of America brought in 500,857 subscriptions, amounting to $95,493,800, so far as definitely reported from cities and towns all over the country. It is estimated that complete reports will show the total amount secured to be over $100,000,000 and that the boys sold about one out of every eighteen bonds subscribed for throughout the country in the campaign recently closed.

ALL MEN LIABLE TO CALL FOR WAR

New Draft Registrations Allow Draft for Work as Well as Fight.

APPROVED BY WILSON

Full Strength of Country to Be Called and Only Extreme Disability Will Debar Men From Service.

Washington, Nov. 20.—Making practically every one of the more than 9,000,000 men registered subject to war duty, if not at the front then behind the lines, drastic new regulations for the draft have been approved by the president and made public by Provost Marshal General Crowder.

Affecting more than 9,000,00 homes, the regulations mobilize the war strength of the country to a point where only a word is necessary to take a man from his desk or plow or work bench and put him in a trench or armored motor car or munitions factory or shipbuilding plant.

Here are some of the radical new provisions which give teeth to the revised rules.

Secretary of War Baker is given authority to revoke any exemption or disregard at any time the deferred classification and order of call of any registered man, if that man's special trade or qualification make him necessary for special service. Thus, if the army finds itself facing a sudden need for 25,000 chauffers, Secretary Baker is authorized to direct local boards to get the number of chauffers, no matter where they stand in order of call.

Voluntary enlistment in the regular army of men between 21 and 31 years of age will be completely stopped on December 15.

Discharged Men Recalled.

Men previously discharged for slight deformities, such as flat feet, will be recalled. They will not be sent to the front but will be put on government work either at army depots or where they are most needed.

Men employed in the building and fitting of ships for the navy and Emergency Fleet corporation are not subject to call as long as they remain in those employments.

Registered men for the first time are permitted, if they so desire, to enlist in the navy or marine corps. Permission to do so will be granted, however, only in case the number of the man is so far down on the order list that he is not subject to call in the second draft.

New Physical Examination.

An entirely new system of physical examination is ordered whereby a man is examined not only by the physicians of the local board, but by an expert board of seven specialists before being finally accepted or discharged from military duty.

The provost general marshal's office has been given the assistance of the entire postal machinery of the country in tracing down men who have moved from their original jurisdictions, leaving no addresses behind.

General Crowder said that it could not be made too plain that the regulations affect every one of the registered men not at present in the uniform of the United States.

The rules will become effective in part on November 20. They are to go into effect as a whole on a date to be set by the provost marshal general, which probably will be December 10.

INVITED TO VISIT ENGLAND

Samuel Gompers Gets Invitation to Great Britain.

Buffalo, Nov. 20.—President Gompers has been informally invited to visit England at the close of the present convention. The invitation was brought by John L. Hill and Arthur Hayday, fraternal delegates from the British Trade Union congress. Mr. Gompers has not indicated whether he will accept.

President Gompers addressed a meeting of the National Letter Carriers and Postal Clerks' association. It is said the organization contemplates a request for a 25 per cent increase in pay.

LOOK FOR DEAL WITH JAPAN

Washington Says Price Is Only Stumbling Block.

Washington, Nov. 20—Confidence that negotiations looking to the exchange of American steel for Japanese tonnage will be concluded successfully was expressed by officials here despite Japan's apparent refusal to sell her ships at the price offered. The question of price, it was said, is the only point that remains to be cleared up.

Switzerland Fears Belgium's Fate.

Washington, Nov. 20.—Alarmed that the circulation of rumors saying one set of the European belligerents has asked Switzerland's permission to move troops through her territory, may be seized by the other belligerents as a pretext to forcibly do the same thing, Switzerland has hastened to denounce the rumors as false. Some of the Swiss press regards the rumors as having been circulated by Germany with the design of seizing upon them as a pretext for moving troops into Italy over Swiss lines.

NORTHWEST IS PROVED LOYAL

Patriotism Made Manifest at Great Rally Held in the Twin Cities.

TALKS STIR AUDIENCES

Financier Born in Germany Pleads for Crushing of Prussianism—Vrooman Says Profiteering Must Be Curbed—Irish Leader Speaks.

Minneapolis, Nov. 19.—The Northwest's great loyalty gathering, called to wipe out the last traces of the stains of La Follettism, was transferred to Minneapolis Saturday.

On Friday delegates from every county in the state met in St. Paul, paraded the streets and listened to patriotic speeches. Saturday the general public in Minneapolis joined in the feast of loyalty.

There was a big mass meeting at the Auditorium in the afternoon, with Carl S. Vrooman, assistant secretary of agriculture, and Otto Kahn, New York banker of German parentage, as the chief speaker. In the evening there was another mass meeting open to the public.

Prominent Speakers.

These were the speakers: T. P. (Tay Pay) O'Connor, for 40 years a member of the British house of commons and leader in the fight for Irish rights; United States Senators Knute Nelson and Frank B. Kellogg, Governor Harding of Iowa and Mrs. Nellie McClung, Canadian writer.

Otto Kahn, one of the country's most patriotic financiers, said that Germany of today was not the Germany Germans in America know. He said that the policy of frightfulness had permeated the whole Prussian ruling caste.

Conscience Superior to Blood.

"It is hard for us to speak against the country from which we sprung," he said. "But it must be done. Conscience must be superior to blood. Honor must be superior to race.

"The spirit of Prussianism and the spirit of Americanism cannot live in the same world. One or the other must go. Do we love liberty? Then meet and crush Prussianism."

Mr. Kahn said that American business men were giving of their all patriotically in this war. He denied vehemently that it was a "rich man's war and a poor man's fight."

To Be No Abnormal Profits.

Carl Vrooman, assistant secretary of agriculture, told his hearers that the President and every one associated with him were doing their utmost to see that there were no abnormal profits in this war.

"In the past war has generally been a hell of carnage at the front and a carnival of profiteering at the rear," he said. "It has meant a sacrifice of career, family, ties, income, health and life itself by farmers, artisans and other fighting men. But not infrequently to the unscrupulous merchants, manufacturers and financiers it has meant increased opportunity for graft and extortion from country and from fellow countrymen.

"But there is a new patriotism abroad in the land. This is a war in which the civilized patriotism and sacrifice is rapidly being as universal among non-combatants as is devotion and heroism among our soldiers at the front."

The parade in St. Paul was the real feature of the loyalty gathering. Every county was represented in the line of march. Some of the counties sent delegations numbering 250 persons.

Counties Send Bands.

When a great parade moved to the capital through the streets of St. Paul Friday afternoon there was evidence from every portion of the state where disloyalty has shown its head that "copperheadism" was no longer to be tolerated.

Glencoe, McLeod county, where Townley, Teigen and Bentall made their recent speeches, sent a band and 100 citizens. They carried banners attesting to the loyalty of McLeod county.

New Ulm and Brown county were represented with a large delegation of patriotic citizens and a band.

Wilson's Message Read.

At the afternoon meeting at the Auditorium, a special message from President Wilson was read by Frank W. Murphy of Wheaton, who presided.

Senators Knute Nelson and Kellogg spoke. At the morning session, Car Vrooman, assistant secretary of agriculture, told the audience that the President and his advisors were doing everything in their power to cut down war profits.

Helping to Break Hindenburg Line.

O'Neil, Neb., Nov. 19.—Gustav Hindenburg, first cousin of the German general of that name, is the owner of $25,000 worth of Liberty bonds. He is 74 years old. "A few weeks ago I saw two Belgian children in Wyoming with their arms severed just below the elbows," said Hindenburg. "I asked them who did it. They said 'the Germans did it so that we could not take up arms against Germany.' I can't bear arms against Germany, but I can buy bonds like sixty."

CHAPTER XVII.—Continued.

—12—

"They're all right," broke in Liverpool, "except for some sore heads. We downed the owner and the second mate easy, but Leayord and the engineer made some trouble, and had to be soaked. We got 'em all quiet enough now, where they can't make any trouble."

"Where are they confined?"

He winked at me in a half-drunken leer.

"Which is none o' yer business—hey, Mr. McCann?"

The impudent manner of the fellow served to fully awaken me to a realization of the helpless position I occupied. I held back the first hot retort on my lips, and forced a smile.

"I get the idea," I said, pretending a good nature I was far from feeling. "I am to merely work under orders. Well, I'd rather do that than let you wreck the ship, and perhaps drown the whole company. What is your object in this affair? You surely don't hope to dispose of this vessel and cargo?"

"No, I don't," and McCann took a step forward, his hand resting on the desk. "To be frank with you, Hollis, this affair has gone further than I intended; it got the start of me while you held me prisoner aft here in the cabin. There's nothing for me to do now but work out of the fix as best I can."

"Mutiny, then, was not part of your original plan?"

"Not open mutiny—no. I'm no fool, and I know what that means. I started in to make the crew dissatisfied, so they would force you to put back to an American port. I offered them money, but with no intention of resorting to force. Then you locked me up, and this other thing happened. We've gone too far now to back out. We don't mean to get caught. So it's up to you to decide whether the Indian Chief remains afloat, and no lives lost; or whether the old hooker is never heard of again."

"You'd scuttle the ship?"

"That's for you to decide; it's my advice to you not to take the chance."

I could scarcely believe he meant this; the proposition was so absolutely heartless, so cold-blooded. I could hardly associate it even with Fergus McCann. Surely he was not in reality the utter villain he now coolly professed himself. My eyes left his face, and sought Liverpool, who was leering at me in drunken gravity.

"Is this true, Red? Have you fellows held council?"

"Some ov us have," he said sullenly. "Jim Dugan, Simms and me, we talked it all over with Mr. McCann here, an' agreed what wus best. That's why the two ov us come ter see you."

"Unless I consent to sign a report showing your desertion of the ship justified, you propose to sink the Indian Chief?"

"You an' Bascom—both ov yer."

"And if we do sign—what then?"

"You'll sail us within fifty miles ov the nearest open port, and we'll take to the boats, and leave you to be picked up."

"You'd report our condition ashore?"

"Nothin' was said about that. Yer drift would be southard, an' would soon bring yer in the track o' ships; besides there's enough left ter handle the sails ter give the hooker steerage way. We figured we'd be safe unless there was a big storm."

It was certainly a cold-blooded proposition, but the fellow's tone was so matter-of-fact I no longer doubted this to be their final decision. I played my last card.

"See here, Red," and I drew a paper from the drawer of the desk. "Do you fellows realize the value of this ship, and the cargo below hatches?"

"We don't give a darn."

"Well, you better, for it's a tidy little sum. Now, see here—I'll pledge the crew fifty thousand dollars, to be divided as you choose, if you will dock the Indian Chief at Hamburg."

"Who'll pay it?"

"The owner, within ten days of landing."

"An' if we get snapped up by an English or French cruiser on the way over, all we'd ever get would be a jail. That sorter plan don't make no hit with me nor my mates. We've talked it all over."

McCann struck the desk with his fist, impatient at the discussion.

"Your price is too low, Hollis. This is no piker's game. Red knows it is worth more than fifty thousand to me to get back to New York. So now, will you help us quietly, or shall we have to make you?"

"What is it you desire of me?"

"That you work out an observation once a day, and set the ship's course as we direct; then tell us when a certain point has been reached."

"What point?"

"Fifty miles northeast of St. Johns."

"And then what happens?"

"We will take to the boats, and leave you and your officers to do what you please with the ship."

"Are all the crew with you in this mutinous deal?"

The eyes of the two men met, and Liverpool blurted out:

"They'll all do what we say; there's none ov 'em yer kin count on fer ter fight on your side; but maybe there's a couple we won't hav' no use for when we take to the boats."

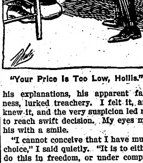
"Who are they?"

"Thar's no need o' my tellin' yer that."

"Well, even with those two this will only give us six able-bodied men; that is not enough with which to bring the Indian Chief into port."

"It will be all you'll have, anyhow," said McCann grimly. "And you are mighty lucky at that. The drift will be southward, and will take you directly into the steamer lane. All you need do is keep steerage way, and wait until you are picked up. You don't imagine we want you sailing into the harbor at St. Johns the same time we get there, do you? Come on now; stop this talk, and give us an answer."

For a long moment I stood motionless, staring out through the open port at the sunlit waters. It seemed to me my best course was to at least pretend to yield to their wishes. To acquiesce would insure me a measure of freedom on board, an opportunity to learn the exact conditions, and might enable me to save the ship from destruction. As to McCann, he had some object in all this far more important than appeared on the surface. He was never assuming this risk, or investing all this money in an illegal cause, without a more serious purpose than an idle desire to return to New York. He was taking a tremendous chance, driven by some impulse I could not comprehend. What was the secret—hate, revenge, greed, love? I would find out sometime; but now I could only grope in the dark, guessing at his motives. Yet I knew this—his promises were lies. He would make use of me; he would induce me to pilot the ship to the spot he desired to attain on the broad bosom of the ocean, and then—what? The man would never be fool enough to permit the Indian Chief to sail into any harbor to accuse him of such a crime. Back of all his words, his explanations, his apparent fairness, lurked treachery. I felt it, and knew it, and the very suspicion led me to reach swift decision. My eyes met his with a smile.



"Your Price Is Too Low, Hollis."

"I cannot conceive that I have much choice," I said quietly. "It is to either do this in freedom, or under compulsion. Naturally I prefer the former."

"You mean you accept our offer?"

"Yes; I will figure out the proper course, and report to you when the vessel is at the place you designate. That is all that is asked of me. In return I have your pledge that the ship will be left in good condition, with all who are loyal safe on board?"

"Yes."

"There is one more condition, McCann."

"What?"

"That Miss Carrington be left absolutely unmolested by either you or your men, until the time comes for you to take to the boats."

"Hah! So that is really where the shoe pinches!"

"We will not quarrel about it—either say yes or no."

"What do you mean by unmolested? Am I prohibited from speaking to the lady?"

"That is to be left to her choice, not yours. She is to retain the key to her stateroom; to eat alone if she prefers, and to see such associates aboard as she desires."

Liverpool laughed drunkenly.

"That ain't the argyment," he said easily. "So far as I see, that don't change things none. She's locked herself in anyhow, an' won't answer nobody."

McCann growled something which I took to be assent, and I was myself so anxious to ascertain our exact position as to have no desire for further argument. I could be of no possible value locked a prisoner in that stateroom; no protection to her. Indeed, if I refused to navigate the vessel, leaving the ship to drift blindly through these unknown waters, exposed constantly to peril, I would be guilty of a failure to do my duty almost as great as the crime of these others. On deck, knowing where we were and the direction in which we were going, the opportunity might arise for the accomplishment of much. I grasped the necessary instruments from the swinging [illegible] in my hands, turned toward the door.

"Come on, then," I said, ignoring the fact that I was any longer a prisoner. "Bring the chart, one of you, and I'll point out where we are to you on deck."

"Just hold on a minute," and Liverpool, blocking the doorway, pushed me back with his huge hand. "We're the bosses, not you. Git it out o' your head right now, mister, that yer the captain of this ship Indian Chief. Blast yer! ye ain't nuthin'; an' if yer attempt to play us any dirty tricks, I'll smash yer the same as I would a fly. Ain't that right, Mr. McCann?"

"Oh, Hollis understands, Red. He knows we've gone too far in this game to take any chances. Let him pass."

"Well," growled the giant, stepping aside, "I just wanted him ter know. I don't kill nobody in cold blood; but I'm goin' ter take keer of myself an' my mates. Yer git me, skipper?"

"Yes, I get you," I answered a bit wearily. "So let it go at that, my man; I know the time to fight, and the time to keep quiet. Now let's go on deck."

CHAPTER XVIII.

A Compromise and an Interruption.

Except for the absence of the regular officers from their stations, I should not have known any especial change had taken place on board the ship. Outwardly everything appeared about as usual as I emerged behind Liverpool, with McCann trailing behind. The latter paused to insert the key into the lock of the door, and I indulged in one swift glance about the apartment.

"Bascom occupies his own stateroom?"

Liverpool nodded ungraciously enough.

"And Miss Carrington retains hers?"

"We are not here to be interviewed, Hollis," broke in McCann sharply. "Go along on deck, and keep your tongue to yourself."

Realizing that silence was my best weapon, I made no response, but climbed the stairs. The decks were clean—had evidently been scrubbed that morning, and nowhere could I perceive any signs that the ship was in the hands of mutineers. Liverpool gripped my shoulder.

"Up the ladder with you," he ordered. "There's too little time left for gaping about here."

There were two men at the wheel, although one could have attended to the service, as the ship was at half-speed, and the sea far from heavy. I recognized both faces, but couldn't recall their names; the shorter fellow, deeply pitted, exhibited a fresh scar where I had struck him with my boot-heel the night before. He grinned good-naturedly, and pointed to the bruised flesh, as I caught his eye. White was evidently the temporary officer in charge, and the brutality of his face was clearly revealed in the bright light as he leaned against the rail. However, I had scarcely time to more than glance about, as the sun was already at the zenith. The others stood around silent, watching as I figured out our position on the back of an old envelope. I took my time at it, not only from my own anxiety to be accurate, but also because of other thoughts in my mind, yet the calculation was completed at last, and I lifted my eyes to McCann's gaze.

"Well?" he said.

I gave him the figures.

"You are sure this is correct?"

"As sure as I can be; the chronometer hasn't been corrected since the ship left Baltimore; except for possible variations on that account, the figures are right. Spread out the chart, and I'll show you where we are within ten miles. When did you furl the sails?"

"After we started up the engines again; while we had all hands on deck."

"Well," I announced, after a moment of measuring, "that would tally pretty close with the figuring. Our present position is just about here, where I put the red cross."

McCann took the compasses from my hand, and began to measure distances.

"Two hundred and ten miles to the northern extremity of Newfoundland—is that it?"

"A trifle more, I should say."

"This is St. Johns here; what southing does that give?"

"Over two hundred."

He studied the map a few moments longer, the three men talking earnestly while I left them, and walked over to the starboard rail. It was of no particular interest to me where they decided to go—the one port meant the same to me as another. McCann got up, rolling the chart in his hand.

"There is no use, then," he called, "of our going farther north?"

I turned and faced him.

"Not if your port is St. Johns; the course would be sou'-sou'west. Is there anything more wanted of me at present?"

McCann turned and spoke to the others, both answering him in low tones.

"No," he said stiffly. "We will send for you if you are needed again on deck."

"I am expected to keep below?"

"Below, and to your stateroom. If you attempt to converse with any of the crew, you will be locked in."

I passed them without a word, and clambered down the ladder to the main deck, aware of the grinning faces of the men at the wheel. Humiliating as the situation was, this was no time for resistance, or the exhibiting of a spirit of revolt. White crossed over to the rail and watched me until I vanished within the companion. I realized his presence without so much as glancing up. There came to me, as I passed at the foot of the stairs, a sudden eagerness to speak to Vera, to explain to her the situation, and bring to her a word of comfort. I crossed over hastily and rapped at her stateroom door. I felt sure there was a movement within, but no response. With lips close to the wood, I spoke.

"Miss Vera."

"Who is it?"

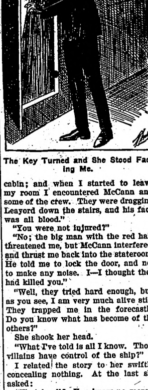
"Hollis; may I have a word?"

The key turned, and she stood facing me, her eyes filled with startled welcome.

"Why—I thought; they told me—oh! I am so glad!"

"They told you what?"

"Why, nothing direct. But there was fighting last night. I—I heard the struggle on deck, and then here in the cabin; and when I started to leave my room I encountered McCann and some of the crew. They were dragging Leayord down the stairs, and his face was all blood."



The Key Turned and She Stood Facing Me.

"You were not injured?"

"No; the big man with the red hair threatened me, but McCann interfered, and thrust me back into the stateroom. He told me to lock the door, and not to make any noise. I—I thought they had killed you."

"Well, they tried hard enough, but, as you see, I am very much alive still. They trapped me in the forecastle. Do you know what has become of the others?"

She shook her head.

"What I've told is all I know. Those villains have control of the ship?"

I related the story to her swiftly, concealing nothing. At the last she asked:

"That is all? You know no more?"

"No."

"Then the others must be alive, and on board. Surely you would have heard if any had been killed?"

"I believe so; they would not kill if possible to avoid it, as such a crime would render their own case more desperate."

"What—what are you going to do?"

"Frankly, Miss Vera, I do not know," I confessed. "I have had no time to think, and my head still throbs so from blows that I hardly realize the situation. I cannot hope to fight these men alone, and there can be no immediate danger—they are sailing the ship toward St. Johns."

"You believe they will take to the boats, and leave us aboard?"

"That would be their only safe course. They would never dare sail the Indian Chief into that, or any other harbor. They must land as shipwrecked seamen, tell their story, and then quickly disappear."

"I—I know that—but—but will they dare to leave us afloat, to be picked up by some vessel?"

I hesitated, but her eyes compelled an answer.

"I do not know," I said soberly. "It hardly seems possible they can contemplate such an act of villainy as the scuttling of the ship, and leaving us on board to drown like rats. That would be too horrid a crime for this age. White and Liverpool might be brutal enough, but surely not Fergus McCann."

"Why not Fergus McCann?"

"His education, his former life, the civilization in which he has been reared; he has lived among gentlemen."

"Gentlemen!" she echoed the word in scorn. "His associates have been principally gamblers and rounders. He is notorious in New York, and his money alone gives him entrance to decent circles. He doesn't know what the word gentleman means. If there is treachery behind this, it will be the plan of Fergus McCann."

"You know him better than I."

"I know of him longer; I have heard more tales, yet surely you saw what he was in the boat?"

"You believe, then, the intention is to scuttle the vessel?"

"Yes, I do."

"And leave us helpless on board?"

"Yes, Mr. Hollis."

I drew a deep breath, at this direct verification of my own secret suspicion.

"So do I," I returned in a whisper, "although I had no thought of telling you."

"You have some plan, then? You have considered what to do?"

"No; hardly that. There will be two days, at least, before we shall be close enough to the coast for them to take to the boats. Much may happen within that time; we may be spoken by some other vessel, even overhauled by a warship, and manned by a prize crew."

"You hope for this?"

"St. Johns is a naval base; the closer we approach the harbor the more apt we are to encounter a British cruiser."

Her fingers grasped my sleeve.

"But, Mr. Hollis, if all these hopes fail, and there should be no rescue, is there not something we can do? Must we remain here helpless, just waiting for death to come?"

I took the little hands in mine tenderly, and, with an effort, controlled my voice.

"Perhaps so, but we cannot be too cautious. Our only chance is to retain our freedom, and arouse no suspicion that we are plotting together. Can you learn where the others are confined, and get the word to me?"

"Yes," she said. "I—I think I can."

"What is it you think you can do, Miss Carrington?" said a voice quietly.

McCann stood in the open passageway leading to the steward's pantry, less than fifteen feet distant, a satirical smile on his lips, as he observed our familiar position. How long he had been there, and what portion of our conversation he had overheard, I had no means of knowing, and for the instant I stood speechless, my brain a blank. Not so with Vera. With a laugh, ringing out as naturally as though in full appreciation of some sudden gleam of humor, she withdrew her hands from mine, turned and faced him, executing a mocking curtsey.

"Hardly fair, Mr. McCann," she said, "to steal upon us like that."

"Perhaps not," he answered grimly, "but just now I am privileged to do as I please on board this ship. Answer my question—what is it you think you can do?"

"Perhaps an answer will be embarrassing."

"Stop the play-acting," he burst forth, advancing about the stair rail. "What were you talking about? I want a direct answer?"

The girl's long lashes shaded her eyes, but there was not the slightest falter to her voice.

"Captain Hollis," she said softly, almost regretfully, "had asked me if—if I thought I could learn to—to like him, and I said I—I thought I could. That—that was all."

McCann stared at the innocent, downcast face as though he half believed the words her lips uttered were deliberate lies; then he laughed mirthlessly.

"I see," he said with sarcasm. "No misfortune along other lines is sufficient to interrupt Mr. Hollis' love-making. My congratulations, captain, on even this measure of success."

The hot blood flushed my face, not so much at the words as the tone with which they were uttered. They conveyed to me a deliberate insult, tingling with a memory of the purpose he charged me with during our last interview. He had not quite understood me before, but now he felt convinced that under all the veneer I was his kind; and he instantly felt that he knew just how to deal with my case.

"Your congratulations are appreciated for what they are worth," I answered, unable to wholly restrain myself. "But we will let the discussion end here."

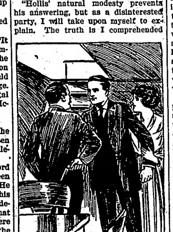
"Oh, will we? Well, perhaps you will recall that circumstances have changed since our last talk. You are no longer captain of this ship—I am; and I will say what I please on board. The first thing I propose doing is to tell Miss Carrington who and what you are."

Her eyes flashed over my face, then sought his.

"Do I understand," she asked clearly, "that I have been before a topic of conversation between you? What was the occasion?"

McCann laughed, not in the least embarrassed, and evidently convinced that his position was sufficiently strong to give him a clear advantage.

"Hollis' natural modesty prevents his answering, but as a disinterested party, I will take upon myself to explain. The truth is I comprehended from the first the real object of this fellow in seeking your friendship. I even compelled him to acknowledge that your father's money was the main attraction."



"You Dog of a Liar!"

I stepped forward, unable longer to restrain the action.

"You dog of a liar!" I said fiercely. "I know you are armed, but—"

"Wait, Captain Hollis," and her fingers caught my arm. "This matter involves me, and I wish to hear the facts. Go on, please."

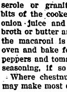
McCann grinned into my face, but kept one hand behind him, gripping his revolver.

(TO BE CONTINUED.)

The KITCHEN CABINET

A mind without convictions is like a road that begins everywhere and leads nowhere.

ECONOMICAL DISHES.



A ball or two of well-seasoned hamburger steak is sufficient to season a dish of macaroni or rice, making a most substantial dish. Break up a cupful of macaroni in inch pieces and cover with boiling water well salted, to cook until tender. Put a layer of the cooked macaroni in a casserole or granite baking dish, add bits of the cooked hamburger, a little onion juice and celery salt, a little broth or butter and water, repeat until the macaroni is used. Place in the oven and bake for a half hour. Green peppers and tomatoes may be used for seasoning, if so desired.

Where chestnuts are plentiful they may make most dainty, nutritious, and at the same time, attractive dishes. Chestnuts contain carbohydrates which need cooking to make them more easily digested. Score the shell and drop them into a hot frying pan to blanch, when blanched remove the shell and thin brown skin and the nut is ready for various uses. Cooked until tender, mashed and seasoned with fat which it lacks, salted and peppered, it may be served as a vegetable with steak.

Chestnut Cakes.—Shell and blanch some good chestnuts, then cook in boiling salted water until tender. Rub them through a sieve and to every half cupful add the yolk of an egg, salt, white pepper, celery salt, and onion juice and Worcestershire sauce, to season highly. Make into neat cakes, brush with beaten egg, roll in fine crumbs, and fry in smoking hot fat. Serve as meat.

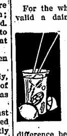
Mock Mashed Potatoes.—Cook a pound of chestnuts for a quarter of an hour, peel and skin them, and cook in a quart of milk until very soft. Add two tablespoonfuls of butter, one teaspoonful of sugar, and a teaspoonful of salt. Rub through a sieve and serve the same as mashed potatoes. This makes a nice vegetable to serve with chicken, and it has the additional advantage that it can be eaten by those to whom potatoes are denied.

Deviled Chestnuts.—Blanch the nuts, then put them with a little olive oil into a hot frying pan, and salt and cayenne pepper and serve either hot or cold.

Chestnuts cooked until tender, then mashed and seasoned with a well-seasoned stock in which the nuts were cooked, makes a most acceptable vegetable dish.

Have you noticed that the women who have system in their work almost invariably appear to have the least to do?

FOR THE INVALID'S TRAY.



For the whimsical palate of an invalid a dainty is more acceptable, whatever it may be, if served in some unusual form. For the busy housewife who has but one pair of hands to perform all duties, time is a most valuable asset, and she has little for frills. However a few minutes spent in garnishing and arranging a dish will make all the difference between receiving and eating it with anticipation, or refusing it altogether. So many fetching things may be done with ordinary things in the home, for example, a whole set of dishes may be made from a few lemons. Cut the lemon that has a good projection for a spout into a cream pitcher, cut a ring of rind for the handle, scoop out the pulp and voila! a pitcher, not for cream, but for various jellies.

Cut a lemon the other way across, put on two little handles and have a sugar bowl, the half of a lemon a little smaller with one handle will be a cup. Pigs, using toothpicks for legs, may be made, eyes of black pins, delighting the heart of a child. With dates and figs, turtles, with peanuts various figures, even a whole man may be made by using toothpicks and cork.

Fruit Cream.—Beat the white of an egg, two tablespoonfuls of sugar, and half a glass of grape jelly until it is stiff enough to stand. Serve in sherbet cups with a bit of whipped cream on top.

Rice Cream.—Blend a tablespoonful of rice flour with cold milk, add it to a pint of scalding milk, a pinch of salt and three tablespoonfuls of sugar, cook until well done. Pour out into a pretty dish and serve with cream and more sugar if desired. An egg dropped into a ramekin with a tablespoonful of cream, set in the oven in water and baked just long enough to set the egg, is delicious when seasoned with a dash of salt and paprika.

In all homes there are some choice bits of china, glass and silver, which will be used to advantage on the invalid's tray. Colored foods, like jellies and gelatin desserts look well in glass.

For the child a little thing to divert the mind while eating will often lead to his eating a good meal, without realizing that he is being forced to do it.

STRENGTH OF THE WARRING POWERS

Statistics Show Huge Preponderance in Favor of the Entente.

WORLD HAS A GREAT TASK

To Nullify the Plans of the Kaiser Is a Large Order—Strength in Wealth and Man Power of Nations at War Compared.

New York. — The comparative strength of the allies and the central powers is graphically shown by "The Balance Sheet of the Nations at War," which has just been compiled by the Bankers Trust company.

"The world has a great task still before it in order to nullify the plans of the Hohenzollerns," says the introduction. "The task must not be belittled, but it is at least interesting to see resources existing successfully to accomplish this task, provided that the nations of the world now opposed to Germany continue to co-operate intelligently and loyally until Germany and her allies have been absolutely defeated and their plans of world dominion rendered permanently ineffective."

Figures showing, for both sides, the combined area, income and interest charge, and cost of the war in treasure and men, are presented with the explanation that they have been gathered with great care from the "best available sources" and are believed to "reflect with substantial correctness the relative economic strength of the opposing groups of nations," although it is impossible to vouch for their absolute accuracy.

Controlled by Allies.

The allies, including the United States, are shown, by this tabulation, to control 19,526,000 square miles of the earth's surface, or 94.1 per cent of the total area held by the nations at war, as compared with 1,222,000 square miles, or only 5.9 per cent held by the Teutonic combination. The aggregate population of the allies, exclusive of the large Asiatic population tributary to the British empire, reaches the huge total of 473,250,000, or 76.3 per cent of the total of warring peoples, while that of the central powers is but 147,000,000, or 23.7 per cent.

Without counting Asiatics and Africans, the allies have available for military service 91,700,000 men, or 78.5 per cent of the total possible fighting men, while the Teutonic powers can command but 25,050,000, or 21.5 per cent. The number of men actually enrolled in the armies and navies of the allies is 21,400,000, or 66 per cent of the total, while the enrolled military strength of the Teutonic allies is 11,000,000, or 34 per cent, as shown by the following table:

The aggregate national income of the allies is placed at $82,100,000,000 and the interest charges each year at $3,891,000,000, which is 4.6 per cent of the income, while the combined income of the Teutonic alliance is estimated to be $16,600,000,000, and interest charges $1,970,000,000, which is 11.8 per cent of the income.

Regarding the cost of the war a table is presented showing that the allies have spent $72,200,000,000, or 64.1 per cent of the total cost of all warring nations, while Germany and her allies have spent $109,500,000,000, or 35.9 per cent.

In killed, wounded and missing the conflict has cost the allies 8,992,956 men, or 58.7 per cent of the total human losses, while it has cost the central powers 6,301,773, or 41.3 per cent of the total of 15,294,729 for last September.

In the introduction to the balance sheet it is pointed out that, while the exact figures are not available, it is a well-known fact that the surplus food producing sections of the world are practically controlled by the entente allies, either directly or through their control of the seas. The same is true, to a great extent, of territories producing metals and coal.

"Japan has not yet been an active factor in the European theater of the war," comments the pamphlet. "It has, however, effectually guarded the Pacific ocean. It has enrolled in its army about 1,500,000 men, out of an effective man power of 10,500,000. The entire army and navy, as well as the unenrolled man power, may be said to be still in reserve.

"While Russia has nominally about 5,000,000 men enrolled in its army and navy, it still has an enormous reserve, as the total number of men available for military purposes aggregates around 30,000,000.

Russian Situation Grave.

"The extreme gravity of the present situation in Russia is, therefore, apparent, especially when it is borne in mind that, if Germany can gain control of Russia or force a separate peace with Russia, even if Russia remained thereafter simply neutral, it would be possible for Germany to draw therefrom an enormous quantity of foodstuffs and the raw material for munitions of war. On the other hand, if Russia can be kept in line with the entente allies, it would seem that the Teutonic allies must be compelled to capitulate, at a reasonably early date, from sheer exhaustion.

"While considering the danger points we must not overlook the fact of the virulence of the Teutonic submarine campaign. It is impossible, however, to present figures in this connection which have statistical value.

"The fact should not be lost sight of that Germany now controls Belgium, northern France, Serbia, Roumania, Montenegro, and a large portion of Poland, having a combined population of about 32,300,000. It is true that men of all these nations are serving in the armies of the entente allies, and that Belgium is maintaining an independent army of moderate size. The control of these countries, especially Belgium and northern France, has given Germany a great advantage because of the supplies of coal and iron ore thus made available, and also because of the ability thus obtained to turn to use the factories of the manufacturing sections in making munitions of war.

"Just at the critical moment, when the scales were almost evenly balanced between the entente allies and the Teutonic allies, the United States, with its great wealth and resources, entered the conflict with a possible 22,000,000 men to draw upon, with its national wealth of $225,000,000,000, national income of $40,000,000,000, national savings estimated in the neighborhood of $5,000,000,000 a year, and has thrown its weight into the scale, prepared to put behind the entente group effective co-operation to secure the success of the principles of democracy."

The task is called a "tremendous one," but, according to the views of the Bankers Trust company, there can be no doubt as to the ultimate victory of the United States and her allies.

FIGHTING STRENGTH.

	Original Man Power 18 to 45.	Present Man Power.	Army-Navy. Present Estimated Strength.	Pct. Present Man Power.
Entente Allies and the United States:				
United Kingdom	12,000,000	13,800,000	6,000,000	49.71
Canada, Newfoundland, Australia, New Zealand, Union of South Africa	3,220,000		860,000

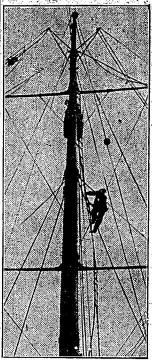
WATCHING FOR U-BOATS



The Germans have placed their hopes of victory in submarine warfare but owing to the measures taken by the allied governments the hope has not materialized. All merchant ships have been armored and every hour of day and night finds a man on watch for periscopes while standing high up in the crow's nest of the ship.

WINS BRIDE ON SOUP RECORD

Cook in Ohio Regiment Finds Way to Soften Heart of Alabama Girl.

Montgomery, Ala.—Robert Fisher of Company C of Lima, Second Ohio infantry, knows the way to a woman's heart. He met Miss Lillie Belle Sweatt of Greenville and won her hand upon proving to her that he was the best soup-maker in the Ohio guard. He proved his worth as a citizen by having the mayor of Lima and the chief of police of that city, as well, wire to the young lady that he was a regular fellow, and held down the position of second cook at the Manhattan hotel, Lima. He is at present second cook of Company C, and has promised his bride to save for her each day a portion of the soup made for the Lima soldiers at the camp.

SUSPECT EVASION OF U. S. COAL PRICES

Newcastle, Pa.—What are suspected to be methods of evading the coal price fixing regulations of the United States government are being practiced here, it is charged. Consumers, when offering their orders to some of the big mining companies, are told that the entire output has been sold to brokers. Inquiry at the brokers shows that the coal can be bought at a considerable advance over the set figures. Coal prices continue to advance here in spite of the government regulations.

CATS ARE UNPOPULAR HERE

Kankakee People Make Reprisals on Milk Dealers by Turning Felines Over to Them.

Kankakee, Ill. — Kankakeeans are getting rid of their cats, and incidentally making reprisals on members of the Milk Producers' association in this district because of the price of milk being raised two cents a quart.

The citizens declared that they could not afford to feed the cats on milk, so they took the felines to the farmers, who are members of the milk association, to feed.

One farmer had eight cats left at his door recently.

Ohio Girl Real War Bride.

Mineola, N. Y.—A real wartime wedding was solemnized at the camp of the rainbow division when Sergt. Walter Valentine of the 166th infantry formerly the Fourth Ohio, was married to Miss Mary Winter of Delaware, Ohio, at an outdoor altar by Chaplain Duffy of the 165th infantry. Sergeant Valentine and Miss Winter marched across the field, escorted by 800 soldiers of the Ohio regiment. The troops also escorted them to their automobile when they left camp on an 18-hour wedding trip.

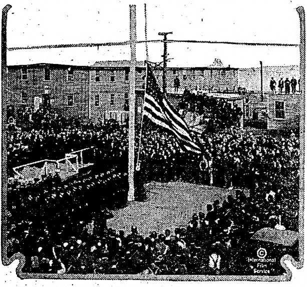
McGrath, one of two women letter carriers employed in Washington, delivering her first letter. 2—Wreck of a German concrete shelter after the British guns had found it. 3—New photograph of some of the Russian women of the Battalion of Death, which tried to defend the Winter palace against the attacks of the Maximalist rebels.

OUTPOST DOGS ARE USEFUL TO THE ALLIES

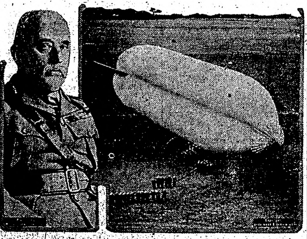
Far beyond the first line trenches of the allied forces these dogs with their keen sense of hearing stand guard. Long before the soldiers in the trenches hear the slightest sound the dogs detect the Germans crawling across the stretch of "No Man's Land" that lies between the trenches. When they hear a Boche making his way toward their masters they do not bark, for that would alarm the Germans. Instead they growl and the hair bristles up on their backs as a warning to the man at the "listening post" to be on his guard.

NEW DESTROYER PLANT IS OPENED



The Fore River shipyard having received large orders from the United States government for the construction of warships, merchant ships, and scores of torpedo boat destroyers, it has been found necessary to enlarge the plant and they have therefore taken the old government aviation field at Squantum and are turning it into a huge shipbuilding yard at the cost of $28,000,000. Photograph shows the Stars and Stripes being raised at the new yard. Naval men and thousands of employees took part in the ceremonies.

DEFENDING ENGLAND AGAINST RAIDERS



This massive dirigible balloon is but one of the great number of similar craft guarding the coasts of Great Britain from attacks by Zeppelins and German airplanes. At the left is Field Marshal Sir John French, at the head of the British home defense forces.

SAVED BY HIS PARACHUTE

British Official Photograph

Early in the battle of Menin road, in Flanders, a British observation balloon and its observer got into serious difficulties. The observer, to escape injury, chanced his life in the parachute. This British official photograph shows how the parachute carried him to safety in a tree-top. The observer let himself down from his precarious position by means of the parachute ropes, which enabled him to reach another truncated tree.

Met the Coal Dealer.

The Lady Reporter—How did you happen to lose the lightweight championship?

Kid McSwat—You see, it was this way, lady. I was cuttin' down all comers easy and then my manager matched me with a coal dealer.

Military Commands.

Nervous Subaltern (endeavoring to explain the mysteries of drill)—Forming fours. When the squad wishes to form fours, the even numbers take—

Sergeant Major (interrupting)—As you were! A squad of recruits never wishes to do nothing, sir!—Punch.

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

COW'S PRIDE.

"It's perfectly delightful," said Mrs. Cow. "Yes, it is really very fine."

Mrs. Cow was talking to Mrs. Black and White Cow. To be sure they were both cows, but Mrs. Cow was always known by just her simple name, and Mrs. Black and White Cow was always called Mrs. Black and White.

Mrs. Cow was brown with a few white patches. She told someone when she was a little calf that she had never had a whole brown dress because her mother hadn't been able to afford to give her one, and she had had to patch it up with white.

All the creatures of the barnyard liked this story, and they also admired Mrs. Cow for telling it. "It's so much better," Mrs. Duck had said, "than to boast as if you could have everything under the sun. And our clothes aren't so important as our dispositions."

So now that Mrs. Cow had something special to say, Mrs. Black and White stopped chewing for a moment and looked at Mrs. Cow.

"I would love to hear it," said Mrs. Black and White. "What is so delightful and fine? It won't excite me to hear it, I trust, for I hate to become excited."

"It certainly won't excite you," said Mrs. Cow. "That is I am pretty sure it won't, for it didn't excite me. It just made me very happy and pleased. I do not like to become excited any more than you do, my dear. I enjoy chewing and taking my time over everything. I never look excited, do I?"

"No," said Mrs. Black and White. "You always look as if you were calm. But then that is the way a cow should be. We should never hurry. We are not meant to for none of our family have ever hurried. We've always enjoyed taking our time and eating and munching. Now and again we look up at people as they pass by but we look at everything calm."

"That is so," said Mrs. Cow. "But sometimes I think we have grown a bit lazy."

"Oh, don't say so," said Mrs. Black and White. "Laziness is the very joy of my life. Never to move quickly, never to eat quickly, never to grow excited—those are the joys of cow life."

"That's so," said Mrs. Cow. "I really meant that I sometimes think people do not appreciate cows enough. They are so used to seeing us move so slowly that they think we aren't worth much. They rather like the creatures who hurry and bustle even if they never get anywhere."

"It's strange that they can admire hurrying," said Mrs. Black and White, chewing slowly all the time.

"They should realize that we do all the work that is expected of us and we do it well," continued Mrs. Cow.

"Now Let Me Look Up About Cows in My Book."

"Isn't that enough?" asked Mrs. Black and White.

"It should be," said Mrs. Cow. "And I think that if ever they would stop hurrying and have a nice long time thinking about cows they would come to the conclusion that we were very useful and that we were a great addition to the world.

"And I do think now they are beginning to appreciate us a little more. That is what I have to tell you. They are beginning to think farming is a fine thing and that cows and chickens, ducks and geese, should be studied.

"What makes me extremely happy is that I saw a friend of the farmer the other day. The farmer was talking about his fine animals and he said, pointing to me:

"'There's a fine cow over there.' And what do you suppose the friend did?"

"I can't imagine," said Mrs. Black and White. 'Cows haven't a great deal of imagination you know!

"He said: 'Now let me look up about cows in my book.' I saw his book. It was on farming and on the outside of the book was my picture—yes, a picture of a brown cow with white spots. Just think, a cow on a book and all about the cow family in the book—for he said so."

"It's splendid," said Mrs. Black and White. "We are appreciated after all. And I'm honored to know you, Mrs. Cow, for you've gone on a book."

"I haven't gone on it myself," said Mrs. Cow. "It's my picture. But that is enough of an honor." And Mrs. Black and White agreed.

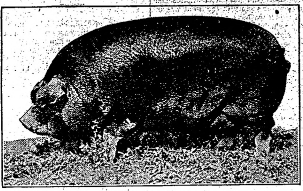
Young Diplomat.

"Say, mamma," said little four-year-old [illegible] "let's play I'm an awful looking old tramp. I'll come 'round to the back door and ask for a piece of pie and you get scared and give it to me."

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

WELL-BRED HOGS GIVE BETTER RESULTS THAN ANY OTHER BRANCH OF LIVE STOCK



SPLENDID SPECIMEN OF BROOD SOW.

No branch of live-stock farming gives better results than the raising of well-bred swine when conducted with a reasonable amount of intelligence. The hog is one of the most important animals to raise on the farm, either for meat or for profit, and no farm is complete unless some hogs are kept to aid in the modern method of farming. The farmers of the South and West, awakening to the merits of the hog, are rapidly increasing their output of pork and their bank accounts. The hog requires less labor, less equipment, less capital, and makes greater gains per hundred pounds of concentrates than any other farm animal, and reproduces himself faster and in greater numbers; and returns the money invested more quickly than any other farm animal except poultry.

In the trucking and mixed-farming sections of the United States hogs are used to consume various unmarketable substances. The value of milk is known on every farm, although it may not be fully appreciated, and any one who has fed pigs knows the keen appetite they have for milk and its products. In the neighborhood of many large dairies pork production has become a very prominent and lucrative supplement to the dairy industry. The hog is also a large factor in cheapening the production of beef. Hogs are placed in the cattle feed lots to utilize the corn and other feeds which the cattle have failed to digest and which otherwise would be wasted. Hogs following steers in many cases have increased the profit per steer by from $6 to $9. Farmers and hotel and restaurant owners are using kitchen refuse to produce salable pork. In fact, as a consumer of by-products the hog has no rival.

However, this propensity in many instances is being taken unfair advantage of through ignorance and lack of care. Milk products, animal offal, etc., which contain disease germs, especially those of tuberculosis, are given to hogs. This practice not only results in spreading disease but causes loss in the hogs themselves through condemnation at slaughter.

Hog-Growing Sections.

The first place in hog raising in the United States is easily with the corn-growing sections, where corn is the first grain thought of when the fattening of hogs is considered. It is, however, fallacious to argue that hog raising will not give profitable returns outside of the corn belt. The corn belt has great advantages for economical pork production, but it also has its disadvantages. The cheapness and abundance of corn in this section have often led farmers to use it as the exclusive grain feed. Breeding stock so fed does not thrive well and is not so prolific as when given a varied ration, and when used for fattening, an exclusive corn diet is not generally profitable. The work of the agricultural colleges and experiment stations during recent years has done much to show breeders and feeders the undesirability of this practice, and the increasing price of corn has forced farmers to economize in its use as much as possible.

The few states comprising the corn belt are the source of supply for a great amount of swine products, especially hams and bacon, that are consumed in other portions of the country. Yet the advantages of these corn-belt states are little, if at all, superior to those of many others outside of that district. The South has an abundance of vegetation. Cowpeas, soy beans, velvet beans and peanuts are leguminous crops peculiar to that section which have great value in pig raising.

The East is peculiarly adapted to hog raising in view of the fact that markets for fresh pork and cured products may be found in local communities as well as in the larger cities and the various coast resorts. As regards feeds, corn is being grown successfully in the East, and in some sections the average yield per acre is greater than that of the middle West. Clover, blue grass, and many other forage crops especially adapted for swine production grow rapidly in nearly every section of the East. In the trucking sections there is wasted annually a vast quantity of unmarketable products that might be used with profit in feeding hogs. The dairy districts offer an advantage to the hog raiser by furnishing such by-products as skim milk and buttermilk, which are especially relished and profitably utilized by growing pigs.

In the extreme West the alfalfa of the irrigated valleys and the clover of the coast districts offer a splendid foundation for successful pork production. In most of these regions there is an abundance of small grain, particularly barley, that may often be fed economically, while in some localities corn is a successful crop.

Location of Farm for Hogs.

The selection of a region is not of paramount importance in hog raising in the United States, for swine are successfully and profitably grown in practically all localities and on almost any type of soil; still, if the breeder is free to choose a location the following points should be considered:

An ideal location is on a well-drained farm possessing a rich soil that will produce grasses and other forage as well as the grains needed for fattening hogs. This does not mean, however, that only those farmers holding rich, level lands should raise hogs, for as a matter of fact hogs are most easily handled on farms that are somewhat rolling.

It is an advantage to locate in a hog-raising community. There are many small problems in management which cannot be touched upon in a general discussion of hog raising, but they may be learned through actual experience in one's own community. In such cases the older breeders have for a long time been in contact with local conditions, and a new man may profit by their experiences without spending several years acquiring one of his own.

SILAGE WILL DECAY AT TOP

Much of Loss May Be Prevented by Beginning to Feed as Soon as Silo is Filled.

More or less silage will decay at the top unless the silo is sealed over or unless feeding is begun soon after filling. To prevent much of this loss, some farmers seal the silo with three or four loads of green corn from which the ears have been removed, some use other sorts of heavy green crops, while others use sawdust satisfactorily. In every case it is advisable to soak this covering thoroughly with water and tramp it regularly for several days after it has been placed in the silo.

Humane Man Comfortable.

The humane man is comfortable when his stock is comfortable, and when they are ill at ease he is in the same condition.

The weeds destroyed and the manure produced by sheep on a farm ordinarily pay for the labor devoted to the flock.

Seed Wheat Treatment.

Treatment of seed wheat for prevention of smut is one of the common duties of agricultural agents this fall. Almost every weekly report received from these agents, by Edward C. Johnson, dean of the division of extension of the Kansas State Agricultural college, shows that at least one demonstration of this work has been given by the agent.

The man who sits down every day to rest and think and plan, will come out ahead of the one who thinks he never has time for such things.

Cheap seed corn may prove very dear; the seed corn that produces the best crop is the cheapest, no matter how high the cost may seem.

Save all the garden produce this year. You cannot afford to allow any to go to waste. Somebody can use what you can't.

Machinery, well oiled, thoroughly in condition, makes work easy and worry scarce.

WHAT'S IN A NAME

By VINCENT G. PERRY.

The village of Wattsville was hardly large enough to support one newspaper, and here it was with two. Fred Burnett, proprietor, managing editor, pressman and compositor of the Wattsville Advance, walked up and down the little room in front of his plant which he called the office, and bit at a match furiously. Wattsville had been without a paper for a long time, and the idea of starting up a weekly again was originally his. He was sure of that. He had come from the city and looked over the plant of the Echo, a paper that had not been published for ten years, and had decided it wasn't in good enough shape to put in working order. Not to be beaten in his effort to make himself a recluse from his friends, he bought out the plant of the Wainbright Advance and moved it to Wattsville to the little building it now occupied. In the meantime the Echo office had been sold by a real estate broker in the city, and the purchaser, who had bought the plant was a woman, the niece of the Widow Spur, of the village.

The idea of the thing was preposterous, he thought. Nobody could make the Echo plant work, let alone a woman.

"Poor thing—if she does know anything about newspaper work she will get a shock when she sees the Echo plant," he muttered.

He was right. Margaret Spur did get a severe shock when she saw the Echo plant. The real estate broker had told her it was in splendid working order, and her aunt had verified his statement. She was foolish to take the word of either, she thought.

If Margaret had belonged to another profession she would have wept, but her newspaper training had fortified her for just such disappointments as this one. Perhaps the plant wasn't as bad as it appeared, she thought, as she started to get things in better shape. As she worked over the type cases her mind went back to the city and the life she had left.

It was to find an occupation to take her mind off the biggest disappointment of her life that made her give up her position on the Times in the city and invest her savings in the country newspaper that proved to be so unpromising. The winter before she had been introduced to Tommy McKay at the Ironworkers' convention. He was representing the Tribune and she was reporting the convention for the Times. Tommy had a pleasant and attractive way, and as they sat side by side, chatting gaily, she couldn't help thinking that perhaps all the girls that wrote to her "Advice to the Fair Sex" column were not as silly as she had thought. The next day she missed her car and was late. Tommy lent her his notes, so that she would not miss the important points of the mayor's speech. After that kindness she couldn't very well have refused his invitation to the theater that evening. After the theater they went to a cabaret. He was the brightest boy she had ever known, and his sense of humor appealed to her.

The next summer they had their vacation at the same time. They met again at a seaside resort. The moonlight nights helped a lot, and before they had been there a fortnight they had decided that they couldn't very well get along without one another. Their happiness was brought to an abrupt ending when Tommy was sent for to take a position he had applied for in the North.

Margaret couldn't help running this all over in her mind as she worked.

The editor of the Advance stopped in front of the Echo office. It wouldn't be out of place to call on this Miss Spur. He could find out what she thought of the Echo plant.

Margaret heard the step in the doorway and turned around. As her eyes met the visitor's, she uttered a little scream and her handful of type fell to the floor.

"Tommy!" she gasped. "Tommy McKay!"

"Norma, what are you doing here?" he cried in surprise.

"Why, I'm the owner of this plant, Margaret Spur."

"You, Margaret Spur? Isn't Norma Cousins your right name? Why didn't you answer my letters?"

"Your letters, Tommy? I never received them." Norma was excited. "Tell me did you address them to Norma Cousins?"

"Yes; I thought that was your real name."

"It is only my pen name, the name under which I wrote for the Times. To think I never told you my right name! But didn't you get my letters, Tommy?"

"No, not a letter." Then it dawned upon him. "Did you know my right name isn't Tommy McKay; that that is only a pen name, too? My right name is Fred Burnett."

So that there would be no more mix-ups in names, the first issue of the Echo-Advance had printed at the top of the editorial column in bold type, "Fred Burnett, managing-editor; Mrs. Fred Burnett, news editor."

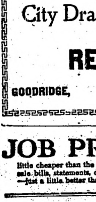
GOODRIDGE, MINNESOTA.

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.



Let Us Be Your Waiter
We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

U.S. SENDS OUT DRAFT CALL TO 9,000,000 MEN

All Registrants Required to Fill Out Questionnaire Classifying Order of Call.

INVENTORY OF MAN POWER

Five Divisions to Be Formed Depending on Occupation and Claims for Exemption Allowed—Local Boards Will Help Registered Men.

Washington, Nov. 16.—Uncle Sam has begun the most gigantic inventory of man power ever attempted.

Preparations for the second draft were started when copies of the questionnaire for every one of the nine million men registered for military service were sent to the local exemption boards.

This questionnaire must be filled out by every registered man between the ages of twenty-one and thirty-one. It will place in the hands of the government the life history of every registered man and will give a complete census of the men of military age in 87 trades, industries and professions. The questionnaire will classify all registered men for service.

Classification of registered men in the order of their liability for military service will be the first accomplishment of the questionnaire. Men will be classified in five divisions, the first division to be called the first and the fifth division last.

The classes and the order in which they will be called are as follows:

CLASS 1.

Single men without dependent relatives.

Married man, with or without children, or father of motherless children, who has habitually failed to support his family.

Married man dependent on wife for support.

Married man, with or without children, or father of motherless children; man not usefully engaged, family supported by income independent of his labor.

Unskilled farm laborer.

Unskilled industrial laborer.

Registrant by or in respect of whom no deferred classification is claimed or made.

Registrant who fails to submit questionnaire and in respect of whom no deferred classification is claimed or made.

All registrants not included in any other division in this schedule.

CLASS 2.

Married man with children or father of motherless children where such wife or children or such motherless children are not mainly dependent upon his labor for support for the reason that there are other reasonably certain sources of adequate support (excluding earnings or possible earnings from the labor of the wife) available, and that the removal of the registrant will not deprive such dependent of support.

Married man, without children, whose wife, although the registrant is engaged in a useful occupation, is not mainly dependent upon his labor for support, for the reason that the wife is skilled in some special class of work which she is physically able to perform and in which she is employed, or in which there is an immediate opening for her under conditions that will enable her to support herself decently and without suffering or hardship.

Necessary skilled farm laborer in necessary agricultural enterprise.

Necessary skilled industrial laborer in necessary industrial enterprise.

CLASS 3.

Man with dependent children (not his own), but toward whom he stands in relation of parent.

Man with dependent aged or infirm parents.

Man with dependent helpless brothers or sisters.

County or municipal officer.

Highly trained fireman or policeman, at least three years in service of municipality.

Necessary customhouse clerk.

Necessary employee of United States in transmission of the mails.

Necessary artificer or workman in United States armory or arsenal.

Necessary employee in service of United States.

Necessary assistant, associate or hired manager of necessary agricultural enterprise.

Necessary highly specialized technical or mechanical expert of necessary industrial enterprise.

Necessary assistant or associate manager of necessary industrial enterprise.

CLASS 4.

Man whose wife or children are mainly dependent on his labor for support.

Mariner actually employed in sea service of citizen or merchant in the United States.

Necessary sole managing, controlling or directing head of necessary agricultural enterprise.

Necessary sole managing, controlling or directing head of necessary industrial enterprise.

CLASS 5.

Officers—legislative, executive or judicial—of the United States or of state, territory or District of Columbia.

Regular or duly ordained minister of religion.

Student who on May 18, 1917, was preparing for ministry in recognized school.

Persons in military or naval service of United States.

Alien enemy.

Resident alien (not an enemy) who claims exemption.

Person totally and permanently physically or mentally unfit for military service.

Person morally unfit to be a soldier of the United States.

Licensed pilot actually employed in the pursuit of his vocation.

Member of well organized religious sect or organization, organized and existing on May 18, 1917, whose then existing creed or principles forbid its members to participate in war in any form, and whose religious convictions are against war or participation therein.

Boards to Aid Registrants.

To aid the registrants in filling out these questionnaires and determining their classification legal advisory boards have been provided for each local exemption district. Disinterested lawyers have been taken into service to aid in the general administration of the law.

All exemptions made prior to this time or revoked. Every man not in the military service must fill out a questionnaire, and the merits of his case will be decided upon again.

Any person failing to fill out a questionnaire is automatically placed in Class 1 and liable for immediate duty.

Following the classification comes a series of general questions. There then follow eleven other series of questions which fit particular cases ranging from the man who claims physical disability to questions asked of men seeking exemption because they are divinity students.

The general questions establish a most intimate knowledge of the personal characteristics of the registrant. He must state every occupation at which he has worked during the past ten years, giving not only the name of the occupation, but the number of hours worked each week and a statement of his education.

In these questions the registrant is given the privilege of stating his preference of service, and may state whether he is willing to attend a night school fitting him for service prior to being called into camp.

There then follows a list of 87 trades and professions, and the registrant is given space to indicate which he has worked in and for how long a period.

Occupational List.

The occupational list follows:

Accountant; artist, dramatic or otherwise; auto and gas engine man (a) factory, (b) garage, (c) ignition system, (d) marine engines; auto and motor truck driver, baker, band instrument, barber, blacksmith (a) helper (b) forger; boatman, boilermaker, bookkeeper, butcher, canvas worker, carpenter (a) brigde, (b) cabinetmaker, (c) house, (d) ship; chemical industry worker, clerical worker, concrete worker, contractor, cook, dentist, detective, draftsman (a) architectural (b) mechanical, (c) topographical; druggist; electrician (a) instruments repair, (b) motors and dynamos, (c) outside work, (d) wiring; engineer, graduate, (a) automotive, (b) chemical, (c) civil, (d) electrical, (e) mechanical, (f) mining, (g) sanitary; factory worker, farmer, furrier, fire-fighter, forest ranger, foundry man (a) core maker and molder, (b) furnace man; grocer, guard, gunsmith, harness-maker, horseman, horseshoer, laborer, lawyer, lineman, (a) telegraph, (b) telephone; locksmith, longshoreman, lumberman, machinist (a) drill press, (b) general mechanic, (c) grinding machine, (d) lathe, (e) miller and planer, (f) toolmaker; mason, merchant, millwright, miner (a) digging and loading, (b) drill, (c) explosives, (d) timbering, (e) track laying; moving picture expert, nurse, painter (a) house, (b) sign, (c) scene; pattern-maker, physician, plasterer, plumbing trades, policeman, printer, quarryman, railroad man (a) construction, (b) operation, (c) maintenance, (d) repair; railway motorman, rigger (a) bridge, (b) building, (c) ship; salesman, sawmill man, seafaring man, sheet metal worker (a) copper, (b) iron, (c) tin; shipbuilder, shoemaker, stableman, steam engineer (a) motive, (b) stationary; stenographer, stock-keeper, structural iron and steel worker, student, surveyor, tailor, teacher, teamster, telegrapher, telephone operator, telephone repairman, tile man, typewriter, veterinary, watchman, welder, acetylene, etc.; wheelwright, wireless operator.

Many Questions Asked.

Persons claiming exemption on the ground of being aliens are asked to give the date of their birth, their birthplace, the time of their entrance to this country, the name of the vessel upon which they entered and their companions. They are also asked, "Are you willing to return to your native country and enter its military service?"

Claimants for exemption on grounds of dependency must answer a series of thirty-one questions, supported by affidavits of the dependents. These questions are most intimate, seeking a declaration of the exact amount of money contributed to the support of the dependent each month. Each registrant must also declare the amount of his income for the past twelve months and the amount of his property, real and personal. If a registrant owns a house he must state whether he rents it and if so how much rent he receives. Encumbrances upon property must be declared, as well as the amount of taxes paid in the past year. "Has your wife ever been employed?" is one question asked. "Is your wife trained or skilled in any calling?" "Do you or your wife live with her parents?"

The State News of the Week in Brief

An Epitome of All the Big and Interesting Events of the Past Few Days in the State.

Rev. Mr. Foote of St. Paul has accepted the pastorate of the First Baptist church at Breckenridge and assumed charge.

One hundred Christmas boxes for the American soldiers in France were packed by the Moorhead Red Cross chapter and sent to the Minneapolis headquarters for shipment.

Eighteen Minnesota merchants paid fines totaling more than $750 last month for violations of the state pure food laws, Commissioner James Sorensen of the dairy and food department announces.

With road conditions growing worse daily, the prospects for relief of the International Falls wood famine grows more unfavorable. No hard coal can be secured by dealers, so the fuel situation is very serious.

Inheritance taxes of $793 were paid the state on the estate of Emerson Hadley, a St. Paul attorney, who died Nov. 11, 1916. Mr. Hadley left property valued at $89,565 to his widow, daughter and grandchildren.

Postmaster Henry J. Schaefer of Albany sent in his resignation last June and not until recently was it accepted by the postmaster general. Owing to the vacancy there will be an examination for the position at St. Cloud.

Several bad cases of black diphtheria have developed in the Kuppela family, living about four miles east of Plummer. Mary, eight-year-old daughter, and John, a 14-year-old son, passed away. The school in that district has been closed.

Fergus Falls Elks donated $150 to the Y. M. C. A. fund and $50 to the Knights of Columbus fund for the boys at the front. They also set aside $50 for the poor fuel bills in the city, besides making arrangements for their Christmas charities.

The little parks of the Great Northern at Barnesville will not receive their usual winter covering to protect the tender plants and shrubs this winter, as the officials of the Fergus Falls division refused the expense necessary for their protection.

Ten-cent milk for St. Paul and Minneapolis will not mean milk of poorer quality, James Sorensen, state dairy and food commissioner, said in commenting on the 10-cent milk price fixing order of the State Public Safety commission, which is effective now.

Red Cross organizations are now established and at work in the following Polk county centers: Angus, Beltrami, Chester township, Climax, Crookston, Erskine, Euclid, Fertile, Fisher, Fosston, Lengby, Mallory, McIntosh, Mentor, Neilsville, Trail, Tabor, Key West.

Andrew M. Halseth, Bemidji, who died in the transport service Nov. 5 from concussion of the brain, fell from a hammock, it is believed. He left Bemidji with the Bemidji division of Minnesota naval militia in April. His sister, Anna Halseth, is chief operator for the Northwestern Telephone company at Bemidji.

From now on all manufacturers, miners, dealers and foremen handling explosives in Minnesota will be obliged to take out licenses, and to keep itemized records of all such explosives that come into their possession, a telegram from Washington to Labor Commissioner W. F. Houk stated. The state labor department is charged with the enforcement of the law.

Sarah Olson, mother of Baby Ruth Olson, who is fighting George Weston, living near Faribault, for the return of her baby, is willing to take her chances on a jury of 12 men. Through her attorney, James B. Hickey, the mother asked Judge Childress of Rice county to have a jury trial. When the case goes to trial Nov. 23 a mother's right to her child born out of wedlock will be considered by the jury.

A new dividend of 15 per cent will be paid creditors of the defunct Osseo State bank about Dec. 15. The announcement was made by F. E. Pearson, state superintendent of banks and receiver of the Osseo institution, following the payment of $10,000 by the surety company on the bond of James B. Thompson, former cashier of the bank, who was sentenced to state prison for misappropriation of bank funds.

The entertainment committee of the Crookston Red Cross chapter has planned a series of afternoon or evening chain parties, each member of the committee to entertain four of their friends at a party, each one of the four bringing 25 cents for the Red Cross. The four guests are then to promise that they will each entertain four of their friends, who will contribute a quarter. Each of these guests will be requested to do the same thing, thus making a continuous chain. It has been figured up that this series for six weeks would raise $5,260.

Three persons, Mr. and Mrs. Paul Alar and a boarder, Peter Trepich, were killed at Virginia by an ax murderer. Their bodies were found in their home there with a note of warning to all other Austrian families who bought Liberty bonds or subscribed to the Red Cross. The bodies had been slashed with a knife in addition to being beaten with an ax.

Mrs. Peter Gaare, aged 45, was found lying dead on the kitchen floor at her home at Georgetown. Coroner C. G. Vincent is making an investigation. The body was fully clothed when found.

GOVERNOR BURNQUIST ISSUES THANKSGIVING DAY PROCLAMATION

St. Paul, Nov. 16.—His annual Thanksgiving proclamation has been issued by Governor J. A. Burnquist. The text follows:

"In the midst of preparations for the gigantic tasks before the American people, we are approaching Thanksgiving day this year with a special feeling of gratitude for the loyalty and patriotism manifested by the citizens of our state and nation. Today, as never before, are American hearts united with a desire to be of service to those who are so patriotically going forth to serve their country on the fields of battle. At such a time as this we realize the need of that inspiration, courage and endurance necessary for victory in the great war into which we have entered to advance the principles of justice.

"Notwithstanding the diversion of some forms of industry from peaceful pursuits to the national defense, progress is being made in all lines of human endeavor. Labor is everywhere employed. Farms have produced immense crops. Business is active. The state and nation are prosperous.

"Now, therefore, I, J. A. A. Burnquist, governor of the state of Minnesota, do hereby proclaim the last Thursday of this month, Nov. 29th, to be observed by all the people of our state, as a day of prayer for fortitude sufficient to secure a righteous peace and of thanksgiving to Almighty God for the many blessings vouchsafed to us as citizens of a free and prosperous republic."

President Woodrow Wilson's thanksgiving proclamation was issued last week.

In the last casualty list sent out from Ottawa, Ont., is the name of E. Anderson, Gonvick, Minn., listed among the wounded and missing.

T. F. Carter of St. Paul, a surveying engineer of the Great Northern railroad, has arrived at Mora with a crew and commenced running lines and staking out the yards and grounds for the long looked for new depot.

C. A. Exstrand, manager of the Spring Lake Shipping association, says that he has great difficulty in obtaining cars in which to make cattle shipments and consequently cannot list cattle for shipment until the cars are spotted.

Stillwater has contributed $1,800.69 to aid the Protective league in war aid. There have been 856 farmers of Washington county who contributed a quarter of an acre to an acre of products to the fund and market days are being held in the county.

Through the efforts of Lewis Hart the Perham band has secured a band instructor in O. B. Karr, formerly of Rolla, N. D. With the material of the present band Mr. Karr states that he will be able to build up a band that will be a credit to Perham.

In their attempt to stamp out the liquor traffic in East Grand Forks, several sacks of whisky consigned to parties in East Grand Forks, were ordered returned by Chief of Police Alber Hurst, acting on orders from the newly re-elected mayor, C. J. Kelleher.

Anthony C. Luskemeyer, 50 years old, president of the Melrose Granite company of St. Cloud, died after an illness of four months. With his brother John he organized the Melrose Granite company, which in the past 20 years has grown to be the largest monument plant in the world.

Charles Wirt is home at International Falls after a trip to Gemmell and vicinity, where he went in search of his fatherr. The latter is 72 years of age, who left home some time ago saying that he was going to take a job cooking in a small camp, but did not state where it was and has not been heard from.

Reports indicating the liveliest interest are coming to Crookston from the county chairmen of the Northwestern Minnesota counties in connection with the campaign for the National War Work council funds. Meetings were held as scheduled in the various counties with a fine attendance at each and committees organized to secure the money apportioned each county.

The Northwestern Telephone company officials, appearing before the state railroad and warehouse commission at the hearing held in Wadena, announced that the local telephone exchange was operated at an annual loss of $4,000 and that the new rates proposed by them would reduce that loss only $1,400 per year, still leaving an annual deficit of $2,600.

Eighteen per cent of the outstanding notes against the Dan Patch road, secured by collateral, will be paid off by the court order releasing $135,000 of the $270,000 in cash and negotiable notes being held by the receiver, C. E. Warner, according to J. O. P. Wheelwright, attorney for the Continental and Commercial Trust and Savings bank. The order was issued by Judge Wilbur F. Booth of Minneapolis in his chambers.

Charles E. Colby, veteran Clay county newspaperman, will assume the management of the Hawley Herald. Mr. Colby recently disposed of the Headlight, published at Barnesville, to Archie Whaley, who has changed the name to the Clay County Leader.

John Wolfe, Jr., Fairmont milkman, asked exemption from jury duty on the plea that he had seventy-five customers and no one else knew the route. "What do you charge for milk?" the judge asked. "Eight cents," Wolfe said. "Excused," the court said.

BANK DEPOSITS NOW ARE $245,160,951

GAIN OF $34,000,000 IN PAST YEAR SHOWS THAT MINNESOTA HAS PROSPERED.

UNDESIRABLE GERMAN TEXTS

Commissioner Ames Reports Thirty-One Objectionable Instruction Books Are Used in Schools of State.

St. Paul.

Deposits of $245,160,950 in Minnesota banks show increases of $34,000,000 over those of a year ago and $19,000,000 since July 19. State banks now have a reserve of more than $43,000,000, or $25,000,000 in excess of legal requirements.

The number of Minnesota banks is 1,103, compared with 1,030 a year ago, and 1,081 on July 19. The figures are based on statements under a call of Oct. 18, compiled in the office of F. E. Pearson, state superintendent of banks, with comparisons under the calls of Nov. 17, 1916, and July 25, 1917. The latest totals show $280,252,392 in resources, $245,160,951 in deposits and $225,20[illegible],315 of loans. The reserve is $43,329,147, against a legal requirement of $18,052,303. Increases between July 19 and Oct. 18, were $19,384,000 in resources, $19,153,000 in deposits, $7,409,000 in loans and $10,932,000 in reserves, while the bills payable and the rediscount items decreased $748,000. Comparisons with Nov. 17, 1916, totals disclose increases of $36,395,944 in total assets and 34,319,428 in deposits.

The new figures, Superintendent Pearson said, reflect the satisfactory condition of state banks and the prosperity of Minnesota.

* * *

Undesirable Textbooks.

Thirty-one textbooks used in the study of the German language in the schools throughout the state were declared "undesirable" and "objectionable" in the report of Commissioner C. W. Ames to the Public Safety commission.

"Im Vaterland" and "Vorwarts" by Paul V. Bacon are characterized as notorious and "are so evidently prepared as a part of the German propaganda that I think that every German book written or edited by Paul V. Bacon might properly be banned from the schools on general principles."

The report divides the books into four classes. The first list comprises forty-seven books which are said to have "a distinct German atmosphere."

Seventeen of these books are regarded as objectionable, while in the other three lists only five or six in each are regarded as objectionable.

The committee was ordered to prepare a list of objectionable books and a "white list" of unobjectionable books, and to present them in the form of a resolution forbidding the use of the first list in the schools and offering the second list to select from.

* * *

Little Danger From Freezing.

With Minnesota's potato crop pretty well under cover, no great loss from freezing is predicted by Hugh J. Hughes, chairman of the state marketing committee of the Public Safety Commission.

Shortage of refrigerator cars is the Northwest's greatest menace, Mr. Hughes said.

"Our committee has conferred with the Great Northern, Northern Pacific and Soo line representatives concerning the protection of Minnesota's potato crop," Mr. Hughes said.

"It was agreed that potatoes now in shallow pits or other unprotected places should be cared for at once, and both the Northern Pacific and Soo lines agreed to furnish refrigerator cars to move such potatoes into storage or to the market. The Great Northern has no cars to supply."

* * *

U. S. Wants Workers.

The United States government is preparing to draw heavily on the resources of Minnesota for skilled labor in the ordnance department and the new shipbuilding program.

Labor Commissioner W. F. Houk of Minnesota received a call for assistance from both the ordnance and Federal labor departments.

Captain L. E. Van Dusen of the ordnance department calls for the names of machinists, drop forgers, pipe fitters, blacksmiths, electricians, toolmakers and turret lathe operators, with information as to their nationality, age and equipment.

The applicants will have to meet civil service requirements.

Commissioner Houk will put the matter before labor organizations, as most of this information is in their hands.

* * *

Discuss New Draft Plans.

Whether all single men are to be drafted before any married men are taken and other questions relating to the new draft regulations were the subject of a private conference held the other day between Governor Burnquist, Representative Van Dyke, Adjutant General Rhinow and his aide, Major W. A. Curtis, Edward Indrehus, of the Third district draft board of St. Paul and Postmaster Raths. Governor Burnquist, said the discussion developed nothing to be given to the public.

Nerves All Unstrung?

Nervousness and nerve pains often come from weak kidneys. Many a person who worries over trifles and is troubled with neuralgia, rheumatic pains and backache would find relief through a good kidney remedy. If you have nervous attacks, with headaches, backaches, dizzy spells and sharp, shooting pains, try Doan's Kidney Pills. They have brought quick benefit in thousands of such cases.

A Minnesota Case

"Every Picture Tells a Story"

Mrs. Henry Zumach, Hutchinson, Minn., says: "My back ached day and night and at times I got so dizzy I thought I was going to faint. At night I had to place a pillow under my back for the slight relief it gave. I got so weak I couldn't lift anything and the medicine didn't help me. Finally, I used Doan's Kidney Pills and they rid me of all the trouble. I don't have any cause for complaint now."

Get Doan's at Any Store, 60c a Box

DOAN'S KIDNEY PILLS

Want More Dogs of War.

Shepherd dogs, mountain dogs, watch dogs, rat catching terriers and bulldogs are requested by the war dog service of the French ministry of war, owing to the growing use of dogs for military purposes.

OLD SORES, ULCERS AND ECZEMA VANISH

Good, Old, Reliable Peterson's Ointment Stops Itching Instantly.

"Had 51 ulcers on my legs. Doctors wanted to cut off leg. Peterson's Ointment cured me."—Wm. J. Nichols, 40 Wilder St., Rochester, N. Y.

Get a large box for 30 cents at any druggist, says Peterson, and money back if it doesn't help you at once. Always keep Peterson's Ointment in the house. Fine for burns, scalds, bruises, and the surest remedy for skin diseases, pimples, itching eczema and piles the world has ever known.

"Peterson's Ointment is the best for bleeding and itching piles I have ever found."—Major Charles E. Whitney, Vineyard Haven, Mass.

"Peterson's Ointment has given great satisfaction for Salt Rheum."—Mrs. J. L. Weiss, Cuylerville, N. Y.

All druggists sell it, recommend it. Adv.

Recognized His Sermon.

Two of England's most famous actresses are "daughters of the manse," and Matheson Lang is the brother of the archbishop of York, Rt. Rev. Cosmo Lang. Barnsby Williams, who represents the characters of Dickens to the life, was educated for the church and was only a youth when he became attached as a preacher to a mission at Bow. So successful was he, writes a correspondent, that many of his sermons were sold at a penny a copy. He tells a good story of one of them.

"'Mene, Mene, Tekel, Upharsin' ('Thou art weighed in the balance and found wanting') was my text," he says, "and as I delivered the sermon with all the dramatic fervor at my command I created a sensation. Some years later I went to a certain church. The preacher was a well-known church dignitary. When he read out his text I pricked up my ears. Still higher did I prick them, till they nearly fell off my head, when, as the preacher read his sermon, I recognized my own juvenile effort."

Not a Bad Comparison.

"Why do they liken the world to an oyster?"

"Possibly because we all get something to eat out of it, but very few of us find pearls."

Had to Quit.

"Saw a woman in a real quandary this time."

"Where did it happen?"

"On a car. She couldn't hang to a strap and knit."

You not only have a right to your opinion, but you also have a right to keep it to yourself.

At Any Drug Store

W. N. U., Minneapolis, No. 47–1917.

Squaring Things.

A certain old farmer would never do any work of any kind on a Sunday, relates London Answers.

But one Saturday night rain fell in torrents, and when Sunday morning dawned the river was in flood and threatening to wash everything away unless some very hard work with pick and shovel was undertaken at once. The old man was in a quandary, but he saw bankruptcy looming very near.

Suddenly a bright idea struck him. "Away with you, lads," he cried to his hands. "Dig for your lives—and I'll put the clock back to Saturday night."

No More Light Cooking.

A socket for electric lamps has been put on the market which makes it impossible to steal electric light bulbs or to use the socket for any purpose which the owner does not intend. The new sockets will be a blow to those who live in furnished rooms and secrete an electric toaster or an electric iron in the bottom of their trunks to use when the landlady is asleep. The safety socket is so made that you can screw in any lamp or attachment plug, but once in, it cannot be removed. The socket only works one way.

Easy to Rid Home of Rats and Mice

There is no need of suffering from the depredations of rats and mice now that Stearns' Paste is readily obtainable at nearly every store. A small box of this effective exterminator costs only 35 cents and is usually sufficient to completely rid the house, store or barn of rats and mice. The U. S. Government has bought thousands of pounds of Stearns' Paste for use in cities where rats and mice are plentiful. The Paste is also efficient in destroying cockroaches and waterbugs. Adv.

United States Will Profit.

Secretary of Commerce Redfield says Germany's foreign trade will largely come to the United States.

Enthusiasm is to man what steam is to a locomotive.

To err is human—to lie about it is more so.

OUR BOYS IN FRANCE AND HOME PROTECTION

The men on the firing line represent the pick of our American youth. One in four of our boys at home was sick, rejected because of physical deficiency. Many times the kidneys were to blame.

If we wish to prevent old age coming on too soon, or if we want to increase our chances for a long life, Dr. Pierce of the Surgical Institute, Buffalo, N. Y., says that you should drink plenty of water daily between meals. Then procure at your nearest drug store Anuric (double strength). This An-u-ric drives the uric acid out and cures backache and rheumatism.

If we wish to keep our kidneys in the best condition a diet of milk and vegetables, with only little meat once a day, is the most suitable. Drink plenty of pure water, take Anuric three times a day for a month.

Step into the drug store and ask for a 60c package of Anuric, or send Dr. Pierce 10c for trial pkg. Anuric, many times more potent than lithia, often eliminates uric acid as hot water melts sugar. A short trial will convince you.

SUFFERED SEVERE PAINS

Mankato, Minn.—"About four years ago I became all rundown and weak through hard work. I could not eat, was bilious all the time, suffered severe pains in the back, in fact was distressed all over. I had several good doctors but did not get any relief. I went on suffering this way for about two years when my sister advised me to try Dr. Pierce's Favorite Prescription, which I did, and three bottles completely cured me. I have never been bothered since. There is nothing better for women who are rundown or suffering with weakness of any sort."—MRS. GERTRUDE E. EVANS, 325 Belgrade Ave.—Adv.

160 ACRE FARMS IN WESTERN CANADA FREE

Canada's Liberal Offer of Wheat Land to Settlers

is open to you—to every farmer or farmer's son who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is much higher but her fertile farm land just as cheap, and in the provinces of Manitoba, Saskatchewan and Alberta

160 Acre Homesteads Are Actually Free to Settlers and Other Land Sold at from $15 to $20 per Acre

The great demand for Canadian Wheat will keep up the price. Where a farmer can get near $2 for wheat and raise 20 to 45 bushels to the acre he is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming in Western Canada is fully as profitable an industry as grain raising.

The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent. There is an unusual demand for farm labor to replace the many young men who have volunteered for the war. Write for literature and particulars as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

RECIPES HELP TO CONSERVE WHEAT

PRACTICAL DIRECTIONS RENDER BREAD MAKING FROM BARLEY FLOUR SIMPLE.

LABORATORY MAKES TESTS

Division of Minnesota College of Agriculture Works to Save Supplies for Use of Soldiers Abroad and America's Allies.

St. Paul.—A conservation laboratory for the people of Minesota has been established by the home economics division of the Minesota College of Agriculture. In the laboratories of this division are being tested out recips to permit the saving of wheat, meats, fats and sugar, for the use of the soldiers at the frant and for Amirica's allies. The latest contributions from the laboratory is a list recipes for the use of barley flour, all of which have been tested and not found wanting. The list incldues recipes for bread, biscuit, cake, and doughnuts, which are as follows:

Barley Yeast Bread.

3 cups liquid (milk and water)
1⅓ tablespoons sugar
1½ tablespoons fat
1 tablespoon salt
1 cup yeast, compressed or dried, softened in some of the liquid
3½ cups barley flour
7 cups wheat flour.

Directions for making barley yeast bread using compressed yeast. Soften the yeast in some of the fluid. Combine the ingredients as for wheat bread. Mix into a dough. Knead and let rise to double its original bulk. Knead again and put into pans. When again double in bulk bake about 45 minutes.

Directions for making Barley Yeast bread using dried yeast. Make a sponge over night with 1 cake of dried yeast, the liquid, and part of the flour. In the morning mix into a dough with the remainder of the flour and knead. Let rise to rouble its original bulk. Knead again and put into pans. When again double in bulk bake about 45 minutes.

Baking Powder Biscuit

3 cups barley or 1½ cups white flour and 1½ cups barley flour
1 cup liquid
4½ teaspoons fat
6 teaspoons baking powder
1 teaspoon salt

Cake.

1½ cups sugar
⅓ cup fat
3 eggs
1 cup milk
4 teaspoons baking powder
½ teaspoon salt
⅞ cup barley flour
1 2-3 cups white flour.

Note.—If pastry flour is used, use 1 cup barley flour and 2 cups pastry flour.

In dark cakes, molasses, spice, or chocolate, as high a proportion as one-half barley flour may be used.

Doughnuts.

1 cup sugar
2 tablespoons fat
2 eggs
1 cup milk
1⅛ teaspoons salt
1 teaspoon cinnamon
4 teaspoons baking powder
1 1-3 cups barley flour
2 2-3 cups white flour

U. S. TO AID IN SLAYER HUNT

McAdoo Wants Murderer of Virginia Trio Apprehended.

St. Paul, Nov. 20.—Characterizing the recent ax murder at Virginia, in which three victims were believed slain for buying Liberty bonds, as a peculiarly infamous and wanton crime, Secretary of the Treasury William G. McAdoo in a personal telegram to Governor Burnquist, urges every possible effort to apprehend the murderers and pledges unrestricted cooperation of the United States Treasury department to that end.

Secretary McAdoo's telegram to the governor read:

"I earnestly hope that every possible effort will be made to apprehend the people who murdered Mr. and Mrs. Paul Alar and Peter Trepich, whom the morning papers report as having been killed because they purchased Liberty bonds.

"It is a peculiarly infamous and wanton crime, and I desire to assure you of the fullest possible co-operation of this department in every measure you may take."

Auto Plants Offered to U. S.

Washington, Nov. 20.—An offer to the government of 300 plants for the production of parts and accessories for airplanes, submarine chasers and trucks was made by the Motor and Accessory Manufacturers' association. The association pledged support to the automobile industries committee of the War Industries board.

Would Give Veterans Farms.

Washington, Nov. 20.—Senator Harding of Ohio believes that the government, as a war measure, should provide a farm for every soldier returning from the great war, who will consent to accept one. In the meantime, he suggests the experiment of placing on farms provided by the government, the dependents of soldiers and aiding them to cultivate the land. "Not everybody, possibly 25 per cent of the 2,000,000 men at the end of the war," Senator Harding said, "would want to go on a farm."

Before and After.

"Why are the stars so dim tonight?" she cooed softly.

"Because your eyes are so much brighter," he whispered, pressing her little hand.

They were engaged then.

"I wonder how many telegraph poles it would take to reach from here to the stars?" she murmured, musingly.

"One, if it were long enough," he growled. "Why don't you talk common sense?"

That was after they were married.

Dr. Pierce's Pleasant Pellets are the original little liver pills put up 40 years ago. They regulate liver and bowels. Ad.

A Relief.

"Is your wife knitting for the soldiers?"

"Yes," replied Mr. Meekton. "And I am highly pleased. Henrietta now has some occupation for her needles besides creating new neckties just for the fun of seeing how their colors become me."

OLD PRESCRIPTION FOR WEAK KIDNEYS

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfil the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy that I know of has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmers' Swamp-Root is due to the fact that, so many people claim, it fulfils almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Leon Daudet says German plotters in June tried to cause rebellion in the French armies.

No dramatist has yet equaled the pathetic touch of a friend in need.

Young Women Are Told How to Find Relief from Pain.

Nashua, N. H.—"I am nineteen years old and every month for two years I had such pains that I would often faint and have to leave school. I had such pain I did not know what to do with myself and tried so many remedies that were of no use. I read about Lydia E. Pinkham's Vegetable Compound in the newspapers and decided to try it, and that is how I found relief from pain and feel so much better than I used to. When I hear of any girl suffering as I did I tell them how Lydia E. Pinkham's Vegetable Compound helped me."—DELINA MARTIN, 29 Bowers Street, Nashua, N. H.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and is, therefore,

WAR TALKS

By UNCLE DAN

Number Three

How War Methods Have Changed Everybody Must Help.

"Hello, Uncle Dan, Jimmie and I have been waiting for you."

"Sorry if I have kept you long," said Uncle Dan. "Your mother has been telling me how bashful I used to be. She said if a girl spoke to me I would blush to my hair roots. Well, I reminded her of the time your father first came to see her and the joke we played on them, so I guess that will hold her for a while."

Continuing, Uncle Dan said: "You want to talk more about the war, do you? Well, war methods have undergone many changes and they are still changing. No two wars are fought alike. In early times, the weapons were stones, clubs, spears, bows and arrows, swords, etc. In this kind of warfare, victory was with the strong right arm. Men of enormous size and strength were the great warriors. The invention of gunpowder, however, has changed all this. It has enabled men to kill one another at a considerable distance, and do it wholesale. The war, as we know it now, is a combination of chemicals, machinery, mathematical calculations and highly trained men. Just think of it! Airplanes, submarines, armored tanks, or caterpillars, poison gases, and curtains of fire are all used for the first time in this war; and they are destructive beyond anything heretofore known.

"The methods followed by the kaiser and his allies are simply devilish. He must answer in history to the killing of thousands of innocent women and children. He has broken every international law and every rule of warfare; he has bombarded hospitals and undefended cities, sunk Red Cross ships on errands of mercy; he has destroyed cathedrals and priceless treasures of art that can never be replaced; he has made slaves of his prisoners; he has tried to get us into war with Japan; his emmissaries have blown up our ships, burned our factories and fired our forests. He knows no mercy or honor. The most charitable view to take of this blood-thirsty tyrant is that he is crazy.

"One thing is certain," continued Uncle Dan, with great emphasis, "Our liberty, the safety of our homes and our country, and the security of the world demand the speedy and absolute overthrow of the kaiser and crushing out once and forever the reign of Prussian brutality."

"How about the German people," said Billie.

Uncle Dan replied: "The splendid German people were happy, thrifty, prosperous and contented. They have been tricked into war and made to suffer the tortures of the damned; they have been cruelly and systematically deceived. God grant that the real facts may get to them, and if they do, Lord help the kaiser!"

"Of course the allies will win," said Mrs. Graham.

"Probably so," said Uncle Dan. "But if we are to win, we must go the limit. We must check the awful destruction to shipping by the German submarines, or we may not be able to get food and supplies to our own men and to our allies; we must also put hundreds of thousands, and perhaps millions, of first-class soldiers in the battle line.

"Food is the first consideration," Uncle Dan continued. "No army can hold out against hunger. It has been said that food will win the war, and this is largely true. Hence the importance of the farm in the war plans of our country."

Mrs. Graham interrupted by saying: "In view of the importance of farming, don't you think, Daniel, that the farmers ought to be exempted from war service?"

"No, a thousand times no," said Uncle Dan, striking the table so hard to emphasize his protest that he tipped over a vase of flowers. "We must have no class legislation. The duty to serve is the common duty of all, and no class must be relieved of this obligation. The question of exemption must be a personal one and decided by the facts surrounding each case. In no other way can we have a square deal, and to insure this, it is the duty of congress to pass immediately the Chamberlain bill, or some such measure, which is fair to all classes. It would settle all these questions and do it fairly. Safety now and safety hereafter demands such legislation, and let me suggest that you and your friends get busy with your congressman and senators and urge them to prompt action.

"It is time for us to realize that we are not living in a fools' paradise; that this great country of ours cost oceans of blood and treasure and it is only due to the loyalty, sacrifice and service of our forefathers that we have a country, and it is our highest duty to preserve it unimpaired and pass it on to posterity, no matter what the cost may be. Our citizenship and their ancestors came from all parts of the world to make this country a home and enjoy its blessings and opportunities; hence, in the crisis before us, it is the duty of everyone to stand squarely back of our country and be prepared to defend the flag. Everyone in this crisis is either pro-American or pro-German. Great as the country is, there is not room enough for [illegible]

The ELEVEN TOWNS
H. W. Smith, Editor & Publisher

Entered at the Postoffice at Goodridge, Minn. as second class mail matter.

Who of us has not marveled at the good cheer and optimism that mark the letters which come from our lads at the battle front? We marvel, but in reality we have no reason to, for there is a principle at work in that matter that has general application. You have noticed, surely, that the people who are most discouraged and hopeless about the sin and sorrow of the world are not the people who come into closest and most vital touch with its misery. In nine cases out of ten at least, the out-and-out pessimist in regard to this poor old sinning, suffering world of ours, is not the man who has his sleeves rolled up, and is tremendously busy at the task of making it better, but rather the man who, with arms folded, is spending most of his time merely looking on. There seems to be something positively vitalizing in work, and to get really at a task is to get hopeful about it. There is one sure cure for pessimism, and that is to get busy at the task that is before you.

There is no such thing as freedom without responsibility. All law is a restriction of a liberty. Yet this is a free country because it is a country of law. Free speech has its limitations, just as free action, free love, free shooting or any other exercise of freedom. Those limitations begin where begin the welfare and peace of the community as a whole. No individual and no group can be free to disturb the peace or to work injury to the common safety by word or deed; and only by the enforcement of this principle can the real freedom of any individual or any group be preserved.

AMERICA'S STRENGTH.

Freedom of the American mind from the merely animal venom, the brutish antipathy that marks the inspiration given forth by the German militarists for the purpose of stimulating the people, is the badge of its Christian sincerity. This makes the American that much more to be dreaded as a foe, says Baltimore American. He goes to war utterly to destroy the works of the devil as represented by German policies. He goes to war utterly to destroy the German nation if it will not give up its idols. But he goes to war indulging the hope of saving the German people and having them evolve into a form of life and political institutions that will save them from such sacrifices as their leaders are now bringing upon them. Hence love of enemies means to fight them with the utmost vigor until the need for fighting is no more. This is moral reformation, an ethical sanitary crusade, the promotion of the reign of righteousness upon the earth. Love of enemies gives resolution to punish them in their wrongdoing and to save them in their sins by the primitive methods. This is the American Christian ideal of war action.

Speaking of Metallic Rings.

"I might have known that you would have refused me," said the poor but otherwise honest young man, who had failed to make an impression on the maiden's heart. "I noticed a metallic ring in your voice when I entered the parlor tonight, that bode me no good."

"And had you been a little more observant," she replied, "you would also have observed a metallic ring on my third finger, which Charlie Gotrox placed there last night."

Thirty seconds later his feet were following each other along the homeward trail.

Mortgage Foreclosure Sale.

Default having been made in the payment of the sum of Three Hundred Eighty-eight and 50 | 100 ($88.50) Dollars, which is claimed to be due and is due at the date of this notice upon a certain Mortgage, duly executed and delivered by John W. Sundahl and Coroline Sundahl, his wife Mortgagors, to First National Bank of Thief River Falls Mortgagee, bearing date the 28th day of September 1911, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the County of Pennington and State of Minnesota, on the 9th day of October 1911, at 10:00 o'clock A. M. in Book 5 of Mortgages, on page 265, and no action or proceeding having been instituted, at law or otherwise, to recover the debt secured by said Mortgage or any part thereof.

Now, Therefore, Notice is Hereby Given, That by virtue of the power of sale contained in said Mortgage, and pursuant to the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises described in and conveyed by said Mortgage, viz:

Lots numbers four (4) and five (5) of Block number four (4) of Porters Addition to Thief River Falls, Minnesota, according to the official plat thereof on file and of record in the office of the Register of Deeds in and for said Pennington County and State of Minnesota, with the hereditaments and appurtenances; which sale will be made by the Sheriff of said Pennington County at the front door of the Court House, in the City of Thief River Falls in said County and State, on the 15th day of December 1917, at Ten o'clock A. M., of that day, at public vendue, to the highest bidder for cash, to pay said debt of Three Hundred Eighty-eight and 50 | 100 Dollars, and interest, and taxes, if any, on said premises, and Twenty-five Dollars Attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law, subject to redemption at any time within one year from day of sale, as provided by law.

Dated October 30th, A. D. 1917.

First National Bank of Thief River Falls,
Mortgagee

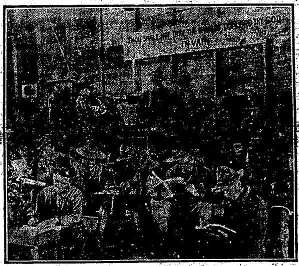
IT was evening on the broad Hempstead Plain, Long Island, where the Rainbow division was spending its last night before embarking for France. It had been raining hard in the afternoon—a cold, steady autumn downpour—and there was nothing to suggest the rainbow in the outward aspect of the camp. Lines and lines of sodden canvas housed 27,000 men, gathered from 27 different states. The ground was dotted with pools and quagmires. Under the wet canvas it was damp and cold, with a penetrating chill. Lit by flickering candles, the tents were far from cheerful shelter for a man's last night in his native land.

But there were seven big tents where electric lights, numbers and friendliness made the night pleasant. In each of these a soldier was strumming on a piano; others were reading books and magazines; hundreds were writing letters home. Behind the raised counter at one end three or four young men were busy passing out notepaper and envelopes, selling stamps and weighing parcels, which the men were sending home. One of the soldiers said to me as I stood in the tent used chiefly by men from Iowa: "We came all the way here from Des Moines, and we were mighty lonely. Then we found this Y. M. C. A. on the job, and it's been a home and more than a home to us. It gave us what we wanted when we needed it most. We'll never forget it. The boys' best friend is the Y. M. C. A."



Music, Games, Good Reading and Correspondence Facilities in Y. M. C. A. Building.

Fine, Clean-Cut, Upstanding Fellows.

How close those benches were packed with men, bending over the long tables absorbed in their writing! What an appeal to the sympathies those great groups of soldiers make! Fine, clean-cut, upstanding fellows, some of them mere boys, one thinks immediately of the sacrifice they have made for the rest of us and how precious they are to some one back home. Somewhere, in far off farm or village or city street, there are parents or brothers or wives who would give all they possess for one glimpse of those sunburned faces as you and I see them on their last night before going across And it was with a throb of the heart that I watched them, bent over their letter paper, in one after another of those seven big tents.

These were the tents of the Y. M. C. A. On that last night in America the association was serving the soldiers in the best of all ways—giving them an opportunity to write home. On previous nights they had enjoyed boxing bouts, movies, concerts, dramatics and a score of healthy entertainments as well as religious meetings. But on this last night home ties were strongest. And perhaps that is the keynote of the splendid work the Y. M. C. A. least is on its way to you. Each one of our 16 cantonments, where the new national army is being trained, is using more than a million sheets of this paper every month. In the draft army alone that means 16,000,000 filaments of love every month reaching out from the great encampment where the men are being trained into the greatest army this nation has ever dreamed and binding them to the hearts at home. Multiply that by thinking of all the other places where Uncle Sam has men with the flag—in navy yards, on the high seas, in arsenals and officers' training camps and "Over There" in France. In all these places men are writing home. Those unassuming little sheets of notepaper gladden millions of hearts a day. They transfer more love from one part of the world to another than statistics can express. Statistics are pretty poor anyway when it comes to reckoning in terms of love and human tenderness. Let's put it this way: That the Y. M. C. A. is the biggest express company the world has ever seen, and the parcels it is handling are the loves and devotions of human beings.

World's Best Loved Trademark.

This war has made us think hard and fast. Your boy or your neighbor's boy or some boy you know and love has been called to do his share in the big job of policing the world for democracy and human liberty. Is it any comfort to you to know that wherever his duty may call him your boy will have a friend that will serve him in body, mind and soul? Are you glad to know that this friend will place books and magazines at his disposal, organize classes to teach him whatever he wants to learn, give him a pocket testament and invite him to join religious meetings of the faith that he was brought up in? Did you realize that the association provides athletic equipment for his favorite games, teaches him games if he knows none and holds concerts, lectures, movies, Bible classes, dramatic entertainments and every kind of wholesome amusement to keep him interested? Are you glad to know that this friend will go with him overseas, help to shield him from a score of difficult and dangerous temptations and follow him right up to the front line trench and beyond it? The last contact the soldier has with this life he loves so well is a cup of tea given him by the Y. M. C. A. free just before he goes "over the top" to a hand to hand struggle with the enemy. And as he comes tottering back from No Man's Land, wounded, but strong enough and plucky enough to keep on his feet, even before his wounds are dressed the Y. M. C. A. is waiting for him with tea and sweet chocolate, the great comforts of the man in the trenches. De

WOULD CUT OUT ALL LUXURIES

Transportation Ban on 500 Non-Essentials Is Urged by Railroad War Board.

COMMODITIES ARE FIRST

Rail Pool to Give Priority to Essentials of War—Public Requested to Cut Traveling for Pleasure.

Washington, Nov. 27.—The committee which will operate eastern railroads as a unit will make several suggestions, two of which are:

1. A practical embargo on the transportation of luxuries.
2. A request to the public to reduce pleasure travel.

The operating committee, composed of operating vice presidents of the eastern lines, will meet here with the railroad war board. Many schemes already are under discussion for the maximum utilization of facilities for war busness.

Reluctant to Stop Luxuries.

It is beleved that the administration is reluctant to cut off the movement of luxuries until the Christmas trade has been supplied. This may take another week or 10 days.

It was learned that many retail dealers in luxuries are already in financial straits, due to the curtailment of their business due to the war, and the administration does not wish to precipitate any wholesale crashes in the business world. Railroads will insist, nevertheless that if they are to move coal, sugar, wheat and steel, the four great staples now held up, they must be relieved of some of the burdens which they consider non-essential.

Ask Reduction in Travel.

Reduction in pleasure travel on railways will be urged by the railroad war board through a campaign of advertising. There is no desire on the part of the railroads to diminsh necessary travel. But through unnecessary travel huge demands are made upon rolling stock, train crews and trackage. Although the railroads have cut their passenger equipment and stopped many of their trains, passenger travel is still increasing.

It has been already announced that the railroad war board has recommended that more than 500 articles be embargoes in transportation, classing them as "non-essentials." The fuel administration is also considering embargoing the use of coal and coke in the manufacture of these non-essentials.

GAVE LIFE TO SAVE FELLOWS

U. S. Gunner Threw Explosives Overboard When Danger Came.

Washington, Nov. 27.—Osmund Pratt Ingram of Pratt City, Ala. the gunner's mate lost overboard when a German submarine attacked the American destroyer Casin, October 6, deliberately sacrificed his own life to save his mates.

A report from Admiral Sims shows that Ingram, standing aft, where some high explosive depth charges were stored, saw the torpedo coming. Instead of rushing forward to save his own life, Ingram stuck to the spot, throwing overboard the high explosives which he knew would further endanger the lives of his fellows if they were detonated by the torpedo. He was the only man lost, being blown overboard by the explosion. The Casin got in under her own steam.

WAR BILL TO REMAIN HIGH

Second Year's Cost Will Equal That of First.

Washington, Nov. 27.—The second year of the war will cost the United States about the same as the first, according to estimated expenditures prepared at the Treasury department.

For the fiscal year beginning next July ordinary disbursements, not including loans to Allies, or interest on bonds yet to be authorized, are estimated at $12,701,000,000, as compared with $12,316,000,000 for the current year ending June 30, 1918. This estimate includes interest on the $9,500,000,000 government securities already authorized.

A large part of the sum must be raised by bonds.

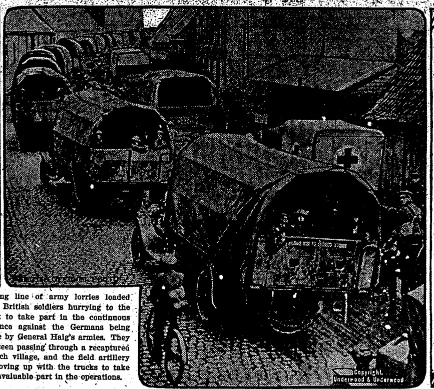
Bread Up 55 Per Cent in 16 Months.

Washington, Nov. 27.—Bread prices advanced 55 per cent in the 16 months ended October 1, while the price of flour advanced 249 per cent above the July, 1916, price, according to charts presented by the baking industry to the food administration.

Duluth Merchant Held by U. S.

Duluth, Nov. 27.—United States authorities have taken their first steps to deal with local persons alleged to have insulted Liberty bond salesmen in the recent Duluth campaign. It is intimated "blue cards," filled out by the salesmen, will play an important part in future activities of authorities. Gustaf Landin, 44, photographer, has been arrested on a state warrant, charging that on October 25 he used abusive and offensive language toward two Liberty loan salesmen who approached him to buy bonds.

BRITISH TROOPS BEING RUSHED TO THE FRONT TO KEEP UP GENERAL HAIG'S ADVANCE IN FRANCE



Copyright, Underwood & Underwood

Long line of army lorries loaded with British soldiers hurrying to the front to take part in the continuous advance against the Germans being made by General Haig's armies. They are seen passing through a recaptured French village, and the field artillery is moving up with the trucks to take its invaluable part in the operations.

MEDALS FOR SAMMIES

Fifteen U. S. Soldiers Given French War Cross.

Cannot Wear Decorations Until Permission Is Given by Congress.

With the American Army in France, Nov. 28.—The French general commanding the sector in which the Americans were stationed at the time of the first German raid on the night of November 2-3 has cited 15 American officers and men and on these the French war cross has been conferred. The men were decorated and were informed that they might keep the medals in their possession, but must not wear them until Congress gives its authorization.

The ceremony was an impressive one. An American major general presented the decorations and citations, giving the regimental colonel those for the men who were killed. They will be sent to their next of kin.

The French general, in referring to the action of the company, said:

"On the night of November 2-3, this company which was in the line for the first time met an extremely violent bombardment, when it seized arms and offered such stubborn resistance that the enemy though numerically superior, was obliged to retire."

The general specially cited in the order of the day Corporal James D. Bresham and Privates Merle D. Hay and Thomas F. Enright, "who died bravely in hand to hand fighting with the enemy who had penetrated the first line."

TO REDUCE BEER STRENGTH

Alcoholic Contents to Be Cut to Three Per Cent.

Washington, Nov. 27.—Orders reducing the alcoholic content of beer to 3 per cent will be issued soon by the food administration with the approval of President Wilson. At the same time the amount of grain used by brewers will be cut down approximately 30 per cent, although the volume of beer will not be decreased.

The food administration points out that since there is in the country two or three years' supply of whisky it is undesirable at the present time to stop entirely the brewing of beer, because of the possibility of driving the people to whisky drinking. The social question involved, it is declared, must be given equal consideration with that of food conservation.

TO OPERATE ROADS IF POOLING PLAN FAILS

Washington, Nov. 27.—Government operation of railways if the pooling plan does not afford relief from the present situation was being considered here as the committee of vice presidents of the Eastern lines gathered to perfect general plans to put the pooling arrangements into effect.

"English Are Good," Was Password.

San Francisco, Nov. 26.—"The English are good and the Germans are bad," was the password whispered by the India revolutionists when they sought to identify each other during their activities against British rule in India. The answer was "The English are bad and the Germans are good." These mystic signals and other facts relating to the proposed revolution were revealed in Federal court here in the trial of 34 prominent men on charges of conspiracy to foment an uprising.

READY TO DRAFT ALIENS IN ARMY

Treaties Between U. S. and Allied Countries Provides for Military Service.

CONGRESS TO ACT SOON

Provisions for Reciprocal Drafting of Subjects of One Country Who Are Resident in Another Country.

Washington, Nov. 28.—When Congress reconvenes Secretary Lansing will be prepared to submit a number of treaties authorizing reciprocal drafting for military service of citizens or subjects of one country resident within the other country, so far have negotiations between the United States and the Allies on the alien slacker problem progressed.

Approval of such treaties by the Senate has been foreshadowed by a general demand on Congress for action to reach aliens in this country of draft age. Several measures had been launched in the Senate and House requiring drafting of such persons, but at the suggestion of the State department and upon its promise to accomplish the purpose by regular method of treaty stipulation, that legislation was postponed.

Many Seek to Escape.

In the meantime a great many foreigners resident in the United States have hastened to file their declarations of intention to become American citizens, in many instances with the express purpose of escaping military service under their own flags in event of a roundup of aliens in the United States by British, French and Italian recruiting officers.

By filing these first papers the declarent renders himself liable to draft into the American army. There is only one chance in four of his being actually drafted as an American, however, even after registration.

Difference in Standards.

The British-American military service treaty will be framed as a model for those between the United States and other Allied countries, though there will be some minor differences because of varyng laws fixing eligibility for military service.

FIFTY ITALIANS ARRESTED

Held by Milwaukee Police Following Bomb Explosion.

Milwaukee, Wis., Nov. 27.—Fifty Italians have been arrested in a dragnet thrown out in the Third ward and are held by the police for investigation in connection with the bomb explosion in police headquarters.

Captain of Detectives Sullivan, who ordered the arrests, would make no statement, but it is understood that the action followed a partial confession of one of the men arrested earlier.

Deserter Sentenced to Death.

Washington, Nov. 27.—Sentence of death before a rifle squad has been imposed by a courtmartial upon an enlisted man of the American army in the United States, on his conviction of desertion with intent to join enemy forces. It was learned at the war department, however, that officials here are not satisfied at evidence adduced before the court that intent to join the enemy was established and the trial court has been asked for additional information to clear up the point.

3 U. S. FLYERS RESCUED

Had Been Lost at Sea for Nearly Sixty Hours.

Picked Up By French Patrol Boat After Sixty Hours of Suffering.

A French Port, Nov. 27.—Three American airmen have been picked up by a French patrol boat after having been lost at sea for nearly 60 hours. They were suffering from cold, hunger and exhaustion.

The three men, in a huge triplane hydro-airplane, left a French base in search of four enemy submarines which were reported operating off the coast.

When the men failed to return within the usual time other machines were sent out to search for them. The searching machines returned after several hours and reported that they had seen no trace of the missing plane or its crew.

The naval authorities then sent out a general warning to all allied boats off the coast and search for the Americans was continued.

About dusk a French patrol boat saw the missing machine drifting several miles out at sea. A boat's crew rescued the three men, who included Ensign Kenneth Smith, a former Yale student, who was pilot; Frank J. Brady of Newark, N. J., observer and gunner, and I. F. Wilkenson, mechanician.

COMING TO UNITED STATES

Former Czar's Daughter Is On Way to This Country.

New York, Nov. 27.—Miss Tatiana Nicholaevna Romanoff, second daughter of Nicholas Romanoff, deposed emperor of Russia, has escaped from Siberia through a camouflage marriage to a son of a former chamberlain of the emperor, and is now on her way to the United States chaperoned by an English woman, according to informaton made public here by persons connected with the Russian civilian relief.

The former grand duchess, who is 20 years old, made her escape from Tobolsk, the present home of the exiled czar, to Harbin, Manchuria, and thence to Japan, where passage was taken on a steamship for the Pacific coast.

Miss Romanoff is coming to the United States to "work in any capacity for the Russian civilian relief," according to a statement issued here.

NO GUARD ON GOTHAM FRONT

Soldiers Not Placed to Watch Piers as Planned.

New York, Nov. 27.—New York's water front did not go under martial law as ordered from Washington by the Department of Justice. After an extended conference at Governor's island between army heads it was announced "no definite action" had been taken. All information as to when the regular army would take charge of the water front under instructions to "shoot to kill" was refused.

Private Found to Be General's Son.

San Francisco, Nov. 27.—The identity of Private Martin D. Sibert, Twelfth United States infantry, increased greatly in prestige following the disclosure here that he is a son of Major General William L. Sibert. Young Sibert, without knowledge of his family, enlisted at Manhattan, Kan., and was written down as on unassigned recruit service in the Philippines. When his paternity was discovered he was sent to the Twelfth infantry as a full fledged private. He is just old enough to qualify.

WAR ON KAISER'S ALLIES IS URGED

Senator Stone, Former Pacifist, Says Move Would Simplify Matters.

AUSTRIANS IN WEST

May Be Facing Americans—Nations Declared Virtually At War—Stone Now Backs Administration.

Washington, Nov. 28. — From two sources come hints that this country will not much longer remain in the position of being compelled to protect herself from attacks while yet not warring upon Austria, and probability that the anomalous situation will be cleared by a declaration of war by the United States against the German ally.

Senator Lewis of Illinois and Senator Stone of Missouri both declared pointedly that the United States should declare war on all the allies of Germany.

Washington, Nov. 28.—"Exceedingly advisable to simplify a situation now anomalous" is the reason given by Senator Stone, chairman of the foreign relations committee, for declarations of war by the United States against Austria, Turkey and Bulgaria.

Opposed War Step.

"We are in fact," said he, "now at war with Germany's allies." Senator Stone's only reservation was that such action by Congress should be in harmony with the policy of the executive branch of the government. Although he voted against the declaration of war on Germany.

Supports Administration.

Senator Stone has reiterated that the war once begun has his whole support. His statement was taken as indicative of the agitation for war on Germany's allies, which will face Congress when it convenes Dec. 3.

Austrians in West.

"I have understood that some if not a large number of Austrian troops have been on the Western front," said Mr. Stone. "They may now or soon be actually fighting against American forces, the two forces firing at each other. Anyway, Austrians are desperately engaged in Italy, which is one of our Allies just as much as France or England."

Sees Long Session.

To have war formally declared against Germany's allies also, said Senator Stone, would simplify matters of domestic concern such as measures to prevent espionage.

New or amended war tax legislation, according to Senator Stone, who also is a member of the Senate finance committee, should not be undertaken until after a thorough survey of the situation. He said there was no doubt that in many respects the new war tax law can be improved and probably will be to remove inequalities and injustices. The session, he predicted, would be a long one.

BIG BILLS BEFORE CONGRESS

War Legislation to Keep New Session a Busy One.

Washington, Nov. 27.—Continued stupendous appropriation bills and other war legislation will feature the session of congress which is to open Dec. 3, in the opinion of leaders here. In the wake of these right of way measures a host of others of domestic concern, such as prohibition and woman suffrage, will be pressed for consideration. Sentiment developed among representatives already here in favor of a declaration of war against Austria, Turkey and Bulgaria doubtless will be strengthened by the return of the party congressmen from a visit to the battlefronts. It is expected that the president may deal with the subject in his opening address to the joint session of congress.

JAPANESE SPURN HUN OFFER

Reject Kaiser's Offer to Desert Allies, Report.

Amsterdam, Nov. 27.—Germany has again attempted to detach Japan from the Allies and again has been refused, according to word reaching here. It was reported the Germans offered Chao to Japan and announced their willingness to discuss the future of occupied islands in the Pacific as the price of Japan's retirement from the war.

U. S. Aerial Officer Killed.

Fort Worth, Texas, Nov. 27.—Lieut. J. C. Matthews, 21 years old, of St. Louis, member of the aviation section, training at Taliaferro field, was instantly killed when his aeroplane fell from a height of 2,500 feet.

Ban on Teuton Insurance Companies.

Washington, Nov. 27—All Teuton insurance companies in the United States, excepting life, are ordered liquidated by Secretary of the Treasury McAdoo. Life insurance companies are confined to continuing existing contracts and the liquidated concerns are placed under Alien Property Custodian A. Mitchell Palmer's control. The action is a blow at German espionage in this country. For months it has been suspected the enemy obtained information through Teuton insurance inspectors.

GETTING A BATH IN BOGOTA

Attempt Was Fraught With Much Difficulty and Considerable Profanity, According to Writer.

Ever since our arrival Hays and I had been threatening to patronize one of the two public bathhouses with a first-class bogotano reputation rumor had it existed in the capital, says Franck's Vagabonding Down the Andes. But in a land where the temperature rarely reaches 50 and the floors are tiled, it takes courage, and we had been satisfying ourselves and our duty to humanity by bravely splashing a basin of icy water over manly forms each morning on rising. By dint of strong resolutions often repeated to be up at six and visit one of the cases de banos we did finally manage one morning to find ourselves wandering the streets by eight, with towel and soap under our arms, and stared at by all we met. We discovered La Violeta at last, next door to a blacksmith shop. The keeper we woke up told us we might have a cold bath, but that the sign on the front wall: "Hot baths at all hours," was to be taken with a bogotano meaning.

A few mornings later we did actually find the other establishment open. We entered a large patio, the most striking of several buildings, within which was a round, or, more exactly, an eight-sided house, and in time succeeded in arousing the place to the extent of bringing down upon us a youth hugely excited at the appearance of a crowd of two whole bathers all at one time.

The youth assured us there was plenty of hot water. I won the toss and was soon stripped. But the shower was colder than the ice fields bounding the pole. When I had caught my breath I bawled my repertory of profane Spanish at the youth, who could be seen through a hole above pottering with some sort of an upright boiler and firebox, and now and then peering down upon me. Suddenly the water grew warm, hot, boiling, then, just when I had soaped myself from crown to toe in the steam, it turned as suddenly cold again, and an instant later stopped entirely. My eyes tight closed I shouted at the youth above.

"Es que el agua caliente se acago," he droned. "It is that the hotel water has finished itself."

There being no deadly weapon at hand I turned on a tap of ice-cold water and raced to the dressing room still half soaped. Hays, scantily clad, was gazing fiercely at the youth through a hole in the door.

"Then there isn't any more hot water?" he demanded.

"Not, now, senor, but there will be soon."

"Good. How soon?"

"Early tomorrow morning, senor."

"Why, you cross-eyed son of spigdom," exploded the ordinarily even-tempered ex-corporal, "I came here and stripped to an undershirt that I might dance in my bare feet on this tile floor in honor of Jose Maria de la Santa Trinidad Simon Bolivar! Get up on that roof and fire up or . . ."

The youth was already feverishly stoking armfuls of wood under the upright boiler, and by the time I left for home Hays was shadow boxing to keep warm with a fair chance of getting a bath before the day was done.

Could Exterminate Germans.

Experiments made since the German bombardment of Armentieres with a mysterious gas shell have disclosed that the poison was arsine, known in the laboratory as arsenlureted hydrogen, one of the deadliest fumes known to the chemists, according to a trench correspondent.

In Armentieres the gas from the shells continued its deadly work for nearly a week, although the shells were all thrown in one hour. More than 4,000 men, women and children died, many in convulsions and many stark mad.

The significant fact in regard to the arsine bomb which the Germans likely overlooked is that while the amount of the drug in Germany is limited, the allies have limitless supplies. If Britain and France wish to retaliate they could in less than a year manufacture these bombs in sufficient quantities to kill every living thing in the German empire.

It would be a question only of getting enough airplanes to carry and drop them.

Can You Beat It?

Once upon a time they published an order prohibiting gambling in Sing Sing. Two inmates were seen exchanging token money and they were haled to the court.

"What's the charge?" asked the judge.

"Alleged gambling," said the deputy.

"I thought all the cards, dice, gambling paraphernalia and such were destroyed."

"They were," answered the deputy, "but these two fellows were bettin' on whether it will rain today or not."

Distracting Attention.

"In the good old days town scolds were severely dealt with."

"So they were, but the ducking stool has gone out of fashion."

"Yes. About the only way we can hope to get any relief from a scold nowadays is to coax her into a motion picture theater and get her interested in a film."

Couldn't Be Worse.

Mrs. A.—I don't think their manners are particularly good. I wonder where they have been living?

Mrs. B.—I don't know, but their manners couldn't be any worse if they had been living at home all their lives.—People's Home Journal.

"CONTRABAND"

A Thrilling War Story of the North Atlantic

By RANDALL PARRISH

Copyright A. C. McClurg & Co.

CHAPTER XVIII—Continued.

—13—

"There is not much to tell," he went on, almost jauntily. "I saw exactly how things were going before we left the boat. I knew Hollis' reputation ashore, and determined to warn you of his purpose, but had no opportunity. Besides, I felt you had so poor an opinion of me that probably you would not listen."

"You were greatly mistaken, Mr. McCann," she said pleasantly. "I would have gladly received your advice. You were my father's friend."

I could read the man's surprise in his face. The graciousness of her words was a shock, yet his egotism made him instantly her victim.

"You mean you trusted me? That you would have listened?"

"Most assuredly. How could you think otherwise? I knew you were not yourself in the boat, and the treatment to which you were subjected was brutal. I owed my life to you equally with Captain Hollis, and am very grateful. I have never forgotten that you have been a guest in our home, a business associate of my father's. Why should I not have confidence in you?"

I looked at her in amazement, but her eyes never met mine. What did this mean? Was the girl acting a part? Was she endeavoring to deceive him, or was she speaking now in deadly earnest? Nothing in her manner, or in the tone of her voice, gave me a clue. As for McCann, the very expression of his face pictured his delight, his conviction of her sincerity. It was almost too good to be true, yet his was not a nature to doubt his own attractiveness.

"I—I—you surprise me," he stammered, absolutely forgetting my presence. "I—I assure you I was actuated by the highest motives in all my efforts. My—my duty was to you, and your father."

He turned and faced me, the bully in him surging to the surface.

"I will converse with Miss Carrington alone."

To resist would have been utter foolishness. I could see the gleam of the gun in his hand, and realized that he only required an excuse to use it. More, there was nothing in the expression of the girl's face to inspire me to resistance. She did not even glance toward me, or exhibit the slightest interest.

With hands clenched in impotent rage, not even venturing a reply, I stepped backward. As I crossed the threshold McCann closed the door, and I heard the key turn in the lock. Trembling still with anger, and dazed by the strange action of the girl, I sank back upon the stool, realizing my utter helplessness. All she had done and said appeared so natural it never really occurred to me once that she might be acting a part, seeking in this way to gain McCann's confidence, in order to win from him the information we required. It was only as I sat there in silence, brooding over every detail, that this possible conception began to slowly dawn upon my mind. That she could trust the man in any way was practically impossible, for he had revealed to her his true character in so many ways the memory could not be blotted out.

As the full knowledge of this truth grew apparent, I was able to view all that had occurred later in a different light. She had simply accepted her one chance; had grasped with womanly intuition the single weapon left at her command. Girl as she was in years, her experience in the world had been that of a woman, and she instinctively realized her power—the power of wealth, of beauty, and of youth. It had been beautifully done, so deftly accomplished as to deceive even me. Aye! and the method had succeeded with McCann. I recalled the expression of surprise, of gratification, of awakened pride on the man's face. He had no power of resistance left; he was already putty in her hands.

True, but would he remain so? The game she played was a dangerous one; if she ventured too far she would discover the brute lurking in him still. And he had the power, the physical power, to wreak vengeance once he suspicioned deceit. And there was no one to help her if she made a single false step—absolutely no one; she was a lamb among wolves. Those fellows would never release me again, not for a moment. I would be compelled to take observations, to calculate position, to trace our sailing course on the chart, but not for an instant would I be left again unguarded, either on deck or in the cabin. McCann would see to that.

The afternoon passed, dragging its weary hours. Nothing happened to relieve the monotony and dread of solitude. No one approached the door of the stateroom, not even to offer me food, and my ears were able to distinguish no sound of movement in the main cabin. Occasionally footsteps passed along the deck overhead, and once or twice I heard the voice of Liverpool sing out some order to the men forward. The sun sank, its rays glinting across the waters, and telling me the ship held to its southwest course, but the ocean, so far as I could see, remained desolate, the horizon unbroken by a gleam of sail, or smudge of smoke. No echo of a cry reached me from any lookout aloft. The vessel proceeded quietly, no effort being made, apparently, to achieve speed. I judged our rate would not exceed eight knots, and decided there was either a scarcity of men in the stokehole, or else they were conserving fuel to attain greater speed during the hours of darkness. The bright sunlight began to fade into a purple dusk.

CHAPTER XIX.

A French Man-of-War.

No food was brought me during the afternoon, nor had I eaten all day, yet my mental state was such I had no consciousness of hunger. I had discovered no means of creating a light, although my eyes were sufficiently accustomed to dimness to enable me to move about my narrow quarters safely enough.

It must have been between eight and nine o'clock when the key turned in the lock of my door, and Liverpool looked in. The light from the swinging lamp in the main cabin flared into my eyes, blinding me, yet I recognized his face, and saw Dade close behind him, bearing a tray. Neither of them spoke, but Red, having assured himself of my presence, stood aside, and motioned the steward to enter. The latter deposited the laden tray on the desk, and backed out silently, every movement showing him thoroughly cowed by his guardian. Realizing that any word from me would only result in insult, I remained silent, and the two disappeared, closing and locking the door behind them. I confess I ate the food with relish, for it was well cooked, and served with some daintiness. After a second cup of coffee I felt much more like myself, rummaging through the captain's chest until I found some tobacco and a pipe, which I at once appropriated to my own use. No one returned for the emptied dishes, and I sat for a long while at the open port smoking, the blue spiral swept away by the rush of air, and my eyes on the starlit waters.

I had been sailor long enough to accept the ordinary perils of the sea as part of the profession. Nothing was too strange to be true at sea; and so it was not the position in which I found myself; not the possible fate of the Indian Chief, or of her captured officers, which weighed most upon my mind—it was Vera Carrington. If those villains scuttled the ship; if they took to the boats to save themselves, leaving us to drown like rats, what would they do with the girl? Would McCann dare to take her with him? Would he venture leaving her alive to bear witness to his crime? There was but one answer—not unless she was utterly in his power. Either he must quiet her by force, and thus bring her spirit to his will, or else compel her to marry him, and so legally seal her lips. And the man was perfectly capable of taking either course — whichever seemed easier.

This was the consideration which served partially to arouse me from coma. I could not continue to sit there waiting for Fate to approach; better far to go forth and meet it in manly fashion. I had a good strong knife in my pocket, and the lock of the door was a common one, the wood surrounding it soft pine. There was nothing in that obstacle to prevent my escape, and if I was discovered at large, my punishment would merely be confinement elsewhere. I had therefore nothing to lose, but everything to gain by the experiment. The hour was late, the night had thus far been a quiet one, and it was quite probable the fellow, comfortably situated, was drowsing at his task. Anyhow, I would make little noise, and the chance was worth taking.

The labor proved easier than I had supposed. The soft pine yielded easily to the sharp blade, and a very few moments sufficed to cut the lock clear, enabling me to open the door silently and take cautious survey of the main cabin. At first I doubted the presence of anyone, and had, indeed, ventured forth before perceiving the form of a man outstretched on the divan surrounding the butt of the mizzenmast. The fellow was asleep, yet restless enough to be dangerous. His face was in shadow, and I thought it best not to venture close enough to identify him, although the dim light revealed a belt about his waist, and the bulging butt of a revolver. Convinced that my only hope of accomplishment lay in the discovery and release of my fellow prisoners, I crept across the deserted cabin, and entered the passage leading forward. Somewhere amidships these were surely confined. There I was not destined to discover where.

I had taken scarcely a step when the companion door opened, and a man started down the stairs. Crouched in the darkness, I saw the sleeping guard, aroused by the noise, spring upright, and as the light fell on his face, I recognized a seaman named Dubois. The man on the stairs paused, gripping the rail, staring down as though momentarily blinded by the light.

"Is that you, Dubois?" he asked in the harsh croak belonging to Jim White.

"D—— you—you was asleep."

"I lay back to rest, but I was not asleep, monsieur—non, non."

"Well, we won't fight over that now. You're the only Frenchman on board, and we want you on deck. Go on up; I'll stay here. Aye, man, yer better leave the gun."

"Vat ees it, Monsieur White? Why they want me on deck?"

"What's the difference, you frog-eater? But I'll tell yer anyhow. There is a cruiser showing up off our port quarter, which has caught sight o' us. She looks Frenchy, and if there is a hail, it will be up to you to answer—you are the only one aboard this hooker who talks the lingo like a native, see!"

Dubois stood staring, his lips parted in sudden terror.

"A French warsheep; eet hail us?"

"Not yet; but they are bound to question us, all right. There! did you hear that? A shot across our bows, politely asking us to heave to; aye! and we are slowing down; come, hurry up on deck with you, Frenchy."

"But—but, monsieur, what ees it I can say? I know not ze words, ze—ze explanation."

"You speak French, don't you?"

"Oui, monsieur, oui, but—but I know not what to speak."

"Well, don't let that worry you. McCann will tell you—but God pity you, Dubois, if you fail to repeat it. Up with you now, and be lively about it!"

All thought of my former purpose vanished from my mind as I realized this new chance of rescue. At any risk I must attain quickly to the open deck, where I could create an alarm sufficient to awaken suspicion on board the approaching Frenchman. McCann's only hope of escape lay in some satisfactory explanation, which would lull the suspicions of the French commander—some lie smooth enough to prevent boarding and search.

Assured that White was beyond observation of any of my movements, I crept cautiously around the stair rail, and noiselessly mounted the steps. I found the after part of the main deck deserted, although forward of the mainmast I could perceive dark blotches along the port rail, where members of the watching party were observing the approach of the French cruiser. With heart beating like a trip-hammer, I made my way along the front of the cabin, until I ventured to peer over the port rail, secure that my presence on deck was screened by the deep shadows in which I lurked.

The gleam of the stars alone revealed the glittering surface of the sea, but the night was clear of fog, and the black outline of the French warship was plainly visible, approaching us at half-speed, and silently closing up the narrowing gap of water between the two vessels. I felt the heart come up into my throat as I gazed spellbound, every nerve in me throbbing painfully. A single voice echoing along those decks yonder could blow us out of the water. Even as I stared at the grim spectacle, the slim figure of a man appeared at the end of the bridge, and a voice hailed us in French.

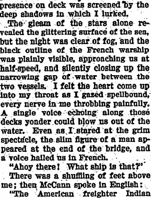
"Ahoy there! What ship is that?"

There was a shuffling of feet above me; then McCann spoke in English:

"The American freighter Indian Chief, bound for Liverpool."

"Is there anyone aboard who speaks French?"

I heard them hustle Dubois forward to the rail, and caught a word or two of McCann's swift threat hissed into his ear; then the frightened Frenchman stammered out an answer.



The Black Outline of the French Warship Was Plainly Visible.

"Oui, monsieur, je parle Francais."

"Then talk up; what ship is that?"

I could hear McCann prompting, and Dubois echoing the words put in his mouth.

"The Indian Chief, Boston, McCann, master, from St. Johns to Liverpool, two days out."

"Eh, what cargo?"

"Miscellaneous; mostly farm machinery."

A searchlight swept us fore and aft, but finally settled on the little group of men clustered together on the poop rail.

"You're north of your course."

There was an instant of hesitation; then Dubois' explanation:

"We ran before the storm last night, monsieur, having been struck by lightning."

"Ah, I see; that accounts for your stump of a foremast and the temporary wheel aft. What shape are your boats in?"

"Three of them left, monsieur."

"Send the captain, with the Frenchman, over with the ship's papers. Be lively about it."

"Oui, monsieur; what is the name of the warship?"

"The French cruiser Descartes, on patrol. Get your boat over."

What would McCann do? Was he ready for such an emergency as this? Had he taken the precaution to alter the ship's manifest, or even forged a new one? There was a moment of excited talk on the deck above me; then McCann descended the starboard ladder, and disappeared through the companion, evidently after the ship's papers. Liverpool's voice ordering the watch to lower number five boat, and stand by, sung out from the poop rail. McCann emerged from the companion, called up to Liverpool, waving his hand with a laugh full of confidence, and went forward. A moment later he was joined by Dubois, and the two men clambered over the rail and dropped into the lowered boat. His actions, his easy manner, startled me; those must be carefully forged papers in his pocket to enable him to proceed with such confidence. Slowly I lifted myself until I could peer over the side at the dark expanse of water between the vessels. The searchlight of the warship rested in a glare of white on the small boat bobbing up and down, revealing the men at the oars, and McCann and Dubois in the stern sheets. Neither glanced back, but I could see their faces clearly, and McCann was smiling as though at an excellent joke.

CHAPTER XX.

The Cruiser Leaves Us.

I was still clinging to the rail, and staring down at the light; I heard nothing, felt no premonition of alarm, when suddenly a hand gripped my throat, the great fingers stifling every effort to cry out. Before I could resist, or even brace myself, another hand was clapped over my mouth and I was fairly hurled back below the shelter of the rail, dragged across the black deck, and thrown through the opened door of the companion. This was accomplished so quickly, and with so little evidence of struggle, as to attract no notice from the Frenchman, from whose deck no doubt every eye was fastened upon the approaching boat. Half hurled, half dragged, I plunged into the dimly lit cabin, and it was not until I struck the lower deck that I even realized clearly what had occurred, or who were my assailants. I fell sprawling on one shoulder, but was as instantly on my feet, bruised, but otherwise uninjured, maddened by a rage beyond all control. White, emerging from the stateroom, through the port of which he had been viewing the scene alongside, startled by the sudden uproar, a revolver gripped in his hand, was the first face I saw.

"What the—" he exclaimed in bewilderment, but before he could say more my fist jammed into his jaw, and the fellow went over full length on the deck, the gun flying from his opening fingers. I had possession of it before he could stop me, and was backed against the door of a stateroom opposite, murder in my heart as I confronted the two who had flung me from the top of the steps. I recognized them now for the first time—Liverpool Red and Tom Dugan. But one thought seethed in my brain—to kill.

"Curse you both," I cried, covering them as they shrank back, "we'll end this thing right here."

Red gripped Rugan, holding the Irishman in front of him as a shield. My revolver covered them both, my fingers nervous on the trigger. Suddenly the door behind me yielded and I staggered back, unable to regain my balance until fairly within the stateroom. With a crash the door closed, instantly shutting out the surprised faces of the two men in the cabin; a key creaked in the lock, and Vera Carrington fronted me, her back against the wood.

"Were—were they trying to kill you?" she panted.

"They certainly did their best," I answered, "but it was my turn when you dropped me in here."

"You—you mean that I made a mistake—that you were in no danger?"

"I had the upper hand. I took this revolver away from White, and do not believe either of the others were armed. In another second I should have fired. Our only hope of rescue lies in creating an alarm; there is a French cruiser lying just off our port quarter."

"A French cruiser! We have been captured?"

"No; merely halted and questioned. The Frenchman does not even suspect anything wrong. I was endeavoring to sound an alarm when these fellows seized me, and threw me down the stairs into the cabin."

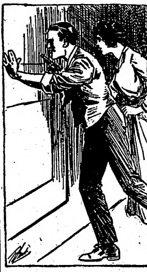
"But how did you get on deck? And where did you procure the revolver?"

"I cut my way out; the gun was taken from White. Don't block the way, Miss Vera! I must get to the deck again, or it will be too late."

"Is McCann out there?"

"No; only Red, and a sailor named Dugan. White is knocked out, and McCann has gone aboard the cruiser. He has forged papers with him. Let me go; I can fight my way through with this gun. Those devils will either make way or get hurt."

She stepped aside, and with no other thought but the necessity for action, I turned the key in the lock and flung the door open. The main deck was deserted; to my surprise, all three of the men had disappeared. With revolver gripped in one hand, I stepped forward, searching with suspicious eyes every dark corner, dimly conscious that the girl followed. I had attained the foot of the stairs, even advanced a step upward, before my progress was arrested. Suddenly the companion door was flung open and a mob of men confronted me, surging in through the narrow space from the deck. I drew instantly back, stunned by sight of McCann in their lead, realizing instantly that our effort to attain the open was already too late.



"There'll Be Six of You Dead If You Break In This Door."

"There he is!" he cried eagerly. "Get him, you men. Lively now; there's no danger; if he lifts that gun, he's a dead man."

I was staring straight into the black muzzle leveled at my head, but before I could move, or even determine what was best to be done, Vera stood between me and the mob on the stairs.

"Go back! back to my stateroom; he'll never shoot me. Please, please go back."

I was hot-headed enough to have fought them all, but to attempt resistance then would have endangered her life. I retained sense sufficient to know this, and that only force would cast her aside. I heard McCann mutter an oath, and Red roar out some order, punctured with profanity, yet did not truly comprehend what efforts were being made to block our retreat. Before a hand could grasp either of us, we were within the shelter of the stateroom, and the girl had closed and locked the door. Fists pounded on the wood in impotent rage, and I heard voices urging others to bring implements with which to batter their way in.

"McCann," I shouted, "call off your men! I have six bullets here; and there'll be six of you dead if you break in this door."

There was silence; then a mutter of voices—one angry with threat, others seemingly urging compromise. Whatever the argument, the advocates of peace seemed in the majority, for out of the hubbub McCann spoke loud enough to be plainly heard.

"There is no use of your threat, Hollis," he said, rapping on the door, "we have weapons as well as you, and you cannot fight alone against the whole ship's crew. The best thing for you to do now is to listen to reason."

"What has become of the French cruiser?"

He laughed, and I could hear Liverpool join in rather noisily.

"Five miles to leeward, and going strong. She'll be out of sight in two hours. There's no hope for you there, my man."

(TO BE CONTINUED.)

Answering Specifications.

"The jury in my case were a lot of fools."

"That couldn't be helped. The law requires a man to be tried by his peers."

You can't grow very great yourself by basking always in the shade of a fine old family tree.

THE KITCHEN CABINET

More dangerous than a little knowledge is much knowledge of things that aren't so.

FOR THE WHEATLESS DAY.

For breakfast we will have any kind of cereals except those containing wheat, for example, the old-fashioned oat meal will go well for this meal, provided it is well cooked, then for luncheon and dinner hot corn bread, rice muffins, steamed brown bread, bran bread, rye, and barley will give us a variety from which to choose. When preparing the breakfast oatmeal a larger quantity will cook nearly as soon, and the left-over amount may be put into a well-greased pan, and when cold cut in neat slices. This if fried nicely in sweet fat makes a most wholesome hot dish which will take the place of meat. We all know the value of cornmeal mush, both as a cereal and as a breakfast dish sliced and fried. Nuts, fruit, or bits of meat added to the hot mush make it more palatable and more nourishing.

In most of the breads a little wheat flour is essential to keep the materials together and when yeast is used to provide the gluten to hold in the gases so that the bread will rise.

Rice Muffins.—Sift together half a cupful of cornmeal, a cupful of pastry, a half teaspoonful of salt, four teaspoonfuls of baking powder, two tablespoonfuls of sugar. Beat one egg and one egg yolk, add a half cupful of milk, and when well mixed with the dry ingredients, add three tablespoonfuls of melted shortening with a cupful of boiled rice. Bake in well buttered muffin pans 25 minutes. The rice should be boiled tender and be quite moist.

When serving rice in various ways care should be taken to see that it is well done, as it is unwholesome under done.

Bran Bread.—Scald a cupful of milk, add two tablespoonfuls of shortening, a half teaspoonful of salt and three tablespoonfuls of molasses. When lukewarm add a cake of yeast softened in a quarter of a cupful of water, add one cupful of entire wheat flour and bran to make a soft dough. Do not knead. Let stand well covered until light, cut down and turn into a breadpan. When doubled in bulk, bake one hour.

Ice is a large item in many households; care in quickly opening and closing the chest will make a great saving in ice. Some housekeepers wrap the ice in newspapers and keep a few folded and laid over the ice, which saves wasting.

He who has conferred a kindness should be silent, he who has received one should speak of it.

GOOD THINGS FOR STATE OCCASIONS.

Celery to be used for the table, should be thoroughly chilled. By adding a slice of lemon or a dash of vinegar to the water, the celery is kept white and made crisp.

Apple and Cheese Salad.—Wipe and pare apples and scoop out 24 balls, using a French vegetable cutter. Marinate with French dressing and chill thoroughly. Mash a cream cheese, and add a tablespoonful of chopped pimentoes, and three-fourths of a teaspoonful of salt. Shape into 12 balls the same size as the apple balls and roll in finely chopped parsley. Arrange a bed of crisp heart leaves of lettuce, sprinkle over it the celery cut in fine strips an inch and a half in length. Arrange the balls on the lettuce and serve with French dressing.

Turnip Cones.—Wash and pare turnips and cut in cone or cube shape, using a vegetable cutter; there should be three cupfuls. Put them into a casserole, add a half teaspoonful of salt, one and a half teaspoonfuls of sugar, one-fourth of a cupful of sweet fat, a dash of pepper, and a half cupful of boiling water. Cover and boil until the turnips are tender, about an hour and a half.

Brown Giblet Gravy.—Pour off all the liquid in the pan in which the turkey has been roasted. From the liquid skim off six tablespoonfuls of fat and return it to the roasting pan, add six tablespoonfuls of flour and stir until well blended, then cook until well browned. Pour on gradually, while stirring constantly, three cupfuls of stock. If you have none, use any vegetable water that vegetables have been cooked in, such as potato water, stir and cook until smooth, season and strain. To obtain stock cover the giblets, neck and wing tips with five cupfuls of cold water and let simmer until reduced to three cupfuls. The giblets are finely chopped and added to the gravy.

Lemon Filling.—One large or two small lemons, rind of juice, one cupful of sugar, a half cupful of water, one egg, a tablespoonful of butter and three tablespoonfuls of flour mixed with the sugar. Cook all together until smooth and thick. The cake may be frosted with chocolate or simply sprinkled with powdered sugar.

Nellie Maxwell

GREAT BRITAIN FIXES PRICES OF FOOD

Rules Less Drastic Than Germany's, But Less Lax Than Ours.

EXPLAINED BY LORD RHONDDA

Chief Aim Is to Safeguard the Interest of Consumers First of All—Imposes Little Compulsory Rationing.

Washington.—Three general policies in food saving are now being maintained by three great nations, the United States, Great Britain and Germany.

The German idea is strict rationing of the consumer, and recently the United States food administration issued figures showing the present German ration, which is meager as to variety and far below average dietetic requirements.

The American idea in food saving is to secure voluntary co-operation, as far as possible, from both the public and the producer and handlers of food articles.

The British idea lies between the two. As little compulsory rationing as possible is imposed upon the general public. But there is a farreaching and rigid supervision of all food articles by regulating the manufacturers and merchants, by the establishment of maximum prices, and after December 30 rationing cards are to be issued for sugar.

What Lord Rhondda Says.

A statement just issued by Lord Rhondda, the British food controller, describing the British system of food control gives a succinct and a clear picture for comparison of the food-saving measures which are now being followed in the United States.

Lord Rhondda says:

"My aim is to safeguard the interests of the consumer, to do away with profiteering altogether, and to prevent excessive profits of any kind. The framework of our machinery is formed on the civil service. They are the administrators, but in all cases we secure the best available business men to advise them, as well as a number of expert committees dealing with almost every food commodity. The policy is to limit profits at every step from the producer to the consumer, and at the same time to regulate supply.

"A costings department under the direction of chartered accountants has been set up, through which the profits made by any manufacturer or retailer of food can be ascertained. The country has been divided into separate areas, in each of which a leading firm of accountants has been appointed by this department to do the necessary work. Reasonable profit based on prewar rates is added to the present cost, the price limits agreed on that basis, after consultation with the representatives of the trades concerned.

Sixteen Food Divisions.

"Decentralization is obtained by dividing Great Britain into 16 food divisions, consisting of so many counties. Each division is under the superintendence of a commissioner appointed by the food controller. In each of these divisions the borough, urban or rural district councils, or other local authorities, appoint local food committees, with limited powers and certain discretion, to carry out such regulations as regards price and distribution as may be issued from headquarters.

"Local tradesmen are registered with their local committees, and if any tradesman does not carry out regulations and orders he may be struck off the register and prevented from further trading. The various orders fixing or amending the maximum prices of meat, milk, potatoes, bread, etc., are communicated to the local committees, and the trades and public are informed through the daily and trades press. A staff of inspectors is kept at headquarters, and a number of sentences have been imposed by magistrates throughout the country for contravention of the regulations. The general penalty is a fine not exceeding $100, or a term of six months' imprisonment, with or without hard labor, or both. This punishment may be inflicted for every several offense. I purpose to make the penalties more severe.

"While the prices of practically all essential foods are now under control, no compulsory rationing is imposed on the general public, although all public eating places are rationed as to the amount of meat, flour, bread and sugar which may be used in every week on the basis of an average for each meal. After December 30 only half a pound of sugar per capita will be permitted. This will be obtainable through a system of each consuming householder or consumer registering with a specified retailer, and securing from the local food committee a card entitling his household or himself to the ration. The retailer will keep a record of his deliveries to insure his not supplying any one customer in one week with more than the proper allowance. Arrangements for the issue of these cards are in progress, and they will form the groundwork should it become necessary later on to ration other foodstuffs.

Restrictions in Manufacturing.

"There are many restrictions in manufacturing. Flour made from wheat must be straight-run flour, milled to 81 per cent extraction, and it is compulsory to mix in 20 per cent of flour from other cereals and pulse, and permissible to mix in up to 50 per cent, while no bread may be sold unless 12 hours old. Following on restrictions of 50 per cent and 40 per cent, manufacturers are now restricted to the use of only 25 per cent of the amount of sugar they used in 1915. Speaking generally, the use of foodstuffs for industrial purposes and for the feeding of animals has been either restricted or prohibited. Waste of bread is a criminal offense.

"Appeals for economy in consumption have been made, and a new campaign is being organized to this end. The maximum price of the quartern loaf has been reduced to ninepence for cash over the counter. It was found possible to do this by subsidizing flour. I find it necessary to control practically all essential commodities. The danger that in reducing prices we may restrict supplies and increase consumption is obvious, but I think it can be largely overcome.

"It has been suggested that our recent fixing of meat prices will lead to excessive slaughtering. If it does, we are in a position to control the transport of meat, and we are taking steps to license the slaughter house. A condition of the license will be that no more than a certain number of cattle are slaughtered per week. We also propose to control the sales through the auctions, and we can limit the quantity there. In the course of a month or two we hope to be able to determine approximately what quantity of meat ought to go to each industrial area and to limit the quantity if necessary. Maximum wholesale meat prices for the whole kingdom have been fixed independently of the cost of transport, but we hope to meet the danger that producing areas, because of this, might get more than their fair share of supplies by fixing a flat railway rate.

MARATHON RUNNER DISPATCH BEARER

Henri St. Yves, Famous Sprinter, Now Carries Messages for French Army.

HAS MANY NARROW ESCAPES

Spotted by Germans While Carrying Orders, He Remains in Water-Filled Shell-Hole for Five Hours—Wants to Fly.

Paris.—Henri Saint Yves, the former marathon runner and now a dispatch bearer in the French army, has returned to Paris for a special 24-hour furlough, granted him because of a particularly perilous mission which he carried out in the course of his duties in the trenches in front of Saint Quentin.

While trying to carry orders from the advanced French trench line to a French machine gun crew which had established itself in a shell hole in the middle of "No Man's Land" half-way between the opposing lines, Saint Yves was "spotted" by two German machine-gun crews, also holding shell holes.

They opened a cross-fire on the former long-distance runner and he dropped into the nearest shell hole which was almost full of rain water. Saint Yves remained in the water with just his head above the surface to enable him to breathe, for five hours, or until after darkness. Then he crept out and made his way to the French machine-gun position, delivered his orders to the lieutenant in charge and made his way to the trenches again.

Sent to the Hospital.

Saint Yves had to go to a hospital for ten days, however, as the shell hole water in which he had been immersed so long was "gassy," having assimilated the poisonous properties of the gas shells from both sides which had been rained down in "No Man's Land." Several hours after Saint Yves emerged from the shell hole the poisonous water got in its effect.

Saint Yves was wounded in the leg last May, but has entirely recovered from that and asserts he will be able to run as well as ever if the war ever ends and he gets back into civilian life.

The marathon runner has applied for a transfer to the aviation, and his superior officers have indorsed his request. He expects to be called to an aviation school to begin his training at any time. Saint Yves will try to be brevetted as a fighting pilot for flying in single-seated machines.

"I hear that poor old Tom Longboat has been killed with the Canadians up near Lens," said Saint Yves. "Well, Tom was a wonderful runner, but no man ever lived that can run as fast as the Boche bullets.

"Our sector at the front—opposite Saint Quentin, where the Germans retreated to the Hindenburg line—is supposed to be quiet all the time, but we had a little fight up there a few weeks ago that was pretty lively. I was assigned as dispatch-bearer, carrying messages from the colonel up to the line, because the German bombardment had plowed up all the ground behind our first and second line of trenches and torn up the telegraph and telephone wires, and their artillery had also wrecked a lot of our wireless.

Had Narrow Escapes.

"I had several close shaves in crossing out in the open, with the German snipers potting at me from 1,000 meters away. A couple of big shells dropped pretty near me, too, but then you get used to shells, whereas machine guns and rifles always annoy you.

"Pretty soon I hope to be in the aviation service and after I get brevetted as a pilot and have some experience of flying at the front, I'm going to apply to be sent to America as an instructor for United States army aviators."

The wife and family of Saint Yves are now at Dieppe. Contrary to general belief, Saint Yves was never a waiter in a Paris cafe. Born in Rouen, he lived and worked there as a bicycle repair man prior to going to the United States eight years ago as a long-distance runner.

LIKE MOTHER USED TO MAKE.

© COMMITTEE ON PUBLIC INFORMATION

Satisfying the large appetites of our boys in France is a tremendous undertaking and hundreds of men are detailed to this duty alone. Sammy is without doubt the best fed of anyone in France. White bread, a luxury unknown to the French for a long time, is served to him daily. Thousands of loaves are baked and thousands of sacks of flour are consumed in supplying his daily needs. All the flour transported from the United States as well as most of the other foodstuffs he uses. Enlisted men detailed to the field bakeries which accompany the army look after Sammy's wants as far as the staff of life is concerned. The picture shows a big hunk of the kind mother used to make, and a hungry soldier.

SURGERY CAN CURE CROOKS

Michigan Judge Declares Half the Criminals in the U. S. Might Be Saved.

Chicago.—"Fifty per cent of the criminals in this country under thirty years of age can be restored to good citizenship under proper surgical attention."

Judge George W. Bridgeman of Benton Harbor, Mich., made that statement at the dinner of the American Association of Orificial Surgeons in the Hotel La Salle here.

"Seventy-five per cent of the criminals brought into the courts of this country are between the ages of fifteen and twenty-four years and 80 per cent of them suffer from physical disability," said Judge Bridgeman. "In most of these cases this disability is responsible for mental disability, manifested in crime, and it is capable of correction."

U. S. FORCES WILL BE ARMIES OF SPECIALISTS

Camp Taylor, Louisville, Ky.—General Pershing's injunction to make the American army an army of specialists is being carried out among the 30,000 Kentucky, Indiana and southern Illinois men in the National army in this camp.

A board of examiners quizzes each drafted man as to his business in civil life. It is the aim of the officers to assign every man to the post for which he is most fitted.

Chauffeurs have been assigned to the motor truck division, telegraphers to the signal corps, clerks and business men to the quartermaster's corps and athletes to bomb-throwing platoons. A board of nine psychologists is investigating mental fitness of all men.

TO CURE DEMENTIA PRAECOX

Form of Insanity Hitherto Regarded as Incurable Conquered by Physician.

Huntington, W. Va.—Two patients formerly afflicted by dementia praecox, a form of insanity hitherto regarded as incurable, have been discharged from the Huntington State hospital as cured. Experiments devised by Dr. L. V. Guthrie, the superintendent, having proven successful.

The cures were effected by the use of an intravenous infusion of normal salt solution. Other cases similarly treated are showing improvement. The treatment is based on an analysis of the blood of afflicted persons showing a deficiency of sodium chloride.

FAMOUS TENNIS CHAMPION TRAINS IN OFFICERS' RESERVE AT PLATTSBURG

R. Norris Williams, noted tennis champion, is one of the famous athletes in training in the Officers' Reserve corps at Plattsburg.

Many of the champion athletes of the country are training for officerships in this branch of the service. The ranks of the Officers' Reserve are filled with the best possible material, the best young blood in America.

The 5,000 men have arrived in camp and the training is under good headway. It is the largest officers training camp in the world. In three months time these men are expected to be ready to drill the men produced by the selective draft.

PLANTZ, STAR HALFBACK.

Eddie Plantz, left half of the Marquette football team, has been accepted in the aviation corps of the United States army. He passed the examination in fine style and is now ready for the call.

Eddie was the boy who went through the Jackies' line for the last and winning touchdown in the game against the Great Lakes Naval Training station eleven.

PRAISE FOR SWEDE RISBERG

Duffy Lewis Says Admirers Should Not Feel Discouraged Because He Played Bench.

Duffy Lewis is one ball player who was surprised that Swede Risberg was not in the thick of the fight for the White Sox. "Swede certainly played wonderful ball all season against us," says the Red Sox star outfielder. "In every series that we stacked up against him he would turn in fielding plays that were wonderful. He was hitting the ball hard, but many times it was on a line into some one's hands.

"This boy Fred McMullin must not be overlooked, however. He gave a good account of himself in the series, and it is a matter of record that the fellows who get in the game at the last minute always pull off some sensational stuff.

"Risberg's admirers should not feel discouraged over the fact that he played the bench, for he made good this year beyond a shadow of doubt, and there would not be a chance of getting him out of the American league."

© International Film Service

Swede Risberg.

McGraw Has Reasons.

There are three reasons why John McGraw is sorry that Edward Trowbridge Collins of Columbia didn't go in for a Rhodes scholarship instead of baseball. They are 1911, 1913 and 1917.

Hannes Changes Clubs.

Hannes Kolehmainen, the Finn runner, is a member of the Finnest-American Athletic club. The athlete was formerly under the colors of the Irish-American club.

Tom Halpin Through?

Tom Halpin, the Boston A. A. quarter-mile runner, is understood to have concluded his race activities.

GERMANS NOW KNOW BETTER

Wouldn't Believe Players Were Anything but Canadians or English Until Game Was Played.

Germans held prisoners in France wouldn't believe the American soldiers now behind the front were anything else but Canadians or perhaps British until they saw them play ball. Now they know better. A correspondent writing from the front tells the story thus:

The Sammies used to meet German prisoners on the road every day. Once in a while they would strike one who could speak English—and the story was always the same.

"You can't tell us you're American," said one German spokesman. "You're Englishmen in American uniforms. The Americans can't bring over troops because the U-boats are sinking their transports."

One day when the Sammies had an afternoon off two ball teams fought out the regimental championship on a typical old sand lot. Working in a distant field the German prisoners "stalled" on the job watching the game. One of the ball players met a German on his way back.

"Who won?" asked the prisoner in English.

"We did, 6 to 4."

The German gave in.

"You must be Americans, all right," he remarked sadly. "No Englishmen could play ball like you fellows did. I know because I used to be a fan when I was in America."

TEBEAU RETURNS TO DENVER

Denver Paper Suggests Former Kansas City Club Owner May Take Over Bears Next Year.

The Denver News prints a story in which it suggests that George Tebeau, selling his Kansas City club, may return to Denver and take over the Bears, keeping them in a reorganized Western league. Tebeau back in the Western league would be odd, considering baseball history of 15 years ago, but then stranger things have happened in baseball and many an old sore has been healed by time. If memory is right Tebeau's former connection with Denver ended when the Western league took his franchise away from him, on the ground that he was trying to wreck the league by assisting in organizing the then outlaw American association.

Indoor Tennis in New York.

The Eight indoor courts of the Seventh Regiment Tennis club of New York will witness many prominent players in action during the next few months. Play will begin with the regimental single matches on December 22d. The national single contests will begin on February 11th.

Augie Kieckhefer to Quit.

Augie Kieckhefer, star billiardist, has decided to abandon competition in the Interstate Three-Cushion league after this season, and go into his father's business. Augie has been a topnotcher in the circuit since its organization.

Barger to Lead Memphis.

Cy Barger, the former Brooklyn pitcher, was reappointed manager of the Memphis Southern League baseball club for next season. Barger bossed the Chicks the latter part of the 1917 season.

Jack Lelivelt Quits Game.

Jack Lelivelt, once with the Washington club, has finally quit playing ball. He has accepted his unconditional release from Kansas City and has gone to his home in Chicago.

Only Two Sports Pay.

Football and basketball were the only two paying sports at Columbia university last season. More than $40,000 was expended for athletics, with a deficit of more than $1,000.

LISTENING TO DRUM CORPS.

"It is just like listening to a drum corps when you come to bat with Ray Schalk catching," writes Oscar Vitt. "He is always whistling. He uses a trill note and occasionally bursts into song. A batter has to be on his guard all the time to keep his mind on the game, for this boy Schalk is always chatting or doing something behind the bat, I cannot figure how he manages to keep it up, for he works it on every batter throughout the game."

MAKES LONG BALK LINE RUN

Ora Morningstar Performs Unusual Feat in Contest at Detroit—Beats Hoppe's Record.

Ora C. Morningstar, the latest addition to Detroit's select family of billiard stars, gave another demonstration of his worth as a balk-liner extraordinary when he showed a run of 348 against one of Michigan's leading amateurs.

The match was to have a 300-point affair and Morningstar, in his third inning, continued to play until he missed on a difficult one-cushion across the table. In his effort to drive the object ball down the table and back again into position, which complicated the shot, a kiss from the object ball on its return robbed him of the count by a narrow margin.

Ora Morningstar.

However, he ran 488 points in three innings, showing runs of 40 and 100 in his first two times at the table, and averaging 162 2-3. This run is better than the best ever recorded in any match in this state. Hoppe's 257 being the previous record in Michigan.

MITCHELL MAY HAVE ERRED

Cub Manager May Have Passed Up Star When He Let Reuther—He Is Hard Hitter.

It may be that coming events will stamp Fred Mitchell as having passed up a trick. He cut Dutch Reuther away from the Cub payroll and the southpaw hitting pitcher became a member of Christy Mathewson's marvelous Reds. Reuther was doing fair pitching for the Cubs and his ability to be stationed most anywhere as a utility player makes him doubly valuable. He is one of the best hitting-pitchers in the big league.

NICHOLLS RESIGNS AS "PRO"

Gives Up Professional Golf to Enter Business—Expects His Release December 1.

Gil Nicholls announces that he has decided to give up professional golf and enter business. He said he had sent his resignation as pro to the Great Neck Golf club and expected to be released from his duties there on December 1.

Sharpe in Service.

Chester J. Sharpe, former Western high school athlete and Virginia Polytechnic football player, is on his way to San Antonio, Tex., to join the flying school corps. Sharpe recently passed his examinations for the aviation service.

Gharrity Has Confidence.

Manager Mike Gharrity of the Portland team of the Eastern league, believes baseball will pay next season. He is trying to buy the Portland club's franchise.

Is Champion Woman Shot.

Mrs. L. G. Vogel of St. Louis, who broke 88 out of 100 targets in the Grand American shoot in Chicago recently, is considered the champion woman trap shot of the country.

What Giants Discovered.

"If Cicotte has an illegal delivery, we have not discovered it," said Captain Herzog of the Giants. "What we have discovered is unusual control and a variety of pitches."

Kansas City Has Hunch.

In Kansas City they have a hunch that the American league plans to embrace that town next year.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

CHANGING PLACES.

"What's the matter, Mr. Sun?" asked the King of the Clouds. "You seem to be having a high old time."

"Well," said Mr. Sun, "I can't very well have a low old time because I am never low down in the world. I am always high up, and so I have a high time it's true. And I suppose it's a high old time, because time is old. There has been time as long as I can remember and that's a very long while I can tell you."

"It is indeed," said the King of the Clouds. "Have you any idea how old you are?"

"I haven't," said Mr. Sun. "I really have been so busy all my life that I have never counted the time. But I know it's such a long time that I couldn't possibly figure it all out. For it would take some one who could do arithmetic to find out."

"What's arithmetic and who can do it?" asked the King of the Clouds.

"Arithmetic is a lesson they study in school. School is a place where children go to learn about all sorts of things such as how to add two and two and how to spell words. They learn how to talk beautifully and they find out where they live in the world. They also study about other places and about the seas and the mountains."

"Gracious," said the King of the Clouds. "I am glad I don't have to go to school."

"So am I," said Mr. Sun, "but they seem to be quite happy. I suppose they become just as used to it as we do to shining and raining."

"I suppose so," said the King of the Clouds. "But why are you having such a frolic today?"

"I heard the earth whispering to the breeze," said Mr. Sun, "that some of the raindrops were leaving. The earth said that Mr. Sun was drawing them to him, and I laughed for it was quite, quite true."

"I think I'll have to have a frolic soon," said the King of the Clouds.

And the sun drew water from the earth through his powerful ray workers. What fun he did have and how he laughed and shone and sparkled.

A few minutes later some wild ducks flew high up in the air. "Where are you going?" asked the sun.

"We're going to fly far out in the bay," they said. "Do you see?" And they pointed with their wings beyond the city and beyond the country, near the place where the ocean and sky were all that could be seen. The bay was very near the ocean, and it was only a little distance beyond.

"We're Going to Fly Far Out," They Said.

"I think," said Mr. Sun, "that I will join you. I will move along slowly and will shine where you go, for the King of the Clouds sent some of the army of raindrops out there this morning."

"To be sure I did," said the King of the Clouds. "Well, if you go out there, they can come in here. We'll just change places, eh?"

"The very idea I had in mind," said Mr. Sun.

"Are you coming, are you coming?" called the wild ducks. "We are in a hurry today, for we need good, quick flying to make us feel better. We're greatly in need of exercise."

"I'm coming, I'm coming," said Mr. Sun.

So Mr. Sun followed the wild ducks out into the bay and then he shone down over the great ocean. The raindrops left as soon as Mr. Sun appeared, and they began to play about where Mr. Sun had been shining and where he had been drawing the raindrops from the earth.

The people down on the earth said, "The sun drew water from the earth and that's a sign of rain. To be sure, here is the rain. And probably quite nearby the sun is shining. It always seems so strange that in one place it may be raining and in another the sun may be shining."

But they didn't know that this time the sun and rain had arranged to change places and that the sun was shining just where the raindrops had been playing!

But the King of the Clouds chuckled as he heard the people talk.

Making a Venetian Blind.

The boss of a woodworking shop in West Philadelphia was examining an Irishman as to his fitness for a job as a cabinet maker.

After a somewhat lengthy examination, the foreman asked: "How would you make a Venetian blind?"

"I'd poke him in the eye wid me screw-driver," answered the tired Celt. —The American Boy.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

UNIFORM PIG CROP

One of the First Considerations in Selecting Original Herd.

CONFORMATION OF GOOD SOW

Many Judges of Swine Regard Good Roomy Females as Being Especially High in Fecundity—Male Is Half the Herd.

In feeding hogs for the market, as also with any other class of meat animals, larger returns are obtained when the stock is as nearly uniform as possible, and as it is very profitable for each farmer to breed his own feeders, particular attention should be given to the selection of the original breeding stock. Uniformity is of primary importance, for to have a uniform crop of pigs there must be uniformity in the breeding herd, and to obtain this must be one of the first considerations in selecting the original herd.

The Sows.

The females of the herd may be obtained by purchasing bred sows or gilts safely in pig to a boar of recognized worth. As it is often difficult to obtain a sow which has shown herself to be a good breeder by the previous litters she has produced, it is advisable for economy's sake to purchase bred gilts. These should be about twelve months old, being bred after the age of eight months, and if possible all should be in pig to the same boar. Here is the first opportunity to practice selection for uniformity; whether pure-bred or not, the sows should be similar in color, marking, type and conformation. The type of the sows selected should be the one which the market demands. While there is some variation between the different breeds, it is largely a matter of characteristics, as a good individual, no matter what breed it represents, if properly fed and managed will make economical gains.

Conformation.

In conformation a brood sow should show first of all femininity. This is well marked in the hog if a close observation is made, and is characterized by quality and refinement in all parts of the body. The bristles are finer and less erect than those of the boar, giving the sow a smoother appearance. The forehead is smoother, the neck much thinner, and a little longer in proportion to the rest of the body. The shoulders are not as heavy, although they must not be narrow, for such a condition is an indication of lack of constitution. By no means accept any breeding animal that is narrow-chested, for it is a sure indication of lack of vitality and consequently of breeding ability. Ample capacity in the middle should be provided by well-sprung ribs, and long, deep sides. Many judges of hogs regard good roomy sows as being especially high in fecundity, and this characteristic is certainly no detriment to their conformation.

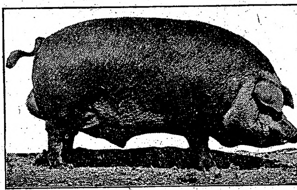
A sow should show the type demanded in a market animal, namely, a strong, wide, deeply fleshed back; smoothly covered shoulders; plump, well-rounded hams; and a trim, neat underline. A wide, well-developed pelvic cavity will insure easy parturition, and the udder should be evenly and well developed and have at least 12 teats. Her legs should be strong and well placed, have good clean bone, and strong, straight pasterns. It is not of as great importance to have perfect feet and legs in a sow as in a male, but she should show no weakness at this point. A sow should have scale and size, combined with quality. Strong, clean, hard bone, trim joints, neat ears, fine, glossy bristles, and freedom from folds and wrinkles in the skin, are all indications of quality. A large, raw-boned sow, having plenty of capacity and size, but lacking in femininity and quality, is one of the poorest investments a breeder can make, for her pigs will be slow to develop, hard to fatten, and lacking both in numbers and in uniformity.

Selection.

If possible, the first purchase of sows should be made from one herd, for in this manner it is easier to get uniformity. Uniformity goes deeper than the mere visible type or conformation; it is determined by past ancestry and is controlled by the characteristics contained in the germplasm. The germplasm is continuous, extending from individual to individual, and any member of the chain shows in its visible conformation only a few of the possible combinations. In other words, a sow may not produce offspring similar in type to herself, unless her ancestors were of the same type. By selecting the sows from one herd, it is not only possible to choose animals similar in visible type, but they are apt to be similar in dormant characteristics as well. In buying such animals the farmer is not purchasing separate individuals to form so many breeding units, but rather kindred individuals, all parts of a single established line or type which will blend together to form a single breeding unit.

The Boar.

The farmer who lives in a community where it is possible to obtain the services of a good boar, and who has only a few sows, will not find it profitable to keep a male simply for use in his own herd. However, if he has six or more sows, or if it is impossible to get the use of his neighbor's boar when necessary, it will be well to purchase one of his own. It is often desirable to delay the purchase of the boar until some time after the original female stock has been selected. If the gilts were bred at the time of their purchase, the service of a boar will not be needed until several months later, when it is necessary to breed for the second lot of pigs. This is not only a saving of money at the time of starting the herd, when expenses are apt to be very heavy, but it also gives the breeder time to study the original sows along with their offspring and select a boar that will correct their faults.



BOAR IS MOST IMPORTANT INDIVIDUAL IN HERD.

GARDEN POINTS FOR WINTER

Spread Manure Free and Turn Under Unless Ground Is Too Wet or Frozen—Mulch Strawberries.

(By L. M. MONTGOMERY, Ohio University.)

If the ground is not too wet or frozen, continue to spread manure freely and turn it under. Fall plowing will assist in making the organic matter available. It will also bring to the surface multitudes of the larvae of harmful insects and will cover up others normally nearer the surface so as to prevent their emergence next spring.

Mulch the strawberry bed, after the ground freezes, with three or four inches of coarse straw. This will protect the plants from alternate freezing and thawing. When partially raked aside in the early spring, the mulch will serve to retain the moisture and also keep the fruit clean.

The tops of the asparagus bed should be cut, thrown into the fire and burned by this time. After the ground freezes apply a heavy coat of manure.

Good Food Is Essential.

Good food, and plenty of it, will turn the tide for successful poultry keeping and make the work a pleasure.

Make Use of Milk.

Be sure to make use of milk if there is plenty to be had, whether it is whole, skimmed, sweet or clabbered.

Demand for Guineas.

There is an increasing demand for guineas, particularly from hotels and restaurants in the large cities.

Carriers for Shipping.

Eggs and poultry are sent by parcel post in carriers that are made and approved for such purpose.

No Public Benefactor.

He is nowise a public benefactor who keeps two cows to do the work of one.

Mistake With Little Pigs.

It is a mistake to feed the pigs sour milk when they are learning to eat.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

STUPID ANIMALS.

"The ostrich in his yard in the zoo was grinning," said Daddy, "and of course as every-one knows he looks even more foolish that way than any other. The ostrich is far from being a bright bird.

The Ostrich Grinned.

"He was not grinning at anything special. In fact, if you had asked him, and if he had been able to tell you, he would have said that he was grinning at absolutely nothing at all. He was just grinning!

"The camel was sitting down in his zoo home, and he was chewing as hard as he could. His mouth went from side to side as he chewed and he also grinned in a very silly fashion.

"Don't you ever wish you had a short neck?" asked a sparrow who had hopped just outside the giraffe's cage.

"'No, I don't bother to wish about anything,' said the giraffe.

"'What's the trouble?' asked the sparrow. 'Are you too discouraged with life?'

"'No,' answered the giraffe. 'I am not discouraged. I simply cannot be bothered with such things.'

"'That seems funny to me,' said the sparrow. 'It wouldn't be natural to live without fights and wishes and trying to get things. I can't understand you at all.'

"'Don't bother,' said the giraffe. 'I am sure it is too much trouble.'

"'It wouldn't be any trouble if I could only understand you,' said the sparrow. 'I've thought about it and thought about it, but it never did any good. You have always been a puzzle to me.'

"'I don't see why you ever bothered to think about it,' said the giraffe.

"'You really don't see why any creature takes the trouble to find out about anything, do you? Are you so terribly lazy?'

"'Oh, I'm not energetic,' said the giraffe, 'but the chief trouble with me is my mind.'

"'Your mind?' repeated the sparrow as he hopped on a nearer bar, so he wouldn't miss a word of what the giraffe was saying.

"'My mind,' said the giraffe again. 'I haven't much, you know. In fact, I don't believe I have any at all. Perhaps a wee scrap, but it certainly doesn't amount to anything. So as I haven't any sense, and very little mind, I never think about anything. You see, I couldn't if I tried!'

"'I see,' said the sparrow. 'But doesn't it make you very unhappy to think that you are so stupid?'

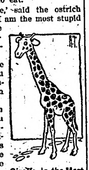
"'I don't think about it,' said the giraffe. 'I just am stupid, and that's all there is to it.'

"'Isn't there anything you bother to think about?' asked the sparrow. 'Or is it impossible for you to think about anything?'

"'I think about my food,' said the giraffe. 'I am very fond of hay and all sorts of vegetables. I also like mulberry leaves, and I absolutely love milk. I would rather have it than water any day.'

"'Well,' said the sparrow, 'I am glad you have some things to be interested in, and that is quite a list of different kinds of things to eat.'

"'Listen to me,' said the ostrich from his yard. 'I am the most stupid animal in the zoo. You mustn't believe the giraffe.



Giraffe Is the Most Stupid of All.

"I am far more stupid than you are," said the camel, as he went on chewing.

"The ostrich grinned even when he scolded the giraffe for boasting. 'You always take all the praise you can get,' he said, 'and you praise yourself too much.'

"'I shouldn't think it was praising himself to say he was so stupid,' said the sparrow.

"'We think it's fine to be stupid,' said the camel.

"'There is certainly no accounting for tastes,' said the sparrow.

"And as he left the zoo and flew back to his luncheon of bread crumbs, he heard the keeper say:

"'The camel and ostrich are very stupid, but the giraffe is quite the most stupid animal of all.'

"So the sparrow knew that the giraffe must be feeling quite satisfied, and that the camel and ostrich were comforting themselves that at least they were very stupid."

More Important.

Assisted by a small son, a war gardener was striving manfully with his work, and after a special effort leaned, for a moment, on his spade, and looked around him.

His assistant also rested.

There was a moment's expressive silence, and then the boy remarked with conviction: "Father, this isn't gardening—it's farming."

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

Fads And Fancies Of Fashion

MATCHED SET FOR AFTERNOON.

When the talk is of richness and luxury in winter apparel, the terms are usually velvet and fur. They have joined forces in the outer garments of women and do their luxurious part for her, whether to provide warmth or to suggest prosperity. Presses, suits and coats are trimmed with furs, and hats borrow of an opulent world, furs for their decoration.

One of the handsomest little accessories of dress which the season has presented appears in a cape of velvet bordered with fur and a hat made to always keep it company. The cape fulfills the mission of those beautiful scarfs which women carry to protect themselves from drafts and to "dress up" the costume. It does not promise much warmth, but it has other virtues to commend it. This set is useful for wear at the afternoon concert or club meeting, or wherever one may have any need for it.

The cape pictured is made of black silk velvet, scalloped about the edges, and is lined and piped with blue silk. A fringe of skunk fur set in between the velvet and silk lining extends all round the cape. It is gathered with several rows of shirrings at the neck, to form a narrow standing collar, and it ties at the front with long ties of narrow black grosgrain ribbon. This is finished at the ends with balls of the fur capped by shirred blue ribbon like the lining.

AN ARISTOCRAT AMONG FROCKS.

In the small hat, with drooping brim, the facing and piping about the brim-edge are of the blue silk. The crown is cut in sections, and fur fringe is sewed in the seams that join them. Grosgrain ribbon, like the ties, is fashioned into a little bow with two loops and two ends and placed at the front of the hat. Small balls of fur, made just like those on the ties, are sewed to the ends of the bow, and finish the trimming.

This black satin frock will provoke a longing to possess it in the hearts of women who love simplicity and distinction in their clothes. These two attributes belong to it and they contribute as much as richness of material, or more, toward making any dress elegant. This particular model, made up in the season's darker colors, would remain as chic and aristocratic looking as it is in black.

It is cut on long, almost straight lines, with a little hint of severity in them and it is intensely modern looking—a fashion of today for the woman of today. A straight-line long-waisted bodice supports a long tunic with three close-set rows of shirring at the top where it is joined to the bottom of the bodice. The tunic is faced up about the bottom and embellished with 18 parallel rows of machine stitching put in with a perfection of workmanship that is beautiful. The bodice fastens down the front with satin-covered "acorn" buttons and the same kind of buttons, pendent on heavy silk twist, finish the long, close-fitting sleeves. The neck has a Chinese collar of white washable satin and there are narrow, plain turned-back cuffs of this satin. The neck in this model might be differently treated without detracting from its good style. It might be finished with a high collar having rows of stitching and a narrow turnover of white satin next the face for those who find the Chinese collar unbecoming.

One of the best bits of strategy on the part of the designer of this frock appears in the narrow, flat sash, made of the satin, that is placed at the normal waistline. It encircles the waist and is crossed in the back with the ends brought round to the front and looped over. They reach below the knees and are finished with long silk tassels. The chances are that occasional snap fasteners about the waistline hold them in place always. There is a plain underskirt of lining faced up with satin.

Julia Bottomley

News of the State

Condensed for Busy Folks

Mrs. John Harry of Fergus Falls has received a telegram that her brother, Arthur Bates, was killed in action on the battlefield in France.

The Aitkin-Crow Wing county sanatorium at Brainerd for treating tubercular patients will be completed in February at a cost of $40,000 and be occupied in the spring.

The mayor and chief of police of Lester Prairie and 10 other residents of that village have been indicted by the McLeod county grand jury on a charge of being members of a raiding party that assaulted owners of the Klatt hotel July 16.

A large delegation of Pipestone county automobile owners went to Omaha to attend a meeting of the executive committee of the King of Trails association. The route for the trail between Sioux City and Ortonville, Minn., will be decided.

As a result of alleged disloyalty utterances and publications 15 indictments have been returned against Faribault residents by a grand jury, and J. E. Palmer, assistant attorney general, has gone to aid James P. McMahon, county atorney, in the prosecutions before District Judge A. B. Childress.

F. S. Schwalen, a Triumph banker, arrested several weeks ago on a charge of interfering with the sale of Liberty bonds, appeared in court at Fairmont and was fined $100 by Judge E. C. Dean. When his case was called Schwalen appeared before the court wearing Liberty Loan and Red Cross buttons. He told the court he had subscribed to the Loan and Red Cross fund, and for that reason was given a light fine.

Effort to co-ordinate Minnesota organizations engaged in patriotic service will be made by representatives of the State Public Safety commission at a conference in St. Paul soon. Announcement of the proposed conference is made by C. W. Henke, publicity director of the commission, who said the undertaking is along lines laid down at a meeting in Chicago which was called by Arthur E. Bestor of Washington, whom President Wilson has placed in charge of national patriotic work.

The Rev. S. M. Kelly has been formally installed as pastor of the First Presbyterian church of Red Lake Falls. Mr. Kelly went there from Stephen, Minn., where he had been pastor for two years.

Four hundred delegates attended the annual convention of the Minnesota Union, American Society of Equity, which was held in St. Paul. The real business of the session were the discussion of market problems, and plans for extending the organization.

St. Paul's mild epidemic of smallpox assumed serious proportions when 10 new cases were discovered. Officials of the health department, who have supervised the vaccination of approximately 1,500 persons since the present epidemic started a month ago, assert that it will be necessary to vaccinate at least 2,000 more to halt its spread.

E. B. Ford, Mrs. Elizabeth Ford and Edward Bosky, indicted on a charge of disloyalty in connection with the publication of the Faribault Referendum, entered pleas of not guilty before Judge A. B. Childress. The charges of disloyalty are the outgrowth of certain items published in the newspaper of which the defendants are owners and editors.

All the patriotic organizations of Minnesota will be represented at the annual convention of the National Security league, to be held February 21, 22 and 23 in Chicago. The meeting this year will be in the nature of a national war time council, which will call in for consultation the Red Cross, state safety commissions, civilian relief societies and all the other organizations brought about by war exigencies.

Two recent announcements from Washington marked progress in preparing for future operation of the selective draft in Minnesota. One stated that December 1 had been set as the date on which all local boards should begin preparations for putting into effect the new classification system for drafted men. The other stated that Dr. William J. Mayo had been named chief of the medical advisory organization for the state.

A new industry has been born in Minnesota—the production of sheep on the long unproductive cutover lands of the northern counties. This was the word brought back by Prof. W. A. McMorrow of the State Agricultural school and D. E. Willard, development agent for the Northern Pacific railway. They attended a series of meetings arranged by the newly organized Minnesota Sheep Growers' association and reported the farmers enthusiastic over the project to put a "flock of sheep on every farm."

Thomas McLaughlin, Jr., who was assaulted and robbed of a sum of money in the vicinity of South Hastings, and who was taken to the Latts hospital for treatment owing to his critical condition, is reported as improving. His assailant as yet has not been arrested.

The importance of more pure bred cattle in Minnesota to prepare for the enormous European demand, which is sure to follow at the close of the war, was emphasized at the annual banquet of the Minnesota Aberdeen Angus Breeders' association in St. Paul.

STATE TO SELL IRON ORE UNDER LAKE BED

OFFICIALS OPEN NEGOTIATIONS TO DISPOSE OF RICH DEPOSITS NEAR AURORA.

WANT ONLY ENGLISH TAUGHT

State Safety Board Urges Exclusive Use in That Language in Public and Private Schools of State.

St. Paul.

Negotiations for the iron ore under Syracuse lake, near Aurora, estimated at 3,000,000 tons, which will bring the state $1,500,000 in royalties, have been opened by Fred B. Snyder of Minneapolis, representing a mining company, with Governor Burnquist, State Auditor Preus and Attorney General Smith, as representatives of the state.

The offer to purchase the ore under Lake Syracuse is the first made under the new law providing machinery for the sale of such ore, the title to which is held to be in the state. The law fixes a minimum royalty of 50 cents against the 25-cent minimum that obtains in most iron mine contracts now affecting state property.

The state officials agreed that F. A. Wildes of the state mining department will make an immediate investigation and report. Arrangements for a sale by competitive bidding will be perfected at another meeting.

* * *

Want Only English Taught.

The exclusive use of the English language in all public and private schools in Minnesota is urged as a patriotic duty of school officials in a resolution adopted by the Minnesota Public Safety commission and made public by Commissioner C. W. Ames, to whom it was referred for revision. Foreign languages are to be prohibited except as a medium for the study of those languages themselves or for religious instruction.

The Public Safety commission took up the subject first on a complaint that a private school in Dodge county was giving instruction in German exclusively. C. G. Schulz, state superintendent of education, was requested to investigate, and the resolution is the result of recommendations by Commissioner Ames based on findings in the survey. The commission previously inquired into the suitability of various German text books used in Minnesota schools, with the result that a large number were reported undesirable.

* * *

Board Clashes With Rhinow.

A clash between state draft officials and District Board No. 3, St. Paul, over exemptions for about 250 men in the new Second Minnesota Field artillery regiment and steps toward the removal of the Ramsey county local board, White Bear, have been made public at the office of Adjutant General Rhinow at the Capitol.

Inclined to believe that enlistment in the Second artillery should entitle a man to draft exemption, especially after the new regiment was granted Federal recognition, state draft officials appealed to authorities at Washington for a reversal of ruling to the contrary.

A telegram from Provost Marshal General Crowder was interpreted to authorize such exemption for the present, but the St. Paul district board rejected the construction placed on the message.

Major W. A. Curtis, chief draft aide to General Rhinow, then announced that local boards would be requested to reopen each of the 250 cases hinging on the question, to remove jurisdiction from the district board.

* * *

State Hygiene Board Named.

The Minnesota Public Safety commission, meeting behind closed doors at the Capitol, approved the formation of the Minnesota Social Hygiene commission and Governor Burnquist later appointed 52 members of the organization. The commission is to assist in the control of venereal diseases and in the better enforcement of laws governing social conditions in the state; to promote the education of the people in social hygiene and to afford protection and employment to the socially unfortunate.

* * *

Koch Must Remain.

Hugo V. Koch, St. Paul, will not be permitted to resign from the Eleventh division draft board, even to take up other Federal work connected with the prosecution of the war.

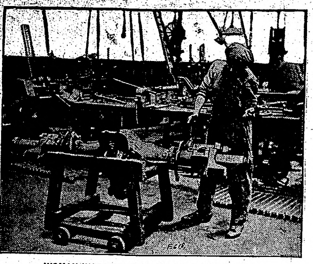
The announcement was made by Major Curtis, chief draft aide to Adjutant General Rhinow. Major Curtis notified Mr. Koch that local board members are under Federal draft and his services cannot be dispensed with at this time.

* * *

To Push Brewers' Suit.

With the final warning having been given, the attorny general will proceed to institute suit against all breweries where action is justified in the face of evidence of violation of the state laws, it was asserted at the Capitol. The seriousness of the safety commission's attitude was emphasized by Ambrose Tighe, commission counsel, who asserted a concerted effort will be made to see if illegal sales may be stopped without resorting to prohibition. Evidence already is at hand, he said.

ENGLISH WOMEN BUILDING MOTORBUSSES



WOMAN WORKER AT WORK ON A REAR AXLE.

One of the great surprises of the war has been the wonderful manner in which women have come to the fore and carried on work formerly done by men. In many cases the work was of a highly technical nature, requiring long experience and practice. Yet, in the course of a few months it has been possible to train women to carry out in a very efficient manner a great deal of this work.

The photograph was taken in the plant of the London General Omnibus company, which has not only been able to train women as conductors, but actually employs them in the highly technical branches of motor engineering, which they carry out efficiently in practically all its branches.

When it is considered how many people intrust their lives to motorbusses built by these women it will be readily realized how efficient these women must have become to be intrusted with this class of work.

Not only are they building motorbusses, but also motortrucks and other cars much in demand by the war department for service both in England and on the fighting front.

TRY GREASING CAR

Gives Owner of Machine Sensation of Having New Auto.

HAVE SPRINGS LUBRICATED

Vehicle That Beforehand Had Registered Every Bump in Road Appears to Be Floating Along—Squeaks Disappear.

It is a great revelation how much better an automobile runs after having the springs thoroughly lubricated. A car that beforehand has registered every bump in the road in no uncertain way appears to be floating along, after the spring leaves have had a full supply of graphite and grease. Not only do the squeaks disappear, which is comforting to the ears, but the whole car appears to be lighter and full of life.

Try it out on your car and see what a tremendous improvement it makes. The effects of full and complete spring lubrication are many. Tires seem to do better service. The car rides better. You can be sure you are helping to lengthen the life of the piece of machinery you have bought.

Attention to Lubrication.

Taken all in all, there is nothing that makes a car stand up and perform like careful and consistent attention to lubrication. You can be sure of getting maximum service out of a car that hasn't been neglected. If you do neglect it, you can be just as sure that you won't get anywhere near what you are entitled to.

It is safe to say that a very large percentage of the troubles that motor car owners have is due to their failure to attend to the proper upkeep of their machines. If they are neglectful of this feature, they not only pile up expense upon themselves—they help to damage the reputation of the car they have bought.

It is a delicate matter for the automobile dealer to have to tell the owner that he isn't doing his share. A lot of motor-car owners think the dealer is merely trying to pass the buck. But those who have had service station experience are only too familiar with the neglect of essentials shown by owners of cars. They have seen too many cases of cars that come in "dry," along with the walls of the owner that the car is a "lemon."

Pleasure to Owner.

Looking after his car ought to be a sort of pleasure to the automobilist. He ought to be able to spare a little time in each week to do the outstanding necessary things. If he doesn't think any more of the money he has invested than the spending of this time amounts to, he must be a reckless sort of person.

All this is not so much intended for the man who has a chauffeur or the man who keeps his car in a garage, where they look after it right along. But men of this type owe it to themselves to make sure that the essentials are being performed. It is too easy for a hired driver or a garage man to neglect things for a day or so, until finally the time runs into a week or more and the car actually begins to suffer.

The majority of motorists attempt to look after their cars for themselves. Most of them do not appreciate for a moment just how much lubrication amounts to.

And here's another thing. After you have had your springs thoroughly greased, try a set of leather spring covers. They'll keep the grease in and the dirt out. Your lubricant will last longer and the effects of it will be so much the more prolonged.

KEROSENE IN A CARBURETOR

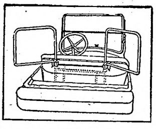
Practical Device Offered by Leading Manufacturer—Tried Out in Foreign Market.

Motorists have realized for some time that a shortage of gasoline was inevitable at some future time and while the increasing price of gasoline has not been a serious drawback to the use of pleasure cars, has been an item of moment in the operating expense of commercial vehicles of various kinds. A practical kerosene carburetor has been recently offered by a leading manufacturer that has been in process of development for several years and which was thoroughly tried out in the foreign market before it was introduced for domestic consumption, according to Scientific American. The carburetor will handle kerosene, benzol, distillate or any hydrocarbon with a final boiling point below 600 degrees. It can be utilized on either commercial cars or pleasure autos because it permits of flexible engine operation by throttle control.

EXTRA WINDSHIELD FOR AUTO

Protection From Wind Afforded Passengers on Rear Seat—Swung to Any Desired Angle.

Passengers in the rear seat of an automobile may now have the same protection from the wind as formerly only the passengers in the front seat have been accustomed to having. This is accomplished by the use of the auxiliary windshields shown in the accompanying drawing. Two small swinging windshields are attached to the ends of the robe rail on the back of the front seat of the car. These are pivoted so they may be swung into whatever position desirable. If the wind comes "quartering" from one side they may be swung at whatever angle is necessary to protect the passengers, so that each passenger in the rear seat will have a clear glass windshield between himself and the wind.



Extra Windshield.

UNGUARDED DITCH A MENACE

Causes Many Automobile Accidents, Says American Highway Association in Recent Report.

The unguarded ditch at the side of the road is a growing menace to motor travel, according to the American Highway association. Formerly, says a recent report, when roads were used only by horse-drawn vehicles, the deep side ditch and the high, narrow embankment were not particularly dangerous. Between the driver and the horse there was enough combined intelligence to avoid accidents at such places.

But with the advent of the automobile the conditions have changed. If a car is forced off the hard road way on to soft shoulders even the most skillful driver will sometimes lose control of it. In such cases there is a real danger to the occupants of the car.

A record compiled by state authorities in Iowa showed that 353 cars turned turtle in a period of three months.

Friendship of America One of the Greatest Needs of Russia

By DR. FRANK BILLINGS
Head of the American Red Cross Special Commission to Russia

Russia's greatest need today is sincere friendship from the outside. In her struggle for a constitutional and democratic form of government, America can be of immense service, not so much in the way of gifts of money, but by letting the people of Russia know what is going on in this country, and what the United States is doing in the war. Russia is absolutely without any American news that is worth while. Most of what they hear about the United States in the war comes to them through pro-German propaganda, and is to the effect that this country is fighting for pecuniary gain; that the United States is a vassal of England, and that England wants to rule the world. They have not heard a word of President Wilson's reasons why we are in this war.

However, America is looked to by the Russians as their best friend. The further cementing of friendly relations will aid Russia in its war operations, and the Red Cross, through its relief work already done and that which will be carried on, will do much to bring this about. The Red Cross commission to Russia has established a well-organized office, with an efficient personnel in Petrograd and on the road as transportation agents.

Russia turns to America as her best friend, and if America will recognize the great power of the people of Russia, their inherent goodness of character and stability, their desire for order, their desire for democracy, by the help which America can give she will cement that friendship for all time.

With the American Red Cross firmly established in Russia, it is to be the policy to furnish such material as may be needed in the care of the sick and injured soldiers, and some degree for the civilian population. The members of the cabinet of the Russian provisional government, the sanitary department of the army, the Russian Red Cross, all the relief organizations, and the "All Union of Zenstvos" have expressed their gratitude for the aid which the American Red Cross has already afforded. A continuation of this good work by the American Red Cross will be one of the most potent factors in cementing that friendship which is so much desired.

TO THE HOME GIRL

By Edgar Rice Burroughs.

You have laid down your knitting to read the paper. The chances are fifty-five or better that you are knitting a sweater that won't fit or a scarf that is too narrow or too wide, for some soldier or sailor, and the other end of the bet—and it may be the safer end—is that you are knitting a mustard-colored sweater for yourself.

The boys need sweaters and scarfs, and more still they need something that you can give them—and not interfere with your knitting. They need association with the sort of girl you are—the good girl, the home girl—the sort of girl they went to see on "beau night" back in Syracuse, or Escanaba, or Nampa, or Hermosa.

There are soldiers passing through your home town, or, may be, there is a great cantonment near you. What are you doing for these boys that a knitting machine couldn't do? They are the same kind of boys that you have always known—they are the best boys, the cleanest boys that the country has produced.

You can give them something infinitely finer than a sweater—something that will warm them more than a scarf. You can give them a memory of virtue, and character, and patriotism to take to France with them that will represent an ideal to them—an ideal of home, mother, sister, and sweetheart, of all that personifies country, of all of which the flag is the emblem—an ideal to fight for, to die for. You can give them this if you will open your home to them, if you will place in your window some sign that will say to them that any man in the uniform of our country is welcome there.

Many of these boys have never before been away from home. They are homesick. They are worked hard five and a half days a week and then they go to town on leave. By that time they are ready for anything that will help them forget their homesickness. Here is where you can help.

There are girls who meet them on the street corners—little fools who mean no harm and do a lot of it—and there are other girls, who live under the red light, and serve, unwittingly, the kaiser.

From these two classes you can protect the boy who has gone away from his home to learn to fight for you and your home. If a bad woman may hang a sign in her window to lure men to destruction, it is your duty to display an emblem upon your home that will offer these men the home life which is the only antidote for the homesickness which drives them to purchase evil companionship.

Photographic Lens and the Human Eye Are Quite Alike.

That the human eye and the photographic lens are very much alike in design and operation is a well-known fact. If you look through a photographic lens you will see nothing clearly. To perceive the image, says the Popular Science Monthly, a piece of ground glass or a plate or film is necessary. A plate is a piece of plain glass which acts as a support for an emulsion. This emulsion decomposes when struck by light, and the decomposition is made visible by a process called development. With an ordinary photographic plate only one such impression, or image, can be obtained. With the motion-picture film, however, a fresh piece of film is continually exposed to the lens.

Just such an arrangement exists in the human eye. An emulsion called visual purple acts as a film of great latitude, renewing itself as soon as it is struck by the light and discolored. It adapts itself to various intensities of light, protecting the retina from too brilliant a glare at all times.

Grinding Wheels Must Do The Very Finest of Work.

Grinding wheels have fine work to do, writes Ellwood Hendrick in the Scientific American. Limits of irregularity as low as 0.0005 inches and 0.00024 inches are often given. And it should be remembered that when 0.00025 of an inch is being ground, the heavy slide that carries the wheel and wheel spindles moves forward only half that distance.

If a piece of tissue paper were split twelve times consecutively, it would have the thickness under which these machines have constantly to work.

And yet, when we consider the forces present in a wheel weighing 200 pounds rotating at a speed of 1,200 revolutions per minute, we are not reminded of a watchmaker's lathe, despite the exquisite precision of the operation.

Around the World.

Many of the ostriches of South Africa are incubator hatched.

Most of the inhabitants of Bagdad live in the cellars during the day.

The potatoes of Greenland seldom grow larger than the marbles used by the small boy.

Rabbit hair is supplanting wool in the felt hat making industry of Australia.

El Paso's jail has steel "sun parlors" in which prisoners may get fresh air and sunshine without possibility of escape.

The wreck record of the Baltic sea is greater than that of any other body of water in the world. The average is one a day throughout the year.

Gayly Decked Fijians Do Artistic Dance Imitating a Tide Rising on a Reef

The Fijians are perhaps the best dancers in the world. One of the most curious dances that they practice is one representing a tide rising on a reef. The idea to be conveyed is that of a tide gradually rising on a reef, till at length there remains only a little coral isle, round which the angry breakers rage, flinging their white foam on every side. At first the dancers form in long lines and approach silently, to represent the quiet advance of the waves.

After a while the lines break up into smaller companies, which advance with outspread hands and bodies bent forward to represent rippling wavelets, the tiniest waves being represented by children.

Quicker and quicker they come on, now advancing, now retreating, yet, like true waves, steadily progressing and gradually closing on every side of the imaginary islet round which they play or battle after the manner of breakers, springing high in mid-air and flinging their arms far above their heads to represent the action of spray.

As they leap and toss their heads the soft white masi or native cloth—which, for greater effect, they wear as a turban with long streamers and also wear round the waist, whence it floats in long scarf-like ends—trembles and flutters in the breeze.

The whole effect is most artistic, and the orchestra does its part by imitating the roar of the surf on the reef—a sound which to them has been a never-ceasing lullaby from the hour of their birth.

Fireflies Have Code of Signals and Utilize Them to Conduct Flirtations.

Fireflies are not flies, but beetles. Their light is emitted from three segments near the tip of the abdomen. There seems to be no doubt of the fact that it is provided by nature as a means for exchanging signals between the sexes at mating time.

When darkness falls the males emerge from their daytime hiding places and fly about. A little later the females climb to the tops of blades of grass and remain motionless, showing no light. A male passes by and flashes his lamp. The female flashes back. Instantly he turns to the spot whence the signal came and alights. He signals; she replies. Thus the courting is accomplished.

The tropical fireflies, much larger in size, belong to another family—that of the click beetles. Their glow is continuous, not intermittent. In Cuba the natives use them in lanterns in place of a candle, so bright is the light they give, and women on festive occasions attach them to their garments or fasten them in their hair.

Steel Glasses for Soldiers.

Steel spectacles are the latest addition to the equipment of the Netherlands army for modern warfare. The commander in chief has ordered that they shall be supplied to all the machine-gun sections of both infantry, hussars and fortress artillery, as a protection against splinters of projectiles, flying chips of stone and the like. Stocks of the glasses will be kept in readiness to serve out to infantry in case of war.

New Place to Sprinkle Salt.

Scatter a little salt from the saltshaker along the whole length of the window-sills right under the sash when cold weather comes. A fine, even coating of salt at this line will prevent snow or moisture getting between the bottom of the sash and the sill and freezing, thus making it impossible to open the window.—Good Housekeeping.

Strategy.

Lady—I like the house very much, but I hear that it is haunted.

Landlord — My dear madam, I attend to that personally. The ghosts only appear to tenants who do not pay their rent and refuse to move out.

She Was Troubled.

Mrs. A.—Are you troubled much in your neighborhood with borrowing?

Mrs. T.—Yes; a good deal. My neighbors never seem to have a thing I want.

Advantageous Marriage.

Mrs. Jiggs—So your daughter married a surgeon?

Mrs. Noggess—Yes; I'm so glad. At last I can afford to have appendicitis.

Hereditary Instinct.

Boarder—Madam, I am told your father was a railroad official.

Landlady—So he was. What of it?

Boarder—Nothing, only it accounts for your tendency to keep cutting down the fare.

Mutual Complaints.

"My husband accuses me of extravagance. I spent $10,000 last year."

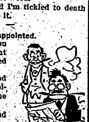
"I wouldn't mind being scolded on that basis. I have to stand for the same accusation on $20 a week."

The Quicker the Better.

Hack—I suppose you always let your wife have the last word.

Peck—Yes, and I'm tickled to death when she gets to it.

Disappointed.



"What did you get out of that will case?" asked the first lawyer.

"A hundred and fifty thousand dollars," replied the second lawyer.

"Good round sum, eh?"

"Yes, but I thought the old man left more than that."

Up-to-the-Minute.

"Is Mabel still devoted to that young man who owns the 12-cylinder car?"

"No. She passed him up for an army aviator."

BOSCHEE'S GERMAN SYRUP

Why use ordinary cough remedies, when Boschee's German Syrup has been used so successfully for fifty-one years in all parts of the United States for coughs, bronchitis, colds settled in the throat, especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectoration in the morning, gives nature a chance to soothe the inflamed parts, throw off the disease, helping the patient to regain his health. Sold in all civilized countries. 30 and 90 cent bottles.—Adv.

From the smoke and fumigation, men seems to think himself a sort of plum tree.

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.—Adv.

The German rat is frantically trying to figure what became of the hole by which it entered the trap.

FIERY RED PIMPLES

That Itch and Burn Are Usually Eczematous—Cuticura Quickly Heals.

It needs but a single hot bath with Cuticura Soap followed by a gentle application of Cuticura Ointment to the most distressing, disfiguring eczemas, itchings and burnings to prove their wonderful properties. They are also ideal for every-day toilet use.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

To listen to people who tell you things for your own good is harmless—and it affords them a lot of pleasure.

Greatest Sugar Exporter.

Figures compiled by competent authority a few months ago showed that since the beginning of the European war the United States, already known as the greatest sugar consuming country, had also become the world's greatest exporter of refined sugar. From 100,000,000 pounds in 1913, our sales of sugar to other countries increased from 500,000,000 pounds during the first year of the war to 1,500,000,000 during the year 1916. Formerly Germany, Austria-Hungary, Russia and France were large exporters of refined sugars.

It's a striking coincidence that the things a boy likes to throw at break easiest.

THE NEW METHOD
(By L. W. Bower, M. D.)

Backache of any kind is often caused by kidney disorder, which means that the kidneys are not working properly. Poisonous matter and uric acid accumulate within the body in great abundance, overworking the sick kidneys; hence the congestion of blood causes backache in the same manner as a similar congestion in the head causes headache. You become nervous, despondent, sick, feverish, irritable, have spots appearing before the eyes, bags under the lids, and lack ambition to do things.

The latest and most effective means of overcoming this trouble, is to eat sparingly of meat, drink plenty of water between meals and take a single An-u-ric tablet before each meal for a while.

Simply ask your favorite druggist for Anuric, double strength. If you have lumbago, rheumatism, gout, dropsy, begin immediately with this newest discovery of Dr. Pierce, who is Chief Medical Director of Invalids' Hotel and Surgical Institute in Buffalo, N. Y. Send 10 cents for trial pkg. Large package 60c.

Costs Less and Kills That Cold
HILL'S CASCARA QUININE BROMIDE
The standard cold cure for 20 years—in tablet form—safe, sure, no opiates—cures cold in 24 hours—grip in 3 days. Money back if it fails. Get the genuine box with Red top and Mr. Hill's picture on it. Costs less, gives more, saves money. 24 Tablets for 25c.
At Any Drug Store

A PROMINENT ST. PAUL WOMAN.

St. Paul, Minn.—There is not a medicine on the market that can compare with Dr. Pierce's Favorite Prescription. I was never very strong and after the birth of my little girl, about four years ago, I was in a very serious condition. I could scarcely move, I was in such a weakened state. I could not get out of my bed. I just thought I never would get well again. I began taking 'Favorite Prescription' and most heartily endorse its use."—MRS. EDNA McCLELLAN, 28 Thompson Ave.

Liquid or tablets. All druggists.—Adv.

CARTER'S LITTLE LIVER PILLS.
WHAT YOU SURELY NEED

ROSY CHEEKS or HEALTHY COLOR indicates Iron in the Blood. Pale or colorless faces usually show its absence. A condition which will be much helped by CARTER'S IRON PILLS

Backache of Women

How this Woman Suffered and Was Relieved.

Fort Fairfield, Maine.—"For many months I suffered from backache caused by female troubles so I was unable to do my house work. I took treatments for it but received no help whatever. Then some of my friends asked why I did not try Lydia E. Pinkham's Vegetable Compound. I did so and my backache soon disappeared and I felt like a different woman, and now have a healthy little baby girl and do all my house work. I will always praise Lydia E. Pinkham's Vegetable Compound to women who suffer as I did."—Mrs. ALTON D. OAKES, Fort Fairfield, Maine.

The Best Remedy is

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Thousands of women have proved this

He—Yes, they hurt me, too.

WOMEN SUFFERERS MAY NEED SWAMP-ROOT

Thousands upon thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmers' Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Magic Words, "With the Colors."

In these times there are some letters that mean more to us than any we have ever read before. They are written on sheets of paper stamped with the Stars and Stripes and the red triangle of the Y. M. C. A., and they bear the magic words, "With the Colors." There are many more than a million such letters in the mails now while you read this. Perhaps one at [illegible] that the Red Triangle is called "the best loved trademark in the world." One soldier in France has called it "the last evidence that anybody cares."

If every thinking citizen could see with his or her own eyes something of the actual work being done for our men by the association there would be no question of the Y. M. C. A. having to appeal to the public for money. Rather than let this essential work falter for an instant rich men would sell their motorcars, poor men would forego coveted possessions or even necessities. The work must go on, because there is no one thing that contributes so much to the spirit and efficiency of the troops. The Y. M. C. A. is working night and day to help the government win this war. And every penny that is given to aid the work is a direct assistance to the health, happiness and strength of your boy and mine.

Snapshots of Kaleidoscopic Work.

In all the big cities in France where our men pass through in large numbers the Y. M. C. A. is operating hostels, where they can get beds and meals at a minimum cost. In London the American Y. M. C. A. has erected a large building for our soldiers and a clubhouse for American officers.

There are Y. M. C. A. dugouts right behind the front line trenches, where the soldiers can get hot drinks, crackers and other comforts at all hours.

Over 2,000 men who had been rejected on account of physical disability have been able to get into the British army by reason of the physical work of the British Y. M. C. A.

A fleet of motor cars leaves the big Y. M. C. A. headquarters in London at midnight every night to pick up soldiers who are wandering about the streets without any wholesome lodging in which to spend the night. These cars are operated by Englishwomen of position and refinement, who report that they never meet any discourtesy at the hands of the soldiers. The importance of this service can be estimated by the fact that at least 50,000 soldiers are on leave in London every week. Over half of these sleep in Y. M. C. A. beds every night.

Entertainment on Vast Scale.

The Y. M. C. A. has erected a big auditorium, seating 3,000, in each of the big draft camps, and huge chautauqua tents, seating 2,500 in the other encampments. The association is running a 22-week entertainment circuit among the camps and is paying 16 companies of entertainers, who are traveling to 30 camps performing before the men.

In each of the draft camps the Y. M. C. A. has ten secretaries engaged in educational work. The association is seeing to it that every man who cannot speak English is taught to do so. In many of the camps the association has a singing director, who is teaching the men to sing the popular and martial airs that do so much to keep up their spirits.

Of 64 Y. M. C. A. men at Camp Dix only three are being paid full salaries. In all the camps the majority of the Y. M. C. A. men have left lucrative positions to do this work simply because its appeal is irresistible to any red blooded man. Harry Lauder, the famous Scotch singer and comedian, now on his farewell concert tour in the United States, is giving all his spare time to the service of the association and is singing to the soldiers at all the camps he can reach.

In one of the draft camps the Y. M. C. A. is supervising athletics on 120 playing fields, providing full athletic equipment. The winners of the interregimental games will play the champions of the other camps.

One of the greatest services rendered by the association is the making out of money orders by which the men can send their pay home to their families. In some of the big camps the Y. M. C. A. is providing banking facilities for the men as well.

A Red Triangle Dugout in the Trenches.

Do Your Bit With a Tenner.

This month (November) the Y. M. C. A. must raise $35,000,000 to carry on its work among our soldiers and their allies until next July. Of this $35,000,000 about $24,000,000 will be spent on the work with our own troops or about $10 for every man in Uncle Sam's uniform. If everybody who has received letters from soldiers and sailors were to contribute $10 the task would be easy. Are your boy's health and happiness and clean soul worth $10 to you?

Your town mayor, your pastor, your school superintendent will know who is the treasurer of the campaign committee in your county or town. Otherwise send a check or money order to Cleveland H. Dodge, treasurer, 124 East Twenty-eighth street, New York city.

Only sacrificial giving by millions of givers will make possible the continuance of this vast work for American soldiers and for those of our allies.

PASSING OF THE SWORD.

The war department order eliminating the sword as part of the equipment of the officer in the organization of the new National army is quite in line with the accepted practice in the embattled armies in Europe since the beginning of the war, but it none the less marks the passing—perhaps final—of one of the most cherished, albeit useless, badges of the military profession, says Philadelphia Public Ledger. This ancient weapon is abandoned for two good reasons: It is no longer of real service either as an instrument of offense or of defense, and it is a distinguishing mark which makes its bearer a conspicuous target for the enemy sharpshooter. The cavalry saber will probably remain for a time, where cavalry can find anything to do, for this form of the sword is to the trooper what the bayonet is to the infantryman. Notwithstanding the admitted uselessness of the sword, its passing will be regretted. It may still linger awhile as a ceremonial adornment, a symbol of military rank far from the field of active service, but, like all antiquated things, must finally succumb to the inevitable and be banished from the kit of the real soldier.

We learn from the Cape Girardeau Republican that a farmer of Millersville, that county, drove into Jackson, the county seat, the other day carrying in one automobile and one wagon products of the farm which sold for $1,380 cash. The by-products consisted of wool, feathers, poultry products and garden truck. Time was when the average farmer would not have fooled with any of these products, except wool; considering them good for use by the womenfolks in trade at the village store—as, indeed, they were. But the world is calling for the products and by-products of the American farm as never before, says St. Louis Republican. The farmer who neglects the call and allows things to go to waste for which there is an active cash demand is the one who will still have a mortgage on his place instead of a tractor and an automobile.

Press Gang at Church.

The cursory examinations which many recruits allege they received in the earlier days of the war were far greater tests of endurance and stamina than the recruit of 50 years ago was wont to receive. In those days, if a man could count all his limbs and had sufficient teeth to enable him to crunch the hard army biscuits and salt beef, or bite off the end of a cartridge before putting it into his old Brown Bess, he was certain of being accepted.

In earlier times, however, there was no pretense at medical examination at all. When Queen Elizabeth resolved to assist in raising the siege of Calais in 1596, the lord mayor and aldermen of London received instructions to raise a thousand men for this service, and on Easter Sunday they proceeded to several churches with their constables, fastened the doors, and selected from the congregation the number of men required. Without any medical examination they were equipped and sent to Dover.—Tit-Bits.

Typical American Eloquence.

Following is the peroration of a speech delivered in an intercollegiate oratorical contest in central Kentucky, 1896:

"Standing upon the last decade of the grandest century ever measured by the flight of worlds, 'I dipt into the future as far as human eye could see; saw the vision of the world and the wonder that would be;' saw the American continent formed; saw it the great sun of the solar system of nations around which all revolved, giving life and liberty to each and prosperity and happiness to all; saw its ports filled with the argosies of commerce; its brow blooming with the wreath of science; the breath of heaven blessing its flag; yet, in the vigor and buoyancy of youth, scorning pessimism and decay, marching ever onward to the accomplishment of its grand and glorious destiny."—Exchange.

The No-Breakfast Plan.

The breakfast-eating habit often creates an abnormal stomachic condition, says Physical Culture Magazine. If one is in perfect health, and arises with a keen appetite for breakfast, there will be no occasion for omitting the meal. There are, however, but few in perfect health, and the omission of breakfast gives the stomach a chance to adjust itself. It has an opportunity to develop a keen appetite for the particular character of nourishment most needed by the body at that time. The no-breakfast plan is a splendid means of properly adjusting one's appetite, both as to quantity and character of food.

Mortgage Foreclosure Sale.

Default having been made in the payment of the sum of Three Hundred Eighty-eight and 80 | 100 (388.80) Dollars, which is claimed to be due and is due at the date of this notice upon a certain Mortgage, duly executed and delivered by John W. Sundahl and Coroline Sundahl, his wife Mortgagors, to First National Bank of Thief River Falls Mortgagee, bearing date the 26th day of September 1911, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the County of Pennington and State of Minnesota, on the 9th day of October 1911, at 10:00 o'clock A. M. in Book 5 of Mortgages, on page 255, and no action or proceeding having been instituted, at law or otherwise, to recover the debt secured by said Mortgage or any part thereof.

Now, Therefore, Notice is Hereby Given, That by virtue of the power of sale contained in said Mortgage, and pursuant to the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises described in and conveyed by said Mortgage, viz:

Lots numbers four (4) and five (5) of Block number four (4) of Porters Addition to Thief River Falls, Minnesota, according to the official plat thereof on file and of record in the office of the Register of Deeds in and for said Pennington County and State of Minnesota, with the hereditaments and appurtenances; which sale will be made by the Sheriff of said Pennington County at the front door of the Court House in the City of Thief River Falls in said County and State, on the 15th day of December 1917, at Ten o'clock A. M., of that day, at public vendue, to the highest bidder for cash, to pay said debt of Three Hundred Eighty-eight and 80 | 100 Dollars, and interest, and taxes, if any, on said premises, and Twenty-five Dollars Attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law, subject to redemption at any time within one year from day of sale, as provided by law.

Dated October 30th, A. D. 1917.

First National Bank of Thief River Falls,
Mortgagee

J. M. Bishop,
Attorney.

Star Notes

John Homme just finished drilling a fifty-some foot well for Mr. Svansjord south of Erie. A strong vein of good water was secured.

"Sub Urban" sold his "Bronchomo" the other day, and is now in a deep which to buy, whether roller skates, stilts or an aeroplane.

The Thanksgiving Masquerade Ball at the Erie Hall was well attended and the usual good time is reported.

Mrs. M. A. Iverson departed Monday morning for Lakota, N. D., where the old lady expects to mrke her future home with her son, P. J. Iverson.

Mesdames Lee and Tharaldson were brief afternoon callers at Clover Nook Friday.

All the school ma'ams are again at their task of "molding plastic minds" after enjoying Thanksgiving festivities at their respective homes.

William B. Torgerson, Cashier of the Farmers and Merchants State Bank of Oklee was a business caller in the Erie uicinity Friday.

Reiner News.

(Too late for last week).

The farmers have been rather busy making fire breaks for their hay, as the prairie fires has been raging for some time, but had to retreat very suddenly for the snow that fell last Sunday night.

Ed. Tronnes, T. Morken, and Arthur and Walter Peterson transacted business at Thief River Falls Wednesday.

Alfred Stenvick returned last week from Bemidji where he has been employed for some time.

Mrs. J. Peterson arrived here last Saturday from Grand Forks to visit her daughter and son, Mrs. T. Morken and A. Peterson.

John Erickson returned last Tuesday from Holt where he has been visiting for a week.

T. Morken Sr. left last Friday for Crookston after spending a few days with his son T. Morken at this place.

Miss Alice Besancon and Agnes and Herman Aakre arrived Wednesday evening from Thief River Falls to spend Thanksgiving at their homes.

Gilbert Vraa left Tuesday for Climax Minn. Mrs Vraa will accompany him back.

Constance Aakre, Mr. and Mrs. Morken and Walter Peterson autoed into Goodridge last Thursday evening to attend the literary meeting at the school house.

The No-Breakfast Plan.

The breakfast-eating habit often creates an abnormal stomachic condition, says Physical Culture Magazine. If one is in perfect health, and arises with a keen appetite for breakfast, there will be no occasion for omitting the meal. There are, however, but few in perfect health, and the omission of breakfast gives the stomach a chance to adjust itself. It has an opportunity to develop a keen appetite for the particular character of nourishment most needed by the body at that time. The no-breakfast plan is a splendid means of properly adjusting one's appetite, both as to quantity and character of food.

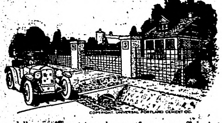
TYPISTS MAKE BAD ERRORS

Slips Are Very Amusing in Some Instances, and Hard to Explain in Many Others.

If some lady typists can make a mistake they will, and some of their efforts are very amusing, a humorist relates. One typist produced the remark, in regard to a rather conceited man, that "his one weakness was onion sauce," the real word being "omniscience." Another, in an obituary of a great theologian, spoke of his belief in the "immorality of the soul." Just the omission of the "t" from "immortality" made all the difference.

Some few years ago a speaker at a meeting waxed very sympathetic over the death of the wife of a manager of the company at some fever-stricken place in West Africa, and the reporters who were afterwards getting out this speech together to save time were in a jocular mood. At the end of the pathetic oration the one who was dictating said, for a joke, and to amuse the others, "Loud Laughter," and the foolish girl, who was as much a machine as the typewriter at which she sat, actually put the words in. Moreover, they appeared in print in a financial newspaper, and a very humble apology had to be made by the editor afterwards, although any explanation of the "slip" was impossible.

Make Those Farm Improvements NOW!



COPYRIGHT UNIVERSAL PORTLAND CEMENT CO.

Every dollar you invest to make your farm more efficient, to save a portion of your feed or lessens your labor brings dividends and increases the value of your place.

START AT THE FRONT with concrete gate and line posts, taut fencing and with a clean driveway. Shut out the rats with concrete floors in corn cribs and poultry houses. Make your barn and hog house sanitary with concrete. Save ten per cent of the corn fed to the hogs by building a concrete feeding floor.

Concrete can be safely and easily placed during cold weather. Ask for printed instructions and let us supply you with UNIVERSAL PORTLAND cement and other building material.

Goodridge, Minnesota

PROTEST MADE TO RUSS PACT

American Ambassador Enters Official Objection to Proposed Armistice.

GERMANS MADE OFFER

Incomplete Returns Show that Bolsheviki Have Carried Election in Petrograd—Russian Officials Go on Strike.

Petrograd, Dec. 4.—Major Kerth, American military attache, has been instructed by Ambassador Francis to make a protest on the part of the United States, similar to that entered by heads of entente embassies here, to negotiations for an armistice between Russia and Germany. Omission to join the protest entered by other allied ministers was due to the fact that it was based on the London agreement against a separate peace, to which America is not signatory.

Ambassador Francis, however, has assumed the attitude that all aid America has extended to Russia, and all recommendations to that end by him were made with the express understanding. Therefore, he believed himself justified, in the absence of instructions from the state department at Washington, to enter a protest against independent action of Russia in the matter of an armistice.

Bolsheviki Carries Election.

Incomplete returns from the election for the constituent assembly indicate the Bolsheviki have carried Petrograd, receiving 272,000 votes against 211,000 for Constitutional Democrats and 116,000 for Social Revolutionaries.

The report of representatives sent through the German lines by Ensign Krylenko, Bolsheviki commander-in-chief, to begin negotiations for an armistice have been given out here. It shows that the agreement to take up negotiations were made in behalf of Germans by their commander-in-chief. It was agreed that the conference should be held at German headquarters at Brestlioovsk.

Government Employes Strike.

Petrograd, Dec. 4.—Employes of the ministries of finance, agriculture and communications have refused to recognize the authority of the Bolsheviki and have begun a strike of two days.

BLAST AND BLAZE ON WHARF

$1,000,000 Fire in Barred Zone in Brooklyn.

New York, Dec. 4.—A $1,000,000 fire in the barred zone on the Brooklyn waterfront which was preceded by an explosion resulted in 1,800 employes being held for examination by federal authorities. The men were herded into one of the extensive yards of the Morse Dry Dock and Repair company, part of whose plant we destroyed and will not be released, it was declared, until the cause of the mysterious explosion is discovered.

The fire, which was not brought under control until midnight, originated in the carpenter shop of the E. P. Morse plant at Fifty-sixth street and spread to the sleeping quarters of the men. Four alarms were sent out. Fire Chief Kenlon and Deputy Chief O'Hara directed a large force of firemen in subduing the flames.

MRS. DE SAULLES ACQUITTED

Slayer of Husband Quickly Freed by Jury.

Mineola, N. Y., Dec. 4.—It required but 1 hour and 43 minutes for a jury in the supreme court here to reach a verdict of not guilty in the trial of Mrs. Bianca de Saulles for the murder of her divorced husband, John L. de Saulles, former Yale football star and clubman, at his home near Westbury, L. I., the night of Aug. 3.

In the verdict no reference whatever was made to insanity. It was a plea of temporary loss of accountability which formed the basis of the defendant's case.

DEMAND 40 PER CENT RAISE

Railroad Men Make Formal Application for More Pay.

Chicago, Dec. 4.—An increase of 40 per cent in wages is the request made by the Brotherhood of Railway Trainmen and Order of Railriad Conductors on almost every railroad in the United States. Vice President of the Brotherhood James Murdock admitted the increase had been asked for.

Water Plant Blows Up; 1 Killed.

Fairmont, Minn., Dec. 4.—The water and light plant at Lakefield, Jackson county, blew up, killing Peter Nelson, engineer, and injuring three other men. The cause of the explosion is not known, but it is believed that the boilers went dry. The blast shook the entire town.

Cannon Urges War Money Supply.

Washington, Dec. 3.—Adequate appropriation by congress for further prosecution of the war were predicted by former Speaker J. G. Cannon upon his return for the new session. "Sentiment as far as I can observe," he said, "is for a vigorous prosecution of the war, to bring it to a successful end as early as possible. The financial needs will be great, both of ourselves and our allies. Of course, we can't provide for the whole shooting match, but congress will respond adequately to the needs of the situation."

ITALIANS FIGHTING HARD TO SAVE THEIR COUNTRY FROM THE INVADING TEUTONS

Italian mobile antiaircraft gun in action north of Venice, where, as all along the line from the Adriatic to Lake Garda, the Italians are fighting heroically to hold back the invading Austro-German hordes. At the left is General Diaz, who replaced Count Cadorna as commander in chief; at the right is the count of Turin, cousin of the king, commander of the Italian cavalry that fought so nobly during the retreat from the Isonzo.

SHERIFF IS SUSPENDED

Governor Removes Sheriff Wagener of Ramsey County.

Charged With Failure to Prevent Rioting in Connection With Street Railway Trouble.

St. Paul, Dec. 5.—Governor J. A. A. Burnquist has suspended Sheriff John Wagener of Ramsey county. The action was taken on the request of the St. Paul association, which filed a written complaint charging the sheriff with failing to prevent rioting and disorder by striking street car men and others in St. Paul.

Ernest H. Davidson, St. Paul realtor and former director of the St. Paul association, was made acting sheriff. Mr. Davidson took charge of the office at once and began plans for organizing his forces to prevent a repetition of the disorder.

State Capitol Under Guard.

A guard of 40 men from the Fourth Minnesota infantry under Lieutenant James Dorsey has been established at the state capitol at the direction of Governor J. A. A. Burnqust.

Adjutant General W. F. Rhinow, who executed the order, said that the guard will be continued indefinitely. The action is attributed to street railway trouble and danger of further disorders in St. Paul.

General Rhinow said he was not informed whether a military guard is still being maintained at Governor Burnquist's home or whether one is to be established.

Governor Burnquist said that any home guardsmen on duty now were called out by county authorities and not on his order.

U. S. Official Coming.

Chief of point of interest in the car situation has shifted from St. Paul to Washington, D. C.

Newton D. Baker, secretary of war, and Louis F. Post, acting secretary of labor, will confer at once with G. W. Ames, member of the Minnesota public safety commission, United States Senator Kellogg and Congressman C. C. Van Dyke of St. Paul. Samuel Gompers, president of the American Federation of Labor, is also expected to go over the situation.

At the same time a personal representative from the United States department of labor will arrive in Minneapolis to make an inquiry and report direct to his superiors in Washington.

U. S. TROOPS KILL BANDITS

Slay Twelve Across Line After Attack Is Made.

Indio, Texas, Dec. 4.—Mexican outlaws opened fire on one of the American cavalry patrols five miles from here, wounding Private Keist in the thigh and leg. The American troops stationed here immediately crossed the river into Mexico, opened fire on the little settlement of shacks and killed 12 of the bandits, including Felipo Romero and Rafael Venasalado. The shacks where the outlaws sought shelter were burned after the occupants had been driven out.

Reichstag Votes New War Credit.

Amsterdam, Dec. 4.—Berlin advices received here say the Reichstag has finally adopted a vote of credit of 15,000,000,000 marks, with only the Independent Socialists voting in opposition. Count von Roedern, secretary of the imperial treasury, stated that the total yield of the assessed war tax this year, estimated at 5,000,000,000 marks, was better than estimated in last year's budget. This tax and defense contributions of assessed property taxes raised during the war will yield more than 6,000,000,000 marks.

LONG CONGRESS SESSION OPENS

Treasury Department Calls For War Appropriation of $13,504,357,939.

PRAYERS FOR VICTORY

Washington, Dec. 4.—With the first call upon it appropriations totaling $13,504,357,939, both houses of the United States win-the-war Congress convened at the stroke of noon.

This sum—an average expenditure of $37,000,000 a day for the next year—is Secretary of the Treasury McAdoo's estimate of war and necessary internal expenses during the next 12 months.

Prayers For Victory Offered.

Prayers for victory were offered in opening of both houses.

In his prayer opening the Senate session, Rev. Forest J. Prettyman, Senate chaplain, said:

"We face the mightiest task ever confronting any generation.

"We thank Thee that we have taken our place on Thy side, in behalf of the brotherhood of nations and peace throughout the world."

Senate Attendance Large.

In his opening prayer, the House chaplain asked that "in this, the darkest hour of human history, help us, a people, to appreciate the gravity of the situation and unite us in bonds of patriotism that we may throw all our moral, intellectual and physical force into the conflict with grim determination to win or perish."

Attendance in the Senate was unexpectedly large. Sixty-seven of the 96 senators answered roll call.

Husting To Be Honored.

Senator La Follette arose immediately after the formal organization of the Senate formally to announce to the Senate the death of his colleague, Senator Paul O. Husting of Wisconsin, who was accidentally shot while hunting.

"This is not the time to pay adequate honor to the memory of Senator Husting," said La Follette. "At a later time I shall ask that a day be set aside to pay honor to him."

The Senate at once adopted a resolution of "profound regret" over Senator Husting's death, and as a further mark of respect adjourned at 12:14 until Tuesday.

MOB BURNS NEGRO AT STAKE

Take Him From Sheriff in Tennessee Town.

Nashville, Tenn., Dec. 4.—A dispatch from Dyersburg Tenn., says that Ligon Scott, a negro alleged to have attacked a white woman Nov. 22, was burned at the stake in the public square there. The negro was arrested in Jackson, Tenn., and was being taken to Dyersburg in an automobile by the sheriff and his deputies when a mob met the officers and relieved them of their prisoner. Scott is said to have confessed.

"Slacker Officers" Must Make Good

Washington, Dec. 2.—The issue over "slacker commissions" took a new turn when the war department announced a new policy had been adopted that will force every officer in noncombatant service to "make good" or be discharged. This follows the action of Secretary N. D. Baker in ordering that no man of draft age be given a commission where there is an older man available, and that no commissioned officer shall be assigned to duties that can be done as efficiently by civilians.

URGE WAR ON AUSTRIA

Senator Lodge Takes Firm Stand For Action.

Massachusetts Republican Says American Declaration is Necessary to Complete Allied Unity.

Washington, Dec. 4.—With the assertion that it was essential to complete unity among the allies, Senator Lodge, Massachusetts, ranking Republican member of the foreign relations committee, has declared unqualifiedly for war on Austria.

"I have always thought we might as well have declared war against Austria, Turkey and Bulgaria when we made the declaration against Germany," he said. "We have sent the mission, headed by Colonel House, abroad to secure unity of action. A prerequisite of unity, I believe is for ali to be fighting the same enemies. It would make our position more intelligible and greatly facilitate unity of action for our government to formally declare war against all of Germany's allies."

NEED "SOMETHING TO READ"

Sammies Send Plea to People Back Home.

With the American Army in France, Dec. 4.—Officers of the American soldier units in training here have asked the Associated Press to inform the American people that the soldiers lack reading material. They said that the comparatively small quantity of magazines and newspapers which have been arriving have eagerly been read by the men. Some of the publications passed through dozens of readers' hands until the pages actually were in fragments and were thus read by others.

"GERMANY WILL BE BEATEN"

Message Sent by General Pershing to American People.

New York, Dec. 4.—Bishop Luther B. Wilson, who recently returned from Europe, where he went on a mission for the Y. M. C. A., brought back with him a message to the American people from General Pershing, American commander in France. The message said:

"Tell them there is no ground for the heresy that Germany can not be beaten. Germany can be beaten, Germany must be beaten and Germany will be beaten."

JOLIET "BAD MEN" ESCAPE

Saw Steel Doors—Beat Guards Into Unconsciousness.

Joliet, Ill., Dec. 4.—Posses are pursuing 13 convicts who escaped from the Joliet penitentiary.

The men, in solitary confinement because of creating disturbances in the cell houses last week, broke out of the cells and sawed through three steel doors.

Albert Chanelli, guard, and John Carlson, captain of the night guard, who were encountered in the corridor, were beaten into unconsciousness.

Wilson Raises Price of Anthracite.

Washington, Dec. 4.—A general increase of 35 cests a ton has been added to the price of anthracite coal at the mines by President Wilson to meet a proposed wage increase for anthracite miners. The new prices are effective immediately and will add more than $30,000,000 to the public's annual coal bill. The wage increase was agreed on by operators and miners' representatives contingent on higher coal prices. When negotations were ended the operators and miners asked that prices be raised 45 cents.

GERMANS MAKE SECOND ATTACK

Teutons Launch Great Offensive in Attempt to Break Through the British Lines.

ALLIES' LINES HOLDING

Heavy Battle Progresses Over Considerable Front in Which British Meet the Onslaught Brilliantly.

With the British Army in France, Dec. 5.—In a second great attempt to break through the British defenses in the Bonnelieu sector and pinch off the salient which General Byng recently drove into enemy territory, the Germans have launched another offensive. The German assault was launched against La Vacquerie shortly before 9 o'clock in the morning and spread rapidly. Within two hours a heavy battle was in progress over a considerable front, from La Vacquerie southward toward Vendhueile.

The enemy was employing great forces of infantry which were sent forward under terrific artillery bombardments from a concentration of guns which the Germans had perfected since the smashing of the Hindenburg line.

By noon there were indications that the German onslaught might equal if not exceed in fierceness their drive which carried them through the British front south of Gonnelieu last Friday.

British Meet Shock.

The British infantry and artillery had met the shock brilliantly and were holding their own strongly through the first grim hours of fighting. The Germans approached La Vacquerie from the east and southeast, and at the outset it appeared that the attack was comparatively local. In their initial charge the enemy came up against a stone wall and they were forced to fall back. They kept coming in waves, however, and finally secured a footing in the town, but immediately were ejected.

Intense fighting at close quarters followed and as this progressed the Germans developed an offensive operation further down the line. By 11 o'clock their artillery was maintaining a drum fire against the whole front involved. As the day wore on the German attack also spread northward toward Masnieres and became even fiercer.

HIGH TRIBUTE TO AMERICANS

French Give U. S. Engineers Credit For Braveness.

Washington, Dec. 5.—Many American soldiers have died bravely on the Cambrai front, where they have been assisting the British in countering the terrific thrusts of the Germans, according to an official communication received from the French government.

High tribute to the gallant conduct of the Americans, who were of the United States army engineer corps, is paid. They were engaged in operating and building military railroads, when they were caught by the encircling move of the Germans. Previous dispatches had told that the American engineers were in action, but no word of casualties had previously been received. Names of the men slain and the exact number is not known here. The French cable says:

"We must remark upon the conduct of certain American soldiers, pioneers and workmen on the military railroad in the sector of the German attack west of Cambrai and Nov. 30.

"They exchanged their picks and shovels for rifles and cartridges and fought with the English. Many died thus bravely, arms in hand, before the invader. All helped to repulse the enemy.

"There is not a single person who saw them at work who does not render warm praise to the coolness, discipline and courage of these improvised combatants."

ROUMANIANS ARE COMING

Mission From That Country Coming to America.

Paris, Dec. 4.—The Roumanian government has decided to send a special mission to the United States with the members of the newly established legation at Washington. The head of the mission will be the new minister, Dr. Constantin Angelesco, former minister of public works.

"I shall be glad," said Dr. Angelesco, "to present to the great statesman, President Wilson, and to the American people the salutations of my sovereign and the Roumanian people, united in the desire to tighten the bonds with the great American democracy."

"Collect Cables" War Time Swindle.

Dilworth, Minn., Dec. 4.—A warning to relatives of engineers sent to Russia recently from the Northwest to watch for men with "collect cablegrams" purporting to come from their husbands and others in Russia was issued here as the result of the appearance of a man who tried to collect $16 on a cablegram for Mrs. Anders, wife of one of the engineers here. The woman refused to accept the message and notified the police. No trace of the man has been found and police have been notified to watch for him.

Long Endured Pains Ended by Dodd's Kidney Pills

Thousands Find Relief
IN THE RELIABLE OLD SAFEGUARD
DODD'S Kidney Pills

In all parts of the country, every day, sufferers from kidney troubles are saying: "Goodbye, backache; goodbye, pains; Dodd's Kidney Pills have settled you for good." They know the efficacy of this fine old remedy which so many people have employed with success. You can be free from kidney ills, from eventual Bright's Disease and possible death, if you start immediately to tone the kidneys with Dodd's Kidney Pills. Be sure you see on the box the name with three D's. It protects you.

CHAPTER XX—Continued.

—14—

"You showed forged papers?"

"Aye; that was easy enough; you never supposed I was such a fool as to overlook that, did you? We are from St. Johns to Liverpool, with a miscellaneous cargo. The fellow swallowed my yarn as though it was sugar candy. And the best of it is, that is the only war vessel patrolling these waters; we have a cinch."

"Not without me," I answered calmly, after a pause in which my mind gripped the situation. "The telltale compass shows you are three points off your course now. I'll talk with you, McCann, but if I continue to navigate this ship it will be at my own terms, and you'll either give me what I ask, or we'll fight it out here and now."

"What are your terms?"

I took time to think, determined to demand every concession I dared ask, assured that I held the winning hand.

"Well," I said finally, "this coast to the west of us is no joke at any season of the year, and there are sea currents along here to fool any seaman. You can take the chances if you want to, but it is my belief you fools will have this ship on the rocks within twenty-four hours, if you trust in blind reckoning."

"D—— it," sung out Liverpool hoarsely, "we don't need no sermon on the dangers of the deep. Stow the gaff, an' tell us what yer want."

"I will," I snapped back. "The freedom of the ship for both myself and Miss Carrington. Our meals are to be served privately, and the lady is not to be addressed by any one of you."

"My Gawd," exclaimed a muffled voice, "you don't want much! Who are you, the czar of Russia?"

"I am the rightful captain of this ship," I returned stiffly, "and the only man on board capable of navigating her. You can accept my terms, or leave them; and those are not all. McCann, I am talking to you, not that sea scum."

"All right; go ahead. What else?"

"I am to retain this revolver for protection, and the key to my stateroom; Miss Carrington is also to retain her key. When you men desert ship, which I know you plan to do, the Indian Chief is to be left in seaworthy condition. That's all."

"Enough, I should think. You must consider your services indispensable. However, I accept the terms, providing you agree to do what we ask in return."

"That I navigate the ship to within fifty miles of St. Johns; notify you when we reach that point, and give you correct sailing directions."

"That is what we want."

"Good; I accept. Take your men out of the cabin."

I stood motionless, still gripping the revolver in one hand, listening to catch every sound the other side of the closed door. There was a muttered discussion, the words mostly inaudible, although I heard enough to convince me that McCann was urging acceptance of my conditions on the ground that it would be impossible for me, alone, and under surveillance, to add to their danger. Some words were added in so low a tone as to fail to reach my ear, but whatever they were, they evoked a laugh, and seemed to restore the dissatisfied to better humor. Liverpool took sides with McCann in the dispute, and the two united must have prevailed, for the men finally dispersed, and we could hear their heavy sea boots tramping up the stairs.

Relieved of the strain, I turned to meet the questioning eyes of the girl.

"That—that was better than fighting—wasn't it?" she asked almost anxiously.

"Yes; I lost my head for the moment, and could only think of reaching deck, and shouting an alarm to the cruiser."

"It was too late for that."

"Yes; we know it was now, and probably I would never have reached there alive. I am very thankful to you."

"To me!" Her lips smiled, although her eyes remained grave. "Why, I merely opened a door—besides, even that act was supremely selfish."

"I cannot conceive how."

"You do not? Yet surely you can realize what it would mean to me to be left alone on board with—with Fergus McCann. I do so despise the creature that I shrink from even looking into his eyes. It—it was to avoid meeting him again that I locked the door."

"He talked with you, then?"

"Yes, at the table. We were alone for a moment, and it was his manner which frightened me rather than any words said. I left the table without speaking. He—he followed me, however, and tried my stateroom door."

"Saying nothing?"

"No; it was locked, and—and he laughed and went away."

"I suspect the man is almost as much afraid of you as you are of him," I said quietly, "and is puzzled what to do with you."

"Afraid of me—why?"

"Well, if you were not aboard, his problem would be a much easier one to solve. The lives of none of the rest of us would weigh much in the calculation."

"And you think my life does?"

"Undoubtedly. McCann is a villain by nature; he was born with criminal instincts, which have no wise been changed by the possession of wealth. But he is fully awake to the peril of his position. The fellow is a coward back of all his bluff, and I do not think his criminal instincts are bloodthirsty. But he has drifted into a desperate situation, from which he must extricate himself at any cost."

"You mean—oh, not that?"

"I mean there is but one sure solution—dead men tell no tales."

CHAPTER XXI.

A Plan to Save Ourselves.

She stood with hands clasped, and parted lips, her eyes wide open with unconcealed horror, for the moment unable to utter a word.

"You—you actually think that, Mr. Hollis? You mean he would be willing to—to murder all on board to protect himself?"

"If assured such an act would bring safety, I do not believe he would hesitate at even that crime. To be perfectly plain, Miss Vera, it is my judgment that your presence on board presents the only problem unsolved."

"My presence! Why, he has no cause to fear me. No one knows where I am. If I never appeared alive again, not a soul could ever account for my disappearance."

"True, and probably McCann is fully aware of these conditions. But he wishes you alive, not dead. That is what makes the problem."

She crossed the narrow space of deck, and grasped my coat in her fingers.

"Oh! this is too terrible! He—he cannot imagine it possible—"

"And why not?" I interrupted. "He is all-powerful on board. He judges the virtue of others by his own standard. He dreams that you might even make that bargain to preserve life."

"That I would marry him?"

"Marriage would seal your lips; would win him safety, and also your subjugation and wealth. It is a stake worth playing for, surely."

"And the others? What would be the fate of you and the others if I made that hateful bargain?"

"In no way different, I imagine, from what it will be if you refuse," I said soberly—and my hand closed on hers. "McCann has no intention that we shall ever put foot on shore. He would be a fool to permit such a thing."

"You think it all planned out?"

"In detail; McCann, Liverpool and White know exactly what they intend doing. Their questioning of me, and their scrutiny of the chart, convinces me of this. I even believe now I could name the other men of the crew who will be in their boat, when they abandon ship—Dugan, Dubois, Sachs and the negro, Watson, with perhaps two others I am not so sure of. Why, Miss Vera, you heard what I was compelled to assent to a moment ago. I am to pilot the Indian Chief to within fifty miles of the harbor of St. Johns, timing our arrival at that point to some hour of the night. I am to give McCann notice of our arrival there, and furnish him with exact sailing directions to complete the course. This means that the crew expect to abandon the ship there, and take to the boats. There are enough remaining in good condition—and just enough—to carry them all, but the Indian Chief will be left with none to rescue those of us who are left on board in case of accident to the vessel."

"And you anticipate accident?"

"I believe the ship will be deserted in an unseaworthy condition—either with her bottom pierced, or her seacocks open; and that those of us left aboard will be so confined as to be practically helpless to save the vessel from going down."

"And the men in the boats will get ashore, scatter and never be heard from again. No one will ever learn what became of the Indian Chief, or that we were aboard?"

"The French cruiser will report having spoken us at sea. That will be the last word. The truth will never be made clear. Our fate will be another sea mystery, never explained."

"Some of the crew might talk later—in liquor."

"There is always that danger, and McCann is farsighted enough to guard against it as far as possible. The boats will easily become separated in the darkness. If the others are ever picked up, it will be accidentally by some ship at sea—and there are almost no ships in this ocean. There are few flaws in the plan, as I have figured out."

She did not answer, her eyes on my face, her expression exhibiting the horror she felt at this vivid picture which I had drawn. Then she slowly, gently withdrew her hand from my grasp, sinking into a chair, her head bent forward.

"You—you really believe they actually plan to do all this?" she asked at last. "And what—what about me? You suggested that—that marriage might save me from this fate. Do you think so ill of me as to imagine I would ever consent to such a bargain?"

"What I may imagine has nothing to do with the case, Miss Vera. My thought, and that of Fergus McCann, is not liable to be the same on any subject. The only hope he can have of ever winning you is through threat. He possesses power and can assail you with deadly peril. It is my belief that he contemplates doing so."

"That he will offer me choice of marriage with him, or death?"

"Yes; it will not be put in just so brutal a form, for the fellow has a certain polish over his villainy, but it will mean that."

"Loan me the revolver."

"For what purpose?"

"To kill the brute, if ever he dares such a proposal. Mr. Hollis, I would die before I would ever permit his touch! Marry him to save my life! Why, I am so ashamed I cannot look you in the face; cannot even find words to express my detestation of such a suspicion."

I stepped forward, and my hand gently rested on the bowed shoulder.

"My dear girl," I said earnestly, "look at me, and believe my words. Lift your eyes; I want you to read the truth in my heart. It is not your life alone; it is mine also, and the lives of nearly all the others aboard, which are at stake. For the sake of us all I am going to ask of you a sacrifice."

There had been a mist of tears in the uplifted eyes, but as I paused this had vanished.

"A sacrifice?" she stammered. "That I marry that man?"

"God forbid! No; but that you encourage him to think it possible."

"Oh, I could not—I could not! Do not ask that of me."

"But listen," I urged eagerly, forgetful of all else in the earnestness of my plea. "Vera, listen before you make decision. The only possible hope lies in the freedom of one of us aboard. I can so juggle figures as to keep the ship safely at sea for another day and night, but no longer.

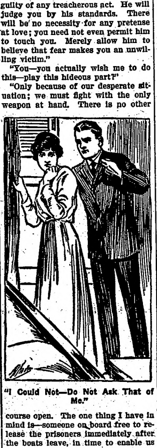
"Someone must be free to act and plan. I cannot, nor any of those men confined amidships. By winning McCann's confidence; by seeming to yield to his desires, you will be allowed freedom on board. You can demand it as the price of your surrender. All else must depend on your woman's wit."

"But—but could I convince the man of my sincerity? I—I detest him so."

"He will want to be convinced; your mere consent will satisfy him. You must not look at this from your standpoint. He is conceited and cowardly. To save his own life he would be guilty of any treacherous act. He will judge you by his standards. There will be no necessity for any pretense at love; you need not even permit him to touch you. Merely allow him to believe that fear makes you an unwilling victim."

"You—you actually wish me to do this—play this hideous part?"

"Only because of our desperate situation; we must fight with the only weapon at hand. There is no other course open. The one thing I have in mind is—someone on board free to release the prisoners immediately after the boats leave, in time to enable us to prevent the ship's going down."



"I Could Not—Do Not Ask That of Me."

"But—but, Mr. Hollis, would—would he not insist upon my going with him in the boat?"

I walked twice across the narrow space of the deck, conscious that her questioning eyes followed me.

"Yes," I admitted, pausing to study her face. "You might even be obliged to do that. You must front this possibility, although the necessity may be avoided. But McCann's boat will make St. Johns. He dare not resort to force once you are ashore. I do not count that a serious danger—only he must not suspect your purpose until too late to prevent his interfering with your action. Nor will you be unsafe with him in the open boat, for the two of you will not be alone. Your greatest peril will be while aboard this ship, and completely in McCann's power."

"The open boat will not be long at sea?"

"Not to exceed a few hours probably; Liverpool and White are seamen enough to see that it is equipped with a sail, and if the wind be favorable, they will make land quickly. But there is even a chance that you need not take this risk."

"What chance?" the full measure of her emotions finding evidence in her voice.

"If Leayord or Olson could be secretly released, or even if you could be assured that I was free to attain the deck at the proper moment, and thus able to release these others, we might best play a bold game. By urging some excuse you could delay leaving the ship until after all the mutineers were over the side, and in the boats. McCann might remain on board with you, but he would be only one man to handle. Once we had control of the ship, we could defend the decks, and prevent those ruffians from returning on board, at least until they surrendered all arms, and agreed to such terms as we offered."

"That—that would be a most desperate expedient," she said dejectedly, "its success doubtful. You would be terribly outnumbered, and without weapons."

"I do not see it so. Outnumbered, yes; but with every advantage of position. Those fellows could not clamber up the side, unless it be one at a time. Besides, the major part of the crew are doubtless mutineers against their will, and would be glad enough to return to duty if promised protection. I doubt if there be three revolvers on board. I have one of these, and McCann carries another. Really the plan looks feasible to me."

She arose and crossed over to the open port, gazing out in silence across the waste of waters, the wind lifting strands of her ruffled hair. She remained there motionless so long I became impatient.

"Have you no answer to make?" I questioned at last. "You think the scheme impracticable?"

"No; it is not that," but without changing posture or glancing about, and I felt there was a deadness in her voice, far from encouraging. "But—but I do not like the part assigned to me."

"You fear you might find it difficult to carry out the deceit?"

She turned and faced me, and there were tears in her eyes, which she swept indignantly away with a swift gesture.

"You have used the right word," she exclaimed, no longer hesitating in speech. "I am not accustomed to deceit, Mr. Hollis; I have never learned how to lie, or conceal my true feelings. I am not afraid physically; it is not that; but you ask me to permit this fellow to make love to me, and I am to encourage his hopes, and pretend to yield to his advancements. You ask me to lower my womanhood, to take my place on a level with a girl of the streets, and pretend to sell myself for a price. Is this your conception of my character?"

It was as though she had slapped me in the face, yet I was ready, half anticipating she might assume this position.

"No; but I believe you willing to sacrifice your conception of what ordinarily seems right to save this ship, and the lives of those aboard; to preserve Philip Bascom's fortune. There need be no love making, no pretense at love. You seemingly yield to force, surrender to fear; that would be the only way in which McCann would expect to gain your consent."

"You—you wish me to do this?"

"It appears to me as our only hope."

"And if I do, you will not despise me? You will not feel my action unwomanly?"

"I feel that of you! Never; why, it would be impossible for me to conceive of your acting unworthily!"

She held out her hand.

"Then I will try," she said simply, her eyes uplifted to mine.

CHAPTER XXII.

Words of Love.

My hand-clasp tightened, and the long lashes shaded her eyes, concealing from me the mystery of their depths, a brighter color flooding her cheeks. Outlined against the open port, and the blue of the water beyond, the fresh young beauty of her face was almost a new revelation. The words she had spoken, her manner, her sudden surrender to my wish, perplexed me, and completely overcame my effort at self-control.

"Why did you ask me that?" I questioned, scarcely aware of my words.

"What?"

"If I would despise you; would deem your act unwomanly?"

"Because—because I had to know. It does not even yet seem right to me—altogether. I—I could not do such a thing unless you approved."

"You have faith in me, then?"

"Yes—yes; I—I believe in you."

"And you mean you would have refused to take such action if I had not urged it upon you, and had failed to assure you that doing so would in no way lower my respect for you?"

Her eyes flashed up questioningly into my face, only to be instantly lowered again.

"Yes."

"Not even to save your own life?"

"I have always felt there were conditions more to be dreaded than death," she answered slowly. "Mere association, such as you describe this adventure to be, with Fergus McCann, may not be such a condition—yet I shrink from it. I have chosen my course, not because it may preserve my life, but for the sake of the others helpless on board this miserable vessel; because of the crippled man locked in his own cabin; because of the mother praying for him in Philadelphia. Oh! Mr. Hollis, can you not understand?"

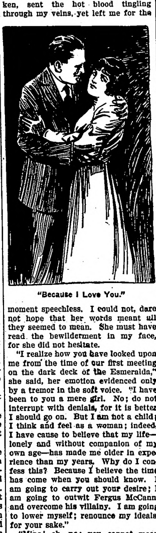
"Vera, why do you question me like this? Why should you hesitate, doubt, when you realize, as you must, that only through you, and your power over McCann, Philip Bascom's life and fortune can be saved?"

"Because I would not save them at the cost of your respect."

"Mine! You think that of me?"

"Yes," she said, and now her eyes met mine frankly. "I think that of you, Robert Hollis."

This avowal, quietly, honestly spoken, sent the hot blood tingling through my veins, yet left me for the moment speechless. I could not, dare not hope that her words meant all they seemed to mean. She must have read the bewilderment in my face, for she did not hesitate.



"Because I Love You."

"I realize how you have looked upon me from the time of our first meeting on the dark deck of the Esmeralda," she said, her emotion evidenced only by a tremor in the soft voice. "I have been to you a mere girl. No; do not interrupt with denials, for it is better I should go on. But I am not a child; I think and feel as a woman; indeed, I have cause to believe that my life—lonely and without companion of my own age—has made me older in experience than my years. Why do I confess this? Because I believe the time has come when you should know. I am going to carry out your desire; I am going to outwit Fergus McCann, and overcome his villainy. I am going to lower myself; renounce my ideals, for your sake."

"Mine! oh, no; you cannot mean that—there are others."

"Yes, there are others. I sympathize with, and am glad to serve them. Yet their fate alone—even my own peril—would never have led me to make this decision. I trust you, and am willing."

"You care, actually care that much for me?"

"Is there any disgrace, any unwomanliness in saying so? We are in desperate stress, all of us. Even death may be but a few hours away. This is no situation to be ruled by social conventions, or lack of frankness in speech. I do care for you, Robert Hollis; you would have known it longer ago if you were not blind in such things. You have cared for me ever since we were in the boat together. Is this not so?"

"Yes, but I never thought—"

"Of course not; you are not the sort of man who would. You have not made a life study of women; perhaps that is why I trust you so thoroughly. If—if you had made love to me, Robert Hollis, I would have laughed at you; but—but now I do not feel like laughing at all."

"You do love me! You—you love me?"

"Oh, you mustn't compel me to say that! It is enough to confess I care; that I am interested. If it was not for the desperate chance I am about to take, I should never have said these words. We simply must understand—you and I. I cannot go to Fergus McCann pretending to yield to his desires, to conform to his wishes, without you comprehend first of all that I do this not even to save my own life, but—because I love you."

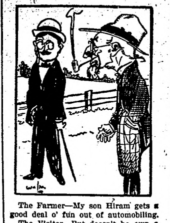
"You love me? You really love me?"

"As woman never loved before, I believe," she answered gravely. "I love you."

(TO BE CONTINUED.)

The hardest crop to raise—money.

RIGHT IN IT

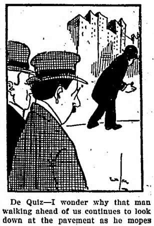


The Farmer—My son Hiram gets a good deal o' fun out of automobiling.

The Visitor—But doesn't he own a machine?

The Farmer—Of course not. He's one o' the county constables.

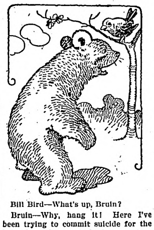
FORCE OF HABIT



De Quiz—I wonder why that man walking ahead of us continues to look down at the pavement as he mopes along?

De Whiz—Don't you know him? That's Highup, the professional aeronaut.

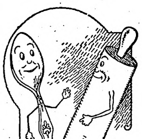
DISAPPOINTED



Bill Bird—What's up, Bruin?

Bruin—Why, hang it! Here I've been trying to commit suicide for the last three hours, and that amateur hunter can't hit the side of a house.

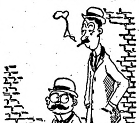
COOKING UTENSILS



Sugar Spoon—I'm one of those golden spoons that get born in people's mouths.

Rolling Pin—You haven't got anything on me in the wealth line. I'm rolling in dough all the time.

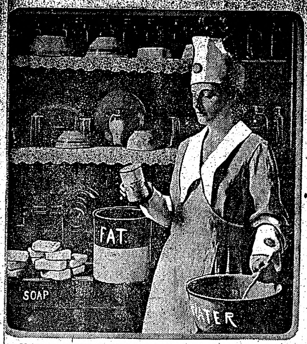
A HOT ONE



The Tall Man.—I'm a self-made man.

The Short Man—Don't brag—the job ain't completed yet.

MEAT DRIPPINGS MAKE FINE SOAP



Making soap from the drippings of meat is the practical war work of Mrs. O. O. Van den Berg of Washington, who is shown at her desk in the uniform of the United States food administration. The drippings are saved until six pounds are accumulated. This, with one can of lye, will make 15 cakes of hard soap, delightful for the bath and excellent for washing fine fabrics or laces.

TELLS EXPLOITS OF THE SEEADLER

Navy Department Gets the Story From Captain of an American Schooner.

WRECKED ON CORAL REEF

Seventeen Ships Captured by German Raider in Spectacular Cruises in Two Oceans—Hoodwinks British by Clever Ruse.

Washington.—The full story of the cruise of the German commerce raider Seeadler has been obtained by the navy department from Capt. Haldor Smith of the American schooner R. C. Slade and three other mariners, who landed at Tutuila in an open boat September 29 after being marooned on Mopeha island by the master of the Seeadler when the raider grounded and was abandoned.

The Seeadler, formerly the American ship Pass of Balmaha, was captured by a German submarine and sent to Bremen and fitted out as a raider. A picked crew was placed aboard, some of whom spoke Norwegian, and sent out into the Atlantic under the guise of a Norwegian ship.

The ruse worked so well that after leaving Bremen on December 21, 1916, the Seeadler was held up by the British auxiliary cruiser Highland Scout, examined and passed.

Captured Seventeen Ships.

Captain Smith learned that while cruising in the Atlantic 13 ships, valued by the Germans at 60,000,000 marks, were captured and four in the Pacific.

Relating the story of the capture of his ship, the Slade, Captain Smith said:

"I left Sydney on April 24, 1917, and proceeded without any incident until the evening of June 17, when the second mate reported to me that a ship was firing on us. She was about eight miles off. There was a heavy squall starting eastward—wind favorable to this time, and I thought it possible to get away and kept holding on. But she kept firing on me at intervals of about five to ten minutes and was coming up on me fast.

"I concluded that there wasn't any use and I lowered down spanker, clewed down topsail, hoisted the American flag, and hove to. Shortly after the prize officer came aboard and a doctor and about ten men. These officers were in uniform. They told me to leave the ship and to go on board the raider and they would give me time in the morning to pack my clothes.

"They took all our men aboard the raider except the cook. Next morning I went back on board with all my men and packed up. We left the ship with our belongings on June 18. We were put on board the raider again. Shortly after I saw from the raider that they cut holes in the masts and placed dynamite bombs in each mast and put fire to both ends of the ship and left her."

Captain Smith said the raider was a full-rigged ship of steel or iron, about 2,300 tons, propelled by oil [illegible] lix Graf von Luckner.

When the men from the Slade arrived aboard the raider they found nine prisoners from the American schooner A. B. Johnson of San Francisco, captured three days before. On July 8, Smith stated, the schooner Manila was captured and dynamited after nila was captured and dynamited.

For about three weeks the raider kept beating up and down looking for passing ships. Meeting none, they went south to Mopeha on July 31, anchored on the lee side of the island, and on August 2 the ship was driven hard and fast ashore. After working all afternoon they gave her up as lost and took ashore everything they could move, including the boats, gear and wireless. The wireless plant, a very powerful one, was set up between two coconut trees.

On August 23, Captain Smith related, the German officers fitted up and armed a small boat and started for the Cook islands or the Fiji islands, where they hoped to capture an American ship and come back for the crew. Count von Luckner, the master, was in charge. They were never heard of again at Mapeha island.

On September 5 a French trading schooner from Papeete, the Lutece, put in at the island. First Lieutenant Kling took a motor boat and machine gun and captured the ship. She had a large cargo of flour, salmon and beef and a supply of water. Kling and his crew dismantled the wireless plant and left the island in the Lutece that night, leaving 48 souls, including the Americans.

A small boat had been left behind, and the marooned men fitted it up. The captain of the Manila, with a small crew, started out in the boat for Tahiti on September 8. They failed to reach Tahiti and returned exhausted on September 16. Captain Smith, with three men, took the small boat and managed to reach Pago Pago ten days later.

Recent dispatches indicate that the captain of the Seeadler and five of his crew were captured on September 21 off the Fiji islands by Fijian constabulary. What became of the men who left Mopeha island in the Lutece is not known.

British Get Honor Stripes.

London.—British soldiers who have served in the great war will henceforth bear a distinctive mark of their service on their uniform. The war office announces that a chevron stripe will be immediately issued to every soldier who serves overseas in a theater of war. Soldiers whose service dates back to 1914 will be given a red chevron, and those whose service began after that year will get a blue stripe. An additional blue stripe will be awarded for each aggregate of 12 months' service. The new stripes will be worn by officers as well as privates.

Coffee From Velvet Beans.

Quitman, Ga.—The velvet bean, so abundantly grown in the South, is being put to an entirely new use in this section and is no longer classed as a stock food exclusively. A hotel started the movement by the announcement to a large number of traveling salesmen that the coffee served was made from velvet beans, after the dinner had been finished and the guests were profusely complimenting the proprietor for the splendid "Javva." One of the guests, claiming to be an expert connoisseur, had taken the third cup.

DANCER TAKES VEIL

Mlle. Eva Lavalliere, who for years was one of the familiar figures of Parisian life and long favorite at the theater des Varieties, has left the stage to take the veil.

The actress has sold all the luxurious furnishings of her apartment, divided her dresses, furs and jewels among her friends, and will soon enter the order of Carmelites.

Typhoid Wiped Out in France

Professor Vincent Conquers the Most Dangerous Enemy of the Republic.

HELPS INCREASE MAN POWER

In Former Wars More Soldiers Perished From This Disease Than by Bullets—Fever Has Vanished From Belfort District.

Paris.—One of France's most dangerous enemies has now been vanquished—typhoid fever, and the victor is Professor Vincent, an officer of one of the French medical schools.

The war has shown that the most deadly of fevers is at the mercy of science. Tyhoid fever was always a great enemy of armies in the field. It has been established that in wars previous to the present one more men died of typhoid than by bullets and shells.

Typhoid Epidemic Started.

At the start of the present struggle a typhoid epidemic started in October, 1914, and increased through the winter of 1914-1915.

Professor Vincent set out to stop the epidemic by using a vaccine which he had discovered four or five years previously.

Already, from 1911 to 1914, most of the French soldiers under arms had been vaccinated. But the mobilization men arrived in different depots in hundreds of thousands.

Doctor Landouzy, head of the medical service in the Belfort district, had 100,000 men vaccinated. Three months later typhoid fever had entirely disappeared from his district, and it was proved that only in districts where men had not been vaccinated was typhoid to be feared.

Number of Deaths Smaller.

At present vaccination is obligatory everywhere, and, thanks to this, the number of typhoid cases dropped from seven in January, 1915, to 0.025 in March, 1917.

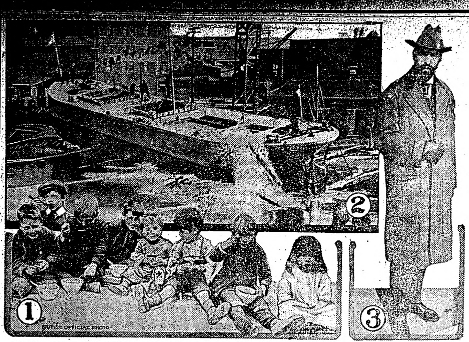
The number of deaths through typhoid had also dropped to such an extent that now they have to be reckoned on an average of 10,000 men. So far, for the present year, only 0.04 deaths in 100,000 have been recorded.

"It is permissible to affirm," says Professor Vincent, "that preventive vaccination, for which the antityphus laboratory of the Val de Grace furnished the army zones with 5,513,073 doses of vaccine, has saved a considerable number of men for the country.

"If the morbidity and mortality experienced from November, 1914, to January, 1915, had been maintained and on the hypothesis that between 4,000,000 and 5,000,000 men had been sent to the front during that period, the number of cases would have been more than a million and the number of deaths 145,000."

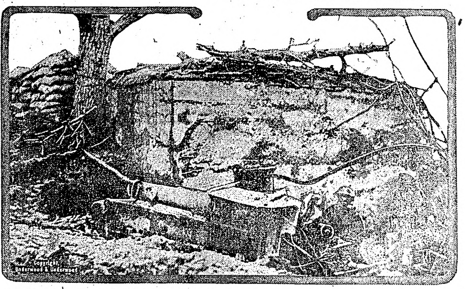
MANY WEALTHY MEN AMONG CONSCRIPTS

San Antonio, Tex.—The per capita wealth of the ninetieth (90th) division of the National army in training at Camp Travis is $650, and the average subscription for Liberty Bonds is $105 per man of the more than 33,000 men on the rolls. The conscripts composing this division were taken from all walks of life and all classes in the states of Texas and Oklahoma. Five men are worth, in their own name, $500,000 each, 20 of the recruits can sign checks for $100,000, 42 are worth, in property, more than $10,000 each, and one man is said to be the sole heir to an estate estimated at $3,000,000. There are more than 400 young men in this camp who are doing the first "real work" of their lives, and all of them are over twenty-one years of age, but they are among the happiest in the ranks.



1—Group of English children who were made homeless by one of the German air raids over London. 2—Launching of the first concrete freighter built in Canada. 3—Augustus C. Post, the famous American aeronaut who has just arrived from abroad, where he organized a foreign service committee for the Aero club of America.

ONE OF THE GERMAN "PILL BOXES" ON THE WEST FRONT



The terrific British and French gunfire in Flanders has caused the Germans to abandon intricate trench structure for defense purposes, and they have now devised concrete and steel outposts defended with machine guns known as "pill boxes." They are proving less formidable than the trenches. One of them is here shown after its capture by the British.

STRAFING THE BOCHES NEAR ANGRES

One of the efficient Canadian batteries stationed near Angres engaged in "strafing Fritz."

GIRL WORKERS WEAR MASKS

When working in a cotton fumigating plant at Bush terminal, Brooklyn, girls have to wear masks for protection against poison gas used in the process. All cotton shipped into port is fumigated with deadly gas.

Simple Remedy.

In these days of nervous prostration, called by some "nervous prosperity," because it is so prevalent among the idle rich, this story of the famous Doctor Abernathy, who did not believe in coddling his patients, is apropos:

A patient, a wealthy woman, sent for him and he found it was a case of nerves.

"Doctor," she said, "I feel a terrible pain in my side every time I put my hand to my head."

"Then, madam," said the doctor, "why in the name of common sense do you put your hand to your head?"

No Waste Allowed.

In the airplane factories in Great Britain, absolutely no waste is allowed. Even the sawdust is sucked up through giant shafts to be transformed into gas, which in turn is used to generate electricity to drive the machinery. The whole power of the plant is supplied by its own waste, a notable instance of up-to-date economical methods.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

SANDHILL CRANES.

"Good-morrow," said the Sandhill Crane to his wife.

"Good-morrow," she said.

"How do you like the zoo?"

"It makes me feel quite jolly," she said.

"It makes me feel the same way," said Mr. Sandhill Crane. "I really don't mind it at all, though I can't say I like the children much. They're forever looking at me, poking their queer fingers at me, and saying:

"'See that funny creature over there!'"

"I haven't heard them say that," said Mrs. Sandhill Crane. "It would certainly annoy me very much, too. Was that why you were so angry the other day?"

"Yes, the very reason," said Mr. Sandhill Crane. "Some children were very rude to me, and if I had been able to get near them, I would have shown them what I thought of them."

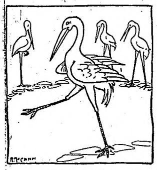
"Why didn't you?" asked Mrs. Sandhill Crane. "I never knew you were a slow bird. I should think you would have been able to reach them. I am surprised." And Mrs. Sandhill Crane held her head high in the air and started to walk off.

"My dear," said Mr. Sandhill Crane. "Pray return. You have not heard all of my story."

"True," said Mrs. Sandhill Crane. "Perhaps I was unfair to you. Well, I will return." And she walked back again and stood near Mr. Sandhill Crane.

"You must remember," he began, "that I have a fence around my home and that I cannot always get at things when I want to. Now, the children were on the other side of the wires and I could not reach them at all.

"I thought at one time I would be able to reach them because they were so near me, and then I would have given vent to my anger."



Mr. Sandhill Crane Would Show a New Step.

"I am sure you would have," said Mrs. Sandhill Crane.

"I dislike children especially," he said. "And the keeper didn't give me any chance at all. He called to the children to keep away from me. He asked them if they wanted to be hurt and they said they did not.

"I was surprised to hear that, because if they had not wanted to get hurt, why did they stand so near me and make such rude remarks?"

"It certainly looked very much as if they wanted to be hurt," said Mrs. Sandhill Crane. "But then, my dear, you have a great deal more temper than I have."

"I can't help it when I am teased, or when children get too near me, for I am not used to them. But I would fight them if they ever came within reach. It doesn't look as though they would, though, for the keeper gave them a great warning about staying at a 'safe distance' from me."

"Was that what he called it?" asked Mrs. Sandhill Crane.

"Yes," her husband answered.

"I think that's a great honor," she said. And Mr. Sandhill Crane looked very happy.

"Do you?" he asked. "Then I will surely have to dance a dance of joy."

"Let me join in, too," said Mrs. Sandhill Crane.

"We won't ask old Whooping Crane, because he has too much to be happy about as it is. He is so handsome and has such beautiful white plumage while we are the color of slate—gray-blue. He is a great deal larger than I am, too, so I won't talk about him any more or it will make me unhappy."

"That's right, don't let's talk about him," said Mrs. Sandhill Crane.

"And I really have nothing to complain about, for even the keeper knows I can be fierce if I want to be and that I won't be trifled with."

So the Sandhill Cranes were joined by other members of their family, their cousins and their uncles and their aunts. They danced! Yes, really and truly danced, and of all the strange dances you have ever seen their's were quite the strangest.

But they looked as if they were having a very gay, jolly time.

Every few minutes Mr. Sandhill Crane would show the others a new step, and after he had shown them he would chuckle and then shriek: "The keeper knows I'm not an animal to be trifled with. I can dance and I can fight!"

Don't Run Without Winding.

Why is a watch like a river?—Because it doesn't run long without winding.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

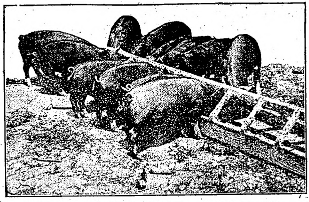
HOG FEED PROBLEM

Most Satisfactory Ration Necessarily Is Wholesome.

MIXTURE TO PREVENT WORMS

Where Pastures Are Luxuriant It Is Possible to Carry Breeding Sows on Pasture Alone—Best Age for Breeding.

The same good judgment required in the selection of stock is very necessary in the feeding and management. Good selection will be rendered ineffective if the feeding and management are not such that the animals will thrive and yield a good increase. The real problem in swine feeding is to supply sufficient nutritive material for building and repairing the body and furnishing sufficient energy to lay on fat. The most satisfactory ration must necessarily be made up of feeds which are wholesome, relished by the hog, and at the same time reasonable in cost.



CHEAP AND CONVENIENT WEANING TROUGH FOR PIGS.

It has been asserted by various experienced feeders of hogs that a mixture of charcoal, ashes, lime, salt sulphur and copperas kept where the hogs can eat it will tend to prevent worm infestation. There is no positive experimental evidence, however, in support of the idea that such a mixture will prevent worm infestation, and it is of value therefore as a source of mineral matter in the diet, and perhaps as an appetizer and tonic, rather than as a worm preventive. A balanced ration may furnish all the necessary feed nutrients, yet the system of the hog craves mineral matter. The mineral matter is not under control, and in order to make sure that the hogs have an abundant supply, free access should be given to a mineral mixture. The following is a formula for such a mixture:

Charcoal Mixture.

Charcoal	1 bushel
Hardwood ashes	1 bushel
Salt	8 pounds
Air-slacked lime	4 pounds
Sulphur	4 pounds
Pulverized copperas	2 pounds

Mix the lime, salt and sulphur thoroughly and then mix with the charcoal and ashes. Dissolve the copperas in one quart of hot water and sprinkle the solution over the whole mass, mixing it thoroughly. Keep some of this mixture in a box before the hogs at all times, or place in a self-feeder.

Dry sows can be placed in a pasture by themselves and given very little grain. Those which show an exceptionally run-down condition from suckling their pigs should be separated from the rest of the herd and fed grain until they regain breeding condition. Where pastures are very luxuriant it is possible to carry breeding sows on pasture alone, but in such case their condition must be studied closely by the breeder, in order to be sure that they are receiving enough nourishment from the pasture. Hogs require attention regardless of condition, age or sex, but the management of the brood sows is the surest test of the breeder's skill.

Age of Breeding.

The age at which a young sow is first bred will depend upon her development, but it is seldom advisable to breed her before she is eight months old. A very young sow seldom produces a large litter. Another objection to early breeding is that a young sow has not the strength to stand the strain of nursing a litter of pigs, and her growth may be checked to such a degree that she never fully develops.

A sow farrows 112 to 115 days from the date of conception. By keeping a careful service record, the breeder is therefor able to determine accurately when to expect the pigs and to make his arrangements accordingly.

It is common practice among farmers to require their sows to produce two litters a year. Although the sows have had good care, they will naturally be run down somewhat in condition, because the greater portion of the food consumed has been utilized for the production of milk.

The sow needs a rest before she is bred again, and the time for this is between the weaning and breeding periods. Intelligent feeding will bring the sow from a thin condition into a good, strong, vigorous condition in a short time. When this is done she will be in proper condition to assume her duty when breeding time arrives. If the sow is bred in a thin, run-down condition, she must resume work immediately, and she will naturally be weak and subject to the inroads of disease. A little cold contracted in this condition may cause death, while a strong healthy sow will resist such attacks. It is the general belief that sows in good vigorous breeding condition conceive more readily, thus shortening the farrowing period for the herd.

Two Litters a Year.

There is no good reason why a sow should not produce two litters a year when properly handled. To accomplish this the sow should be bred to farrow, say, for example, in march, and bred again to farrow the early part of September. A sow bred about November 15 will farrow about March 6 to 9. The pigs should nurse eight weeks. The sow should be rebred by May 20 so as to farrow on or after September 8. The pigs could then nurse until November 3. The chances for profitably rearing two crops of pigs from a sow annually are undoubtedly far better in regions of mild climate and short winters than where the winters are long and severe.

Management During Pregnancy.

During pregnancy two facts must be borne in mind. The first is that the sow is doing double duty. Not only is she keeping up her own bodily functions, but the development of the litter is an increasing drain on her system.

Corn should not be fed in large amounts to breeding stock, because it does not furnish enough bone and muscle-forming constituents to properly develop the unborn pigs.

The KITCHEN CABINET

They will ask you "What have you done?"
Not, "Who were your ancestors?"
The famous veil in the sanctuary
Is not reverenced by the faithful
Because it came from the silk worm.
—Saadi, the Persian Poet.

THE MELLOW MARSHMALLOW.

Many a common dish is changed into a most tasty one by the addition of a few marshmallows. Drop in the cut-up marshmallows while heating the icing for the cake; they will melt entirely if fresh and make most delicious frosting. To make pudding sauces melt them in a little grape juice if the sauce is to be served with a fig or plum pudding, a little vanilla if used with prune or date or with gingerbread.

Cream pie, chocolate pie or custard is made quite elegant by decorating the top with quartered or whole marshmallows just before putting on the meringue.

An apple pie made of thickened apple sauce covered with marshmallows instead of a meringue is both delicious and pleasing to the eye. The pie should be set in the oven to puff and brown the mallows before serving.

Fudge, cream candy and boiled icing stay moist longer and are creamier if marshmallows are added to them.

In any candy they may be dropped in and stirred until dissolved while the candy is cooking.

Delightful marguerites are made by putting a marshmallow, dented in the center, where a bit of butter, a nut or a bit of dried fruit may be placed, all on a round cracker, browned in the oven.

When serving children cocoa, a marshmallow pleases them better than cream for a garnish to the cup of cocoa or chocolate.

A boiled custard is improved by adding a handful of marshmallows to the custard when cooking.

Gingerbread cut in squares while hot with a fork, the pieces broken open and a marshmallow placed sandwich fashion in each, then set in the oven to melt, served with whipped cream and a cup of tea, makes a most delectable cake for an afternoon tea.

Dates and prunes stuffed with marshmallows add variety. Mixed with various fruits, a bit of salted dressing and whipped cream, makes a salad hard to equal for deliciousness.

WHOLESOME DISHES.

When roasting mutton, lamb, or in fact any good-sized cut of meat, if one uses a sharp knife, making soft pockets to insert bits of fat, onion, garlic, pepper, or other seasoning, the meat will be much better seasoned than with the usual all-over method which is too apt to overseason the gravy.

Corn Chowder.—Take an inch thick slice of fat salt pork, and one small onion, one and a half cupfuls of corn, one and a fourth cupfuls of sliced potatoes, a fourth of a teaspoonful of pepper, one and a half cupfuls of hot milk, two tablespoonfuls of butter and a teaspoonful of salt. Cut the pork in bits and cook in a frying pan until brown and all the fat is tried out, add the onion and cook it until yellow. Pour boiling water over the potatoes and cook five minutes, then drain. Pour a cupful and a half of boiling water on the onion and pork and simmer 20 minutes, strain this water over the potatoes and cook until they are nearly done, then add the corn, milk and butter with seasoning. Serve very hot with crackers that have been soaked in boiling water, then added to the chowder. Codfish may be used in place of the corn, or in fact any fresh cooked fish.

Graham Cracker Cake.—Take one and a fourth cupfuls of sugar, one and a half cupfuls of sour milk, two tablespoonfuls of butter, two eggs, a teaspoonful of salt and the same of soda, with 32 graham crackers rolled very fine. Mix and bake in two layers. Use lemon filling.

Chicken Croquettes.—Make nice, shapely cakes of well-seasoned mashed potato, cook until brown in hot fat. Remove to a hot platter, make a deep depression in each, fill with hot minced and well seasoned chicken, sprinkle with buttered bread crumbs or riced egg yolks for a garnish.

Boiled rice with tomato, chopped green pepper, a little onion added to a very small amount of meat, will make a most filling main dish. Bake in the oven until thoroughly heated through.

Creamed Potatoes.—The very best creamed potatoes are prepared from the freshly cooked vegetable. Cut the potatoes in cubes and cook in boiling salted water. While they are cooking prepare a rich white sauce, using four tablespoonfuls of butter and four of flour, cook until thick, then add a pint of milk, the richer the milk the better, the white sauce, season well, then stir in the well-drained potatoes, piping hot. Grated cheese or onion juice may be added if desired. Mixing the hot potatoes in the seasoned sauce, they are better seasoned than the cold potatoes will be when added.

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

Based On Cost Per Tablet
It Saves 9½c.
HILL'S
CASCARA QUININE
BROMIDE
No advance in price for this 20-year-old remedy—25c for 24 tablets—Some cold tablets now 30c for 21 tablets—Figured on proportionate cost per tablet, you save 9½c when you buy Hill's—Cures Cold in 24 hours—grip in 3 days—Money back if it fails. 24 Tablets for 25c. At any Drug Store

Tragedy of the Cuisine.

"Did you tell the cook she must economize?"

"Yes," replied young Mrs. Torkins. "She asked me what it meant and I said to avoid waste. She said she had no more waist than I have and it was nobody's business anyhow; and she's going to leave tomorrow."

KIDNEY TROUBLE NOT EASILY RECOGNIZED

Applicants for Insurance Often Rejected

An examining physician for one of the prominent life insurance companies, in an interview of the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

We find that Swamp-Root is strictly an herbal compound and we would advise our readers who feel in need of such a remedy to give it a trial. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

It Has All Been Said.

"Are you getting ready to make a big speech in congress?"

"No," answered Senator Sorghum; "not unless a new topic develops. I think I have offered or listened to every possible observation on every conceivable subject available up to this time."

NEVER FAILS TO END MISERY OF PILES

Stops Itching at Once.

"Hundreds of people in this vicinity," says Peterson, "know of the mighty healing power of PETERSON'S OINTMENT in eczema, salt rheum, old sores, itching skin, ulcers, pimples and all diseases of the skin. They know it cures these ailments—that it is guaranteed to cure them."

Now I want to say to every sufferer from piles, either blind, bleeding or itching, that I will guarantee that a 30 cent box of PETERSON'S OINTMENT will rid you of piles or your druggist will return your money.

"For years I suffered terribly with itching and bleeding piles. I tried everything and despaired of ever getting rid of them. It gives me great pleasure to state that Peterson's Ointment entirely cured me, and I sincerely recommend it to all sufferers."—Yours truly, David A. Seymour, Supt. of Parks, Buffalo, N. Y. Adv.

An Opportunity.

"Do you think Bliggins wants to fight for his country?"

"Undoubtedly. He never missed any other chance to fight. He now has the opportunity of his life to put a belligerent disposition to a good account."

GREEN'S AUGUST FLOWER

Has been used for all ailments that are caused by a disordered stomach and inactive liver, such as sick headache, constipation, sour stomach, nervous indigestion, fermentation of food, palpitation of the heart caused by gases in the stomach. August Flower is a gentle laxative, regulates digestion both in stomach and intestines, cleans and sweetens the stomach and alimentary canal, stimulates the liver to secrete the bile and impurities from the blood. Sold in all civilized countries. 30 and 90 cent bottles.—Adv.

The Draft.

Said a "rooky" to his companion, both bound for military service at Camp Sherman at Chillicothe, O.:

"Say, what put the chill in Chillicothe?"

"I don't know. What did?"

"The draft."—Indianapolis News.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative, three for a cathartic. Ad.

A political victory only lasts about forty-eight hours. Then the struggle begins to prevent a future defeat.

The difference between a skin-deep beauty and the other kind is that you get the other kind at the drug store.

Beautiful Customs and Traditions of the Christmas Season

By VALENTINE YARNALL.
In Philadelphia Public Ledger

BUT do you know aught of the first observance of Christmas? Of the first celebration by the masses in general of Christmas as a great holiday? And do you know the origin of the various things that are a part of our modern Christmas — the Yule log, the mistletoe, the holly wreath and the Christmas card?

The word Christmas is "Cristes Maesse," the Mass of Christ, first found in 1038, and "Cristes-messe" in 1131. In Dutch it is "Kerstmisse;' in Latin, "Dies Natalis;" in Italian, "Il natale," and in German, "Weinachtsfest." These are, of course, based on the Christian celebration of Christmas as the birthday of Christ.

We are told that the pagan countries of the world held festivals before the birth of Christ and that as Christianity spread the early church sought to replace these pagan festivals with Christmas festival. The old pagan nations of antiquity had a tendency to worship the sun as the giver of light and life. These festivals took place near the winter solstice, the shortest day in the year. This holiday was called Saturnalia by the Romans and celebrated with great merriment.

Among the people of the north great fires were kindled to Odin and Thor and sacrifices of men and cattle were made. The ancient Goths and Saxons, called this festival Yule, which is preserved today in the Scottish word for Christmas. The early Teutons celebrated by decorating giant fir trees as celestial sun trees. The lights represented the flashes of lightning overhead; the golden apples, nuts and balls symbolized the sun, the moon and the stars, while animals hung in the branches were as sacrifices.

It is related that Christmas was not among the early festivals of the church. The first evidence of the feast, according to church historians, is from Egypt. And December 25 was not the day celebrated with any uniformity in the early days of the church. The celebration of December 25 spread to most parts of the East in the fourth and fifth centuries. At Rome the Nativity was celebrated December 25 before 354; in the East, at Constantinople, not before 379.

As Christianity supplanted paganism, many of the old customs were carried along to be handed down through the ages. We have distinct evidences of Christmas celebration in "Merrie old England" in the Anglo-Saxon days of Alfred. The holiday season then began December 16 and ended January 6. With the rise of Puritanism the existence of Christmas for a time was threatened. And this extended to this country with those Puritans who brought an anti-Christmas feeling to New England.

By degree of the Roundhead parliament in 1643 and the general court of Massachusetts in 1659, the observance of Christmas was officially banned by England and the New England colonists. But the restoration of English royalty brought about the restoration of Christmas, and in 1681 Massachusetts repealed the law of 1659. And so Christmas has remained through the centuries and is celebrated now through the entire civilized world.

Always, but particularly at Advent, the Norwegian makes much of hospitality. On Christmas day, if you were to call to see him, his first courtesy would be to offer you a pipe of tobacco, and at dinner, which is usually more simple than that of other races, national hymns are sung between the courses.

In Sweden, where in truth it is evident that "cleanliness is next to godliness," the industrious housewife has the entire house renovated for the festival. Nor do they forget their annual friends, for before they sit down to their own dinner a sheaf of corn is fastened to a pole and placed in the garden. This is done in order that the birds may not be without their share of the enjoyment.

Another beautiful custom in Scandinavia is that of placing in a row a pair of shoes belonging to each member of the household. This is done on Christmas eve, and signifies that they will live together in harmony for another year.

When Christmas comes in Germany the whole family prepares to go to church. They form in line, probably in the order of their ages, and, armed with lighted candles, march to the service. As the edifice has no other light than that furnished by the candles, it makes a very pretty effect to see them appearing one by one until they have spread over the entire church. With this service the season is supposed to begin. In every house the tables are spread with all sorts of good things, and the lights are left burning the entire night. This is done in order that the Virgin and the angels will find something to eat when they pass.

Some of the superstitions are very quaint and beautiful. One existing in some parts of Poland and elsewhere is that on the night before Christmas the heavens open and the scene of Jacob's ladder is enacted, this, however, being visible only to saints.

Candles are put in the windows in certain parts of Austria, so that the Christ Child may not stumble in passing through the village.

In Bulgaria they have a curious custom. No one will, if it can possibly be avoided, cross a strange threshold on this day. It was an early custom among these people to put corn in the stockings. The head of the family would sprinkle some in front of the door, saying, "Christ is born," and the reply from the family was, "He is, indeed." More corn was then taken and put in the fire, and wishes would then be made for the family, for the house, for the cattle and for the crops. A brand was saved from the fire and placed in the notch of a tree, that assuring them of plentiful harvests for the coming year.

A maiden in Suabia, in order to know something of the appearance of her future husband, would draw one from a bundle of sticks; if it were short, he would be short; if it were long, he would be tall; if it were crooked—and so on.

Another method of learning of the appearance of a lover (this time his features) would be to pour melted lead into a bowl of water, and, from the shape which the congealed metal took when it cooled, imagine some one who appeared like that.

Christmas eve in Russia is a very bustling time. (Remember, this means prewar and prerevolution times in Russia.) The peasants prepare to, and eventually do, form into a procession and march through the village. They are sure to pass the houses of the nobility, the mayor and other officials, stopping at each one to sing carols and receive, in return, copper. This habit of begging is called "Kolenda." A masquerade follows the procession, and as soon as the evening star arises the supper is spread.

Paris indulges in one great fete the night before Christmas. It finds everyone eating a sumptuous dinner, and the restaurants are taxed to their greatest capacity, for on Christmas eve, if at no other time of the year he has a full meal, the Frenchman has it then. At the Foundling hospital in Lyons a practice is maintained which (in the light of recent statements about the decreasing birth rate in France) is somewhat humorous. A royal welcome is prepared for the first infant received that day. This special honor, however, has a very beautiful meaning—it being intended to contrast the humble story of our Savior with that of this foundling.

In sunny Italy a sumptuous banquet is prepared, consisting mainly of fish cooked in many different ways. Fish is eaten for a week previous to Christmas and its feast day. The churches are largely attended and the Italian is careful to see that his children go also. The children have their part of the rejoicing in what is called the "urn of fate." In some receptacle, preferably an urn, are placed written fortunes, and the children and their friends, in the order of their ages, draw lots. Great merriment is occasioned by some of the ludicrous results. This is to them what the Christmas tree is to the American child.

Peru presents a scene of varied activity at this time of the year; people are bustling to and fro and having a jolly good time; suddenly the church bell rings, calling them to the midnight mass. The interest of the next morning, Christmas day, is usually centered about a bull fight, the most popular one of the year and one in which it is said the women take more interest than the men. After this there is a religious pro-

From Germany we get the Christmas tree; Santa Claus from Holland; from Belgium and France the Christmas stocking, and a "Merry Christmas" from England.

And a Merry Christmas it was, with its ruddy glow from the kindling Yule logs and the gleam from the pearly berries of the mistletoe. There are early records of the mistletoe having been used as a decoration, and it was held in great reverence by the Celtic nations.

The bringing in of the Yule log had origin in a really interesting manner. In the days when England was young it was the custom of the serfs to bring fuel with them to the baronial hall. The dinner which they received there was to last as long as the wood burned. This was called bringing a "wet wheel." The wet wheel was usually a green branch or limb of a tree, and it is obvious how, since their dinner depended upon the size of the stick furnished, the stick eventually became larger and larger until it assumed the proportions of a log. The term "Yule" which is prefixed to it simply signifies that it is a log of the "Yule" season.

In the old days the feast of St. Martin, November 1, opened the Christmas season. From that time on mummery and merriment were king.

Elizabethan England, and even England of a later period, is rich in traditions and superstitious beliefs.

Anyone turning a mattress on Christmas day would die within the year; but the baking of bread was commended, and loaves baked on that day would never grow moldy.

Yule cakes were supposed to have miraculous power, and on them representations of Jesus were sometimes pressed.

In some places in Oxfordshire every maid servant had the privilege, and frequently exercised it, of asking a man for ivy to decorate the house. If the man assented, well and good; but if he refused, the maid stole a pair of his breeches. The next day they could be seen nailed to the gate on the highway.

The first maid to pass under this evergreen on Christmas day was sure to be married within the year, and equally sure of being kissed—for that was the penalty to be paid by any maid who passed under it. After each offense a berry was plucked, while the privilege was supposed to cease with the last berry.

For anyone but a dark-skinned person to cross the threshold first on Christmas day was considered unlucky in parts of Scotland, the reason for this being that Judas had red hair. No one would think of giving a light or matches at this time in certain counties, and the bees were supposed to sing all night Christmas eve, although previous to this a sprig of holly had been placed on the hive. Mortals who die on that night are certain of immediate and perennial happiness.

But enough of these children of the imagination, citizens of the past. Do we not hear, just outside our chamber door, a youthful choir singing a carol, as did Washington Irving on that Christmas morning when he was at Bracebridge hall? And, through the night, were there not voices either blended with, or a part of, our dreams, which sang the news of a Savior born?

The singing of carols is not peculiar to England, where it was introduced by the Puritans. In France they are similar in character to those of the nation across the Channel, and are called noels. In Italy the Calabrian shepherds are itinerant musicians and choral singers. At the season of Advent they come down from the mountains to the cities singing their peculiar hill music. Lady Morgan gives an interesting account of the piety of these shepherds. Having seen them stop every year in front of a carpenter's shop in Rome, to sing and play, she questioned them of the reason for this. They replied that in that way they gave honor to St. Joseph, who was a carpenter also. The name of these singers is piferari.

The word "carol" is really formed upon two other words: Cantare, to sing, and rola, an interjection of joy. Therefore, the term carol need not be confined to Christmas music, although that is the general use of the world.

In Wales and Ireland the custom of singing carols is better preserved than in England, as is also the case in France.

Of the origin of the Christmas tree, we have many beautiful legends, of which that of St. Boniface is not the least. Unfortunately, it is too long to have more than a mere mention of the recognition that is due it in an article of this character.

A Scandinavian myth tells of its having sprung from blood-saturated soil, where two lovers met a violent death, and always thereafter on Christmas eve lights were seen to burn in the branches.

On of the French legends of the thirteenth century speaks of a gigantic tree which the hero discovers. Its branches were covered with burning candles, and on the top floated a vision of a child. Not understanding the meaning of this, he asked the pope for an explanation. The pope's reply was that the tree represented mankind; the child, the Savior; the candles, good and bad human beings.

Some writers have found a connection between the original Christmas tree and Yggdrasill, the giant ash tree of Scandinavian mythology, which spread its branches over the whole world; others point to the pine tree used in the Bacchanalia, which was crowned with the image of Bacchus, and again there are those who speak of the custom of the ancient Egyptians, who at the time of the winter solstice decorated their houses with the branches of the date palm—these are all referred to as probable progenitors of our custom of trimming a tree and decorating our buildings. Similar trees were used on festive occasions by the Hindus, sometimes artificial and of priceless value, being formed of pearls and other precious stones.

Whatever may be said, there is no certain knowledge of the use of the trees as we now have it before the sixteenth century. We find it appearing at Strassburg, in Germany, at about that time, and for 200 years it was maintained along the Rhine. After this period, during which it was gaining strength, it suddenly flashed over all Germany. This was at the beginning of the nineteenth century, in the 50 years succeeding this sudden growth it had struck its roots into all Christendom.

The preparation of it for the eyes of the young in Germany, the country where the modern practice originated, is an affair of great secrecy. It is kept in a separate room, which is locked, and into whose mysteries none but the mother is initiated.

At six o'clock in the evening of the day before Christmas the door is opened and in the children rush to receive their presents, which are hung on and spread all about the tree. Then the children present their gifts to their parents, and then to each other, and the whole surprise is over before Christmas eve has passed. Probably this explains the lassitude that is experienced the next day—which feeling, nevertheless, is not solely characteristic of Germany.

America received its first tree through the German immigrant, who brought it with him. But for a long time the festival did not receive recognition because of the laws forbidding it. It was not until the latter part of the eighteenth century that these laws were repealed, and after that it took some time for it to emerge from the state of quiescence into which it had been forced.

To our country belong the honor of being the birthplace of the Christmas card, which, sadly enough, together with other Christmas remembrances, has degenerated in some cases to a mere business convention.

The custom first started with the school pieces which the schoolboy of the middle nineteenth century was to read at the annual school exercises always given at this time of the year. The original flourishes of embellishment on these cards, upon which the pieces to be read were written, grew into an elaborately designed poem or maxim, good wishes or what not.

Tusser, in his "Five Hundred Points of Good Husbandry," said, and wisely, too:

> "At Christmas play and make good cheer,
> For Christmas comes but once a year."

Happy are those who profit by this advice, and more happy those who maintain, in some form, this spirit through the 364 days which intervene before another such time returns.

Had To Give Up
Was Almost Frantic With the Pain and Suffering of Kidney Complaint. Doan's Made Her Well.

Mrs. Lydia Shuster, 1838 Margaret St., Frankford, Pa., says: "A cold started my kidney trouble. My back began to ache and got sore and lame. My joints and ankles became swollen and painful and it felt as if needles were sticking into them. I finally had to give up and went from bad to worse.

"My kidneys didn't act right and the secretions were scanty and distressing. I had awful dizzy spells when everything before me turned black; one time I couldn't see for twenty minutes. Awful pains in my head set me almost frantic and I was so nervous, I couldn't stand the least noise. How I suffered! Often I didn't care whether I lived or died.

Mrs. Shuster

"I couldn't sleep on account of the terrible pains in my back and head. Nothing seemed to do me a bit of good until I began taking *Doan's Kidney Pills*. I could soon see they were helping me; the backache stopped, my kidneys were regulated and I no longer had any dizzy spells or rheumatic pains. I still take *Doan's* occasionally and they keep my kidneys in good health."

"*Sworn to before me.*
F. W. CASSIDY, JR., Notary Public.

FOSTER-MILBURN CO., BUFFALO, N. Y.

A Touch of Nature.

The scene is a crowded bus. A soldier, back from the trenches, sitting in a corner near the entrance, put his hand into his pocket for his fare, and pulls out a shilling and some coppers. The bus jolts violently and, to the soldier's dismay, the shilling slips from his fingers just as the lights go out, as they always do in London, in these days, when a bridge is being crossed. The passengers with one accord begin to grope for the soldier's shilling. "'Fraid it rolled off, mate," says the conductor. Then lights go up again, and discover three passengers each holding out the shilling.—Christian Science Monitor.

The Quinine That Does Not Effect Head
Because of its tonic and laxative effect, Laxative Bromo Quinine can be taken by anyone without causing nervousness or ringing in the head. There is only one "Bromo Quinine." E. W. GROVE'S signature is on box. 30c.

Wrong Home.

Timson was naturally a patient man. He had listened as young Fudwiddle talked, had watched him squeeze Maria Timson's hand under the tablecloth as he made havoc of the two-shillings-a-pound sirlion at the supper table, and had yawned all in vain as a hint that the time of leave-taking was considerably overdue.

When the young man sat himself down at the piano and began to sing, Timson muttered "Good-night," gruffly, and stalked up to bed.

An hour or two later the music was still in full swing.

"Maria!" shouted Timson, from the top of the stairs, "what's all that noise about?"

"Noise, father!" said Maria, in horrified tones; "why, it's Mr. Fudwiddle singing, 'I Love That Dear Old Home of Mine.'"

"Oh! does he?" came from the landing. "Well, just tell him this ain't it."
—London Tit-Bits.

Senatorial Procedure.

"I am now beginning to understand about senatorial procedure."

"Huh?"

"If it's a poker game it's a meeting. A request for a small loan is an interview. If a few senators gather to sample some prime old stuff it's a conference."—Louisville Courier-Journal.

One man may speak of another, but one woman can't talk for another with any degree of satisfaction.

Henrietta, Okla., women are working in a coal mine.

POSTUM CEREAL

Instant Postum fits the spirit of the times perfectly. It is Purely American
Economical (without loss of pleasure)
Convenient (ready for instant use)
and is a pleasing, wholesome, drug-free drink good for both young and old.

"There's a Reason"

HOW TO CLEAN CAR

Warm Water Recommended and Avoid Some Chemicals.

WET SPONGE QUITE HARMFUL

Complete Bath for Auto Is at Best a Time-Consuming and Troublesome Operation, Especially During Winter Season.

Paint and varnish manufacturers will say that any chemical cleaner and polisher will contain substances injurious to the high finish of the car. This may or may not be true of several of the chemicals now on the market, but certain it is that a car, already neglected beyond the possibility of rehabilitation by means of soap and water, can be made almost new by the frequent and proper use of proper grades of such cleaners, writes H. W. Slauson in Leslie's.

Nature's own solvent, water, is still considered by automobile manufacturers as the best cleaner. This water should not be any warmer than is necessary to dissolve the accumulated dust and mud. Warm water tends to soften varnish, while cold water has the opposite effect and is one of the best hardening agents available. The less soap that need be used the better for the finish of the car, for the mud and stain removing qualities of soap must lie in its combination with a chemical which also tends to remove the varnish. However, immediate rinsing with cold water, so that all traces of soapsuds are removed, will not damage the car seriously if soap of the proper kind has been used.

Mistake of Many Owners.

A mistake which many owners make is to rub the mud and dust off the highly finished surface with a wet sponge. The particles of dust and grit thus wiped off form an abrasive which scratches the mirror-like surface of a new car, and care should, therefore, be taken to flow a gentle stream of water over the surface to be washed so that the mud will be loosened and the dust rinsed off. The sponge should only be used to assist the flow of this dust and mud. After the car has been thoroughly rinsed with clean, cold water, a well-wrung chamois skin should be used to remove the excess moisture and to assist in uniform drying.

But the complete soap and water bath for a car is at least a time-consuming and troublesome operation, and, especially in winter time, it is an uncomfortable if not dangerous occupation. It is little to be wondered at, therefore, that many preparations have been placed upon the market to remove dust, mud and grease and to polish the car without the use of water.

Renew Neglected Car.

The car which has not been cared for properly or which is beginning to give evidence of the need of a new coat of paint or varnish can be temporarily rehabilitated as often as desired by the use of one of the abovementioned cleaners and polishers, for the reason that no water is used with them. They are applied either by means of a soft rag or in the form of a fine spray from an atomizer and are used directly on the mud and dust. Included in the composition of such cleaners is an oily chemical which coats each particle of dust and mud so thoroughly that it is rendered harmless and cannot scratch the surface of the car.

Metal Parts Will Rust.

If you have detachable wheels, remember that the metal parts may rust. Every time you change a wheel cover the metal contact surfaces with grease, otherwise the detachable wheel will no longer be detachable.

HINTS ON CAR LUBRICATION

Not Enough Attention Is Given to Matter by Drivers of Machines—Drain the Crank Case.

(By H. L. THOMSON, Oklahoma Experiment Station.)

Not enough attention is given by drivers of automobiles to the changing of the lubricating oil in the crank case. Fresh oil is poured in the crank case from time to time, but no thought is given to what happens to this oil.

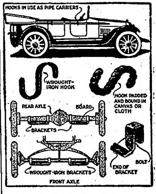
The oil breaks down into gum and carbon as it wears out, neither of which will lubricate. Pouring fresh oil into this mixture simply dilutes it. There is also water, which will separate from oil into the bottom of the crank case, as well as dirt and material which will have a tendency to clog up the strainer of the oil pump and cause serious trouble.

Once in every 2,000 miles the crank case should be drained of oil and the oil strainer cleaned. A gallon of kerosene is put in and engine run for about a minute, and the kerosene drained off. It is surprising how black and dirty this kerosene will be, and what dirt it will bring out with it. Then when fresh oil is put in the crank case the engine has a clean oil. Under such treatment the bearings will stand up for a long time without taking up. The wear on the whole internal mechanism of the motor will be much less. In addition to this, the driver will save many dollars in fuel bills. Friction is greatly increased on the inside of the engine when carbon and gum are present in the lubricant, and it will take more power to run an engine, and the engine will have less power to drive the car. Changing the oil as often as this is apparently an expensive procedure, but really is the cheapest insurance for long life that the engine can have.

HAULING BRACKETS ON AUTO

These Devices Are Useful in Carrying Pipes, Ladders, Poles and Similar Articles.

Two simple methods of adapting an automobile quickly for business purposes are shown in the sketch, writes G. A. Luers of Washington, D. C., in Popular Mechanics. The S-shaped wrought-iron hooks, padded in cloth or canvas, are used by a plumber to convey long sections of pipe handily. The brackets are used by a paper hanger in transporting scaffolding. They are made of wrought iron, as shown, to conform to the axles of the car.



Detachable Brackets.

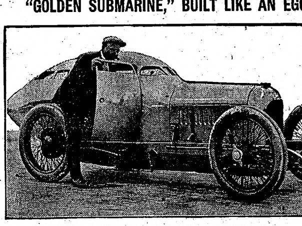
They Believe in Signs.

More than 20,000 road signs for touring motorists have been erected in Ontario the last few years by the Ontario Motor league, nearly 3,000 of them during the last year.

Iceless Refrigerator.

An iceless refrigerator has been invented for automobile tourists or campers, the food container being surrounded by a water bag that is kept cool by evaporation.

BARNEY OLDFIELD'S RACING MACHINE, "GOLDEN SUBMARINE," BUILT LIKE AN EGG



UNIQUE RACER BUILT ESPECIALLY FOR OLDFIELD.

The ordinary racing car, because of its shape, creates air eddies and currents that force the car to push a mass of air along in front of it and pull along another mass in back of it by suction. It requires a certain amount of power to move these masses of air. This leaves less for the actual propulsion of the vehicle whose speed is correspondingly decreased. Hence greater speeds than ever before attained by racing automobiles should be made possible by the unusual egg-shaped body which Barney Oldfield, the famous automobile racer, had made for him. It is known as the "Golden Submarine." Except for the projecting hood over the engine, Oldfield's car is the nearest approximation to a perfect streamline body ever made. Even the pan under the engine is blended into the body in such a manner as to present as little surface as possible against the propulsion of the car through space. The body is completely inclosed and has none of the usual flat surfaces and angles.

Automobile makers have learned much from the airplane builder concerning the construction of bodies that part the air easily and so cut down wind resistance.

Brief Items of State News

Three bank clerks, several railroad office employes and a number of other local young men of International Falls will enlist at once and the majority of them will enter the radio service.

Plans are well under way for the second annual industrial short course to be offered by the St. Cloud Technical high school, which will open on Monday, Jan. 7, and will continue for 12 weeks.

Archie Stone, member of the legislature from Stevens county, and H. A. Le Lashmutt, late city editor of the Morris Tribune, have enlisted in the aviation service. The former will go to the training camp at Berkley, Cal., and the latter to Fort Sam Houston, Texas.

The state game and fish commission sent a big shipment of white fish and tulibee to Red Wing. The fish were placed on sale at all the meat markets in the city at exact cost to the state in marketing the supply, white fish at 12 cents per pound and the other fish at 8 cents a pound.

Verdicts of not guilty in the cases of Oliver Smith of Morristown and William Van Hout of Dundas, charged with disloyalty, were returned in district court at Faribault. Smith was accused of saying that the Unitted States never should have entered the war and Van Hout of stating he wished the president were dead.

While all of the figures for the ore shipments from docks at the Head of the Lakes were not obtainable it is believed in shipping circles at Duluth that the season will show about equal to 1916 and may exceed it. Last season the Duluth, Missabe and Northern shipped 21,455,245 tons and to date this year has shipped 20,270,617.

The water and light plant at Lakefield, Jackson county, blew up, killing Peter Neison, engineer, and badly injuring three other men. It is believed dry boilers caused the explosion. The blast shook the entire town. Lakefield is without electric lights or water from the city system as a result. The explosion blew the roof from the brick building and the walls were badly shattered.

Without one casualty in Minnesota, the big game season has ended. The number of hunters was below normal, because many of the former big game hunters were stalking foes in Northern France. Hunting was largely confined to residents, who sought to hang up a deer to keep down the high cost of meat during the winter. The number of moose killed in Minnesota was proportionately higher than usual

Stockholders of the Clay County Creamery association have decided to build a modern creamery building in Moorhead to cost about $6,000.

Thomas A. Donlin, manager of the Thompson yards at St. Cloud, enlisted in the forestry service for the engineers' corps and left for Fort Snelling, where he has been ordered to report.

A bowing well yielding 100 gallons a minute has been located at Lincoln by Harry W. Peterson, while drilling. The flow was struck at a depth of only 90 feet. Flowing wells are very rare in that section of the country.

An appropriation of $1,000,000 has been made by the Minnesota public safety commission to be used in perfecting the organizzation and supplying equipment for the Minnesota home guard, this action being taken on advice of Secretary Baker of the department of war.

About seventy-five beavers in the large colonies in Itasca State Park will be killed under a special permit issued by Commissioner Carlos Avery of the state game and fish department. The pelts will be turned over to Commissioner Avery for sale at auction and the proceeds will be credited to the park fund.

Sheriff Kelly of Crookston has announced that if he enters any so-called soft drink emporiums in East Grand Forks under a search warrant, that he will confiscate all intoxicating liquors and fixtures connected with the sale of them in any way, such fixtures being the bars, tables, chairs and any other fixtures pertaining to the sale of the liquor.

Leech lake has been opened up as another state fishery lake and fishermen may now operate with net in securing the rough fish that are so plentiful in this lake and a menace to the game fish. The netting is done by permit from the State Public Safety commission under the direction of Carlos Avery as superintendent and with S. A. Selvig of Redby as inspector.

Coal dealers of Minnesota are asked to carefully distribute their supplies of hard coal in a letter from Judge McGee. Judge McGee calls attention to the practice in some of the smaller cities, where a few families buy the whole supply of hard coal received by the local dealers leaving many families with none. He suggests that some coal be sold to everyone who can use it as the supply of that variety is more plentiful.

George E. Rice of Foley has been appointed judge of Burton county by Governor Burnquist, Judge Rice will fill the vacancy caused by the enforced resignation of Judge F. C. Lane who was drafted and is now at Camp Dodge. Frank J. Conway of Waseca was appointed judge of the municipal court in that city to succeed the late Judge Peter McGovern.

Nearly 200 Crookston people, includcluding the Home Guard and the Citizens' band, went to Ada on a special train to participate in the ceremonies incident to the opening of the new Great Northern depot at that place.

An Average Load.

"There goes what you might call the average suburbanite."

"How do you place him?"

"He's carrying home something his wife asked him to get at a department store, a steak, a head of lettuce and a new record for his phonograph."

To Cure a Cold in One Day
Take LAXATIVE BROMO QUININE Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 30c.

Serious Objection.

"Did you tell the cook that she must economize?"

"Yes."

"And what did she say to that?"

"She said we could eat as little as we wanted to, but her family couldn't live on less than she's been taking home every day."

HEAL ITCHING SKINS

With Cuticura Soap and Ointment—They Heal When Others Fail.

Nothing better, quicker, safer, sweeter for skin troubles of young and old that itch, burn, crust, scale, torture or disfigure. Once used always used because these super-creamy emollients tend to prevent little skin troubles becoming serious, if used daily.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Old Stuff.

"What started this row?" inquired the judge.

"Fighting talk. He called me a minion."

"What had you called him?"

"A varlet."

"You're both about eight hundred years behind the times. That might have been fighting talk during the middle ages. It isn't now."

Important to Mothers
Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it
Bears the Signature of Chas. H. Fletcher
In Use for Over 30 Years.
Children Cry for Fletcher's Castoria

Like the Drafted Men.

A number of volunteer soldiers were waiting to be "shot" when one of them remarked: "In a way this compulsory vaccination makes us conscripts."

"How so?" he was asked.

"We are forced to bare arms, aren't we?" he replied.

Natural Place.

"So Bill dressed up his story?"

"Yes, and then took it to a swallow tale party."

State of Ohio, City of Toledo, Lucas County—ss.
Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for any case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.
FRANK J. CHENEY.
Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.
(Seal) A. W. Gleason, Notary Public.
HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. Druggists, 75c. Testimonials free.
F. J. Cheney & Co., Toledo, Ohio.

Some Reason.

Probably Delilah's hair was getting thin and she became enraged at Samson because he refused to name the brand of hair tonic he used.

General Tendency.

"It costs Algernon three cents to send you a letter now."

"Yes," replied Miss Cayenne; "as with most articles the prices goes up, but the quality does not improve."

A Russian Proverb.

With God go over the sea; without him, not over the threshold.

Evansville, Ind., now has a rabbit cannery.

SELF DEFENSE

Defeat Backache and Kidney Trouble With Anuric

Many people in this section have suffered from rheumatism and kidney trouble and have found that Anuric was the most successful remedy to overcome these painful and dangerous ailments.

The lucky people are those who have suffered, but who are now well because they heeded nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's called "An-u-ric" (double strength). You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as stone in the bladder. If you want quick relief buy Anuric now (60c a package)—or send Dr. Pierce 10c for trial pkg. This will prove that "Anuric" eliminates uric acid as hot water melts sugar.

It's the Same Story Everywhere

Lavalle, Wis.—"After having a severe attack of grip last winter I was troubled with backache across my kidneys and had such aching pains in every joint of my body I thought it must be rheumatism—never had anything like it before. I am 64 years old. One day I read an article in our paper that described plainly just how I felt, so I sent to Dr. Pierce for a trial package of the Anuric Tablets. After taking them the rheumatic pains left me, and I was greatly benefited."—MRS. EMMETT DARROW, P. O. Box 117.

Minneapolis, Minn.—"I became all run-down and weak. At times was very miserable. I saw Dr. Pierce's Favorite Prescription advertised as being good for this condition. I got it and am in better health than I have ever been."—MISS JULIA CARROLL, 1312 4th Street N.—Adv.

SPOHN'S DISTEMPER COMPOUND

Canadian Farmers Profit From Wheat

160 ACRE FARMS IN WESTERN CANADA FREE

The war's devastation of European crops has caused an unusual demand for grain from the American Continent. The people of the world must be fed and wheat near $2 a bushel offers great profits to the farmer. Canada's invitation is therefore especially attractive. She wants settlers to make money and happy, prosperous homes for themselves by helping her raise immense wheat crops.
You can get a Homestead of 160 acres FREE and other lands at remarkably low prices. During many years Canadian wheat fields have averaged 20 bushels to the acre many yields as high as 45 bushels to the acre. Wonderful crops also of Oats, Barley and Flax.
Mixed farming as profitable an industry as grain raising. The excellent grasses full of nutrition are the only food required for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent.
There is an extra demand for farm labor to replace the many young men who have volunteered for the war. The Government is urging farmers to put extra acreage into grain. Write for literature and particulars as to reduced railway rates to Supt. of Immigration, Ottawa, Canada, or

WAR TALKS

By UNCLE DAN

Number Four

Military Training Necessary for Safety and Defense.

"Say, Uncle Dan," said Billie, "Jimmie and I have been looking up about war in the encyclopedia at school. We found that in the war between Germany and France in 1870-71, Germany lost in killed and wounded 28,000 soldiers while France lost about six times as many, and besides that, she lost every battle. We asked Professor Slocum why this was. He said that the German army was highly trained and ably commanded, while the French soldiers were poorly trained; and that their war department was honeycombed with jealousy and politics; that the officers were not much good, and that's why France lost the war and so many men. What do you think about it, Uncle Dan?"

"Well," said Uncle Dan, "Professor Slocum is right. By inefficiency France lost that war, together with two of her best provinces—Alsace and Lorraine—and had to pay a billion dollars indemnity money. France today learned her lesson by that sad experience, so she put in universal military training, and as a result, her soldiers now know how to fight and how to protect themselves. They are losing less men in the war than the Germans. France also put politics out of her war department, so that expert authority, instead of bureaucratic stupidity, now directs the army. The result is, France has one of the best and most efficient armies every assembled, and this shows what thorough training and good leadership means in warfare. This saved France in this crisis, as well as the liberties of the world."

"As war is now conducted, there is no place for an untrained man. A body of 10,000 well trained soldiers properly handled could defeat five times their number of raw recruits and do it every time with comparatively small loss to themselves. Proper training alone will reduce the death and casualty rate one-third of what it otherwise would be, and right here is an unanswerable argument for universal military training.

"Our government has no moral right to force her men into war service without properly training them for it. To do so is simply murder, hence the frantic effort that is now being made to give her soldiers some training before they are sent to the front. If we are to win this war, it will take trained men to do it, and it will take trained men to win any other war that may come upon us in the future. If we must fight, let us fight to win and not to lose."

"That's the stuff," said Billie.

Continuing, Uncle Dan said: "Our government has expended about $300,000,000 to put up cantonments and training stations in order to train the men called by the selective draft. When these men are trained the training stations should be immediately filled with younger men, say those in their nineteenth year, to receive six months of intensive military training along the lines of the Chamberlain bill. This will be of immeasurable benefit to them individually. It will do them more good than any other two years of their whole life; it will make them strong, manly, self-reliant, quick to see and quick to act; it will equip them for a successful life. In short, it will rebuild American manhood and will also give the government a body of trained men to draw from in case it is necessary to defend our flag and country. We must settle this question of universal military training immediately, otherwise these training camps may be demolished. The adoption of universal military training will be notice to the world that from then on we will be prepared to defend ourselves promptly and efficiently, and this will do more to keep us out of war in the future than anything else we could do."

"Do you think, brother," said Mrs. Graham, "that there will ever be another war?"

"I have no doubt about it," said Uncle Dan. "So long as men are selfish, so long as nations are ambitious to acquire territory, so long as population presses and demands more room, so long as there remains a scramble for world trade—so long wars will be. When the time comes that we reach the high plane for which we hope and dream, when all will recognize the fatherhood of God and the brotherhood of man, then, and then only, will wars cease. When that day comes doors will need no locks, banks will need no vaults to protect their treasures, but that day is a long way off.

"The only safe and sane plan is to be able to defend ourselves at all times. Therefore, every citizen should insist that senators and congressmen shall provide for universal military training, so that never again shall the country be caught so completely unready as this war found us. Fortunately, in this case, our enemy has been held back, so we have had a few months in which to prepare. This advantage probably will never come again. It is however our salvation today.

"Because she was ready, Switzerland is an island of peace in a sea of war. Safety first is good, but safety always is better. In strength there is safety. You never saw a tin can tied to the tail of a bulldog. There is a reason."

TO SETTLE FAMILY ARGUMENT

Friendly Wagers Between Husband and Wife Serve to Quench Frequent Dangerous Quarrels.

Here is a plan by which a great many family quarrels have been averted for a certain couple. They used to quarrel all the time.

Before, the wife would say:

"My dear, you'll make a mistake if you do so and so."

And the husband would reply:

"My darling, you are altogether too fussy. I know my business. Kindly let me alone, will you?"

Then would ensue a row of fearful dimensions that sometimes would shake the house, startle the servants and scandalize the neighborhood.

But now they do differently.

When they disagree they do it thus:

"Well, dear, if you think you're right, suppose you back your opinion? If I'm wrong I'll give you half a dozen pairs of gloves."

If she feels pretty confident she backs her opinion with a box of cigars, and the agreement is carefully signed by both and locked up. Then one or the other pays when the decision is reached. The young woman has an income of her own, so the arrangement is a fair one, which it might hardly be were she compelled to take her husband's own money to pay for his cigars.

Gambling is, of course, a wicked thing to do, but it checks wild assertions and smothers, in this case, many a fire that would burn up comfort.—New York Evening Post.

Mortgage Foreclosure Sale.

Default having been made in the payment of the sum of Three Hundred Eighty-eight and 50 | 100 (388.50) Dollars, which is claimed to be due and is due at the date of this notice upon a certain Mortgage, duly executed and delivered by John W. Sundahl and Coroline Sundahl, his wife Mortgagors, to First National Bank of Thief River Falls Mortgagee, bearing date the 26th day of September 1911, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the County of Pennington and State of Minnesota, on the 9th day of October 1911, at 10:00 o'clock A. M. in Book 5 of Mortgages, on page 255, and no action or proceeding having been instituted, at law or otherwise, to recover the debt secured by said Mortgage or any part thereof.

Now, Therefore, Notice is Hereby Given, That by virtue of the power of sale contained in said Mortgage, and pursuant to the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises described in and conveyed by said Mortgage. viz:

Lots numbers four (4) and five (5) of Block number four (4) of Porters Addition to Thief River Falls, Minnesota, according to the official plat thereof on file and of record in the office of the Register of Deeds in and for said Pennington County and State of Minnesota, with the hereditaments and appurtenances; which sale will be made by the Sheriff of said Pennington County at the front door of the Court House, in the City of Thief River Falls in said County and State, on the 15th day of December 1917, at Ten o'clock A. M., of that day, at public vendue, to the highest bidder for cash, to pay said debt of Three Hundred Eighty-eight and 50 | 100 Dollars, and interest, and taxes, if any, on said premises, and Twenty-five Dollars Attorney's fees, as stipulated in and by said Mortgage in case of foreclosure, and the disbursements allowed by law, subject to redemption at any time within one year from day of sale, as provided by law.

Dated October 30th, A. D. 1917.

A few boys Mackinaw coats going at bargain prices at P. C. Halvorson's.

Wilson Urges War On Austria.

President Wilson's address to congress is described by many who have heard it as the greatest speech he has ever delivered.

The message is being printed and read throughout the civilized world.

In it our Commander-in-Chief recommends war on Austria, declaring that nation is but a vassal of the Kaiser, reaffirms U. S. determination to win the war, urges more strict alien enemy laws and discusses in simple, eloquent language, other subjects vital to the nation.

President Wilson's message is printed in full elsewhere in this issue of the Eleven Towns.

If you are an American, the message is for you. Read it.

Evidently She Had Not.

The small boy was teasing his mamma for candy all during the preparation for a trip downtown, when finally, exasperated, she said: "Claude, if you don't stop mother will be angry. If I see fit when we get there I'll buy some, otherwise I'll not."

He was quiet during several visits in and out of the downtown stores, when finally he said: "Mother, have you seen your fit yet?"

Gunder Tveit called at the Aakre home last Sunday evening.

The Reiner shipping association held a business meeting at the school house ast Saturday.

NEWLYWEDS DINE ON STEW

Wifey Prepares Dainty Morsel With Own Little Hands — But Physician Must Be Called for Hubby.

The cook had insisted on a day off, and young Mrs. Freshly-Wedd was in a quandary and her stunning new house gown of twisted percale, muses the Detroit Free Press.

"I'll make a stew—anybody can make a stew!" she cried.

And she proceeded to make a stew. In the icebox she found seven frankfurters, a dozen fried oysters and three pickled herring.

"How fortunate—meat is the very importantest thing!" she exclaimed. And she chopped it all up and added three cupfuls of salt and two of pepper so as to be sure not to forget the seasoning. Then—because she knew that a stew must have lots of variety—she put in a glass of olive oil, two tablespoonfuls of grated nutmeg, two packages of Saratoga chips, a can of salmon and a half cake of bitter chocolate.

At 6:30 Freshly-Wedd came home—her Ben, stalwart and handsome, who had never known an hour's illness in his life.

"Phew!" he exclaimed. "What's that smell?"

"It's a stew I made for you wiv my own 'ittle hands," she told him.

"Divine aroma!" cried Freshly-Wedd, and forthwith sat down and ate two big platefuls, while his wife watched him so eagerly that she forgot to eat any herself.

Three hours later, in response to a hurry call, Doctor Blister drove up and rang the front doorbell. Query: Who was the patient, and why?

Gone Forever.

In the meantime, what has become of the old fashioned man who gave away all the pennies he received to children?

Thought for Day.

There are in the world few things that are worth having.

P. C. HALVORSON

Goodridge, Minn.

JERUSALEM IS WON BY BRITISH

Holy City Surrounded, Is Abandoned by Ottomans—Held Good Omen.

LONG UNDER TURK RULE

Christianity's Most Hallowed Spot In Possession of Mohammedans, With Two Brief Interludes, for 1,200 Years — England Hails Allenby's Victory.

London, Dec. 12.—Allenby's Christian army will today enter Jerusalem where Mohammedans for hundreds of years have held sway. Bethlehem, the cradle of Christianity, will also be in Christian hands this coming Christmas.

London, Dec. 12.—After being surrounded on all sides by the British troops, Jerusalem has surrendered. Andrew Bonar Law, chancellor of the exchequer, has announced in the house of commons.

Held by Turks for Centuries.

The capture of Jerusalem by the British forces marks the end, with two brief interludes, of more than 1,200 years' possession of the seat of the Christian religion by the Mohammedans. For 673 years the Holy City has been in undisputed ownership of the Turks, the last Christian ruler of Jerusalem being the German emperor Frederick II., whose short lived domination lasted from 1229 to 1244.

Ottoman Efforts Collapse.

Apart from its connection with the campaign being waged against Turkey by the British in Mesopotamia the fall of Jerusalem was the definite collapse of the long protracted efforts of the Turks to capture the Suez canal and invade Egypt. Almost the first move made by Turkey after her entrance into the war was a campaign against Egypt across the great desert of the Sinai peninsula.

Retreat Began In 1915.

In December, 1915, the Turks had been driven back as far as El Anish, about 85 miles east of the Suez canal. In December, 1916, the British stormed El Anish and a few days later severely defeated the Turks at Maghdabeh, about 60 miles to the south on the same front. Two weeks later the invaders had been driven out of Egypt and the British forces crossed the border into Palestine.

Allenby Works Near Coast.

On March 7 last the British forces captured El Khulil, 15 miles south of Jerusalem. El Khulil is the modern name of ancient Hebron. The campaign lapsed into stagnancy through the heated period.

Early in November the British captured Beersheba, 40 miles south of Jerusalem. Similarly a coastal column became active. By the seventh of the month the city of Gaza was in their hands and the British were pursuing the Turks northward after having inflicted casualties estimated as in excess of 10,000. General Allenby, the British commander, kept his forces near the coast in rapid motion and pushed on to Jaqa, the port of Jerusalem, in mid-November.

By November 22 the British had pushed within five miles of Jerusalem on the northwest and on December 7 General Allenby announced that he had definite possession of Hebron. Jerusalem thus was virtually cut off on all sides but the east.

Objective of Crusaders.

In sentimental and romantic aspect the capture of Jerusalem far exceeds even the fall of fable-crowned Bagdad. The modern city of Jerusalem contains about 60,000 inhabitants and is the home of pestilence, filth and fevers, but in historic interest it naturally surpasses to the Christian world all other places in the world. Since the days when Joshua wrested it from the hands of the Jebusites, to make it the capital of the Jewish race, Jerusalem has been prized prey of half of the races of the world. It has passed successively into the hands of Assyrians, Babylonians, Greeks, Romans, Persians, Arabs, Turks, the motley crowds of The Crusaders, finally to fall before the descendents of that Richard, the Lionhearted, who strove in vain for its possession more than 700 years ago.

Good Omen for Triumph of Right.

The news spread like wildfire throughout London. Its fall was heralded as a good omen. The most cherished Christmas gift which could be given the world of democracy and the hosts fighting for Christian justice and peace and freedom is this gift of the Holy City to world Christians again after having been held by infidel hordes for centuries.

Former Canadian Premier Dies.

Bellville, Ont., Dec. 11.—Sir Mackenzie Bowell, premier of Canada from 1894 to 1896, is dead here after a week's illness. He was 94 years old.

Sprinkled the Kaiser.

San Francisco, Dec. 11.—Frank Vandergrift was arrested at Los Angeles when he attempted to end the miseries of Kaiser Wilhelm burning in hades and was brought before a judge. A film company claimed Vandergrift turned a hose into a thrilling "hell" scene where the "kaiser" was sizzling at the expense of quantities of crude petroleum, and, besides, considerably dampened the temperament of the actors because he failed to get employment. Vandergrift was released under suspended sentence.

HEART OF MODERN JERUSALEM WHICH HAS BEEN TAKEN BY BRITISH

Copyright, Underwood & Underwood

PAY DEARLY FOR GAINS

Teutons Blocked on Both Italian and French Fronts.

Their Losses Have Been Enormous—Artillery Activity Hints of New Plan.

Paris, Dec. 12.—The attempted drive of the Germans toward the Italian plains have been stopped by the Italians, and the Germans have failed thus far to follow up their success against General Byng's army on the Cambrai sector in France.

Both in Italy and where they have faced the British the Teutons have paid dearly for any gains they have made, and apparently now they are endeavoring to find some easier spot upon which to make a drive.

Possibly their search is leading them toward the line held by the French, running eastward from the region of Soissons through Champagne, past Verdun and up into Alsace, for all along this front they are showing great activity with their artillery. Their apparent test fires are everywhere being returned by the French artillery.

Hundreds of Thousands Fall.

Washington, Dec. 11.—Rome dispatches confirming earlier reports of a lull after the fierce fighting in which the Teutons failed to break through the Italian lines says the Austro-German commander sacrificed hundreds of thousands of his best men without improving his position.

LIGHTLESS NIGHTS MAY COME

May Be Ordered By Garfield To Conserve Fuel.

Washington, Dec. 11.—Regulations limiting electric display advertising have failed to conserve the amount of fuel hoped for by the fuel administration, and a plan is under consideration to stop all outdoor lighting, save street lights, at least three nights a week.

Institution of lightless nights would snuff out entirely the white ways of cities which now are permitted to burn for a period of two and a quarter hours a night.

It would darken on nights to be named all window display lights, theatre fronts and directional signs on shops, hotels and restaurants.

On other nights there would be no restrictions whatever against any sort of lighting.

CUBA READY TO DECLARE WAR

Action Against Austria Is Expected At Once.

Havana, Dec. 11.—The belief is expressed by several congressmen that President Menocal today would send a message to congress asking that a declaration be made that a state of war exists between Cuba and Austria-Hungary.

Pershing Calls for Airplanes.

New York, Dec. 11.—A message from General Pershing to the American nation, saying "Send us all the airplanes you can and send them as soon as possible," was delivered by Augustus T. Post during an address before members of the Automobile Club of America at a War Relief assembly.

Drops Note From Train; Wins Bride.

Hinton, W. Va., Dec. 10—When Miss Ledotia S. Hyatt, a pretty milliner, saw a piece of paper fluttering from the window of a passing train, she curiously picked it up. As a result, she is the bride of J. Dale Jackson, of Spokane, Wash., with the marine corps, whom she had never heard of previous to that time. The couple were married at the home of Mr. and Mrs. B. J. Greenland, by the Rev. J. J. Rives of the Methodist church of this city. Miss Hyatt's home is in Cincinnati.

WILSON TO ASK RAILWAY LAWS

President To Go Before Congress Immediately With Plan Not Yet Revealed.

ROADS WANT INCREASE

Government Operation Is Strongly Favored By Many of President's Advisors—Roads Will Oppose Anti-Pooling Repeal.

Washington, Dec. 12.—Legislation to bring about unification of the railroads during the war is to be asked by President Wilson who will go before Congress for that purpose.

The fact became known after he had gone over the transportation situation with Senator Newlands, chairman of the Senate Interstate Commerce Committee. He will probably ask for the legislation in an address to be delivered before the holidays.

Officials were doubtful as to just what the President may ask. Some were of the opinion that he might request action in line with the suggestion with the Interstate Commerce commission that anti-trust and anti-pooling laws might be suspended during the war. Others pointed out that the commerce commission's report also carried the suggestion that additional legislation might be needed, were the government to decide to take over the operation of the roads.

Majority for U. S. Operation.

The President's advisers are divided in their views as to what is necessary to be done. Most of them, however, have come out for government operation and that some of the strongest supporters of this proposal declare the executive already under the army appropriation act has power to take over the roads for operation under an administrator.

The position of the roads themselves was set forth in a letter to Sen. Newlands from Fairfax Harrison, chairman of the railroad board. The roads, Mr. Harrison declared, do not seek a repeal of the anti-pooling and anti-trust laws, believing the cooperative use of facilities recently put into operation will bring about maximum efficiency. Neither do they seek a loan from the government, he said, although government aid is asked in obtaining for them on their own individual credit new capital needed.

Railroads Desire Rate Increase.

Further measures to make the roads more efficient, Mr. Harison suggested, would be an increase in rates, priority for transportation of new material, appointment of a traffic manager for government freight and exemption from draft for railroad employes.

North Dakota Law Sustained.

Washington, Dec. 11.—The supreme court has sustained the North Dakota inheritance tax law levying a tax of 25 per cent on property willed to aliens living in foreign countries, but from 1¼ to 2¼ per cent on bequests to resident citizens.

Would Recruit Boys For Farm Work.

Chicago, Dec. 11.—Federal state directors of the United States Boys' Working Reserve at a conference have decided to ask President Wilson to proclaim a national enrollment week during which a campaign would be conducted to enroll boys between the ages of 16 and 21 in the reserve farm work. The conference concurred in a committee recommendation that school authorities over the country arrange school terms so as to permit a maximum amount of farm labor by boys without interfering with their studies.

SANK IN 17 MINUTES

Destroyer Jones Went Down Quickly After Being Hit.

New Estimate Places Death List at Sixty-eight as Result of Torpedoing of U. S. Ship.

Washington, Dec. 11.—The loss of a large part of the crew is announced by the navy department by the sinking, in the war zone, of the American destroyer Jacob Jones.

Only 44 of 110 or more officers and men aboard are known to have survived, including one unidentified man picked up and carried off by the submarine that struck the blow.

Secretary Daniels issued this statement:

"Additional information received from Vice Admiral Sims reveals the fact that the Jacob Jones was torpedoed at 4:12 p. m. December 6. She began to settle aft and finally sank at 4.29. The submarine was not seen until some time after the ship sank. The submarine then picked up one survivor, whose identity is not known. The destroyer was not so far from the European coast as was indicated by first dispatches.

SAYS AUSTRIA IS UNAFRAID

Minister Czernin Accuses Wilson of Beclouding Issue.

Amsterdam, Dec. 11.—Declaration of war against Austria-Hungary by the United States, while "painful" to the empire, will not affect events of the war, in opinion of Count Czernin, the Austro-Hungarian foreign minister, whose speech quoted by the Vienna correspondent of the Berlin Tages Zeitung, referring to President Wilson's address to Congress, Count Czernin is quoted as having said:

"President Wilson's speech is in many respects incomprehensible and not clear, but it still makes a step forward in the President's manner of thinking, at least in one direction, when he says: 'We in no wise desire to harm Austro-Hungary and it is none of our affair to concern ourselves with institutions and peoples.'"

GIVES PICKETING SETBACK

Supreme Court Upholds Right of Employers to Maintain "Open Shop."

Washington, Dec. 11.—Right of employers to prevent labor unions from soliciting non-union employes to join the labor organizations has been upheld by the supreme court by a divided vote of six to three in test cases against the United Mine Workers of America and the American Flint Glass Workers.

Methods of the labor organization in attempting to unionize the "open shop" workmen and bring about strikes were declared "unlawful and malicious."

Three Die in Cleveland Cold.

Cleveland, O., Dec. 11.—With the thermometer at 5 degrees below zero, three lives were lost, several homes destroyed by persons thawing out pipes, a man and a woman overcome by gas fumes in their home, four men are in hospitals with frozen hands or feet, and one man was seriously injured by a street car as a result of the worst blizzard in years.

Teuton Military Defense League Here.

New York, Dec. 10—Letters indicating the existence in this country of a "German military organization for defense" were seized by agents of the naval intelligence bureau when they examined the effects of Otto Julius Merkel, a German writer and lecturer, who was arrested and interned on Ellis island on orders from the government authorities. Suitcases and trunks were filled with letters, some from Merkel's mother in Germany. One of them said General von Mackensen had visited her on several occasions.

DANIELS PROUD OF NAVY'S WORK

In Annual Report Secretary Tells Of Big Problems Met and Solved.

READY FOR ALL DUTIES

Department Will Need Over Billion Dollars In Next Year For Rigorous Prosecution of War.

Washington, Dec. 10.—The annual report of Secretary of the Navy Daniels, just made public, makes pride in the achievements of the navy since the United States entered the war, its keynote.

Daniels Sums up Report.

Secretary Daniels himself sums up the report in these words:

"In the navy we have prepared for and have met the duties of the present; we are preparing for and are confident we will be able to meet any call for greater duties, for more exacting responsibilities. The best way to secure enduring peace is to prepare unceasingly, night and day, for the winning of the war, whether it be long or short. This we have done; this we are doing; this we will continue to do."

Big Problems Met.

Problems that have arisen and have been met since the declaration of war with Germany are listed by Secretary Daniels as follows:

Preparing for impending and actual war.

The co-ordinating of our efforts.

The carrying on of offensive operations against opponents.

Providing safe passage for ships transporting army across the ocean.

Maintaining available naval forces in a state of readiness for battle.

Providing additional fighting units necessary to bring the war to a successful conclusion.

Training personnel to man the new units of the navy and to assist in manning the merchant marine.

Since the beginning of the war 745 vessels have been commissioned and manned.

Too Many Volunteers.

The navy actually was embarrassed in the early days of the war by the eagerness with which young America responded to the call for naval recruits.

Secretary Daniels estimates that the total expenditures for naval activities during the next fiscal year at $1,039,650,502.84. All appropriations not essential to the rigorous prosecution of the war are excluded from this estimate.

THIRD BLIZZARD AT HALIFAX

Another Storm Stops Rescue Work and Burials.

Halifax, Dec. 11.—A roaring blizzard, the third to sweep over this city since a blast from an exploding ammunition steamed killed 4,000 and made 25,000 persons homeless, has burst from the Northwest.

Raging with all the fury for which these northern winter storms are noted, it all but crushed the courage of little bands of workers struggling against overwhelming odds to alleviate suffering.

For a time groups of Canadian soldiers toiled doggedly among the ice-covered ruins, searching for unrecovered dead, but when the wind veered suddenly to the southeast and blew with redoubled force, they had to withdraw. Heavy sleds, distributing hospital supplies to the numerous relief stations were storm bound. The crippled lighting system broken down again leaving the city in darkness.

Volunteer burial parties, composed of business and professional men, were driven to cover.

TO HURRY GREAT AIR FLEET

Hundreds of Liberty Motors Promised Monthly.

Washington, Dec. 11—Production of Liberty airplane motors has begun, American army aviators are in training on the fighting lines in Europe, and the nation is within sight of realization of the great air fleet project mapped out since the United States entered the war.

Figures can not be published, but it has become known that members of the air board are satisfied that another 60 days will see men and machines being turned out at a rate that insures the ultimate success of their plans.

North Dakotan With Pershing Dies.

Washington, Dec. 11.—Among deaths from natural causes General Pershing just reported was Private Lyle B. Rich, medical corps, December 8, typhoid fever; father F. M. Rich, Willow City, N. D.

Wisconsin Man Indicted for Disloyalty

Madison, Wis., Dec. 11.—The federal grand jury has indicted Lewis B. Nagler, assistant secretary of state, on a charge of uttering disloyal statements. It is alleged Nagler asserted before witnesses that he was "through contributing to private grafts," and that he did not "believe in the Red Cross or the Y. M. C. A."; that "they are nothing but a bunch of grafters." Nagler was indicted under a section of the espionage law, which calls for a penalty of $10,000 fine or 20 years imprisonment or both.

Lungs Are Weakened By Hard Colds

HILL'S CASCARA BROMIDE QUININE

The old family remedy—in tablet form—safe, sure, easy to take. No opiates—no unpleasant after effects. Cures colds in 24 hours—Grip in 3 days. Money back if it fails. Get the genuine box with Red Top and Mr. Hill's picture on it 24 Tablets for 25c.

At Any Drug Store

Spared to Art.

"Has our movie star claimed exemption from military service?"

"Oh, yes. He proved that he had dependents and his claim was allowed."

"Good! Then we can proceed with our next war play. With a handful of men he will lead a desperate charge in one of the greatest military spectacles ever shown on the screen."

WATCH YOUR SKIN IMPROVE

When You Use Cuticura—The Soap to Purify and Ointment to Heal.

On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. Continue this treatment for ten days and note the change in your skin. No better toilet preparations exist.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

In Memory of the Titanic.

The Titanic disaster is being commemorated in Belfast by the erection of a memorial which will in all respects be worthy of the city where the ill-fated ship was built. It consists of a Titanic group in marble on a granite pedestal. The memorial will occupy a site on the carriage way opposite the city hall, facing the Royal Academical institution, and will bear the names of Ulster heroes who perished with the great vessel.

Cupid Statue of Marble.

Cupid, fashioned in marble in a statue which has been described as a perfect masterpiece, has just been unearthed at Cyrene, in Libya. Other important archeological discoveries made in the same region during Italian occupation include statues of Jupiter, Venus, Mars, Minerva and Apollo. The statue of Cupid will be sent to Rome.

State of Ohio, City of Toledo, Lucas County—ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for any case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

CHAPTER XXII.—Continued.

—15—

I know not what time passed as I held her in my arms, and whispered those words repressed so long. Almost had I forgotten where we were, the nature of our surroundings, the fate which threatened us. I could remember only her, the velvety touch of her flesh, the welcoming light of love in her eyes. I know not what we talked about, conscious only of the joy of being alone together, with every barrier between us swept away forever. The sunshine poured in through the open port, touching her hair with threads of golden light, and leaving a bar of brilliance across the stateroom deck.

Yet I imagine the respite was not long. There came a sharp rap upon the wood of the door, bringing us instantly back to a realization of our position. Her arms released me, and I arose to my feet.

"What is wanted?"

"It's a few minutes till noon, sir," said a voice I failed to recognize. "And I'm to tell you to come on deck."

"Quite right, my man, I'll be there at once. Stand by to carry the instruments."

"Aye, aye, sir."

There was a certain cheerfulness and respect in the voice, which convinced me that the fellow was not among the ringleaders, but the hope of making him an adherent to our cause vanished when I opened the door, and recognized Dade. The man was too weak, too much of a jellyfish, to render his friendship of any particular value. Besides Dugan was also in the cabin, leaning idly against the stair-rail, but quite as evidently on guard. I nodded to him, but he only condescended to stare in return, and the look in his eyes convinced me that he had not yet forgiven the rough treatment accorded him a few hours before. The memory made me smile.

"I've seen you when you looked happier, Dugan," I said carelessly, "but I imagine you have nothing on Jim White."

"To h—l with yer," he growled savagely. "If I had my way ye'd have no tongue left to get smart with. Get along now after yer things."

Dade followed me into the captain's stateroom. He was obedient enough, but reluctant to talk, no doubt afraid of being overheard by Dugan.

The conspirators were grouped on the after deck waiting my arrival, and I followed Dade up the ladder, determined they should perceive no change in my demeanor, which might awaken suspicion. McCann's manner was far from cordial as I approached, but I thought it best to ignore his churlishness.

"You were long enough coming; perhaps you still think yourself in command?" he said savagely.

"That would indeed be a stretch of the imagination," I replied, holding my temper, and motioning Dade where to place the sextant. "However, I do not think I have wasted my time—it is still two minutes of twelve."

He growled something, but I busied myself with the observation, only anxious to make it accurate enough for my own use. Whatever figures I reported, it was absolutely necessary that I know myself the exact position of the ship. Nor did I dare to juggle them greatly in my report, for while McCann was far from being an expert navigator, he yet possessed a smattering of knowledge, which rendered him dangerous, and he was very sure to check up my figures with every care possible. However, I fooled him by a point or two, sufficient for my purpose, and wrote down the result on the back of an old envelope, while stowing away the correct figures in my own brain.

Although the air was balmy enough, the wind from the southwest almost directly in our teeth, yet there was a look of the north about both sea and sky, which would have convinced me that we were approaching higher latitudes without the aid of my observation. Without being able to explain the phenomenon the seaman instinctively recognizes northern waters. Now, as my eyes swept the wide circle of the horizon, vainly seeking the gleam of some distant sail, the heaving expanse of water, the overarching sky were almost alike in color—a cold, repellent blue, misting into gray afar off, as though particles of fog filled the atmosphere. Indeed it was this which interested me the most, this vague evidence of floating vapor, for I knew enough of these seas to suspect that this might prove the forerunner of storm, already preparing to down upon us out of the more northern mystery. Others must have noted the evidence also, for Liverpool crossed the deck to where I stood, leaving McCann with the chart in his hands.

"What do yer think o' that sorter mist out yonder?" he asked, indicating the distance by a sweep of the hands, and striving to make his gruff voice sound friendly.

"It may mean nothing," I answered civilly enough. "I have never sailed these waters, but my guess would be that there is a storm brewing to the north of us. What does the barometer say?"

"A slight drop in the last two hours; nothin' much yet, but it don't look good to me."

McCann joined us, the chart still half open.

"There seems to be plenty of harbors along this Newfoundland coast line," he said. "Do you know what they are like?"

"Only what the map says. The whole coast is rugged and rocky, dangerous for any vessel larger than a fishing schooner. There are government mail boats calling at those smaller towns during the summer months."

"How far are we to the north of St. Johns?"

"Two hundred and fifty miles, approximately."

"Which makes us about due east of this White bay indicated here?"

"Yes; but there is not even the name of a town given; all that country is wilderness, I take it. Why do you ask? I thought you had decided on St. Johns?"

"So we have," in no pleasant tone, and crumpling up the chart in both hands, "but I thought if there was a more quiet port to the north it might be safer. There are apt to be warships at St. Johns. However, we will keep to that course." He turned to Liverpool.

"Where's White?"

"Forward somewhere."

"Have him come aft, and take the deck; it's time for dinner."

I shall never forget that meal—not the first, but the last time we were all together about the table in the after cabin. Not that anything occurred of special interest to this story, but I doubt if ever a stranger company, under stranger circumstances, was ever gathered together, even at sea. McCann rapped at Miss Carrington's door, and she received his invitation to join us with a graciousness of manner which must have surprised the man.

Liverpool, who sat at the lower end, his uncombed red thatch more conspicuous than ever, appeared decidedly ill at ease, but his presence failed to embarrass the rest of us, or interfere with the game. Dade, at McCann's orders, helped Philip Bascom from his cabin, and found him a place at Miss Carrington's left, directly opposite the New Yorker, the two men greeting each other with a stiff bow. I had not seen Bascom for some days, and could not help being impressed with his appearance of illness, his face having a positively ghastly look. Yet he seemed equal to the occasion, entering into conversation with the lady, and even occasionally addressing a remark to McCann, who replied in assumed good humor. Wine was served, although previously I had no knowledge of any being on board, and the party developed into a rather pleasant occasion.

The girl played her part well, and I could read Bascom's bewilderment as he endeavored to join with them in the same spirit. To relieve his embarrassment, I managed to keep up a desultory conversation with him, although my thoughts were busy enough elsewhere, endeavoring to figure out the meaning of all this byplay. It was a decided relief when the party finally broke up, and McCann conducted the lady back to her stateroom, pausing for a final farewell at the door.

CHAPTER XXIII.

The Depth of Despair.

McCann's manner changed instantly with the closing of the door, although he indulged in no remark, except to order Liverpool to take charge of the deck, and permit White to take his place at the table. He passed me by without a word or glance, and disappeared into his own stateroom, the farther one aft to starboard. I waited until Dade had assisted Bascom to retire, and then sought my own berth to think the whole affair over. Bascom's appearance shocked me, and I felt there was a death look in his face, but our own perilous position kept my mind from dwelling long on this theme. There was little—nothing, in fact—that I could do. I must be content to leave Vera to evolve some means for the final overthrow of these men who held us prisoners. Dubois remained in the cabin on guard, probably with instructions to prevent my holding any private interviews, and the only assistance I could give lay in the juggling of figures, in which I could not be too cautious.

The main doubt assailing me had come from a dim suspicion aroused on the deck by McCann's questioning, and a sly glance exchanged between him and Liverpool. Were the fellows really contemplating making a landing elsewhere on the Newfoundland coast, instead of at St. Johns? This was not impossible, and the fact that it would take us thoroughly by surprise would appeal to the conspirators. Yet I discovered absolutely nothing on which to base such an assumption. McCann was evidently in no haste to reach the latitude of St. John's, and take to the boats, for the Indian Chief was proceeding with greatly reduced speed, and, as the afternoon wore slowly away, it seemed to me we were scarcely moving, the reverberation of the screw being barely perceptible. To assure myself that the course I had mapped out was still being adhered to, I ventured into the cabin for a glance at the telltale compass. We were headed to the west of south.

The man Simms was on guard, lolling against the butt of the mizzen mast, with no one else visible. To test his orders, I turned toward the closed door of Miss Carrington's stateroom. Instantly he was on his feet to interfere.

"You are not to do that, sir."

"Not to do what?"

"Speak alone with the lady; those were my orders."

I raised my voice in remonstrance, but had scarcely uttered a word, when McCann emerged from his stateroom, leaving the door ajar, and crossed the deck to face me.

"What is the trouble here, Simms?" he asked, the harshness of his tone differing greatly from the pleasant conversation at dinner.

"Mr. Hollis was going to rap on the lady's door, sir."

"Oh, he was, hey! Well, now see here, Hollis, you understood that you were to have no communication with any prisoners aboard, didn't you?"

"I was not aware that Miss Carrington was considered a prisoner."

"Well, whether she is or not, she is no longer to be bothered with your attentions," with no attempt to control his temper. "I consider that you have broken your word. You will go back to your stateroom, and stay there."

"Supposing I refuse?"

He grinned, exposing his teeth like a great cat.

"I wouldn't advise you to try that," he sneered, "for there is crew enough on deck to man-handle you to a finish. You can go in quietly, or I'll call them down, and have you thrown in. So take your choice."

I looked at the two of them, eager enough myself to make it a fight. Yet what was the use? Any excuse enabling him to confine me more closely would evidently be to his advantage. I conquered myself, and hands clinched, crossed the deck space, and entered my stateroom, closing the door. I heard McCann laugh, and say something to Simms; then I knew he crossed the cabin, and went up the stairs. To better control myself I thrust my face out through the open port, breathing in the salty freshness of the air.

Suddenly I became aware that others had entered the main cabin. There was no sound of voices; nothing to tell me the purpose of this invasion, yet I felt certain that, at least, a dozen men had descended the steps from the companion. I stood erect listening; there was fumbling at my door. Had McCann changed his mind? Were they about to attack me in force? Revolver in hand I took a step forward, half-ready to welcome any open hostility.

"The first sea rat to open that door," I called, "will get what's coming to him."

There was a mocking laugh in answer, in which more than one voice joined; then White growled reply:

"No one is a' comin' in, mister; an' damn me, if you're goin' ter get out."

I grasped the knob, throwing my whole weight against the wood. It yielded scarcely half an inch, just enough to reveal a stout bar. This time I was a prisoner beyond doubt; they had left me no loophole of escape. But why? What had I done to warrant them in breaking their pledge? Could it be that McCann had no further use for me? no desire for another observation? If this was true, then it must be the men proposed deserting the ship that very night, and taking a chance at getting ashore in one of those northern bays. And they had nailed me in to die like a rat in this hole, when the Indian Chief went down.

For the instant, as this fear gripped me, I was dazed and incapable of thought; helpless to even clearly comprehend the full horror. I do not believe it was my own situation which so completely unmanned me, but the remembrance of Vera. What would become of her? She would be alone in McCann's power without a human being to whom she could appeal. She would be forced into the boat despite her struggles, laughed at, and mocked. She might even be compelled to witness the slow sinking of the ship carrying us down into the depths. And then—what? The vision I conjured up was agony, and I sank back upon the stool, my face buried in my hands.

It is not even yet clear in my mind how the remaining hours of that afternoon passed. I was conscious only of a mad, impotent rage. Wild schemes flashed through my brain, only to fail of execution. There could be only one reason for McCann's action—desertion of the ship, that same night. If the mutineers were really, as pretended, intending to land their boats in the harbor of St. John's, they would require my services for at least another day yet. No one else on board could place the vessel at the point designated. Their actions, however, plainly evidenced that I was no longer needed, and that their plans had been changed.

Indeed no one held communication with me all that afternoon; occasionally I overheard movements in the cabin, but could scarcely peer through my door, and was unable to ascertain who were present, while the few words distinguished brought me no specific information. That some movement of secret importance was going on aboard seemed more than probable. I became impressed with the conviction that food supplies were being conveyed from the lazarette to the boats and stowed away.

Supper was served early in the cabin, but was evidently more of a lunch than a meal, no attempt being made at formality. McCann, Liverpool and Miss Carrington were at the table together, but, while I could differentiate their voices, conversation was carried on in such low tones, I could make little of it. When they left the table Vera went to the piano, and played and sang all the time White was eating. My little peekhole gave me a glimpse of McCann, leaning against the mizzen mast, his eyes upon her. No offer of food was made me, nor did I see, or hear Bascom; if he ate at all it must have been in his own stateroom. Finally the music ceased, the two exchanging a few apparently friendly words, before the girl excused herself, and returned to her room.

I sat down to think again—hopeless, my mind on the same treadmill. What could I do? What effort of mine was possible? There was no means by which I could escape from the stateroom; I was like a rat in a trap, and McCann intended to leave me there to drown. Within an hour, perhaps; certainly before midnight, those devils would desert the ship, and take to the boats. Already I was practically dead; certainly as helpless to prevent the consummation of this villainous plan as though fathoms beneath the sea. How deathly still it was on board. Suddenly it occurred to me that Dade had not even cleared the table; at least I had heard no rattle of dishes, or any evidence of work. Such neglect certainly must mean that McCann's plan was known to all aboard of his own company. I opened the door again, noiselessly, its scant quarter of an inch before it was stopped by the bar, and sought to look out. The space gave me no view; there was a light burning, but turned so low as to leave the cabin in semidarkness. I waited listening, but no movement told of any presence. For the fourth time I tried my knife point on the bar holding me prisoner. It barely scratched the wood, for I could not force the handle through the narrow opening. I might smash it by shots from my revolver, but that would leave me unarmed, and create an alarm which would fill the cabin with men; besides the severed ends of the bar would still hold the door secure.

I straightened up, my heart beating like a triphammer. Something strange, unaccountable was occurring in the cabin. I could make nothing of it; not even satisfy myself that what I seemed to hear was an actual reality—yet there was a sound like a blow, followed by a barely audible groan, and the sliding of a body to the deck.

CHAPTER XXIV.

The Hand of Fate.

It seemed an age I stood there, bending to the narrow crack, hearing no further sound, and unable to guess what had occurred in the semidarkness of the apparently deserted cabin. I could distinguish no movement, not even the sound of breathing. Then a soft whisper spoke almost in my ear, causing me to start back as though stabbed by a gun.

"Robert!"

There was agony in the utterance sufficient to disguise the low voice, yet I could not doubt the identity of the speaker.

"Yes; I am here; what has happened?"

"Oh, don't ask that. I hardly know myself. It was all impulse, desperation. Listen; they are going to desert the ship within an hour. McCann told me. I—I let him believe I would go with him to save my own life. I—I didn't know what to do. All that was left me was to pray and watch."

"Yes, dear heart—but what happened? you must speak quickly. They all left the cabin, and went on deck."

"Yes; to provision the boats; they are lowering the two forward ones now. I was told to get my own things ready."

"No guard was left here below?"

"Only Dade; they knew you could not possibly get out, and they had no fear of me because I was so frightened."

"And what became of Dade?"

"I struck him; dear, there was no other way. Maybe I killed him, but—but I never meant to do that. I used the only weapon I had—an iron leg from my washstand."

"Don't worry; it was either his life, or ours. There is no one else then below?"

"Not—not now."

"Is there any way of loosening this bar? I cannot even determine how it is fastened; there were no cleats."

I could see her outline as she stood there, feeling with her hands; then realized that a length of iron was inserted between the wooden bar and the jamb of the door; there was a crunching sound, not loud enough to be alarming, and the bar fell, but was caught before it struck the deck. Instantly I was in the cabin, and had grasped her hands still clinging to the leg of the washstand.

"You brave, dear girl!"

"Oh, don't, not now!" she pleaded, drawing back. "What shall we do?"

"What do you know?" I asked. "Tell me as quick as you can."

"They are lowering the boats. He will be back for me in a minute."

"Yes, I know; but they mean to open the sea-cocks first?"

"I was not told; no one has come down this way."

"Whoever is given that job would use the mainhatch, or the ladder to the engine room. You do not know if all the crew are on deck?"

"The man White yelled down the ladder to somebody, whom he called Tony, to use only the one screw—do you know a man by that name?"

"Aye, Tony Rappello, the head fireman; he could keep the machinery going. Now one thing more—where have they confined Leayord and Olson?"

"I haven't dared ask," she admitted. "I did not suppose they would leave the ship tonight, and thought I might find some way to discover this for myself."

"You have no hint?"

"Only that the boy Moon carried food forward from the table while I was at the piano."

"Forward? on deck?"

"No; down the passage amidship."

"Good; that is what I supposed, and it gives us a far better opportunity to reach the men than if they were being held in the forecastle. They are in the petty officers' quarters, no doubt. Now, listen, dear. McCann may come for you at any moment. You must go back to your stateroom, so that he will not suspect. Leave the rest to me, but delay him in every way possible."

"Am I to go with him?"

"Only as a last resort. If I can release Leayord and Olson in time to act we'll back the game. This probably depends on how long you can keep McCann on board."

"He must not suspect your escape."

"No; I'll attend to that." I caught her in my arms, and kissed her, feeling her arms twine about my neck. "You must go now, dear. You trust me?"

"With all my heart."

She crossed swiftly to her stateroom, stepped within, and partially closed the door, yet, I felt, stood there, watching my every movement. There was no longer hesitancy on my part; our lives hung on the next few minutes, and I had already determined what I must do, and how. Action, the chance to fight, inspired me; I was no longer a caged rat, but a man able to cope with these villains face to face. The first thing to be done was to clear the cabin, so that anyone entering it would have no suspicion aroused. Time, time in which to work, was my one great need, and this could only be had while McCann believed me still to be a helpless prisoner. I caught up the wooden bar from where it lay on the deck, closed my stateroom door and, fitting the nails back into the old holes, drove them in tightly with the iron Vera had used to pry them free.

Dade was unconscious, but not dead. I only needed to touch his flesh to assure me of this fact, yet the fellow neither stirred, nor groaned, as I hastily dragged his body into the nearest open doorway. He should have been bound and gagged, but I could not waste the moments for that job, and satisfied myself with closing and locking the door. Then, for an instant, I stood, panting for breath, uncertain as to my next move, taking hasty survey.

(TO BE CONTINUED.)

Platinum Substitutes.

Since the development of "palau," the palladium-gold substitute for platinum, trials have been made with mixtures of these two metals in varying proportions. The alloy containing 60 to 90 per cent of gold is to be known as "rhotanium," and has a specific gravity of 16 to 18.5, is malleable and ductile and can be welded without flux or other agent. It proves entirely satisfactory for most chemical and electrical purposes for which platinum is used, though it is not suitable for use with hot concentrated nitric acid, nor for electrolytic anodes. For jewelry it is thought to be even superior to platinum, as it is harder and stronger and takes a better finish and it has practically the same color, can be worked as readily and does not tarnish or corrode.

Boy Strangles Leopard.

Strangling a leopard with his bare hands was the feat performed by a lad in South Africa. The leopard, a full-grown female, had in the course of a few nights destroyed as many as seven calves, writes a correspondent. Ultimately the spoor was found, and a chase resulted in her being brought to bay by a large hunting dog owned by the farmer, and which was then with one of his native boys some little distance from the line taken by him in the pursuit. The leopard made no attempt to take refuge in a tree, as is usual, but halted. The dog immediately tackled her, gripping the hindquarters. With the dog still hanging to her she sprang at the boy, carrying him to the ground. The boy, who is of unusually powerful build, succeeded in gripping the animal by the throat, and the two struggled on the ground. When the farmer arrived the leopard had been effectually strangled and was relaxing its grip of the boy, who was badly injured.

Be Contented.

Let none repine at their station and waste their time longing for other things than such as they have, greater things, more congenial, or things of apparently superior promise. The scale of our stewardship may be small, the items of it meager, the situation obscure, the duty to which we are called insipid and irksome in the extreme, yet in the faithful discharge of our obvious calling lie all the possibilities of discipline, all that is necessary to fit us for great destiny. Our consuming solicitude should be that we grasp the circumstances of the hour, learn their lessons, extract whatever they have to give of knowledge and strength.—Exchange.

HALIFAX BLAST AND FIRE TAKE FEARFUL TOLL

More Than 2,000 Lives Known To Be Lost in Disaster With List Steadily Mounting.

TEMPEST OF FLAMES

Two Square Miles of City Wiped Out When Fire Follows Collision of Ships in Harbor Which Resulted in Explosion.

Halifax, N. S., Dec. 7.—More than 2,000 persons perished, and the toll of dead is steadily mounting, in the explosion and fire which followed the collision in Halifax harbor between the French ship Mont Blanc, munitions laden, and the steamship Ioma, loaded with supplies for the Belgian relief commission. It is expected that many of the thousands injured will die.

The disaster which has plunged the Dominion into mourning, probably will rank as the most fearful that ever occurred on the American continent. Residents of Halifax and thousands of volunteer relief workers who have come into the city have been almost dazed at the extent of the horror.

Property Loss Millions.

No American ship was involved in the explosion.

The north end of the city was laid waste and the property damage will run into the millions. A part of the town of Dartmouth across the harbor from Halifax, was also wrecked. Nearly all the buildings in the dockyard there are in ruins.

The zone of destruction in Halifax covers an area of about two square miles in the section known as Richmond. Buildings which were not demolished by the explosion were destroyed by the fire which followed.

Scores of persons were injured by the collapse of the railway station, Arena rink, military gymnasium, sugar refinery and elevator.

All Business Suspended.

All business has been suspended. Soldiers and sailors are patrolling the city. Not a street car is moving and part of Halifax was in darkness. Hospitals and many private houses are filled with injured. Temporary morgues have been opened in school houses in the western section of the city.

Damage Cannot be Estimated.

The damage along the water front can not yet be estimated.

Many of the men composing the crews of the ships in the harbor were killed or injured. On one steamer, the Pictou, it is reported that 33 of the crew of 42 were killed. The bodies of many seamen have been picked up in the harbor.

Two of the members of the Canadian cruiser Nobe were killed by the explosion and six were injured.

At 9 o'clock the city was enjoying its usual period of calm and the streets were crowded with people wending their way to work.

People Thrown Into Streets.

Suddenly, like a bolt from the blue there came an explosion. From one end of the city to the other glass fell and people were lifted from the sidewalks and thrown flat into the streets. In the downtown offices, just beginning to hum with the usual day's activities, clerks and heads alike cowered under the shower of falling glass and plaster which fell about them.

Temporary Morgues Everywhere.

Temporary morgues have been established in many buildings to which a steady procession of vehicles of all kinds have been carrying for hours the bodies of men, women and children. Most of them were so charred that they were unrecognizable.

Collision Occurs Near Pier.

The collision which resulted in the disaster occurred near Pier 8, in the narrows leading from the harbor to Bedford basin. The munitions ship was bound from New York for Bedford basin when the relief ship Ioma bound for sea, crashed into her.

EMPEROR OF AUSTRIA IS STRONG FOR PEACE

Amsterdam, Dec. 7.—At the reception of the Austrian delegation, says a Vienna dispatch, the emperor remarked to the president of the parliaments: "It will be the finest day of my life when I can conclude peace."

Champion Steer $2.10 Per Pound.

Chicago, Dec. 7.—Beef on the hoof went up to $2.10 a pound here when the grand champion steer of the International Live Stock exposition—Merry Monarch—was sold to the Congress hotel. The steer weighed 1,600 pounds and was entered by Purdue University. Clay, Robinson & Co., as Purdue's agents, sold him to the American Shorthorn Breeders' Association, for $2.05 a pound. He was immediately resold to the Congress for $3,391, or $2.10 a pound, the highest price ever paid for a beef steer.

GERMAN PRISON CAMP AS SEEN BY AN AMERICAN

Connecticut Man Arrives Home After Escape Into Sweden on Fertilizer Boat.

WAS HELD IN THREE PRISONS

Lost 80 Pounds in Seven Months Before Aid Came—Guards Worse Off Than Prisoners and Glad to Get Scraps from Food the Y. M. C. A. Sent.

New York.—What is a German prison camp like, from the prisoner's viewpoint?

What sort of food, treatment, comforts (if any) do the men receive who are captured by the Germans?

How do the captives stand German prison conditions?

Americans are more than ever vitally interested in these questions, since some of General Pershing's soldiers were made prisoners a few days ago in a trench raid in France.

Through the narrative of an American adventurer who less than a month ago escaped from a German prison and who had had experience with two other confinement camps, the New York World is able to give answers to the questions.

Captured by Moewe.

The narrator is Willet C. Smith of South Norwalk, Conn., who reached this country on November 6 from Sweden, to which land he escaped from Luebeck, Germany, by concealing himself in the hold of a vessel and existing six days without food or water.

Smith had been a prisoner, first aboard the German raider Moewe, then in camp at Duelmen, then at Brandenburg and finally at Luebeck, for seven months and one day. He fled on October 11.

Summed up, his testimony is this: There is no particular brutality, no clubbing with guns or stabbing with bayonets as long as prisoners remain orderly. But the food is insufficient—he fell away from 210 to 130 pounds—and long continued subsistence upon German prison fare alone has most grievous effects upon the health. Only the Red Cross and Y. M. C. A. supplies are keeping the prisoners alive at some confinement places.

Brandenburg, where about 70,000 prisoners of allied nations were kept, was the worst camp Smith encountered. This is in Prussia, not far from Berlin. Duelmen, in Westphalia, was bad enough, although the treatment was better. At Luebeck, which is not a camp but a port where prisoners are worked on the waterfront, conditions were not bad at all.

Guards Worse Off.

The German soldiers guarding the prisoners were far worse off there than the captives, Smith declares. Relief organizations keep the prisoners supplied with enough food and clothes to get along with, and the middle-aged guards, half starving and in patches, beg supplies from their captive enemies.

"They're sick and disgusted with the war, these fellows at Luebeck," Smith says. "They would often say: 'Look at us, without enough to eat or wear! The kaiser's no earthly good! He's crazy. Germany's starving and licked and yet he keeps on fighting!'"

Smith, a railroad brakeman by trade and a "boomer" by inclination, sailed from Newport News on January 28 for Liverpool as foreman of 54 American horse-wranglers. When his ship, the British-owned steamer Esmeralda, was on her return voyage in March she was captured, robbed and sunk by the raider Moewe, and her crew added to the prisoners of that adventurous craft, who numbered at the end of the Moewe's raiding voyage above 600.

How the prisoners were shut below, with no chance for their lives, whenever the Moewe sighted another vessel, has been told by others, and Smith's narrative of that need not be repeated. He arrived with the rest at Kiel, Germany, on March 21, and next day, with all the Moewe's prisoners, was sent to Duelmen, Westphalia, a town about ten miles from the Holland border.

Captors "On Leave."

"We were sent down there in third class cars," Smith said, "with one guard to each ten men. The guards were all middle-aged Germans who had been at the front and who were home on furlough. They complained bitterly because when they got a leave it wasn't really a leave at all. They had to do guard duty or work in a factory or on a farm. This trip lasted all night, but we didn't get a scrap of food till we had breakfast at Duelmen in the morning.

"The camp consisted of a lot of low, wooden, unpainted shacks, with plain board floors. Around the walls ran bunks, one above another. Each bunk had a bag of straw for a mattress, and two medium weight blankets. There were four of these shacks in each inclosure at Duelmen. Each inclosure held about 1,000 prisoners, and had a 12-foot barbed wire fence around it, with the wire at the top bent inward so you couldn't get over. How many of these inclosures there were—each with its four shacks—I don't know, but I was told there were 50,000 prisoners.

"Then there was another barbed wire fence, higher and thicker, on the outside of a roadway which ran around the entire camp. Every 200 feet around this barrier was a sentry box and a sentry. Inside of each smaller inclosure there were two armed guards, marching back and forth.

Nationalities Separated.

"The nationalities were all separated. The French prisoners were kept by themselves. They seemed to get the worst treatment. The Russians were by themselves and we Americans were kept with the English. Nobody got what you'd call good treatment.

"For breakfast every morning we got a piece of bread an inch and a half thick and about four inches square and one tincup of what they called coffee—but I'd call good water spoiled. I don't know what they made it out of, but it was rotten, bitter stuff and not even very hot.

"For dinner and supper we had the same thing every day—turnip soup, with mighty few turnips in it. We never had anything else. No meat, no potatoes, no bread, even, except at breakfast. You could take the turnip soup or starve. It was just about enough to keep you alive. Some of the fellows got so weak they'd have to be carried to the hospital. There they'd get nourishing food for a few days, but as soon as they were a little stronger they'd be chucked out of the hospital. There wasn't much of what you'd call real suffering at Duelman—and the guards were decent enough—but it wasn't much of a life."

Sent to Brandenburg.

On April 3 Smith and his fellow captives of the Moewe were sent from Duelman to the notorious camp at Brandenburg, which is on the Havel river, between Berlin and Magdeburg. Again they had an all-night trip without food and crowded into narrow wooden benches in the worst sort of cars.

"Here we had Prussians for guards, and they were wicked devils," Smith went on. "The camp was the same sort of a place as Duelman, with barbed wire inner inclosures, and then a roadway circling the whole camp and barred on the outside with wire.

"At Duelman they would turn us out and count us only twice a day, but at Brandenburg they gave us the 'raus' a dozen times. They'd keep us standing barefoot in the snow for hours until some major would come up and verify the final count. By this time our shoes had worn out, and most of us actually were barefoot.

"The Prussians hauled and shoved us around like cattle, although I must say I didn't see any one struck or stabbed who didn't have it coming to him.

"At Brandenburg we got the same old food—turnip soup, with never a change. They made the strongest of us work on farms outside the inclosure, clearing the ground for the spring planting; but we got no better food than the rest.

"We nearly froze to death at Brandenburg. There were small stoves in the huts, but they didn't begin to warm them. The blankets—you could see through them! We were all full of insects and had to have our clothes fumigated every two weeks, but in a couple of days we'd be as bad as ever.

Gets Job on Docks.

"I was about ready to take a desperate chance for escape when on May 1 they asked for 300 volunteers to go to work on the docks at Luebeck. They said they'd give us boots, better clothes and a mark a day for wages. I thought anything was better than Brandenburg, so I volunteered and was taken.

"The clothes they gave us were black uniforms with a yellow stripe down the pants and a yellow band fitted into the sleeve, with our number and the word 'Kriegsgefangenlager' (war prison) on them.

"They did give us better footgear, but you were just as likely as not to get one boot and one shoe, and different sizes. And when they half-soled a shoe they did it with the upper part of an old boot. They had scarcely any leather at all. While I was working on the farms I managed to get a pair of wooden shoes to keep my feet off the ground.

"There had been promises of Red Cross packages and Y. M. C. A. boxes at Brandenburg, but they hadn't arrived when I left.

"At Luebeck everything was much better. They kept us in a big warehouse on the Hamburg-American quay, and made us load and unload ships. But here we had steamer bunks to sleep in and decent blankets, and it was luxury compared to the other places. We had the same old bum coffee and turnip soup—but our guards got the same. Then in the summer we began to receive some clothing from the International Y. M. C. A. and some food boxes from the American Red Cross through Copenhagen.

What Y. M. C. A. Sent.

"Every week we got a box that had in it 50 biscuits, some corned beef, veal loaf, suet pudding, condensed milk, one-quarter pound of tea, a slice of bacon, a can of fruit, 50 cigarettes and some tobacco. That saw us through. It was so good we felt sorry for the poor guards and would give them scraps. They offered as high as 50 marks for a pound of tea. And the bacon they would have given anything for."

In June, Smith made his first attempt at escape. He had been working in a shipyard distant from Luebeck and managed to elude his guard at nightfall. He struck out overland, but his prison uniform revealed him and two days later he was captured and returned. For the offense of trying to escape he was given 10 days in the "black hole," with only a piece of bread a day to eat. Also a big German guard "took a couple of cracks" at his face.

"The Spanish ambassador came to see us Americans on June 1 and promised to send us books and clothing, but I never saw any of them. They did begin to put a few potatoes into the turnip soup, and occasionally they put about five pounds of meat into the soup supply for 300 men.

Another Getaway Chance.

"In October I made up my mind to take another chance on a getaway. The ships we were loading were plying between Luebeck and Swedish ports, and I thought I might hide on one of these. They carried mostly salt fertilizer to Sweden, though sometimes some coal and coke, and they brought back pig-iron and ore. I never saw them bring in any foodstuffs. Sometimes the German ships would go out carrying barbed wire and iron rods for the trenches on the Russian front. They went to Riga, I believe.

"There was one boat, the Undine, which traveled between Luebeck and a Swedish port named Norrkoping regularly. I got acquainted with a Swede on board her, and he told me one other fellow had made his getaway to Norrkoping by concealing himself in the hold.

"My scheme was this: Every morning the guard would get together an early working crew of 12 men at four o'clock. He would take them on board while it was dark, to get the hatches ready for the others. One morning when I wasn't in this squad I hid myself in the hallway where they always lined up. The guard counted his 12, and then in the darkness I joined them. As we climbed aboard the Undine he didn't know he had 13, instead of 12. He was a boneheaded German anyhow.

"I hid myself in the fertilizer—a combination of salt and sulphur. What it did to me was plenty. My feet are still full of holes and the nails are off my toes."

For six days then (an unusually long journey) Smith remained in the hold. When the vessel docked at Norrkoping and the hatch was opened he dashed down the gangplank to safety. The Swedish police gave him water and food; American consulate attaches clothed him and sent him to Stockholm and then to Christiania, Norway, and there he boarded the liner Bergensfjord for home.

THE THINKER

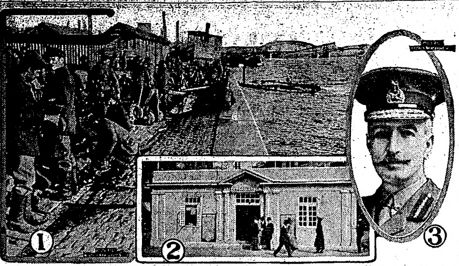
An old Frenchwoman seated in the midst of what was once her home. Hearing that the Germans had left her home town, driven back by the French, she returned, but to find the ancestral home a mass of ruins.

HERE IS "COLLEGEIST" PRIVATE IN U. S. ARMY

San Antonio, Tex.—The best educated man in the southern department of the army has been found in Private George B. L. Thornton. He was born in England, but now is an American citizen and enlisted man in the quartermaster's service. Here is his collegiate education: One year in College St. Servais, Liege, Belgium; one year in College St. Michael, Fribourg, Switzerland; four years in St. Bede college, Manchester, England; four years to graduation from the University of Oxford. He is getting $30 a month.

Adopted 22 Children.

Vineland, N. J.—William J. Purvis of Rosenhayn celebrated the forty-second anniversary of his marriage the other day by coming to Vineland and visiting the old homestead on O[illegible] road. Purvis was married in Mi[illegible]ville and the next morning he and his bride adopted five needy children. The couple have kept that practice up until now they can point with pride to a family of 22 that they have raised and sent out into the world, all imbued with the Purvis spirit of America first. The foster father is a survivor of the Civil war and extremely patriotic.



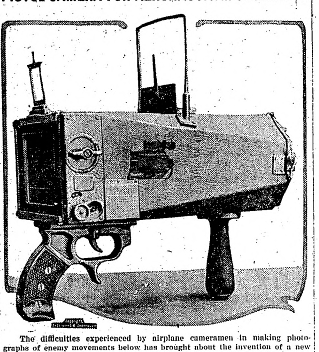
1—First photograph received from Riga since the capture of that Russian port by the Germans. 2—Information bureau for soldiers and their friends such as the commissions on training camp activities are erecting near all camp centers. 3—Gen. W. P. Marshall, who has succeeded the late General Maude as commander of the British forces in Mesopotamia.

BABES MUST BE SHIELDED FROM GERMAN AIR RAIDERS

Copyright, Underwood & Underwood

When the Germans make their ruthless air raids over London, the babies and their mothers have to take refuge in all manner of underground shelters. The photograph shows a group of them safe in an old cave that had been dried out and made ready for the emergency.

PISTOL CAMERA FOR AERONAUTICAL OBSERVERS



The difficulties experienced by airplane cameramen in making photographs of enemy movements below has brought about the invention of a new device, the pistol-camera, which greatly facilitates their work. The German airmen originated the pistol-camera, and the one shown in this British official photograph was captured by a British aviator.

NONE TOO OLD TO SERVE FRANCE

That service to one's country recognizes no age limit is evident from this photograph showing Frenchmen too old to fight constructing trenches and dugouts behind the battle lines. Each man, a volunteer, has released a younger man for duty at the front. Many of these men served France in 1870.

MAY MARRY GREEK PRINCE

Latest photograph of Mrs. William B. Leeds of New York, who is reported engaged to Prince Christopher, youngest brother of ex-King Constantine of Greece. Mrs. Leeds has just leased the Kenwood estate in Hampstead, formerly the English residence of Grand Duke Michael of Russia.

Lumber in British Columbia.

Fifty million feet of lumber or its equivalent in material heavier than boards, represents many trees, even big trees such as are to be found in the forests of British Columbia, says a correspondent.

Well, that is the quantity called for by the wooden shipbuilding program now being carried out in British Columbia. The cost of this material will amount to $1,750,000.

The ships being built in British Columbia are in part sailing vessels, others carry auxiliary engines, and most of them are intended for the lumber-carrying trade with Australia.

Amphitheater Walls Intact.

Pola, the fortified Austrian naval center recently bombed by Italian aviators, contains the finest of the old Roman amphitheaters. When Pola was a Venetian colony, in the middle ages, the amphitheater lost its tiers of seats, capable of accommodating 20,000 spectators. They were totally destroyed by the Venetians, who used the stones for building their own palaces. They respected the interior, however, for this is the only Roman amphitheater whose outer walls are entirely intact.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

A WHITE CHRISTMAS.

"It's pretty chilly," said one of the snowflakes.

"Just the best kind of weather, eh?" asked old King Snow. "It makes my cold heart feel snug and warm."

"How can your heart feel snug and warm when you say yourself it is cold?" asked the snowflakes.

"Ah, that is what you do not understand, little snowflakes," said old King Snow. "You are very young. You do not know all things. But I will tell you. To be sure my heart is cold—nice and cold—just like the winter should be and my heart is a winter heart. I sleep and rest all summer—except some of my family who go far, far north beyond where people live.

"But my heart can feel snug and warm because the snow can feel snug and warm. Haven't you ever seen children bury themselves with snow? And haven't they been warm? That was because of the corners of my heart which are snug and warm. The snow is not so terribly cold—Oh, no!"

The snowflakes were in the sky and they wanted to join a few of their friends who had gone down to the earth.

"We love chilly weather," said the first little snowflake. "Can't we go down to the earth?"

"Now pray tell me what do you want to go down to the earth for?" asked old King Snow, though he knew perfectly well that it was very natural for the little snowflakes to want to go down to the earth.

Snowflakes Were in the Sky.

"We want to cover the ground with snow and we want to go especially at this season of the year."

"What do you know about seasons?" asked old King Snow, as he laughed. "And why do you want to go especially at this one?"

"You were dreaming the other evening and you talked in your sleep," said the snowflakes.

"I did that?" asked old King Snow. "Goodness, but that was very careless."

"And you said," continued the snowflakes, "that you would certainly have to have a good sleep for you were going to give the children and grown-ups a white Christmas this year."

"Did I explain what a white Christmas was?" asked old King Snow.

"Yes," said the snowflakes. "You said that Christmas was the happiest time of the year and that a very jolly, kind old man named Santa Claus went around and filled stockings which children hung up on mantlepieces and at the ends of beds. You said he carried a great pack on his back down all the chimneys and fire escapes, to every home where there were children.

"And you said that Santa Claus, grown-ups and children all said it looked more like Christmas when there was snow—and by a white Christmas they meant plenty of us around the ground. So can't we go down and see the excitement? For we are new this year to the snow world."

"If you're very good—you may go," said old King Snow. "And do be good, for I want to make the ground white, but if you're naughty I'll have to punish you and not let you fall to the earth."

So the snowflakes were very, very good and they all began to fall down and land on the earth, the trees, the houses, the window sills—every place imaginable. And they began their trip on the night before Christmas.

They met Santa Claus and some of them danced on his great red coat and sat for a few minutes on his white beard and his white eyebrows.

"Hello, snowflakes, glad to see you," said Santa Claus. "So you've been very good, eh? And King Snow has allowed you to be the honored ones to give us the white Christmas?"

The snowflakes danced about and some of them peeped in the windows and saw great, tall trees being trimmed by the jolly old man they had met.

They saw stockings being filled so full they thought they would burst! How crammed and jammed they were with wonderful things! And they saw the sleeping children, as they fell down on the sills of the bedroom windows. When the next morning came and amidst all the excitement the children shouted, "Oh, it's snowed during the night!" Then how happy the snowflakes were that they had been good and so rewarded by old King Snow.

Poor Evidence.

"The poor little children in Belgium haven't got any clothes to wear," said Harry, "and we are going to sell lemonade to buy them some."

"They have, too, got some clothes," said Mabel, "because my Aunt Mary has a picture of them, and they've all got clothes on."

LOSSES THROUGH SWINE DISEASES

Cholera, Tuberculosis and Parasites Are Drawbacks.

SIMPLE METHODS ARE URGED

Farmer May Avoid, to Large Extent, Decimation of His Herd by Epizootics—Sanitary Preventive Measures Are Favored.

Hog cholera and swine plague, both highly fatal diseases characterized by fever and heavy mortality, are so very similar that the breeder may regard them as identical so far as his practical management of the herd is concerned. Positive differentiation between the two diseases can only be made by the most careful bacteriological tests, and by employing the assistance offered by a fully equipped laboratory. However, sanitary preventive methods which are found beneficial with one of these diseases will prove equally efficacious with the other.

There are a few fundamental facts which the breeder must remember if he is to avoid losses through hog cholera or swine plague. The first is that they are specific diseases caused by germs, and the contagion cannot be spread from one animal to another or from one herd to another except through the agency of these minute organisms. They may be carried in a multitude of ways—by the hogs themselves, on the clothing of persons, on vehicles, in feed, by birds, dogs, and other animals, or by streams. The breeding or feed of a hog cannot cause either disease, although bad methods may so weaken the constitution and vitality that the animal becomes more susceptible to them than would otherwise be the case. Since these diseases can only arise from the presence of these specific causative agents, it can readily be seen that dentition and the presence of supernumerary teeth or black tusks cannot, as has been suggested by many, play any part in their development. A second fact to be borne in mind is that diseases caused by germs may be best prevented or controlled by thorough disinfection and scrupulous cleanliness.

Tuberculosis Increasing.

Tuberculosis is rapidly increasing among hogs in the United States, and every owner of swine should be on his guard against the introduction of this serious malady upon his premises. Unlike hog cholera this disease is insidious in its attack and slow in its development, so that it may be present for months in a herd without exciting the least suspicion of the owner, and will be revealed to him only at the time of slaughter. Until recent years tuberculosis has been looked upon as of uncommon occurrence and only of importance from a meat-inspection standpoint; but today it must be recognized as a serious menace to the owner of hogs, and especially to the one who allows his hogs to run with cattle that have not been proved to be free of tuberculosis, or who feeds them upon nonsterilized products as part of their ration. As tuberculosis of hogs is chiefly contracted through eating infected feed, the importance of this statement is obvious.

Tuberculosis of hogs is closely associated with the same disease in cattle, the reason being apparent when one considers the close relations of these two species of animals upon nearly every farm. Tuberculous cattle may scatter great numbers of tubercle bacilli with their excrement; cows that are tuberculous may produce contaminated milk that is subsequently fed to pigs; and carcasses of cattle that have died from tuberculosis are sometimes eaten by hogs. Any of these conditions make the infection with tuberculosis of the hogs concerned a very easy matter.

Sources of Infection.

The feeding of hogs upon creamery refuse is also a very frequent source of infection. In this way the milk of a single cow with a tuberculous udder, if sent to a public creamery, may spread the disease to a number of hogs, and may also infect many farms that have never previously been contaminated with tuberculosis.

An equally dangerous source of infection is likewise observed in the methods which obtain among some of the small country slaughter houses. It is not unusual for these houses to get rid of their blood, intestines, viscera, and other inedible parts by feeding them to hogs, a herd of which is usually kept on the premises. This custom is pregnant with danger and serves to perpetuate the infection principle of various contagious and parasitic diseases, particularly tuberculosis.

Hogs are also susceptible to tuberculous infection from affected persons and poultry, but these sources are undoubtedly of far less moment to the hog owner than those existing in a herd of tuberculous cattle.

Intestinal worms, lung worms, and skin parasites also levy a burdensome tax upon the profits of hog raising. Absolute cleanliness will be found valuable in preventing and controlling these parasitic troubles, as well as the more serious diseases—hog cholera and tuberculosis.

Prevention of Disease.

In dealing with the diseases of hogs, preventive measures must be most relied upon. The animals must be given dry and well-ventilated quarters, which must be kept clean. Contrary to common belief, hogs have some habits which raise them above other domestic animals from the standpoint of cleanliness. For example, unless compelled to do so, a hog will not sleep in its own filth. If a part of the floor of the pen is raised and kept well bedded with straw, while the rest is not, all excrement will be left on the unbedded portion of the floor and the bed itself will be always clean.

In addition to cleanliness close attention should be given to the feed, so that nothing may be fed that will convey the germs of disease, especially tuberculosis, to the herd. If the hogs are fed milk in any form obtained from cows kept upon the same farm, the cows should be subjected to the tuberculin test. If they run with the dairy cattle of the farm a tuberculin test of all the cattle is none the less desirable. Animals dead from any disease should not be fed to the hogs until the meat has been made safe by cooking. Skim milk or refuse from a public creamery should not be fed to hogs until it has been thoroughly sterilized.

Feeding and drinking places should be clean and the water supply pure. Unless the origin is known to be uncontaminated and there has been no possibility of infection during its course, hogs should not be allowed access to any stream. Wallows should be drained out and kept filled up as much as possible. At least once a month the quarters should be disinfected with air-slaked lime or a five per cent solution of crude carbolic acid. These precautions will be found valuable aids in the destruction of the various animal parasites.

Advantage of Isolated Hog Houses.

The advantage of isolated hog houses, each accommodating a few hogs, rather than one large piggery for the entire herd, has been referred to previously. In districts where cholera is prevalent these are undoubtedly the best shelters. They make it more difficult to carry contagion to all animals in the herd, and the destruction of one of them in case of an outbreak does not entail a great expense. An added advantage is that they may be moved from place to place as needed. While more work is necessary in feeding, the convenience and safety from their use more than offset this disadvantage.

DRAIN WET SPOTS ON FARMS

Productive Acreage Can Be Increased by Drainage—Can Be Made to Return Good Profit.

The production acreage can be increased on many farms by drainage. Many wet areas are being cultivated which do not produce profitably and are often a hindrance in planting and proper cultivation of the rest of the field. These places are found along the creek bottom, and on seepy hillsides. They are very fertile and can be made the most productive part of the farm by tile drainage.

Clean Water for Fowls.

A good supply of clean water should always be before the fowls and chicks, for a large part of the body of a fowl is water and a steady supply of good quality is needed.

Lessen Wireworm Damage.

If practicable, grow field peas or buckwheat on sod land before planting it to corn, to lessen the damage due to wireworms.

LARGE FARM MACHINES BEST

Make Seed-Bed Preparation More Timely and Economical—Also Increases Farmers' Efficiency.

The use of large farm machines makes seed-bed preparation more timely and more economical, increases the farmers' efficiency, reduces man-labor requirements per acre, results in better quality of work, makes large-area farming possible and profitable and farm life more satisfactory and more enjoyable.

Put Machinery in Order.

Put the farm machinery in first-class order during odd times this winter. An hour spent in repair may prevent later on a day of despair.

Disinfect Hen House.

Frequently disinfecting the poultry house will do considerable to prevent the development of diseases.

Keep the hens in laying trim. Their "shells" are valuable food ammunition.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

TREE AND STOCKINGS.

"I am getting so excited I can hardly wait," said the Christmas tree. "The daddy of the children brought me to the house because he said it would be a great help to Santa Claus to have me all ready. All ready! And for what? That's what I can hardly wait to see.

"I know Santa Claus will give me the most beautiful of decorations, for I've often heard my family talk of the wonderful Christmas trees there have been. Ah, how handsome many of my relations have looked, and I can hardly wait until Santa Claus comes to see me."

"You're not any more excited than we are," said three stockings which hung up by the side of the mantlepiece.

"I belong to Dot, age four," said the white stocking.

"I am hanging up for Jimmie, age eight," said the tan stocking.

"And I am for Betty, age six," said the black stocking.

"I'm for all of them," said the Christmas tree.

"That's so," agreed the stockings. "But even if we're not for all of them, but each stocking for one child, we're just as excited as we can be."

"Have you ever been here before?" asked the tree.

"Yes, we're used every Christmas. We're kept just for Christmas. That's all we do all the year. We're put up on Christmas eve, and down we come on Christmas morning, but between Christmas eve and Christmas morning the most wonderful things happen! Ah!" and the stockings waved a little as they talked of their evening and morning of pleasure.

"It's far better than being around all the time and getting worn out. We're very fortunate stockings!"

"You are indeed," said the Christmas tree. "But for my part I am willing to be around for one season of the year and to have a glorious time then. Oh dear, I am so excited! I can hardly wait!"

"Patience, dear tree," said the stockings. "Santa Claus will soon be here."

"You don't think he's lost his way," said the tree. "I never heard of his losing his way from any of my relations. But perhaps he might have forgotten about this house."

"Forgotten! Santa Claus forget a house where there are children! Dear me, tree, but you don't know Santa Claus. He never, never forgets! He's Santa Claus—and that's enough reason."

"You talk just like my relations who've been Christmas trees. We've heard their stories from the wind who whispers it to the pine needles, the pine trees, fir trees, spruce trees and pine cones."

"They know," said the stockings. "But listen!"

A sound was heard coming down the chimney and over the roof they heard the sound of hoofs. "The reindeer are above!" said the stockings. "Santa Claus is coming now."

"Hello; You're a Beauty.

There was a sound of sleigh-bells and another strange sound in the chimney. And while the tree was trying to stand very straight, and the stockings trying to hang very gracefully and as Christmas stockings should, down into the room came Santa Claus!

"Hello, you're a beauty," said Santa Claus as he looked at the tall green tree, so dark and handsome. The tree shivered a little with delight. Its branches bowed slightly too, for they were trying to say:

"Thank you, Santa Claus."

"And here are the stockings," said Santa Claus.

"Well, I must start right in. Everything's in readiness for me. Seems to me these are the same three stockings of the same three children I've known for some time." And the stockings moved a little as they hung down, because they were so pleased that Santa remembered them. "But though the stockings are the same, the three kiddies are each a year older! They must not be forgotten."

And the tree remembered that the stockings had said that Santa Claus never forgot! Ah, how beautifully he decorated the tree and how proud it was! And the stockings were just as happy as they held their share of the presents for the three children! For they were helping Santa Claus in his wonderful Christmas play-work as he calls it.

According to Father.

"Mother, isn't father very late to night?"

"Not so very. I suppose the street cars got off the track."

"Or maybe that man came [illegible] losing time."

JOB PRINTING

We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

WAR DECLARATION AGAINST AUSTRIA IS RECOMMENDED

NECESSARY, SAYS PRESIDENT IN MESSAGE, TO MEET SITUATION THIS COUNTRY FACES IN WAR WITH GERMANY.

AMERICA'S PRESENT TASK TO WIN WAR DECISIVELY

Turkey and Bulgaria Not Considered in Path of Fight On Autocracy at Present—More Drastic Laws for Food, Railroad and Aliens Recommended

Washington, Dec. 5.—President Wilson in his address delivered before a joint session of congress Tuesday afternoon, urged immediate declaration of war on Austria-Hungary.

He said he did not believe war with Turkey and Bulgaria necessary, as yet, because those nations do not stand in the direct path of necessary American action.

Immediate war against Austria, even though she only be Germany's vassal and not her own mistress, the President declared, was necessary because the Teuton powers must be considered as one and because the war can be conducted successfully in no other way.

Will Go Where War Carries Us.

Giving a plain warning, however, that he would not hesitate to ask for declaration of war on Turkey and Bulgaria when he considered it necessary, the President said:

"We shall go wherever the necessities of this war carry us, but it seems to me that we should go only where immediate and practical consideration lead us and not heed any others."

Peace, the President told Congress, can come only when Prussian military autocracy is beaten down, when the German people make peace with the world through rulers the world can trust, when they make reparation for the wrongs their present rulers have done and when the enslaved people of Belgium, Northern France and the Balkans have been set free.

Text of Message.

Following is the President's message in full:

Following is the President's message in full:

Gentlemen of the Congress: Eight months have elapsed since I had the honor of addressing you. They have been months crowded with events of immense and grave significance for us. I shall not undertake to detail or even to summarize these events. The practical particulars of the part we have played in them will be laid before you in the reports of the executive departments. I shall discuss only our present outlook upon these vast affairs, our present duties and the immediate means of accomplishing the objects we shall hold always in view.

War Causes Not Debated.

I shall not go back to debate the causes of the war. The intolerable wrongs done and planned against us by the sinister masters of Germany have long since become too grossly obvious and odious to every true American to need to be rehearsed. But I shall ask you to consider again and with a very grave scrutiny our objectives and the measures by which we mean to attain them; for the purpose of discussion here in this place is action, and our action must move straight toward definite ends. Our object is, of course, to win the war; and we shall not slacken or suffer ourselves to be diverted until it is won. But it is worth while asking and answering the question, when shall we consider the war won?

United In Spirit and Intention.

From one point of view it is not necessary to broach this fundamental matter. I do not doubt that the American people know what the war is about and what sort of an outcome they will regard as a realization of their purpose on it. As a nation, we are united in spirit and intention. I pay little heed to those who tell me otherwise. I hear the voices of dissent—who does not? I hear the criticism and the clamor of the noisily thoughtless and troublesome. I also see men here and there fling themselves in impotent disloyalty against the calm, indomitable power of the nation. I hear men debate peace who understand neither its nature nor the way in which we may attain it with uplifted eyes and unbroken spirits. But I know that none of these speaks for the nation. They do not touch the heart of anything.

PRESIDENT WILSON

They may safely be left to strut their uneasy hour and be forgotten.

Peace By Overcoming Evil.

But from another point of view, I believe that it is necessary to say plainly what we, here at the seat of action, consider the war to be for, and what part we mean to play in the settlement of its searching issues. We are spokesmen of the American people and they have a right to know whether their purpose is ours. They desire peace by the overcoming of evil, by the defeat once for all of the sinister forces that interrupt peace and render it impossible, and they wish to know how closely our thought runs with theirs and what action we propose. They are impatient with those who desire peace by any sort of compromise—deeply and indignantly impatient—but they will be equally impatient with us if we do not make it plain to them what our objectives are and what we are planning for in seeking to make conquest of peace by arms.

Must Crush Master.

I believe that I speak for them when I say two things: First, that this intolerable thing of which the masters of Germany have shown us the ugly face, this menace of combined intrigue and force which we now see so clearly as the German power, a thing without conscience or honor or capacity for covenanted peace, must be crushed, and if it be not utterly brought to an end, at least shut out from the friendly intercourse of the nations; and, second, that when this thing and its power are indeed defeated and the time comes that we can discuss peace—when the German people have spokesmen whose word we can believe and when these spokesmen are ready in the name of their people to accept the common judgment of the nations as to what shall henceforth be the bases of law and of covenant for the life of the world—we shall be willing and glad to pay the full price for peace and pay it ungrudgingly.

Hears Voice of Humanity.

We know what that price will be. It will be full, impartial justice, justice done at every point and to every nation. The final settlement must affect our enemies as well as our friends. You catch, with me, the voices of humanity that are in the air. They grow daily more audible, more articulate, more persuasive, and they come from the hearts of men everywhere. They insist that the war shall not end in vindictive action of any kind; that no nation or people shall be robbed or punished because the irresponsible rulers of a single country have themselves done deep and abominable wrong.

Huns Lead Slavs Astray.

It is this thought that has been expressed in the formula "no annexations, no contributions, no punitive indemnities." Just because this crude formula expresses the instinctive judgment as to right of plain men everywhere, it has been made diligent use of by the masters of German intrigue to lead the people of Russia astray—and the people of every other country their agents could reach in order that a premature peace might be brought about before autocracy has been taught its final and convincing lesson and the people of the world put in control of their own destinies.

To Base Peace on Justice.

But the fact that a wrong use has been made of a just idea is no reason why a right use should not be made of it. It ought to be brought under the patronage of its real friends. Let it be said again that autocracy must first be shown the utter futility of its claims to power or leadership in the modern world. It is impossible to apply any standard of justice so long as such forces are unchecked and undefeated as the present masters of Germany command. Not until that has been done can Right be set up as arbiter and peacemaker among the nations. But when that has been done—as God willingly it assuredly will, be—we shall at last be free to do an unprecedented thing and this is the time to avow our purpose to do it. We shall be free to base peace on generosity and justice to the exclusion of all selfish claims to advantage even on the part of victors.

To Give All To Win War.

Let there be no misunderstanding. Our present and immediate task is to win the war and nothing shall turn us aside from it until it is accomplished. Every power and resource we possess whether of men, of money or of materials, is being devoted and will continue to be devoted to that purpose until it is achieved. Those who desire to bring peace about before that purpose is achieved I counsel to carry their advice elsewhere. We will not entertain it. We shall regard the war as won only when the German people say to us, through properly accredited representatives, that they are ready to agree to a settlement based upon justice and the reparation of the wrongs their rulers have done. They have done a wrong to Belgium which must be repaired. They have established a power over other lands and peoples than their own—over the great empire of Austria-Hungary, over hitherto free Balkan states, over Turkey and within Asia—which must be relinquished.

German Industry Admired.

"Germany's success by skill, by industry, by knowledge, by enterprise we did not grudge or oppose, but admired rather. She had built up for herself a real empire of trade and influence, assured by the peace of the world. We were content to abide the rivalries of manufacture, science and commerce that were involved for us in her success and stand or fall as we had or did not have the brains and the initiative to surpass her. But at the moment when she had conspicuously won her triumphs of peace she threw them away to establish in their stead what the world will no longer permit to be established—military and political domination by arms, by which to oust where she could not excel the rivals she most feared and hated. The peace we make must remedy that wrong. It must deliver the once fair lands and happy peoples of Belgium and Northern France from the Prussian conquest and the Prussian menace, but it must also deliver the peoples of Austria-Hungary, the peoples of the Balkans and the peoples of Turkey, alike in Europe and in Asia, from the impudent and alien domination of Prussian military and commercial autocracy.

Not To Meddle In Austria.

"We owe it, however, to ourselves to say that we do not wish in any way to impair or to rearrange the Austro-Hungarian empire. It is no affair of ours what they do with their own life either industrially or politically. We do not purpose or desire to dictate to them in any way. We only desire to see that their affairs are left in their own hands, in all matters, great or small. We shall hope to secure for the peoples of the Balkan peninsula and for the people of the Turkish empire the right and opportunity to make their own lives safe, their own fortunes secure against oppression or injustice and from the dictation of foreign courts or parties. And our attitude and purpose with regard to Germany herself are of a like kind. We intend no wrong against the German empire, no interference with her internal affairs. We should deem either the one or the other absolutely unjustifiable, absolutely contrary to the principles we have professed to live by and to hold most sacred throughout our life as a nation.

Autocrats Mislead Germans.

The people of Germany are being told by their men whom they now permit to deceive them and to act as their masters that they are fighting for the life and existence of their empire, a war of desperate self-defense against deliberate aggression. Nothing could be more grossly or wantonly false and we must seek by the utmost openness and candor as to our real aims to convince them of its falseness. We are in fact fighting for their emancipation from fear, along with our own from the fear as well as from the fact of unjust attack by neighbors or rivals or schemers after world empire. No one is threatening the existence or the independence or the peaceful enterprise of the German empire.

World Partnership After War.

The worst that can happen to the detriment of the German people is this that if they should still, after the war, is over, continue to be obliged to live under ambitious and intriguing masters interested to disturb the peace of the world, men or classes of men whom the other peoples of the world could not trust, it might be impossible to admit them to the partnership of nations which might henceforth guarantee the world's peace. That partnership must be a partnership of peoples, not a mere partnership of governments. It might be impossible, also, in such untoward circumstances, to admit Germany to the free economic intercourse which must inevitably spring out of the other partnerships of a real peace. But there would be no aggression in that, and such a situation, inevitable because of distrust, would in the very nature of things sooner or later cure itself by processes which would assuredly set in.

Not to Right Wrong With Wrong.

The wrongs, the very deep wrongs, committed in this war will have to be righted. That of course. But they cannot and must not be righted by the commission of similar wrongs against Germany and her allies. The world will not permit the commission of similar wrongs as a means of reparation and settlement. Statesmen must by this time have learned that the opinion of the world is everywhere wide awake and fully comprehends the issues involved. No representative of any self-governed nation will dare disregard it by attempting any such covenants of selfishness and compromise as were entered into at the congress of Vienna. The thought of the plain people here and everywhere throughout the world, the people who enjoy no privilege and have very simple and unsophisticated standards of right and wrong, is the air of all governments must henceforth breathe if they would live. It is in the full disclosing light of that thought that all policies must be conceived and executed in this midday hour of the world's life.

Teuton Opinions Restricted.

German rulers have been able to upset the peace of the world only because the German people were not suffered under their tutelage to share the comradeship of the other peoples of the world either in thought or in purpose. They were allowed to have no opinion of their own which might be set up as a rule of conduct for those who exercised authority over them. But the Congress that concludes this war will feel the full strength of the tides that run now in the hearts and consciences of free men everywhere. Its conclusion will run with those tides.

Regrets Mistakes In Russia.

All these things have been true from the very beginning of this stupendous war, and I cannot help thinking that if they had been made plain at the very outset the sympathy and enthusiasm of the Russian people might have been once for all enlisted on the side of the Allies, suspicion and distrust swept away and a real and lasting union of purpose affected. Had they believed these things at the very moment of their revolution and had they been confirmed in that belief since, the sad reverses which have recently marked the progress of their affairs towards an ordered and stable government of free men might have been avoided.

Slav Minds Poisoned.

The Russian people have been poisoned by the very same falsehoods that have kept the German people in the dark, and the poison has been administered by the very same hands. The only possible antidote is the truth. It cannot be uttered too plainly or too often.

Attitude Not Altered.

From every point of view, therefore, it has seemed to be my duty to speak these declarations of purpose, to add these specific interpretations to what I took the liberty of saying to the Senate in January. Our entrance into the war has not altered our attitude toward the settlement that must come when it is over. When I said in January that the nations of the world were entitled not only to free pathways upon the sea, but also to assured and unmolested access to those pathways, I was thinking, and I am thinking now, not of the smaller and weaker nations alone, which need our countenance and support, but also of the great and powerful nations, and of our present associates in the war. I was thinking, and am thinking now, of Austria herself, among the rest, as well as of Serbia and of Poland. Justice and equality of rights can be had only at a great price. We are seeking permanent, not temporary, foundations for the peace of the world and must seek them candidly and fearlessly. As always the right will prove to be the expedient.

What shall we do, then, to push this great war of freedom and justice to its righteous conclusion? We must clear away with a thorough hand all impediments to success and we must make every adjustment of law that will facilitate the full and free use of our whole capacity and force as a fighting unit.

Asks War on Austria?

One very embarrassing obstacle that stands in our way is that we are at war with Germany, but not with her Allies. I therefore, very earnestly recommend that Congress immediately declare the United States in a state of war with Austria-Hungary. Does it seem strange to you that this should be the conclusion of the argument I have just addressed to you? It is not. It is in fact the inevitable logic of what I have said.

Vassal of Kaiser.

Austria-Hungary is for the time being not her own mistress, but simply the vassal of the German government. We must face the facts as they are and act upon them without sentiment in this stern business. The government of Austria-Hungary is not acting upon its own initiative or in response to the wishes and feelings of its own peoples, but as the instrument of another nation. We must meet its force with our own and regard the Central Powers as but one. The war can be successfully conducted in no other way. The same logic would lead also to a declaration of war against Turkey and Bulgaria. They also are the tools of Germany. But they are mere tools and do not yet stand in the direct path of our necessary action. We shall go wherever the necessities of this war carry us, but it seems to me that we should go only where immediate and practical consideration lead us and not heed any others.

New War Measures Needed.

The financial and military measures which must be adopted will suggest themselves as the war and its undertakings develop, but I will take the liberty of proposing to you certain other acts of legislation which seem to me to be needed for the support of the war and for the release of our whole force and energy.

It will be necessary to extend in tain particulars the legislation of the last session with regard to alien enemies; and also necessary, I believe, to create a very definite and particular control over the entrance and departure of all persons into and from the United States.

Would Define Crimes.

Legislation should be enacted defining as a criminal offense every wilful violation of the Presidential proclamations relating to alien enemies promulgated under section 4067 of the revised statutes and providing appropriate punishments; and women as well as men should be included under the terms of the acts placing restraint upon alien enemies.

To Avoid Money Waste.

The legislation proposed at the last session with regard to regulated combinations among our exporters, in order to provide for our foreign trade a more effective organization and method of co-operation, ought by all means to be completed at this session.

May Ask Rail Legislation.

Additional legislation may also become necessary before the present Congress adjourns in order to effect the most efficient co-ordination and operation of the railway and other transportation systems of the country but to that I shall, if circumstances should demand, call the attention of Congress upon another occasion.

If I have overlooked anything that ought to be done for the more effective conduct of the war, your own counsels will supply the omission. What I am perfectly clear about is that in the present session of the Congress our whole attention and energy should be concentrated on the vigorous and rapid and successful prosecution of the great task of winning the war.

War of High Principle.

We can do this with all the greater zeal and enthusiasm because we know that for us this is a war of high principle, debased by no selfish ambition of conquest or spoliation, because we know, and all the world knows, that we have been forced into it to save the very institutions we live under from corruption and destruction. The purposes of the central Powers strike straight at the very heart of everything we believe in, their methods of warfare outrage every principle of humanity and of knightly honor, their intrigue has corrupted the very thought and spirit of many of our people, their sinister and secret diplomacy has sought to take our very territory away from us and disrupt the union of the states.

To Fight for Right Until Last Shot.

Our safety would be at an end, our honor forever sullied and brought into contempt were we to permit their triumph. They are striking at the very existence of democracy and liberty. It is because it is for us a war of high, disinterested purpose, in which all free peoples of the world are banded together for the vindication of right, a war for the preservation of our nation and of all that is held dear of principle and of purpose, that we feel ourselves doubly constrained to propose for its outcome only that which is righteous and of irreproachable intention, for foes as well as for our friends. The cause being just and holy, the settlement must be of like motive and quality. For this we can fight, but for nothing less noble or less worthy of our traditions. For this cause we entered the war and for this cause will we battle until the last gun is fired.

Plain Words Necessary.

I have spoken plainly because this seems to me the time when it is most necessary to speak plainly, in order that all the world may know that even in the heat and ardor of the struggle and when our whole thought is of carrying the war through to its end we have not forgotten any ideal or principle for which the name of America has been held among the nations and for which it has been our glory to contend in the great generations that went before us. A supreme moment of history has come. The eyes of the peoples have been opened and they see the hand of God is laid upon the nations. He will show them favor, I devoutly believe, only if they rise to the clear heights of his own justice and mercy.

Washington Justice Dies.

Washington, Dec. 5.—Seth Shepard, chief justice of the court of the District of Columbia, is dead at a hospital, where he was operated upon a week ago. Justice Shepard was born in Washington county, Texas, in 1847, saw service in the Civil war, and after practicing law in Texas, he was appointed associate justice of the district court by President Cleveland in 1893. He was made chief justice by President Roosevelt in 1905, and had served ever since.

Drive Starts for Flying Recruits.

Washington, Dec. 5.—Navy recruiting officers, it is announced, have been ordered to begin at once a drive for 8,000 men between 21 and 35 to form the ground personnel of the navy's flying corps. Carpenters, woodworkers, machinists, coppersmiths, blacksmiths, fabric workers, riggers, acetelyne welders, gas engine repairmen and instrument workers are needed especially. After intensive training the men will be eligible for promotion to higher grade.

First Trench Men to Train Troops.

With the American Army in France, Dec. 5.—A number of officers who were attached to the first battalions to enter the trenches have been transferred to the newly arrived units of former national guardsmen, where they will direct the work of getting the new troops ready for the front line. Later men of the first unit to establish contact with the enemy may be transferred temporarily to assist the officers. This conforms with announced plans of Gen. Pershing.

U. S. May Control Silver Market.

Washington, Dec. 5.—Treasury officials have held the first of a series of conferences with Western silver producers looking to the ultimate fixing of a standard price for silver, effective for one year and to government acquisition of options on practically the entire output of the United States. Pressing needs of this country and the Allies for silver for coin under abnormal war conditions is responsible for the plan. The price would probably be 87 cents per ounce.

Modification of Law Sought.

Washington, Dec. 5.—To enable the thousands of unnaturalized citizens in the army to obtain full citizenship before the end of the war, Labor department officials will urge Congress to pass the pending bill amending the existing statute that an applicant for naturalization must live in the same state for a year and wait for at least three months after filing his application for naturalization. Otherwise many soldiers of foreign birth would remain aliens.

EAT SKINNER'S THE BEST MACARONI
MY SIGNATURE Paul F. Skinner ON EVERY PACKAGE

Youngest British Soldier.

The youngest soldier at the front and the youngest N. C. O. in the British army is a lad of eleven, who is attached to an A. S. C. unit. He was specially enlisted to act as interpreter, as he speaks English and French fluently. He was made a sergeant and is now regarded as a mascot.

KIDNEY TROUBLE OFTEN CAUSES SERIOUS BACKACHE

When your back aches, and your bladder and kidneys seem to be disordered, go to your nearest drug store and get a bottle of Dr. Kilmer's Swamp-Root. It is a physician's prescription for ailments of the kidneys and bladder.

It has stood the test of years and has a reputation for quickly and effectively giving results in thousands of cases.

This preparation so very effective, has been placed on sale everywhere. Get a bottle, medium or large size, at your nearest druggist.

However, if you wish first to test this preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Plenty of Material.

"Here's an article says that they are using rags instead of rubber to make automobile wheels in Germany with."

"Well, they ought not to run out of material with all the treaties and promises they make over there."

Dr. Pierce's Pleasant Pellets are the original little liver pills put up 40 years ago. They regulate liver and bowels. Ad.

Five Generations In Wars.

Five generations of one family have served in the United States wars, the chain being completed by the recent enlistment at Los Angeles of a young man named Bennett. Not only did his two grandfathers, Bennett and Brookover, serve in the Civil war, but his great-grandfather, Daniel Bennett, was also a veteran of that war. The young man's great-great-grandfather, Asa Bennett, was in the war of 1812, and his two great-great-great-grandfathers, Bennett and Harris, were in the Revolutionary war. Although not in direct line of ancestry, young Bennett's uncle, Harry Brookover, represented the family in the Spanish-American war.

Girls as Bell Ringers.

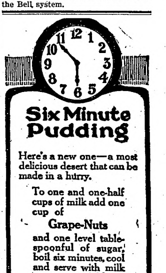
Bell ringing is being done by girls in the little village of Longstock, Ireland, as the young men who used to perform this duty have joined the army. The chiming is excellently and regularly performed by three or four girls, trained by a local lady, and week-day and Sunday the bells send out their cheery message over the countryside. This may not be essential war-work, observes a correspondent, but it is one of immense value to the morale of the neighborhood, and a work which would be left undone, like so many other "odd jobs" of wartime, but for the good offices of the women at home.

Would Scare Germans.

Among the funny ideas for ending the war is that of the Syracuse man who is making massive soldiers out of paper pulp to scare the Germans to death by the mere impression of numbers.

Keep Telephones Busy.

President Vail of the Bell telephone system states that nearly ten billion telephone calls are made a year over the Bell system.



Six Minute Pudding

Here's a new one—a most delicious desert that can be made in a hurry.

To one and one-half cups of milk add one cup of Grape-Nuts and one level tablespoonful of sugar, boil six minutes, cool and serve with milk or cream. Add raisins if desired.

Get a package of Grape-Nuts from your grocer and try this pleasing recipe.

Brief Items of State News

Three hundred and twenty-one big game and sixty-three small game licenses were issued by County Auditor Sander at Mora during the hunting season which closed Nov. 30. Few deer were killed in Kanabec county.

A plan to combine the deliveries of the local merchants is to be considered by the Merchants' association at Thief River Falls. In order to reduce expenses it has been proposed that all merchants do away with their individual systems and form a combination to have this form of work in charge.

Ousting of Herbert W. Libby, newly appointed member of the Minnesota Public Safety commission from the machinists' union, was demanded by President Ben Laab of Winona union 133 of which Mr. Libby is a member. The local body revoked action which made Mr. Libby a delegate to the central labor body.

John M. Baer, Nonpartisan congressman from North Dakota in an address to farmers at Faribault urged that farmers raise every bushel of grain and every pound of livestock possible in an effort to aid the government to win the war with Germany. Mr. Baer scored food manipulators and speculators declaring they had been driven out of North Dakota and would be driven out of every state in the nation.

Ornamental street lighting in cities and towns must be curtailed at once, Judge John F. McGee, state fuel administrator says. "It is up to everybody using electric lights in contravention to the regulations announced to stop at once or take the consequences," said Judge McGee. "The rules will be strictly enforced—not only the penal provisions as prescribed, but fuel will be refused to persons who violate the rules."

E. M. Wheelock, a mechanical expert of Winona gave the British the first practical idea of the war monster that forced the Germans to turn on their heels in the recent drive toward Cambrai, directed by General Byng. The fact that Wheelock was the inventor of the armored tank came to light a few days ago, when the bearer of the blueprints of the Winona man to the British military authorities revealed the secret in an interview at Cleveland. The Winonan verified the statement, although he admitted that he had hoped that the revelations might come from the British side rather than in America.

Danger of a shortage of hard coal in the Northwest is past, A. L. Flinn, rate and traffic expert of the Railroad and warehouse commissioner said. He said the available supply of soft coal is about 2,000,000 tons short of the estimated total of 10,000,000 tons necessary to supply all wants.

The city council of New Ulm must elect a mayor and city attorney under the law, to fill vacancies caused by executive orders removing those officials. W. P. Elbner was acting mayor during the proceedings. Auditor Vogel's reinstatement is effective at once and will relieve the temporary auditor, W. P. Backer.

Resolutions offering its co-operation with the government in every way possible, and its most earnest endeavor to produce fruits and vegetables necessary to assist in keeping people properly nourished, were sent to President Wilson, Herbert Hoover, A. D. Wilson and Governor Burnquist by the Minnesota State Horticultural society in its closing session in Minneapolis.

The attitude of Commissioner Keller on the street railway trouble was officially called to the attention of the Public Safetly Commission in a letter from R. D. Cotton, Ramsey county director of public safety. Newspaper reports of the speech made by Commissioner Keller at the labor meeting in Rice Park, St. Paul, were enclosed with a letter asking an investigation.

"Death by wounds in the head, caused by an unknown person," was the verdict in the case of John McGarry, who was found unconscious in George Anderson's "soft drink" place at Brainerd, when the police raided the place confiscated some liquor and arrested Anderson who is held on a charge of conducting a place in which intoxicating liquors are sold.

The Northern Minnesota Development association, in joint convention with the Minnesota Potato Growers' association and the newly formed Northern Minnesota Sheep Growers' association was held at Brainerd with the largest attendance in the history of the association. President Middleton in his address paid tribute to the potato growers of the state and emphasized the need of organized effort in assisting the government in its war program. Patriotic resolutions were adopted. Among the features of the convention, a potato luncheon, part of the conservation program, was in the foreground. Potatoes were prepared after government recipes. Sheep culture was discussed by Prof. W. A. McKerrow of the University farm. Governor Burnquist addressed the convention the closing day.

Unless trains come in from North Dakota with grain in the next few days lake shipments from Duluth elevators will be wound up in a hurry, according to a statement given out by a member of the local food administration grain corporation representative.

Henry Helsene died recently at Everett, Wash., aged 63. Mr. Helsene was formerly a resident of Isanti and served as village marshal here at one time. He moved to Washington about twelve years ago. The survivors are his wife, one son, Fred, three sisters and two brothers.

The Place of the Nativity

In a place built, like Bethlehem, in many cases against the soft limestone rock it often happens that the existence of a cave where the house was to be was a great attraction since it offered a ready made, dry, above ground cellar as well as a specially suitable spot for the household animals and for a storeroom. It would seem that Joseph was at last able to get room in some such back portion of a house, and there, we are told, Mary bore her divine Son.

A cave below the high altar of the Church of the Nativity is now shown as the very place where this august event transpired; a little recess, shaped like a clam shell, its floor of marble wrought into a star in the center, bearing in Latin the words, "Here Jesus Christ Was Born of the Virgin Mary." A row of lamps hangs round the outer edge, the right to attend to them being a jealously watched matter, each of the ancient churches, the Greek, the Latin, the Armenian and the Coptic, having one or more of these under its care.

The evidence for this site is so strong that most persons accept it as sufficient, reaching up, as it does, to within living memory of the days of the apostles. But even if this be an illusion the fact remains that in this petty village the Saviour of the world was made man for our redemption. No wonder that we read of the anthem of the angels, for surely nothing could draw forth the interest of the heavenly population like the exceeding grace God was showing to sinful man.

The scene of the visit of the shepherds is pointed out as on a rough slope, facing the village, at some distance to the east, Bethlehem lying far above on its mountain seat. One can follow the shepherds in their journey to see the unspeakable wonder. They would go along the rich valley of Boaz and then up the terraced hill by a path still in use, nor is it uninstructive to reflect that, while simple shepherds were led by angels to the manger, the high priest and the great of Jerusalem, so near, slept through that most illustrious night of all history, quite unconscious of what had happened. But we know of it, and may God grant that if we cannot go with the shepherds to Bethlehem we may one day go to the right hand of God and worship him there, who that night lay a little child in Mary's arms.—Dr. Cunningham Geikie.

One Christmas Pudding

Perhaps the most heroic attempt to keep Christmas in conventional fashion under unconventional conditions was that made by the late Lord Wolseley, when a young officer, in the trenches before Sebastopol during the Crimean war sixty years ago. He and his comrades decided that the Christmas should be honored and that there should be a plum pudding. The "pudding" was compounded of biscuit, grease and such fruit as could be obtained, the ingredients being mixed in a fragment of a Russian shell. Wrapped in a cloth, it was boiled for some hours, and a tasty reminder of the great festival was eagerly looked forward to by the hungry officers. But before the pudding was considered "cooked" orders came transferring Wolseley and his tent companions to a distant part of the works.

Should they leave the pudding until their return or eat it as it was? They were hungry, and the latter course was decided upon. The "pudding" was duly swallowed, and away they went in obedience to orders. Late that night Wolseley was troubled with internal disturbances that necessitated the doctor's kindly ministrations. It seemed, said the future field marshal, as if pieces of Russian shell were rolling against each other inside. It was the only pudding, the first and last, he ever made.

"Don't Open Until Christmas!"

My Love hath sent a gift to me,
But though that gift I long to see,
The packet's label says me nay—
"Don't open until Christmas day."

Till Christmas day—how long to wait
And pine, yet hold inviolate
The ban, too strict for Adam's clay,
"Don't open until Christmas day!"

On Christmas day shall I be here
To joy in that which now were dear?
And must I heed these runes that say,
"Don't open until Christmas day?"
Should Time, the churl, have power to hold
In check each word, each deed of old!
Through this decree of drear delay,
"Don't open until Christmas day."

For there be hearts—and purses, too—
Locked fast to Love the long year through
By that same word, which fools obey,
"Don't open until Christmas day."

Ah, Love, the sages all allow
The time for any joy is now!
Then charge me never more, I pray,
"Don't open until Christmas day!"

—Arthur Guiterman in Life.

The Golden Christmastide

Under the far blue Syrian sky
Was born the Conqueror of Death,
Who bore credentials from on high
In Bethlehem and Nazareth.
Then came the new and better times;
One lone star signaled far and wide,
And now we ring melodious chimes
To mark the holy Christmastide.

Come young and old from every side;
Come rosy maid and gentle swain,
It is the holy Christmastide
That joyously we meet again.
The holly hangs upon the door.
It is no time for work or woe:
Now jollity commands the floor,
And joy comes with the mistletoe.
Bring in the Yule log's ancient flame,
The soused boar's head, a rich repast.
Let sorrow go the way it came;
Let care be to oblivion cast.
The sweet clear voices sound without
Sackbuts and shawm make wholesome glee.
Twined is the boar's head round about
With garlands rich and rosemary.

And now the foaming wassail bowl
Shall bring us comfort and delight,
This is the season of the soul,
From golden morn to starry night.
Naught care we for the piercing cold,
The drifted snow or raging blast,
For Christmas never shall grow old
From eons new or centuries past.

Quaint mummers mingle in the scene
Where pudding mates with Christmas pie.
The rooms are thick with evergreen,
And happiness lights every eye.
Let Fortunatus turn his horn
Of basket loads to famished need,
For on this day the One was born
Who knew no mark of class or creed.

Then welcome, merry Christmastide,
Another hour before we go.
The rosy girl close at our side
We'll kiss beneath the mistletoe.
Deep, mellow bells salute the air
With benisons sent far and wide.
Good will and joy go everywhere
Upon the golden Christmastide.
—Joel Benton.

The Sweetest of All.

Christmas is a jolly day, but let us not forget that it is Christ's birthday and that to make someone else happy is the sweetest thing of all.

A GREAT DISCOVERY

(By J. H. Watson, M. D.)

Swollen hands, ankles, feet are due to a dropsical condition, often caused by disordered kidneys. Naturally when the kidneys are deranged the blood is filled with poisonous waste matter, which settles in the feet, ankles and wrist; or under the eyes in bag-like formations.

As a remedy for those easily recognized symptoms of inflammation caused by uric acid—as scalding urine, backache and frequent urination, as well as sediment in the urine, or if uric acid in the blood has caused rheumatism, lumbago, sciatica, gout, it is simply wonderful how quickly An-u-ric acts; the pains and stiffness rapidly disappear, for Anuric, (double strength), is many times more potent than lithia and often eliminates uric acid as hot water melts sugar. All druggists.

Dr. Pierce's Pleasant Pellets for the liver and bowels have been favorably known for nearly 50 years.

Anuric is a recent scientific discovery by Dr. Pierce, Chief of Staff at the Invalids' Hotel and Surgical Inst., in Buffalo, N. Y. Send 10c there for a trial pkg. of Anuric. Large package 60c.

Would Save the Cake.

Johnny had often seen the new food signs posted up everywhere, telling people not to waste food and use what is left. One day he was invited to a birthday party. In a short while the birthday cake was cut up and each child had a piece, and there was a big piece left. The maid was going to take this piece away when Johnny called to her and said, "I think I can use the piece that is left."

One Worse.

Friend—I suppose you'd rather lick the kaiser than anybody else on earth?

Recruit—There's just one fellow I'd like to get my hands on worse.

Friend—Who's that?

Recruit—The guy that hollered "Fire!" just as I got my clothes off for the physical examination.—Judge.

BOSCHEE'S GERMAN SYRUP

Why use ordinary cough remedies, when Boschee's German Syrup has been used so successfully for fifty-one years in all parts of the United States for coughs, bronchitis, colds settled in the throat, especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectoration in the morning, gives nature a chance to soothe the inflamed parts, throw off the disease, helping the patient to regain his health. Sold in all civilized countries. 30 and 90 cent bottles.—Adv.

Before Wealth Came.

No doubt there are a lot of rich men, too, who thought they'd be different than they are when they got money in the days before they got it.

Quarantine Not Observed.

Brooklyn, N. Y., will no longer placard homes for measles or for whooping cough, quarantine being considered useless.

The Reason.

"What makes wheat nervous, pa?"

"I guess it is the way they keep thrashing it, son."

Colds Cause Headache and Grip

LAXATIVE BROMO QUININE removes the cause. There is only one "Bromo Quinine." E. W. GROVE'S signature is on box. 30c.

True.

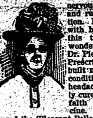
"Bad weather we're having."

"Yep. But you're in luck if that's all you've got to kick about."

If the man you are talking to looks at his wife it's time to shut up.

Better a budding genius than a blooming idiot.

ADVICE FOR THOSE WHO ARE WEAK, NERVOUS, SLEEPLESS.



St. Paul, Minn.—After my first child it left me in very nervous, weakened and run-down condition. I also suffered with headaches. At this time I found wonderful relief in Dr. Pierce's Favorite Prescription. It soon built me up in good condition and my headache was entirely cured. I have great faith in this medicine. I have also used the 'Pleasant Pellets' as a purgative and have always found them to be effective and non-griping."—Mrs. R. McL. HOLMES, 466 Farrington.

The "Prescription" is sold in tablet or liquid form. Send 10c to Dr. V. M. Pierce, Buffalo, N. Y., for trial pkg. tablets.—Adv.

His Advantage.

"The gardener is a natural grafter but he has one big advantage over the other kinds."

"What is that?"

"Whatever he puts over on the public, he can get them to swallow it."

The Smart Retort.

"She wanted to borrow a cup of sugar."

"Did you lend it to her?"

"I sent back word that if I had a cup of sugar I wouldn't speak to the likes of her."

Some Exceptions.

"Does like always produce like?"

"Not always. Rich food often produces poor health."

The Middlemen.

A farmer raised a peck of wheat beside the River Dee; a boarder ate a wheated loaf 'way down in Tennessee; the loaf the boarder fed upon cost half as much and more as did the farmer's peck of wheat a month or so before. "Now, why is this," the boarder raved, "they hold me up on bread?" "And why is wheat so bloomin' cheap?" the plodding farmer said.

A chap beyond the Rocky ridge raised 20 pounds of limes; another one in old New York was kicking on the times, for he had downed a glass of "ade," and, poor forlorn galoot, had paid one-half the market price of 20 pounds of fruit. "Now, why is this, they soak me thus for this wee sip of 'ade'?" "And why," exclaimed the orchard man, "am I so poorly paid."

Now hold your horses steady there, you man beside the Dee; go easy there, you hungry chap in sunny Tennessee; restrain yourself, you orchard man, forbear this angry talk, and you beside the soda fount in Little Old Noo Yawk, remember this: Our food and drink, no matter where and when, must also be the food and drink of thirty middlemen.—Utica Globe.

Curious Burials.

The inhabitants of Mesopotamia have curious customs in the disposal of their dead. The corpse is carried to the grave dressed in ordinary clothes, with the face uncovered. Bodies are buried in shallow graves, and after a period dug up again, the bones being collected into a white linen bag and deposited in small buildings.

"One day," says an officer of the R. A. M. C., "I saw such a bag in a church; it was labelled with a woman's name. In a village near the Struma I have visited one of these storehouses of the bones of the departed. The bags most recently placed in it were still white and whole; others were whole, but stained brown by time. Those that had been deposited in years past had rotted away."

Can You Beat it.

Last Friday evening while a bunch of fellows were sitting quietly in the P. P. Palmer Pool Hall, they were disturbed by some terrible screaming in the street, and upon going out to investigate they found Mrs. Andy Ryan running from their place of business calling for help. Upon asking her what the trouble was she told them that Andy was chasing her and was going to kill her. While the fellows were deciding what to do, Andy gets an automobile and goes to Thief River where he was arrested by the deputy sheriff.

Mrs. Ryan went down Saturday and swore out a complaint against her husband and the day for the hearing was set for Tuesday. In the meantime Mrs. Ryan and her husband made up and she did not appear against him on Tuesday. The ending of the case as far as we can learn, is that a fine was imposed on him, and all the costs.

MUSIC REACHES THE HEART

Performer Dealing in Emotions Captivates Women More Swiftly Than the Poets or Painters.

The poet deals in words, while the painter deals in color and form, but the musician deals in emotions and therefore his appeal to women is always more swift, as it is always more subtle, than the appeal of any other artist.

Such, summed up by a writer in the Philadelphia North American, is the latest theory to explain the lure of music for women and the attraction of the dark-eyed, long-haired musician himself.

The average woman, say the theorists, is hemmed in with conventions that make her feel a prudish discomfort if a book or a poem talks too openly of what she thinks of, but never puts into words. With a picture it is the same way, but in the music, she hears with emotional delight all the romanticism, all the beauty, and all the vague dreams which she hides so closely from the world. In consequence she reads into the music her own feelings, and then she confuses the musician with his music. He, too, is keyed up to a high tension; he feels telepathically the emotion he has communicated, and so a spark is kindled between them. As for the result—well, sometimes it is love, sometimes a momentary infatuation—that all depends upon how much music they hear together and how much pent-up nervous emotionalism lies buried in the woman's soul.

Small Prescriptions.

Many physicians have a habit of writing prescriptions without calculating the quantity of medicine their patients are to take. This leads to a great waste of drugs and much unnecessary expense. Which leads the New York Medical Journal to urge physicians to be more careful.

Another evil result of this far too common practice is that partly used prescriptions are stored away in the medicine chest, and next time the patient has, or thinks he has, the same symptoms, he takes what he supposes to be the same medicine.

But the chief reason why physicians should not prescribe four or six ounces when they know only one or two will be used, is that it is wasting the drugs and making the patient pay far more for his medicine than is at all necessary.

First Introduced Canes.

The Mexicans first used canes in America. When the Spanish conquered the country, a queer custom was introduced. The chief executive of the towns carried a stick with a gold or silver head. It was a kind of scepter.

The people, of course, rarely knew how to read or write, and when anyone was wanted for a crime, one of the mayor's subordinates would take the cane, find the culprit and place it horizontally upon the latter's chest.

The proceeding was equivalent to a summons, and the man had to appear before the mayor under the penalty of being cast into prison. This action was borrowed from Spain, where it still prevails in the more important actions.

Find Skeleton of Giant.

A perfect sketeleton was uncovered in Surrey, England, during the work of carrying out alterations to surface water drainage in one of the main streets in Farnham. The chief bones were in a perfect state of preservation, and were sufficient to show that the body was that of a man of unusual stature. Close by was found a bone of a horse. The site of a Norman cemetery is only a little distance from the spot where the body was found, and here some years ago cinerary urns were discovered, which were stated to be perfect examples of first-century urns. Some of these are now preserved in Waverly abbey.

"MEMORY MAPS" ARE FREAKS

Try to Draw Outlines of the Various Countries and You Will Be Surprised at Your Ignorance.

A man and wife sat at the table at their home trying to draw the outline map of Europe, from memory, observes the Ohio State Journal. They soon found that they knew little about it. They had been reading of European events for years, and yet when they came to putting their mind picture of the continent on paper they forgot their geography entirely. The man had read Anabasis and Homer in the original and yet put Greece between the Adriatic and the coast of Spain, and left Austria out altogether. The wife had Spain and France side by side on an east and west line, with Belgium to the north, covering both, while she made the boot of Italy a fashionable $10 gaiter. Anyone looking at the two maps could tell they were not of America or Asia, but of where, he couldn't say.

But seriously, it is a delightful amusement and might with profit be indulged in more. After one gets through with Europe, take the other continents and the countries that belong to them. And then one night come nearer home. It would be really sad to observe the ignorance concerning our own localities, but it would be amusing, too. Just for fun, have a company draw maps of Great Britain and Ireland, or Turkey, China, Kansas and Nebraska, Louisiana, Delaware, etc., and much surprised you will be to see how this old earth had changed since you trusted it to your memory.

DRY RESOLUTION PASSES HOUSE

Question of Nation-Wide Prohibition To Be Submitted To State Legislatures

VOTE IS 282 TO 128

Bill Would Prevent Manufacture, Sale or Importation of Liquor For Beverage Purposes—States Have 7 Years to Ratify.

Washington, Dec. 19.—Only a slight difference in resolutions between the House and Senate now stands in the way of submitting to state legislatures an amendment to the federal constitution forbidding the manufacture, sale or importation of intoxicating liquor for beverage purposes in the United States or its territories, for nation-wide prohibition has won in the House.

The vote in the House, taken after a day of debate before crowded galleries, was 282 to 128, with the parties divided almost evenly. The margin for prohibition was just eight votes more than the necessary two-thirds vote of the House required for adoption and 26 more than two-thirds of those voting.

Same as Senate Measure.

The resolution adopted by the House is identical with that pased by the Senate last August, except that it gives the states seven years instead of six in which to ratify the amendment. Senator Sheppard, author of the resolution, predicted that the Senate would accept the amendment at once. He said he had assurances that the seven year period would be approved and that he did not believe a roll call necessary.

Every attempt to put on amendments to except light wines and beer was beaten and 141 Democrats stood aligned with 137 Republicans and four Independents to win the final victory for the prohibition forces.

Text of Resolution.

Following is the resolution as adopted:

"Resolved by the Senate and House of Representatives, that the following amendment to the Constitution be and hereby is proposed to the states, to become valid as a part of the Constitution when ratified by the legislature of the several states as provided by the Constitution:

"Article—Section 1.—After one year from the ratification of this article the manufacture, sale or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

"Section 2. The Congress and the several states shall have concurrent power to enforce this article by appropriate legislation.

"Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several states, as provided in the Constitution within seven years from the date of the submission hereof to the states by Congress."

HARRIS QUITS SHIP BOARD

Third Manager to Hold Place Returns To Work In Navy.

Washington, Dec. 18.—Rear Admiral Frederick R. Harris, recently appointed general manager of the shipping board's emergency fleet corporation, has asked to be relieved of that duty and returned to his post as chief of the navy's bureau of yards and docks.

His request will be granted and Charles A. Piez, a Chicago engineer, vice president of the Emergency Fleet corporation, will be named to succeed him.

It is said that Admiral Harris did not find the work congenial. He was appointed general manager when Rear Admiral Capps retired. The first general manager of the Fleet corporation was Major General Goethals, who resigned after a few months because of the board's refusal to give him a free hand.

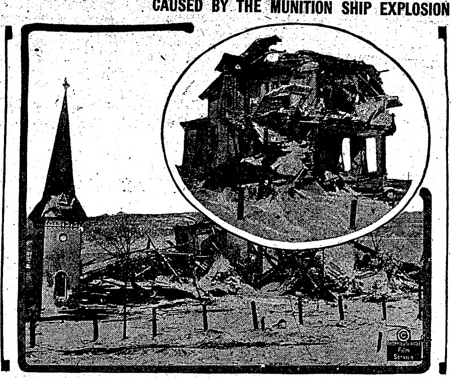
SWISS TO STAY NEUTRAL EVEN IF IT MEANS FIGHT

Geneva, Dec. 18.—President Felix, Galonder, in the first public speech he has delivered since his recent election, said that the Swiss people are ready to pour out their blood against any one who might attempt to invade their country. Switzerland, declared the president, will defend her neutrality to the end.

Raiders Believed in Singapore Region.

Manila, P. I., Dec. 18.—Officials of the Philippine government have issued a warning to shipowners to beware of German raiders suspected of being near Singapore, one of the Strait settlements. American and British warships, it is reported, are co-operating ing guarding the shipping routes. Governor General Harrison has received the assurance that 140,000 ton of shipping has been pledged by the shipping board for the transportation of Philippine products in order to relieve the stagnation and congestion here.

SCENES OF THE DEVASTATION IN HALIFAX CAUSED BY THE MUNITION SHIP EXPLOSION



What is left of the Grove Street church in Richmond, the suburb of Halifax, that was totally destroyed. The church collapsed, but the steeple was left standing. Inserted above is the Thayer residence.

WAR COUNCIL FORMED

New Body to Control All Military Relations.

Co-Ordination of Supplies Is Chief Aim Of Organization—Headed By Baker.

Washington, Dec. 18.—Organization of a war council of the War department to co-ordinate all matters of supplies for the armies at home and overseas and the military relations between the armies in the field and the department is announced by Secretary Baker.

The council will consist of Secretary of War Baker, acting assistant Secretary of War Crowell, Major General Tasker H. Bliss, chief of staff, and Major Generals Henry G. Sharpe, quartermaster general; Erasmus Weaver, chief of coast artillery; William Crozier, chief of ordnance, and Enoch P. Crowder, provost marshal general. The announcement says:

"The purpose of the council is to oversee and co-ordnate all matters of supply of our field armies and the military relations between the armies in the field and the War department. The council will act through the chief of staff and will be provided accommodations and facilities for the transaction of its business.

REVEALS WAR OFFICE SHIFTS

Baker Rearranges High Commands—Post for Goethals.

Washington, Dec. 18.—Rearrangement of some of the high commands in the War department is indicated by the detachment of officers designated by Secretary Baker to sit in the department's war council.

It has become definitely known that Major General Goethals, builder of the Panama canal, has been offered the place of quartermaster general to succeed Major General Sharpe.

Provost Marshal General Crowder is the only officer assigned to the war council who will not be detached from his present office.

"BUY WAR STAMPS," IS PLEA

Vanderlip Says Similar Chance to Invest Never Offered Before.

Kansas City, Dec. 17.—Buy war savings stamps now, when they are cheap, and luxuries, which are high, later, when they are cheap, was the plea of Frank A. Vanderlip, chairman of the war savings committee, in an address at a luncheon here. "War savings stamps are a security everybody can invest in," he said. "Never before in the history of the country have all the people had a chance to invest small sums in a gilt-edged security."

Explosion In German Munitions Plant.

London, Dec. 18.—Two disasters in widely separated parts of Germany are reported in Zurich dispatches received here. An explosion occurred in the Zeppelin works at Friedrichshaven and resulted in the death or injury of many. The second explosion occurred near Kiel, destroying a factory where bombs were prepared for Zeppelins and airplanes, and many of the employes in this plant were killed.

Trials For More Negro Army Rioters

San Antonio, Tex., Dec. 15.—Plans are rapidly being shaped to try additional men of the Twenty-fourth infantry on charges growing out of the Houston riot August 23. Fourteen enlisted men of the Twenty-fourth who have been confined at Fort Bliss, El Paso, since the removal of the battalion from Houston, have been brought to San Antonio. No formal charges have been preferred against any of the men or against any other Twenty-fourth infantrymen so far as has been made public.

HUNS DESTROY 10 CONVOYED SHIPS

Sink Destroyer, Mine Sweepers, British and Neutral Merchantmen In North Sea.

TONNAGE LOSS 8,000

Raid Duplicates Successful Foe Enterprise of Last October When Several Norwegian Merchantment Were Sunk Without Warning.

London, Dec. 19.—German naval forces have sunk one British and five neutral merchantment, a British destroyer and four mine sweepers in the North Sea.

Tonnage Loss 8,000.

The losses were the result of an attack on a convoy bound from Scotland to Norway, Sir Eric Geddes, first lord of the admiralty, announces. The total tonnage of the lost merchantmen was 8,000.

Duplicates October Raids.

The German raid duplicates the successful enterprise of last October carried out by two German raiders which attacked a convoy in the North sea. They sank nine neutral merchantmen and two of the escorting British destroyers. Five Norwegian, three Swedish and one Danish vessel were sunk without warning. They were armed heavily and succeeded in evading the British watchers on the return as well as the outward trip.

Three Ships Lost Dec. 12.

London, Dec. 18.—Two neutral merchant vessels and a trawler were sunk off the Tyne December 12 by German destroyers, Thomas J. MacNamara, financial secretary to the admiralty, has just announced in the house of commons.

CROZIER RELIEVED OF POST

Goes From Ordnance Department To Inner War Council.

Washington, Dec. 18.—General Crozier, chief of ordnance of the army, is to be relieved of that post and assigned to the new inner war council, it is learned here. General Crozier has been under fire before the Senate military committee investigating the conduct of the war, but his removal it is declared, is in no way connected with Congress' action. No successor has yet been selected.

5,500,000 IN GERMAN ARMIES

Numerical Strength of Foe Estimated by French Critic.

Paris, Dec. 18.—German combatant forces on all fronts are estimated at 3,130,000 by the military critic of L'Echo de Paris. His estimate of the present total strength of the German army is 5,500,000. Noncombatant units, which he says total 2,370,000 men, are needed for guarding the frontier, occupying the invaded territory, and maintaining the long line of communication.

Mexicans Fire On U. S. Guards.

El Paso, Texas, Dec. 18.—Two Mexican federal cavalrymen rode across the Rio Grande north of this city, one opening fire with pistol on the American guards who halted them. The guards returned the fire, killing the horse of one Mexican, capturing the rider. The other rode back to Mexico and was believed to have been wounded, as he was seen to fall twice from his horse. The captured Mexican was turned over to the immigration officials here. None of the American guards was hit.

DRAFT WINS IN CANADA

Borden and Unionists Carry Election by Big Vote.

Incomplete Returns Give Union Government Lead of More Than Forty Seats.

Ottawa, Ont., Dec. 19.—A decisive victory at the polls has been won by the Union government.

Virtually complete returns from the eastern provinces, and results not quite so complete from west of the Great Lakes, indicate that, apart from the soldier vote to be counted in January, the government will have a majority in excess of 40 seats.

The provinces east of the Ottawa river more than verified the predictions of those who believed that the Unionists and Liberals would break about even, but Ontario and the West proved a surprise. The opposition counted on at least 20 seats from Ontario, and obtained only half that number.

Liberals thought they could count on not less than 15 seats in the West, but Mulloy of Provencher, Manitoba, was the only supporter of Sir Wilfred Laurier elected.

DRIVEN INTO MOUTHS OF GUNS

Teutons Forced To Advance In Italy By Own Artillery.

With Italian Armies, Dec. 17.—Austro-German troops are being driven to the attack against the Italians. Prisoners taken by General Diaz's forces declare losses in their ranks have been increased to staggering proportions by their own artillery, which under orders had put a moving curtain of fire behind the attacking waves to force them into the charge.

Commanders of the Teuton forces, they also asserted, are adopting other coercive measures.

JURY'S VOTE ACQUITS MEANS

Is Freed of Charge of Murder of Wealthy Widow.

Concord, N. C., Dec. 18.—Gaston B. Means has been acquitted here of the murder of Mrs. Maude A. King, a wealthy widow of New York and Chicago, whose business affairs he had handled. The jury was out all night.

After the foreman of the jury had formally pronounced the verdict of "not guilty," counsel for Means asked the court if it had any other charges against their client. Judge Cline replied there was none and Means was given his freedom for the first time since last September.

SHIP CREWS MAKE TROUBLE

Washington, Dec. 18.—Immediate legislation to bring crews of transports, mine layers, and other army vessels into military service is urgently recommended by Quartermaster General Sharpe in his annual report just made public.

Continual difficulties with civilian crews are described, with the conclusion that grave danger can be averted only by making officers and men subject to military discipline.

Power Refused to Non-War Plants.

Pittsburgh, Dec. 18.—Practically every manufacturing concern in Pittsburg engaged in making other than absolutely necessary materials will be forced to close down the first of this week unless their plants are steam equipped, as the entire supply of direct current will be diverted to war order factories, it is announced by Robert J. Bulkley, member of the priorities commission of the Council of National Defense, who is conducting an investigation into the power situation here.

SEPARATE PACT IS HELD CERTAIN

Germany Opens Peace Negotiations With, Bolsheviki Government of Russia.

RUSSIANS DEFY ALLIES

Notify Ambassadors That Bolsheviki Must Be Recognized Or All Courtesies Will be Refused.

Amsterdam, Dec. 19.—The belief is generally accepted that a separate peace will be arranged between Russia and Germany. Dr. von Kuehlmann, German foreign secretary, says a Berlin dispatch, is proceeding to Brest-Letovsk during the course of the week to take part in peace negotiations.

Peace to be Hastened.

A semi-official dispatch received here from Vienna says:

"The governments of Austria-Hungary, Germany, Bulgaria, Turkey and Russia will follow up the armistice as speedily as possible with peace negotiations. The selection af plenipotentiaries now is proceeding, and pending their arrival the armistice delegates at Brest Litovsk have started informal peace negotiations.

Chinese Troops Sent to Harbin.

London, Dec. 18.—News received in London is to the effect that the population of Harbin, Manchuria, is entirely under the control of the Boolsheviki and that great disorder prevails there. Movements of the Russian railway administrators and of the civil government are being hampered. The governor's authority is being ignored.

The Bolsheviki in Harbin are said to be more aggressive than those in Petrograd.

A dispatch received here from Peking says the Allied ministers in the Chinese capital decided that at the present juncture the preservation of order in Harbin should be entrusted to the Chinese government and that two battalions of Chinese regular troops were dispatched there from Kirin.

The dispatch adds it is officially denied that Japanese have landed at Vladivostok.

Bolsheviki Defy Allies.

Petrograd, Dec. 18.—The commissioner of foreign affairs has notified the foreign embassies that they must vise the passposts of Bolsheviki couriers or that similar courtesies will be refused him. The notification says the government considers the question of recognition purely formal and that it does not care about it in the least, but that foreign governments must realize that the Bolsheviki constitutes the de facto government and extend to it the right for its couriers to travel abroad.

MISSION IS BACK FROM PARIS

House Reports Enterprise Complete Success.

New York, Dec. 18.—What the American mission was sent to accomplish in the Inter-Alied war conference in Paris "has been successfully and satisfactorily done," was the message brought to the American people by Colonel E. M. House, head of the mission, who has returned to the United States with four of his colletagues.

Peace was never discussed at the Inter-Allied war council, which cemented together the Allied nations for the vigorous prosecution of the war, Colonel House declared.

"I will report that it was a complete success," Colonel House said last night.

PAY FOR SOLDIERS' FAMILIES

U. S. Checks Expected at Camp Dodge Within Few Days.

Camp Dodge, Iowa, Dec. 16.—Several thousand mothers, wives or dependents of Minnesota soldiers now at Camp Dodge will receive Christmas presents from Uncle Sam in the form of separation allowance checks. The checks are expected at Camp Dodge within the next few days, and will be sent direct to the dependents entitled to receive them. Very few of the Minnesota solders, as well as those from other states, now at the cantonment failed to show at least one dependent.

Ten Killed by Mine Explosion

Bluefield, W. Va., Dec. 18.—Ten miners are known to have been killed by an explosion in the mine in the Yukon-Pocahontas Coal company at Susanna, twenty miles west of here. Four others are reported to have lost their lives. The bodies of ten men have been taken from the mine, and exploring parties are searching for other possible explosion victims.

German Republic Urged.

Washington, Dec. 18.—The committee on public information has made public an article written by Germans and circulated in Germany urging the overthrow of the German war lords and the proclaiming of a republic. The document, which contains about 2,500 words was distributed through German republicans in Switzerland, declares peace will not come until Hohenzollern is completely overthrown and the German people take a firm and decided stand for humanity and civilization

GREATER EFFICIENCY. REDUCED COST

Grow Grain in Western Canada, Make Profits, and Show Greater Patriotism.

The nation-wide cry of "More Efficiency" has now reached even the most remote agricultural sections and there is a general interest amongst the farmers to increase their products and to reduce their expenses. The need of foodstuffs is greater than the world has ever before known, and every effort is being used to meet the world's food requirements, becoming more apparent every day. While it is true that this desire is attested by a general patriotism, there is an underlying factor in this extension work to secure some of the benefits that are being offered by a ready market at maximum prices. Wide-spread attention has been given to the opportunity in this respect in Western Canada, where fortunes are being made in a few crops out of grain at present prices.

It has been found that the open, level prairie can be cultivated for wheat and other small grains at a minimum price, and during the past few years the yields have been more than satisfactory. Wheat crops of forty bushel to the acre have been common in Western Canada in the last three or four years, and with a present available price of over $2.00 per bushel this means a return on investment and labor that cannot be duplicated elsewhere. This is made possible by the low priced lands that can be secured for grain growing. The range in price runs from $15 to $25 per acre, according to location and other local conditions. In this period of "more agricultural efficiency" it is apparent at a glance that the farmer on low priced but high grade lands, growing his grain at a minimum cost, is reaping a golden harvest with the highest percentage of profit.

The cultivator of high priced farm lands has a big handicap to overcome in computing his profits on a $200 an acre farm as compared with the agriculturist reaping as great, if not greater return from $25 an acre land.

It therefore becomes a question for the farmer himself to answer, whether he is doing himself and his country the best service, by devoting all his energies to working high priced land that yields no better return than land that can be secured at one-eighth the price. It is a case of getting either minimum or maximum quantity. Many have already decided on the alternative, and with their spare money invested in and now working Western Canada lands, they are allowed to speak for themselves. Apparently they are satisfied, for we learn of cases where on a $4,000 investment, in one year they have had their money back, with a profit of from 50% to 100%. Such is one of the steps in progressiveness now being demonstrated in the effort to create greater efficiency. The Canadian Government is using every effort to bring these conditions to the attention of the agricultural world, in order to secure the necessary increased grain production so greatly needed. The farmer in Western Canada is exempt from all personal taxes. His buildings, stock and implements are not assessed; and every encouragement is given to farmers to improve and increase their farm output. Reduced railway rates are being offered to new settlers to look over the country and to size up an unprecedented opportunity in farming.—Advertisement.

Pay No Attention to Him.

"What do they mean by a presiding genius?"

"One who can keep order at a woman's club," growled the grizzled grouch.

DON'T WORRY ABOUT PIMPLES

Because Cuticura Quickly Removes Them—Trial Free.

CHAPTER XIV.—Continued.

—16—

Only some miracle, or the consolidation of their interest temporarily on what was being done forward, had saved us from discovery. Yet I could not remain there, almost in plain view. Where should I turn first? Bascom would be of no value, even if I released him; my only hope of assistance lay in the two seamen. Gripping the iron bar, the revolver snugly stowed away in my pocket, I crept down the black passageway leading forward, glad to escape from the light of the cabin.

McCann believed his prisoners were secure; that it was quite safe to leave them unwatched for the short period before deserting the ship. The very fact that the inefficient Dade had been left alone in the cabin to watch over Miss Vera, and myself, was evidence that he needed every seaman to carry out the work on deck. The measure of his confidence, his conceit, was what gave us this opportunity to act. My hand, fumbling for the lock encountered a bar, a stout wooden bar, extending from jamb to jamb, and my heart bounded madly. This was the place! I had found it already, and the men I came to release were imprisoned exactly as I had been. I tapped gently on the panel.

"Who is it?" Low as the whisper was, I felt convinced the speaker must be Leayord.

"Hollis. Stand by now; are you alone?"

"Yes; Olson and Masters are together in the bosun's quarters."

"Masters! when did they look him up?"

"About an hour ago; he made quite a fight of it—that's how I knew what was going on, sir. Can you get me out?"

"Aye! I'll rip this bar off in a jiffy. Have you a light in there?"

"Black as the inside of a whale's belly, sir."

I got a purchase with my iron lever, and put my full strength to it. The bar was of oak, but the jambs soft pine, and the nails drew out, creaking slightly, but making no noise to create any alarm. It was so intensely dark I could not even perceive the outlines of the man's figure, yet felt aware that Leayord fronted me in the open door. He found my hand somehow, and gripped it.

"I'm sure glad to meet you, captain," he exclaimed heartily, "and get out o' that hole. What's the word, sir?"

"Release the others, and get busy; minutes are worth hours now. McCann and his gang are deserting ship; they have the boats provisioned, and alongside already; that is why the guards have been withdrawn."

"They were going to leave us aboard locked in?"

"Aye, and with the sea-cocks open; dead men tell no tales."

He whistled, his fist smiting the wood of the door.

"The dirty hound! And where are we, sir?"

"Off the Newfoundland coast; they think less than fifty miles, but there's nearly a hundred miles of blue water to the west of us. Here's the way of it in a nutshell: I was locked in my stateroom the same as you. It was Miss Carrington who gave us our chance. She became friendly with McCann, and agreed to go with him. She was left free on board, and managed to release me while the crew were all on deck. The steward was left on watch in the cabin, and she had to hit him with this iron."

"She did! Lord, I'd never have thought it of that slip of a thing! What's become o' the girl?"

"She's in her room, waiting for McCann to come down for her. She'll delay him all she can. Is this the door?"

"Aye, aye, sir; and give me the iron."

He was not a minute at the job, and it required scarcely longer to acquaint the other two released men with a knowledge of the situation. Olson picked up the bar of wood for a weapon, asking simply:

"Vat we do now, captain? Iss it to fight?"

"Hush!" whispered Masters, "there's someone coming up the ladder."

We crept back into the bosun's stateroom and waited breathlessly. There was scarcely room for the four of us, and the door caught, and would not wholly close. A dim light reflected along the walls of the passage, making me aware that the fellow who was slowly climbing the iron ladder from below, had a lantern with him. Leayord retained the iron leg, and I drew my gun, holding it tight gripped in one hand. The man's head and shoulders emerged through the round opening, and the dim light enabled me to recognize Tom Dugan. He paused on the edge, looking down.

"All quiet enough up here," he called. "You better draw the fires, Tony."

"No use o' that," answered a sullen voice from a distance. "The water will fix 'em in half an hour; there's two cocks open. I'm goin' on deck; that crooked millionaire don't git no chance ter drown me."

Dugan laughed.

"Always a thinkin' how to git out of a scrape safe. Yer got yer price, didn't yer?"

"Enough ter make me want ter live long 'nough ter spend it, anyhow. Are you comin' down this way agin, Dugan?"

"No; I'll have a look at the cabin on my way up; the boss doesn't want any mistake made. There's nuthin' left ter do aboard this hooker; she's ticketed for Davy Jones."

He stared below a minute, as though to make sure of what Tony was doing down in the engine room; then, apparently satisfied, swung to firm footing on the deck of the passage, flashing his light aft. The radius was small, and his glance must have revealed nothing strange, for the fellow whistled softly as he advanced.

He was almost at the stateroom door behind which we were hiding before he even noted the absence of the wooden bars which had confined the prisoners. He stopped, a look of amazement on his face, the lantern swung higher to throw the light forward. Before he could move a limb, I had stepped forth into the radiance, the muzzle of my revolver held within three inches of his eyes.

"Don't drop your hands, Dugan," I said sternly, "Not an inch, you brute. Here, Leayord, take the lantern from him. Move quietly, all of you. Now, Olson, if there is a sheet in there, or anything you can make a cord out of, bring it to me—yes, take the lantern a minute. Good! that will answer; now lads, make it strong, a sailor's knot."

Dugan sputtered and swore under his breath, but the shock had robbed him of all power of resistance. I never saw a more amazed look in a man's eyes. He stared at us as though we were ghosts raised from the grave to haunt him.

"Anyone below beside Rapello?" I asked, gripping his shoulder so as to make him look at me. "Answer now or I'll take means to make you."

"No."

"No, what, you fool! You are speaking to the captain of this ship."

"No, sir."

"That's better; you were the two last men left aboard, I take it; it was your job to open the sea-cocks?"

He nodded sullenly, as I dug the revolver deep into his cheek.

"You dirty murderer! where did you leave McCann? Twist his neck, Leayord, until he finds his tongue."

"On deck," he sputtered, "close by the companion; he—he was going down to the cabin after the girl. Tony was the only one left in the engine room, and I was sent along to see that he left the cocks open."

"The boats were all over the side then?"

"Yes, sir."

"How many of them?"

"Four."

"Where were they?"

He set his teeth, but the pressure of Leayord's fingers compelled an answer.

"Three o' 'em had got away, lyin' maybe a hundred yards out, and the fourth was still at the ladder, waitin' fer us to come over the side."

"This last one was McCann's boat? Who were in it?"

"I didn't look over ter see, sir."

"Maybe not, but you know just the same. The men were all picked for the boats. Give me the names."

"Well, thar wus Liverpool, White, Dubois, Tony an' myself, the nigger, Watson, an'—let's see—Joe Sachs."

"Seven—with McCann and the girl—nine; not overloaded surely, and quite a picked company, worthy their chief. The other boats held more?"

"About twelve men each, sir."

Leayord's eyes met mine in silent understanding. He was seaman enough to instantly grasp the purpose of this unequal division—the lighter boat would be the better sailor, the easier operated in a heavy sea.

"Which boat was it you fellows chose?" he asked.

"The port-quarter boat."

"I thought so. What'll we do with Dugan, sir?"

"Throw him into the bosun's bunk, and then nail up the door. We'll give him a dose of his own medicine. More lively; there's another job waiting us on deck."

CHAPTER XXV.

We Capture the Ship.

They were in no way gentle about it, yet the work was noiselessly done, and with sailorlike thoroughness. Dugan undertook to curse, but was so instantly gagged that only the first muffled word reached me in the passage. Masters held the lantern, while the two mates refastened the door, driving home the nails with the iron bar. The moment this was secure I was ready for the next act.

"Give the lantern to Olson, Masters. You've got to look after the engine-room, and leave us to attend the deck job. There'll be those sea-cocks to see to first, and then keep enough fire under the boilers for steerageway. Down with you, and don't pay any attention to whatever we do."

Heavy as he was he went down the iron rungs of the ladder like a fireman answering a call, and the three of us who were left behind in the passage, stared into each others' faces, barely visible in the dim radius of light.

"What next, sir?" asked Leayord anxiously. "There's only three of us now, an' forty-three o' them."

"One less—you're counting Dade, and he's safe enough. The boy Moon is of no account, and I imagine there are twenty men out in those boats who have no heart in this business. They'd be with us now if they had any chance—isn't that so, Olson?"

"Yas, sir—but they won't likely git no chance."

"True enough; yet it is something to knew that McCann and his gang cannot count on them either, if it comes to a fight. As things stand it is all a matter of luck and nerve. There are only six in the boat hanging to the foot of the ladder, with McCann left alone on deck. We ought to be able to handle that bunch."

Leayord dug the iron bar he held into the deck planks savagely.

"What did yer tell Masters to only keep up enough steam for steerage-way for, sir?" he asked bluntly.

"I was afraid they might notice, if he fired up."

"'Tain't likely, so the funnels don't git ter blazin'. The only fellers with eny brains are in thet boat close in alongside, sir, an' they can't see nuthin' frum thar. Them common fo'castle rats in them other boats never would notice a bit more smoke."

"What is it, Leayord? You have a plan? Speak quick, man; we can't stand talking here."

"'Tain't not much o' a plan, sir," he explained briefly, "only I don't see why we couldn't just naturally heave this cuss McCann overboard, er else kill him just as you please. Eny two o' us could keep that quarterboat crew from comin' up the ladder, an' then, if Masters had his boilers het up, no darn rowboat could ever catch us. Thet would leave us one hand at the wheel."

It was true, the very simplicity of it making me curse my own stupidity. I stared into his face without uttering a word of comment, yet with my mind grasping instantly the necessary details. With a single step I was bending over the ladder peering down into the depths below. A faint far-away light appeared at the bottom.

"Masters!" I called, my voice thrown downward through hollowed hands.

I saw his shadow emerge into the circle of light.

"Aye, aye, sir."

"Have you any pressure now?"

"Fairly good, sir. The water's drawing off and the wet coal will steam up in a jiffy."

"Well, stand by for all the steam possible, and give it to her the instant you get the signal—only be careful not to flame your funnels. You hear me?"

"Every word, sir."

"All right; stand by, and don't fail us."

"Now, lads," I said, standing erect, "First it's the after cabin, and then the deck. Douse the glim, Olson; we're better off in the dark. Follow me, and mind your footing."

The gloom was no handicap in that narrow space where we could feel either wall with our fingers, but I emerged into the cabin with caution, fearing the possible presence there of McCann, who might even have brought a man, or two, back on board to assist him. The hanging lamp had been extinguished, or else it had burnt out from lack of oil, but there was a faint glimmer of light in Miss Carrington's stateroom, enabling me to discover at a glance that the main cabin was unoccupied. Her door stood wide open, but with no signs of confusion within.

What had happened? There was nothing to tell me the truth. Had McCann succeeded in inducing her to accompany him on deck? Had he taken her there by force? or, had the girl finally yielded to his insistence, after exhausting every form of delay, her last faith in my return having vanished? Nothing remained but to follow them, and find out what had occurred, and, if not already too late, attempt a rescue.

"There's no one here," I said in a whisper. "We'll try the deck; quiet both of you."

We reached the head of the stairs on our hands and knees. I had my revolver gripped in my fingers, Leayord his iron bar, while Olson had found a hatchet somewhere in the darkness. The companion door was but half closed, and I squeezed my body through the opening, assured no one occupied that immediate portion of deck. The other two followed noiselessly, and we huddled close together in the black shadow of the cabin. So still it was I could hear their breathing, and my eyes, trained by long service in the darkness below, were able to distinguish objects forward beyond the mainmast. There was nothing living visible; to all appearances the ship was totally deserted; the last stragglers had taken to the boats. Olson, who lay next me on the deck jerked my sleeve, his uplifted hand pointing toward the starboard rail amidships.

"There's two of 'em," he whispered.

My eyes caught the indistinct outlines, unable for the instant to make them appear human. Indeed I was still in doubt when McCann's voice, with the old hateful sound in it, called into the darkness:

"Below there; are you still fast?"

"Aye, fast enough, an' blamed tired o' holdin' on," grumbled someone below testily. "Why don't yer come along down?"

"In a minute. Is everyone in the boats?"

"I don't know nuthin' 'bout the steward; nobody ain't seen him yet, 'less he got in somewhar else; nor Tom Dugan. Tony sez he's in the cabin."

"Well, he isn't; I just come up from there. We won't wait for the blame fool. You flooded the engineroom, Tony?"

"Sure I did, with both cocks wide open; there's five feet o' water in her by now."

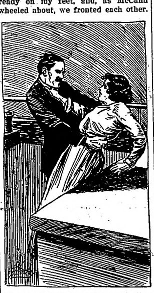
"Good; then it's time we're off. Send a hand up here to help me, Liverpool—the girl won't go along."

The men below laughed at his trouble.

"Can't yer handle that little bit o' a thing, mister?" sang out a new voice, "without the help o' a sailor man?"

"Stow it, Joe Sachs," roared Red, and there was the dull thud of a fist blow. "Now up yer go to give the lady a lift, me lad. Jump er I'll take the tiller ter yer next."

Sachs must have started his upward climb, for McCann drew back from the rail, and, as he did so, the girl broke free from his grasp. The man, however, although apparently taken by surprise, was quick enough to get between her and the companion. She only escaped the grip of his hand by shrinking back against the rail. I was already on my feet, and, as McCann wheeled about, we fronted each other.



As He Did So, the Girl Broke Free From His Grasp.

I gave him no time even to utter a cry of alarm, my only thought being to rid the deck of such scum. Before he could move to escape, or even throw up a hand in self-defense, I had him by the throat, my other hand twisted in his waistband. He was a man nearly, if not quite my own weight, yet, at that moment, mine was the strength of a giant, and with one mighty effort I lifted him clear off the deck, as helpless in my grip as if he had been a child, and, with one desperate heave, swung him out over the rail, and let go. I staggered back, weakened for an instant by my own violence; I heard him cry out, the sound muffled in his throat as he fell; Vera gave utterance to a sob, and the whirling body struck the black water below with a splash plainly audible. Still gasping for breath, I leaned out and looked down. The only light was a lantern held up in the hands of a man in the boat at the foot of the ladder. I could see his face, and the dim figures of three or four others; beyond that narrow radius all was black. I could not even perceive Sachs, half way up the ship's side, yet I knew he was there, clinging tight, because of the tautness of the rope strands. There was no need to conceal the facts longer; we must fight in the open now.

"Leayord, come here," I ordered. "And you, Olson, take the wheel, and ring the engineroom for full speed ahead. Jump into it lads." I sent my voice below, stern with threat.

"Get down that ladder, Sachs, just as quick as God will let you. Let go, you man with the lantern, or we'll swamp you alongside. Do you hear the steam, Liverpool? It's full steam ahead, you fool!"

It was Red's voice which replied:

"Is that you, captain? What happened? Who went overboard?"

"McCann; he's astern of you, and you better pick him up as you go. Move quick! You haven't a second to lose. Man, you'll be sucked under, if you don't let go!"

They were seamen enough to realize the imminent danger of their position. Liverpool and White both called out, and the others, grasping their oars, backed water furiously. I saw Sachs tumble back into the boat, and a face or two staring upward. Voices roared at us, the fellows cursing lustily; then the darkness seemed to swallow them completely, and I knew from the tremor of the deck planks that we were underway. I sprang to Vera, and lifted her to her feet.

"You are not hurt?"

"No, only frightened and bruised. He threw me to the deck. Are we safe? Have they all gone?"

"Yes, all who can make any resistance. Hold her just as she is, Olson; there's a bone in her teeth already; it will take more than oars to overhaul us. Does anyone know if those fellows picked up McCann?"

"I think most likely they did, sir; they wuz swingin' the lantern alongside."

"Bring me the night-glasses, Leayord—aye, they're on the shelf in the captain's stateroom."

He returned with them before I had finished whispering a word of hope into the girl's ear, but even that short time had so broadened the expanse of water I could conceive few details through the lens. Three of the boats were close together, bunched as though their occupants were still unaware of just what had occurred; the fourth boat—the one we had just left, no doubt—was much nearer, and must be entirely out of sight of the others. I got it fairly within my focus, but the occupants were indistinguishable at that distance; all I could be sure of was that the fellows were engaged in rigging up a jury mast for a sail, and that they were no longer attempting to pursue us, or making any effort to rejoin the other boats.

"Do you see 'em, sir?" asked Leayord, impatience overcoming him.

"Yes; Liverpool's boat is out there, heading due west, and the men are rigging a sail."

"And the others, sir?"

"To starboard, at least a quarter of a mile away."

"That's the game, then," he said, staring out into the blackness as though he saw it all. "Them fellows don't care a darn what becomes o' the three first boats so long as they git safe ashore. I'd bet they rather they wud drown than not. I wonder did they pick up that millionaire?"

"No reason why they shouldn't. He must have struck within ten feet of the boat. They wouldn't be likely to leave him behind, when he's their meal ticket if they ever get ashore."

"Where they heading for?"

"White Fish bay."

"Well, they may git thar, if it ain't too fur. Thet's a good boat they're in, Mr. Hollis; an' Liverpool an' White are both sailors all right. I'll say that for 'em. But just the same they're a goin' to have ter show their train'n before many hours."

"You mean a storm? I don't like that mist myself."

"'Tain't only that, sir; it's in the air; you kin sorter breathe it like. Besides I took a squint at the barometer when I went below—it's fallin' ter beat the band."

"Then we better look to our own safety; we are far too short handed to stow sail before a wind."

"I reckon there ain't so awful much to stow," with a glance upward into the blackness aloft. "There are two men below deck you can rout out and put at work."

"Two, sir?"

"Aye, Mr. Leayord—Dugan and the steward. The latter you will find in one of the staterooms aft; here is the key. I leave it to you to persuade the fellows to take hold."

"I'll do that, sir, with pleasure; and maybe, come the need, even the owner would give us a hand?"

"We will not count on Mr. Bascom; he could scarcely keep his feet in a seaway," I answered firmly. "But we have one more in the crew, nevertheless—Miss Carrington, here."

"The lady, sir?"

"Yes," she broke in eagerly. "Captain Hollis knows, Mr. Leayord, for he has tested my seamanship. I could take the wheel such weather as this. May I not relieve Olson now?"

"Yes," I said, feeling it best to encourage her enthusiasm, and truly possessing faith in her capability to handle the ship. "I'll keep you there while we get snugged away. Mr. Olson!"

"Aye, aye, sir."

"Let Miss Carrington relieve you. Stand by a moment until certain she has the trick of it; and then come forward."

"Aye, aye, sir," but less heartily, a strong doubt in his voice.

"It's all right, Olson; she'll hold her this weather. Now, Mr. Leayord, bring the other two men on deck."

(TO BE CONTINUED.)

Encouraging Strife.

"You stated in your announcement of my marriage to Miss Susan Spats that we were 'launched upon the troubled sea of matrimony.'"

"Well, young man," replied the editor of the Diggsville Clarion, "what's wrong with that sentence? It's a fine figure of speech."

"Maybe so, but it looks to me like an invitation for my wife's relatives to get busy and start something."

BEST OUTFIT FOR SPRAYING

Hand Sprayer Is Sufficient for Two or Three Acres—Keep Chemicals Well Stirred.

Size of orchard, nearness to water, and size of trees are big factors in determining the size of a sprayer to buy. Generally the following suggestions hold good. A hand sprayer is sufficient for two or three acres. For three to ten acres of full bearing trees a small power outfit equipped with one lead of hose will do the work. A duplex outfit is needed for an orchard of from 10 to 20 acres and a triplex outfit for 20 to 30 acres. Keep the chemicals in your solution well stirred. A curved-bottom cypress tank is the best. A belt connection from the engine to the pump is better than a chain. A 35-foot hose is the most convenient length.

Foot-Rot.

Look out for foot-rot. Wet ground will produce it.

SELECT EGGS FOR HATCHING

Never Use Those From Entire Flock Indiscriminately—Keep Breeders in Separate Pen.

Never set eggs from an entire flock indiscriminately, but select the best birds and give them a separate place, or pen up the flock and let this pen run at liberty during the hatching season. The latter is the better plan because the eggs will be more fertile and hatch better.

CULL OUT WEAKLING CHICKS

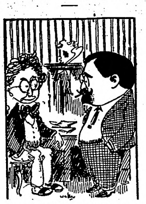
Never Breed From Fowl That Is Not Just "Full" of Vitality—Avoid "Crow" Head.

One decided aid to better vitality in the flocks is to never let a chick live that shows low vitality; "kill every weakling" should be the wide-awake poultryman's watchword, and never breed from a bird that is not just "full" of vigor and vitality—that is not in the most robust health. The indications of weakness and low vitality were considered, the conditions of the eye being one of the safest guides; a dull, lusterless eye is a certain sign of weak vitality. A long thin shank and thin body is another indication of weakness, and we should avoid a "crow" head—a long, thin head—that is a sure sign of lack of vitality and vigor.

Doesn't Enlarge Profits.

Enlarging the flock does not always enlarge the profits.

POOR MAN

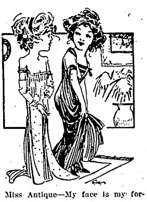


Mr. Knowsit—Doctor, I think my wife has too much leisure.

Dr. Emdee—Then why doesn't she take up something?

Mr. Knowsit—She does. She takes up most of my time.

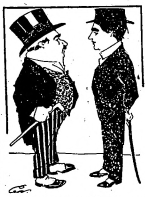
HARD LINES



Miss Antique—My face is my fortune.

Miss Caustique—Then the bankruptcy court is staring you in the face.

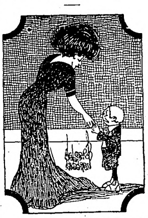
GENERALLY LED



"You act as your wife's leading man, I believe."

"Yes, but only on the stage."

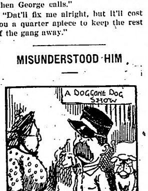
A HOLDUP



"Here's a quarter, Willie; now you keep away from that keyhole tonight when George calls."

"Dat'll fix me alright, but it'll cost you a quarter apiece to keep the rest of the gang away."

MISUNDERSTOOD HIM



Keeper at Dog Show—Don't go yet, madam. It'll soon be feeding time.

Old Lady Visitor—I beg your pardon, but I had my dinner before I came here.

FAKE WAR HEROES GET COMMISSIONS

Newspaper Correspondent Says Americans Are Taken in by Impostors.

LATEST CONFIDENCE GAME

Fraudulent "Warriors" Exploit War Fever in United States by Impersonating Real Heroes of Foreign Legion and Flying Corps.

Paris.—One of the latest and most successful "confidence games" in the United States today, judging from letters and newspaper reports, is the assertion of nondescripts that they are returned American "heroes" of the French foreign legion, or of the Lafayette escadrille. Almost daily the legionaries and aviators at the front send me clippings from American papers which tell of the valorous exploits of a certain man "back from the war," whose deeds and often whose name are unknown on the battle front. It is at the request of many of the brave Americans who are really fighting that I write a word of warning against the fraudulent "warriors" who are exploiting the war fever in the United States, writes Paul Ayres Rockwell in the Chicago News.

Some Never Reach Europe.

Some of the impostors have never been in Europe at all; some came over and enlisted in the allied ranks, then managed by one means or another, even by downright desertion, to return to America before ever viewing the firing line.

Others impersonate the men who are in France offering their lives in the fight against the Germans. Sergt. Frederick Zinn of Battle Creek, Mich., the famous aviator-observer, recently received a copy of the Hood River (Ore.) News for July 11, 1917, containing a story beginning: "Frederick W. Zinn, an American who has seen active service in the aviation corps of the allied armies in France, spent several days last week in Hood River, and those who met him were thrilled by his stories of aerial combat in the war zone. Mr. Zinn came west to find a half brother and sister, from whom he has become separated since he went to Europe. He traced them to Portland, and was told there that they had been adopted by a Hood River family."

The article goes on at length and gives some personal details about Sergeant Zinn which the impostor probably gleaned from news reports. The real Sergeant Zinn has no half brothers or sisters. He returned to France from a short leave in America last March.

Another clipping from Pasadena, Cal., tells of Richard L. Bryner, who is referred to as a lieutenant and the youngest member of the Lafayette escadrille, who "has been very successful in battling against German war planes. Several of his heroic deeds are chronicled." The name of Bryner has never appeared on the roll call of the Lafayette flying unit.

I have before me the official stenographic report of the interrogation by the senate's committee on military affairs of two Americans who have worn the French aviation uniform. Senator Sheppard asked: "Have you a record of the number of battles in which you have participated?"

Army Adopts Impostors.

One of the men replied that he had been in 17 different engagements. Yet he has never once flown over the front. The other claimed to have had thirty or thirty-five air battles. The truth is that he spent seven months with the Lafayette escadrille, and during all that time had only about five hours of flight and not one aerial duel. He has been made a first lieutenant in the United States army on the strength of his assertions.

A man who deserted from the French aviation corps after France had spent over $5,000 teaching him how to fly is today a lieutenant and chief pilot at an American aviation school. He never flew at the front and was never under fire, although he has given out many interviews describing his heroic exploits while fighting the Germans.

A number of other Americans who enlisted in the French aviation corps and were trained as flyers at the expense of the already overburdened French nation went to the United States directly after being brevetted, without ever having gone to the front, and have not yet returned to face the German foe in battle. Some of these men are so shamelessly lacking in honor that even in the training camp they announced to their American comrades that they had not enlisted with the intention of fighting, but to learn a paying occupation, so as to return to America and make money.

Overlooked $1,729 for Years.

Bethlehem, Pa. — E. G. Coursen, forty-seven years of age, a Scranton grocer, is an honest man. While looking through a lot of old papers recently, Peter Eichelberger of Portland found a check for $1,729, given him 19 years ago by Coursen, and which had been overlooked. Eichelberger, knowing that the check was outlawed, mailed it to Coursen, and shortly received another check.

CHYOTES WILL HELP DEFEAT THE KAISER

Macon, Ga.—Few people have heard of a chyote. No, it is not an animal. It is a vegetable which grows on a vine and may be used as a pickle or relish. It is appetizing and "hits the spot" with all who have tried it. It is suggested as another article adding to the supply of food in the country's effort to "beat the kaiser." The vegetable is about the size of a cucumber.

ENLISTS TO FEED SOLDIERS

Wisconsin Hotel Keeper Enters Service and Is Given the Rank of Sargeant.

Green Bay, Wis.—From potato peeler to chef for some of the principal hotels in the country and then head chef for an overseas force of the American army, has been the career of William J. Rupp, restaurant owner and chef in this city for many years. Mr. Rupp has joined a unit at Allentown, Pa., and has received the rank of sergeant. He expects to go to France within a short time.

Pictures on Apples.

Toledo, O.—"Here y'are—your monogram on an apple!" It's the latest wrinkle. S. O. Butler, fruit grower of Helmer, Ind., has a method of putting initials, pictures of horses, cows and most anything on apples. After the fruit has become full grown, but is still green, a stencil is placed on the surface and the leaves pulled away to allow the sunlight to color the skin.

GREAT BRITAIN'S FLEET READY TO FIGHT

Most Powerful Aggregation of Superfighting Vessels Ever Assembled.

HOLD MOCK BATTLES DAILY

Is Governed by One of the Most Efficient Business Administrations in History—Every Vessel Provisioned for Two Months.

London.—Britain's grand fleet is not only the greatest and most powerful aggregation of superfighting vessels ever assembled by a nation but is undoubtedly governed by one of the most efficient business administrations in naval history. The enormous outpouring of treasure in money and supplies required to keep the grand fleet in condition to leave at a moment's notice for an engagement with the enemy accomplishes maximum results. After a week's visit with the fleet, the New York Sun's correspondent was able to obtain a general idea of the results attained and of the plans upon which this enormous fighting force operates.

Primarily the grand fleet is protecting England from an attack by the German fleet. Since the beginning of the war Germany has known of the existence of this superior force lying silently in wait at its base in northern waters and the thought of contact with it has kept the Teuton navy well within protected harbors.

Secondarily the British battle cruiser squadrons are acting as a protecting force for the Scandinavian traffic, and now that America has brought into being a line of communications across the Atlantic, Britain's fleet acts as a guardian for that vital thread of shipping. Every hour since the declaration of war in 1914 the fleet has been in readiness, and its maintenance under such a long strain will constitute one of the glorious chapters in the history of naval affairs.

Provisioned for Two Months.

In the fleet are some thousands of vessels of every kind, aside from the battle cruisers themselves. Each battle cruiser carries a complement of from eight hundred to a thousand men, making in a human element well up into six figures. The exact data cannot be given, but the enormity would almost be beyond conception even if put down in terms of hundreds of thousands. Just one item that seemed impressive and which brought up visions of the herculean tasks confronting the commanders of the fleet was the statement that each cruiser must be continually supplied with two months provisions of food, oil and everything else that would be needed by a small-sized city in case of siege.

His majesty's ship St. Vincent is of the battleship type, built in 1908, and it was aboard her that I lived during my visit. She was engaged at the time in daylight target practice, carried out within the harbor in conjunction with the other vessels that made up the squadron. Every man was in his fighting position, carrying out his duties just as if the squadron were attacking an enemy. They were firing small shells through sub-caliber guns inside the monsters that are ordinarily used in battle.

Mock Engagement Every Day.

Behides this actual practice of engaging the enemy the entire fleet carries out daily a mock engagement directed from the flagship. This is done altogether on paper, the admiral of the fleet sending out messages giving the imaginary location of his vessels. At a given hour he sends out a message saying the enemy is sighted in a certain position. The fleet is supposed to be sailing at a given speed and when the various vessels come within range they proceed to engage the enemy. On paper many German fleets have been sunk and many allied ships have sunk to Davy Jones' locker. Another method of keeping the men involved in the fighting is through a war "game," in which the whole fleet is plotted out on charts and certain men designated to command the enemy vessels, directing their movements and playing their wits and knowledge against others who are supposed to be commanding British cruisers.

The same methods are used aboard all the hundreds of craft that dot the harbor. There is continued movement. One squadron is always in action some place on the water between the dreary brown hills or is steaming out to sea for patrol. Submarines disappear and reappear constantly and are sworn at by captains who are attempting to keep some target in line.

Throughout the whole of the seemingly confused mass of ships there is order and system. Daily or weekly charts show the efficiency of each boat. Not a tin can nor a bone is wasted, and the economy of each ship is known down to the last penny.

Find Cave of Winds.

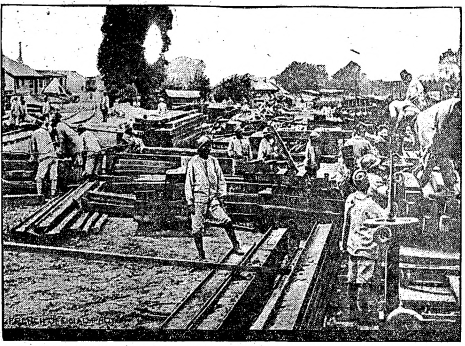
Columbus, Kan.—A "cave of winds" has been discovered in the Columbus-Miami mining field near the state line north of Quapaw. The wind is so strong the miners declare their lamps are blown out the moment they enter. But that is not the only peculiar feature of the cave. It was once filled with water, but the pumps of another mining company, more than a mile away, has drained it. When the pumps are not working, water accumulates.

CLOTHES AMERICA SENDS TO FRANCE

These practical peasant garments are being made for the people of the devastated districts of France who cannot adjust themselves to American styles of clothing. They are being supplied by the American Fund for French Wounded from patterns collected in France by Mrs. Robert Bacon, wife of the former ambassador, and from models sent from the devastated districts by American fund workers.

1—Italian soldiers heliographing in the mountains at the west end of their line. 2—First photograph of the American troops in the first line trenches in France; the men are watching an airplane. 3—Carrier pigeons, much used in the warfare on the west front, being placed in a receptacle in the trench to protect them from gas.

BELGIUM'S COLONIALS REBUILDING IN MOTHERLAND



Men from Belgium's colonial possessions at work in recovered section of Belgium rebuilding the war-swept territory. The photograph was taken at one of the subdepots for supplies of all kinds which are forwarded to points where the reconstructive work is in progress.

NO FOOD WASTE ALLOWED HERE

© HARRIS & EWING

Rumors of waste of food at cantonment camps have been hotly resented by officers who have charge of garbage disposal at the various camps. This picture shows the unloading of garbage at the central depot at Camp Meade. The cans are brought from benches underneath the windows of each mess hall. Each can is labeled for various sorts of refuse so that bones, cans, paper, etc., go into separate receptacles. The camp's conservation officer notes the contents of each can as they are dumped into motortrucks for sale to contractors. At Camp Meade a cook who fails to scrape a bone properly is in for a stiff call.

EAT RICE AND YOU GROW FAT

Popular Grain Not Only a Splendid Diet, but Is Among Cheaper Foods on the Market.

Rice is one of the few food products that have not advanced in price, asserts the Memphis Commercial-Appeal. You can get about four pounds of rice for a quarter. A quarter's worth of rice will carry you further than 50 cents' worth of beef. A quarter's worth of rice will carry you as far as 50 cents' worth of flour.

Rice is a wholesome food. Fashion caused a reduction of the greatest food value in rice requiring it to be polished. There ought to be a law forbidding the whitening of flour and polishing the rice. The law should be so that the whole grain should be ground into flour. People would have better teeth and better digestion.

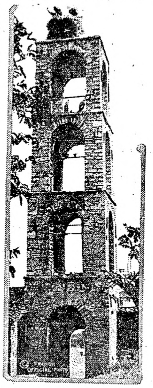
But this article is about cheap food and not about the business of keeping healthy.

Rice is the chief diet of about a third of the population of the world. The rice-eating Jap whipped the filling out of the tallow and flour eating Russian. A man can go farther on a rice diet than on any other single article of food that is grown.

So, if you do not want to spend all your money for feed, buy rice.

If you want to have a variety in your diet, and that cheaply, buy sweet potatoes. And if you want a dessert buy some molasses. Rice, sweet potatoes and molasses are the only food products we know of that are not high. Eat rice, it is healthful; and eat rice, it is cheap.

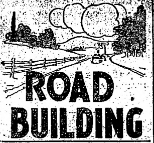
STORKS UNMOVED BY WAR



Storks in their nesting place in the old bell tower of Demirli, France, have not yet been driven away by the shells of the Germans.

Time-Saving Hoist.

Most of the labor and time usually consumed in lifting paper stock to the top of a flat press in a printing establishment are saved through the use of an elevating mechanism that is now being adopted. A steel framework, carrying a motor and hoisting outfit, is attached at the feeding end of a press. The paper is moved beneath it on a small truck. Cables are then attached to the latter and power applied. When the top of the stack reaches the desired height, the hoist stops. As the feeder removes the paper the remainder is raised automatically so that the stack is maintained at the proper elevation until exhausted.—Popular Mechanics Magazine



ROAD BUILDING

HIGHWAYS ON PACIFIC COAST

Interesting Figures Secured by California Experts on Pull Required to Move Wagon.

An energetic and influential organization on the Pacific coast, the California State Automobile association, has carried on some investigations affording definite figures of the value of good roads. It secured the help of Prof. J. B. Davidson of the University of California and Austin B. Fletcher, state highway engineer, in carrying on a large number of tests of the pull required to move a standard farm wagon loaded to make the gross weight 6,000 pounds. This wagon was hauled in some cases by a two-ton truck and in other cases by a team of good draft horses, weighing about 1,600 pounds each.

Tests have shown that a pull of 27 to 30 pounds per ton of gross load was needed to haul the wagon on unsurfaced concrete roads. When the concrete was surfaced with oil and screenings the pull was increased to about 50 pounds. About 65 pounds were needed for hauling on water-bound macadam and on bituminous concrete laid on top of cement concrete. On good gravel roads a pull of 65 to 82 pounds was needed, while on loose gravel the pull was 263 pounds, the highest record in any of the tests. About 80 pounds were required for hauling on bituminous macadam. On earth roads 92 pounds were required for hauling over a good surface covered with 1½ inches of loose dust, 99 pounds over an ordinary dirt road with dust 3 inches deep in places, and 218 pounds over a muddy earth road.

Road Through California Forest.

The significance of these figures lies in the fact that on a good earth road it is necessary to exert three times the pull that is required on a concrete road, and nearly twice the pull required on a macadam road. Furthermore, when the earth road becomes muddy, a condition which does not affect traffic on good pavements, the pull is more than doubled.

ROADS INDEX OF CHARACTER

Determine Importance of Country, Limiting or Aiding Its Advance —Should Be Built.

The roads are an index of the character of any country, determining its importance and limiting or aiding its advance. A country that isn't worth a good road isn't worth what its land sells for and soon won't be worth living in. No community that has ever improved its roads, has ever regretted it, for road improvement is a good investment for any community. Since the roads are for all the people, they should be built by all the people—with state and federal aid.

MOTOR TRAFFIC IS GREATER

Significant Feature of Road Development Is Construction of Better Surfaces.

A most significant feature of road development is the construction of better surfaces as a result of automobile traffic, for it is estimated that there are approximately 2,500,000 autos in use on the roads of the country, or one car for every mile of road. The motor traffic is greater than traffic of all kinds 12 years ago.

Urges Permanent Roads.

That road-building along permanent lines should be prosecuted as a part of our national war program was the determination of the chamber of commerce of the United States, at its meeting held at Atlantic City, N. J.

Roads Expand in Winter.

Concrete roads expand most in winter and contract most in summer, according to the United States bureau of standards, because of increases or decreases in the moisture they contain.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

TREATING VARIOUS DISEASES OF SWINE

INOCULATING A HOG WITH ANTI-HOG-CHOLERA SERUM.

As soon as sickness appears in the herd the unaffected hogs should at once be removed to clean, disinfected quarters, preferably without much range, for by running over pastures they come in contact with contagion. Their feed should be carefully regulated and, if they have previously been on pasture, should include some green feed, roots, or an abundance of skim milk.

The quarters in which the sickness first appeared should be thoroughly cleaned, all bedding and rubbish burned, and loose boards and old partitions torn out and burned. If the pen is old, knock it to pieces and burn it. Disinfect pens and sleeping places; using air-slaked lime on the floors and the carbolic-acid solution on the walls and ceilings. Whitewash everything. If a hog dies from any cause the carcass should never be exposed where it may be devoured by the other hogs or by passing birds or beasts, but should be burned at once or buried deeply and the pens thoroughly disinfected immediately. If possible, do not move the carcass from the place where it falls; but if necessary to do so the ground over which it is dragged should be disinfected. It is not known positively how long the virus of hog cholera may survive in the soil, but under favorable conditions it is not unlikely that it may live in the ground for several months. Care should be taken to maintain a strict quarantine between the sick and healthy hogs. The same attendant should not care for both lots unless he disinfects himself thoroughly after each visit to the infected hogs. Dogs should be confined until the disease is stamped out.

The treatment of hogs suffering from cholera is not satisfactory after the disease has become well established in a herd. The prevention of an outbreak by the use of anti-hog-cholera vaccination should be relied upon rather than the cure of sick animals.

The destruction of vermin is of importance in the production of swine.

Lice are common pests among swine, and vigorous and persistent treatment is required to eradicate them. The farmer should frequently examine his hogs about the ears, flanks, and insides of the legs to see if they are lousy. The lice may be readily seen traveling among the bristles, particularly in the parts just mentioned. The eggs, or "nits," are small white oval bodies attached to the bristles. Dipping does not as a rule destroy the vitality of the eggs. Swine should be dipped repeatedly in order to kill the lice that hatch out of the eggs after the previous dipping

Mange.

Mange, one of the most common of skin diseases, is caused by a mite which feeds on the skin. It is much more common and severe on young stock than on the older animals, although the mature animals as well as the young are likely to become affected if the disease is introduced into the herd. Mange is characterized by the formation of crusty scabs on the face and neck and along the back and in severe cases the mite may be found on any part of the body. The hair is stiff and erect, giving the pig a very unthrifty appearance.

All newly purchased stick should be examined for lice and other skin diseases, and if any are found the hog should be treated before he is turned with the rest of the herd.

Dipping to Destroy Vermin.

To free hogs from vermin they should be dipped two or more times at intervals of about two weeks, preferably 15 to 16 days for lice. Several dippings may be required before complete eradication is accomplished. Do not fail at the same time to clean and disinfect thoroughly the sleeping quarters. Cresol compound (U. S. P.) may be used for dipping and disinfecting. For dipping, mix in the proportion of one gallon to 100 gallons of water; for disinfecting, in the proportion of three gallons to 100 gallons of water. Coal-tar stock dips and nicotine stock dips may also be used to treat hogs for lice. For use they are diluted with water in accordance with directions supplied by the manufacturers. Cresol compound, coal-tar dips, and nicotine dips may be purchased at the drug store.

For mange crude petroleum is more effective than the ordinary stock dips. It is also destructive to lice. The vat may be filled with the oil or half filled with water before the oil is added. If one dipping does not effect a cure the treatment should be repeated in one or two weeks.

PREVENT GNAWING OF TREES

Wash Recommended Is Composed of Carbolic Acid, Sulphur, Soft Soap and Slaked Lime.

The following wash is recommended to prevent rabbits gnawing apple or other orchard trees. Take one-half gallon carbolic acid, four pounds of sulphur, two gallons soft soap, and 32 pounds of lime. Mix the soap with enough water to slack the lime, then while hot, mix in the sulphur and acid. When applied by about the first of April, it will also act as a preventive of borers.

Catalogues Are Interesting.

The nursery catalogues are interesting to people who like orchard work. The varieties and suggestions for planting and caring for trees will be found handy.

Dirt in Milk.

About nine-tenths of the dirt in milk has been found to be cow manure. Keep the cow and the dairy barn clean.

RUSSET APPLES MAKE CIDER

They Do Not Yield as Much Juice Per Bushel as Other Varieties—Good Qualities.

Experienced cider makers are agreed that the best cider is made from Russet apples. They do not yield as much juice per bushel as do many other varieties but they seem to contain just the right amount of acid and some aromatic flavors not to be found in other varieties. They are also free from the objections raised against sweet apples for cider stock. Where there is a demand for choice sterilized cider there is often a possibility of utilizing the Russets for this purpose at a better profit than can be secured by selling them as barrel stock.

High-Grade Milk.

A high-grade milk must be clean, free from disease germs and contain so few bacteria that it does not sour for 24 to 48 hours, even when kept at ordinary temperature.

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

ANNETTE'S DREAM.

"It was the night before Christmas," said Daddy, "and little Annette had put a note by the fireplace for Santa Claus and hung up her stocking, and then had gone off to bed.

"She did not believe she would be able to sleep at all, for the night before Christmas was such a very exciting night—quite the most exciting in the whole year. None of the other three hundred and sixty-four nights were anything compared to Christmas eve.

"She stayed very still in bed and she really did try quite hard to go to sleep. Of course she would have been very happy if she had stayed awake and seen Santa Claus when he arrived.

"But when her mother had told her that Santa Claus was on the look-out for little open eyes and that he did not like to be seen while he was doing his work. He wanted to hurry and he wanted too, to surprise the children when they awoke in the morning. If they saw everything that was happening their fun would not be nearly so great.

"So Annette really closed her eyes and yet she felt so very wide awake. Somehow she just couldn't help it. It seemed as though a very long time went by and at last Annette heard strange sounds on the roof.

"'Ah,' she said to herself delightedly, 'I am sure I hear Santa Claus and the reindeer. I am sure he must be coming down my chimney now.'

"More sounds on the roof and then the sounds were heard nearer and nearer. Now Annette's stocking was hung in the nursery by the fireplace and she wondered if she would not be able to see everything.

She Saw Him Turn His Back.

"Oh, this was wonderful and she wondered if she could keep her eyes close and still see! Yes, she thought her eyes must be closed. She wasn't quite sure, but no matter, she was going to have the most thrilling time. She was going to watch Santa Claus at work.

"At last there was a terrific noise in the chimney and soon she saw Santa Claus! There he was, just like his pictures, so wonderfully jolly and merry and gay! She wasn't in the least scrap disappointed. No, he was far more perfect even than his pictures. His beard was so white, his cheeks so red and his eyes so twinkling.

"And his smile! The most wonderful smile she had ever seen in all her life. She wondered if the worst crosspatch in the world could have kept from smiling if that smile had been seen. She felt herself all smiles. But she must keep very quiet!

"Santa Claus was talking to himself, but Annette didn't hear him. 'So the Dream King is playing a joke on me, eh?' he chuckled. And the Dream King said, 'Never mind, Annette, this is really Santa Claus!'

"Annette didn't know quite why she had heard some one telling her such a thing, when she knew it anyway. As if anyone could have mistaken Santa Claus!

"'But I mustn't let her see what I am putting in the stocking—that will never do,' said Santa Claus. And she saw him turn his back and bend over her stocking and at last hang it up again all filled with something very much like a doll poking out of the top.

"'She must have a surprise, Dream King,' said Santa Claus.

"'That is all right,' answered the Dream King. 'I simply wanted her to see you in her dream. And her dream is really true because you are here, and she is seeing a perfect picture of you. That's my magic camera that does that. I'm taking pictures of you every minute and they pass before Annette's eyes. You did not want me to take a picture of you as you filled the stocking, so I took your back and she saw a picture of your red coat and of you bending over the stocking.'

"'Ha, ha,' laughed Santa Claus. 'You're a pretty smart old fellow, Dream King. So now the little girl is seeing me through your dream pictures, and your pictures are just as clear and true as can be, eh Dream King?'

"'They are perfect,' said the Dream King.

"'Good,' said Santa Claus. 'But I can't stop to have any more pictures taken here tonight as I've too much to do.' But how delighted Annette was to have had such perfect dream pictures!"

Truest Philosophy.

The man who is thankful for the most in life has the truest philosophy.

Goodridge Hotel and Restaurant
Board by the day or week. Meals or lunches served at all hours. Good Rooms. Confectionery, Soft Drinks, Cigars, Pipes and Tobaccos

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter
We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

GERMANY GUILTY OF BARBARITIES IN WAR CONDUCT

Atrocious Treatment of the Helpless Part of Campaign Plans of Military Leaders.

POLICY OF FRIGHTFULNESS

Terrorism Declared a Necessary Principle in National Warfare—Brutalities May Be Said to Be Directly Attributable to the Emperor Himself.

A pamphlet just issued by the Committee on Public Information tells of the horrors deliberately and systematically inflicted upon the people of Belgium by the German soldiers, under the orders of their commanding officers. Quotations given are from documents already made public or in the possession of the government at Washington.

For many years leaders in every civilized nation have been trying to make warfare less brutal. The great landmarks in this movement are the Geneva and Hague conventions. The former made rules as to the care of the sick and wounded and established the Red Cross. At the first meeting at Geneva, in 1864, it was agreed, and until the present war it has been taken for granted, that the wounded, and the doctors and nurses who cared for them, would be safe from all attacks by the enemy. The Hague conventions, drawn up in 1899 and 1907, made additional rules to soften the usages of war and especially to protect noncombatants and conquered lands. Germany took a prominent part in these meetings, and with the other nations solemnly pledged her faith to keep all the rules except one article in the Hague regulations. This was article 44, which forbade the conqueror to force any of the conquered to give information. All the other rules and regulations she accepted in the most binding manner.

But Germany's military leaders had no intention of keeping these solemn promises. They had been trained along different lines. Their leading generals for many years had been urging a policy of frightfulness. In the middle of the nineteenth century Von Clausewitz was looked upon as the greatest military authority, and the methods which he advocated were used by the Prussian army in its successful by the Prussian army in its successful cause these wars had been successful, the wisdom of Von Clausewitz' methods seemed to the Prussian army to be fully proved.

Policy of Frightfulness.

Now, the essence of Von Clausewitz' teachings was that successful war involves the ruthless application of force. In the opening chapter of his master work, "Vom Kriege" ("On War"), he says:

"Violence arms itself with the inventions of art and science. . . . Self-imposed restrictions, almost imperceptible and hardly worth mentioning, termed usages of international law, accompany it without essentially impairing its power. . . . Now, philanthropic souls might easily imagine that there is a skillful method of disarming or subduing an enemy without causing too much bloodshed, and that this is the true tendency of the art of war. However plausible this may appear, still it is an error which must be destroyed; for in such dangerous things as war, the errors which proceed from a spirit of 'good-naturedness' are precisely the worst. As the use of physical force to the utmost extent by no means excludes the cooperation of the intelligence, it follows that he who uses force ruthlessly, without regard to bloodshed, must obtain a superiority, if his enemy does not so use it."

In 1877-78, in the course of a series of articles upon "Military Necessity and Humanity," General von Hartmann wrote, in the same spirit as Von Clausewitz:

"The enemy state must not be spared the want and wretchedness of war; these are particularly useful in shattering its energy and subduing its will." "Individual persons may be harshly dealt with when an example is made of them, intended to serve as a warning. . . . Whenever a national war breaks out, terrorism becomes a necessary military principle." "It is a gratuitous illusion to suppose that modern war does not demand far more brutality, far more violence, and an action far more general than was formerly the case." "When international war has burst upon us, terrorism becomes a principle made necessary by military considerations."

"War Established by God."

In 1881 Von Moltke, who had been commander in chief of the Prussian army in the Franco-Prussian war, declared:

"Perpetual peace is a dream and not even a beautiful dream. War is an element in the order of the world established by God. By it the most noble virtues of man are developed, courage and renunciation, fidelity to duty and the spirit of sacrifice—the soldier gives his life. Without war, the world would degenerate and lose itself in materialism." "The soldier who endures suffering, privation and fatigue, who courts dangers, cannot take only 'in proportion to the resources of the country.' He must take all that is necessary to his existence. One has no right to demand of him anything superhuman." "The great good in war is that it should be ended quickly. In view of this, every means, except those which are positively condemnable, must be permitted. I cannot, in any way, agree with the declaration of St. Petersburg when it pretends that 'the weakening of the military forces of the enemy' constitutes the only legitimate method of procedure in war. No! One must attack all the resources of the enemy government, his finances, his railroads, his stock of provisions and even his prestige. . . ."

Many other examples might be cited from the writings of German generals. The very best illustration of this attitude, however, is to be found in the emperor's various speeches, and especially in his speech to his soldiers on the eve of their departure for China in 1900. On July 27 the kaiser went to Bremerhaven to bid farewell to the German troops. As they were drawn up, ready to embark for China, he addressed to them a last official message from the fatherland. The local newspaper reported his speech in full. In it appeared this advice and admonition from the emperor, the commander in chief of the army, the head of all Germany:

Soldiers Told to Be Merciless.

"As soon as you come to blows with the enemy he will be beaten. No mercy will be shown! No prisoners will be taken! As the Huns, under King Attila, made a name for themselves, which is still mighty in traditions and legends today, may the name of German be so fixed in China by your deeds, that no Chinese shall ever again dare even to look at a German askance. . . . Open the way for Kultur once for all."

Even the imperial councilors seem to have been shocked at the emperor's speech, and efforts were promptly made to suppress the circulation of his exact words. The efforts were only partly successful. A few weeks later, when the letters from the German soldiers in China were being published, in local German papers, the leading socialist newspaper, Vorwaerts, excerpted from them reports of atrocities under the title "Letters of the Huns." Many of the leaders in the reichstag felt very keenly the brutality of the emperor's speech. The obnoxious word "Huns" had excited almost universal condemnation. When the reichstag met, in November, the speech was openly discussed. Herr Lieber of the center (Catholic party), after quoting the "no mercy" portion of the speech, added, "There are, alas, in Germany groups enough who have regarded the atrocities told in the letters which have been published as the dutiful response of soldiers so addressed and encouraged." The leader of the social democrats, Herr Bebel, spoke even more pointedly. Toward the end of a two-hour address on the atrocities committed by the German soldiers in China and on the speech of the emperor, he said:

"If Germany wishes to be the bearer of civilization to the world, we will follow without contradiction. But the ways and means in which this world policy has been carried on thus far, in which it has been defined by the emperor . . . are not, in our opinion, the way to preserve the world position of Germany, to gain for Germany the respect of the world."

The consequences of the emperor's speech Bebel aptly described:

"By it the signal was given, garbed in the highest authority of the German empire, which must have most weighty consequences, not only for the troops who went to China but also for those who stayed at home. An expedition of revenge so barbarous as this has never occurred in the last hundred years and not often in history; at least, nothing worse than this has happened in history, either done by the Huns, by the Vandals, by Genghis Khan, by Tamerlane, or even by Tilly when he sacked Magdeburg."

Atrocities in China.

These atrocities in China or "Letters of the Huns" continued to be published in the Vorwaerts for several years and appeared intermittently in the debates of the reichstag as late as 1906. At that time the socialist, Herr Kunert, reviewing the procedure in a trial of which he had been the victim in the previous summer, stated that he had offered to prove "that German soldiers in China had engaged in wanton and brutal ravaging; that plunder, pillage, extortion, robbery, as well as rape and sexual abuses of the worst kind, had occurred on a very large scale and that German soldiers had participated in them." He had not been given an opportunity to prove his allegations, but had been sentenced to prison for three months for assailing the honor of the "whole German army." The outrageousness of this sentence was made clear by the revelations, made in the reichstag shortly afterwards, of similar atrocities committed by German officials and soldiers in Africa in the campaign against the Hereros.

These ideas, which have come to control the minds of the military class, are best shown in the "German War Book" ("Kriegsbrauch im Landkriege), published in 1902. The tone of this authoritative book may be judged from the following extracts:

Teachings of German War Book.

"But since the tendency of thought in the last century was dominated essentially by humanitarian considerations which not infrequently degenerated into sentimentality and flabby emotion (Sentimentalitat und weichlicher Gefuhlschwarmerei), there have not been wanting attempts to influence the development of the usages of war in a way which was in fundamental contradiction with the nature of war and its object. Attempts of this kind will also not be wanting in the future, the more so as these agitations have found a kind of moral recognition in some provisions of the Geneva convention and the Brussels and Hague conferences."

"By steeping himself in military history an officer will be able to guard himself against excessive humanitarian notions; it will teach him that certain severities are indispensable to war, nay more, that the only true humanity very often lies in a ruthless application of them."

For the guidance of the officers in case the inhabitants of conquered territory should take up arms against the German army, the "German War Book" quotes with approval the letter Napoleon sent to his brother Joseph, when the inhabitants of Italy were attempting to revolt against him:

"The security of your dominion depends on how you behave in the conquered province. Burn down a dozen places which are not willing to submit themselves. Of course, not until you have first looted them; my soldiers must not be allowed to go away with their hands empty. Have three to six persons hanged in every village which has joined the revolt; pay no respect to the cossack" (that is, to members of the clergy).

Officers Trained to Be Savages.

Some of the rules laid down in the "German War Book" are illustrated, and their spirit made more definite in "L'Interprete Militaire zum Gebrauch im Feindesland" ("Military Interpreter for Use in the Enemy's Country"). This is a manual edited at Berlin in 1906. "It contains," says the introduction, "the French translation of the greater part of documents, letters, and proclamations, and some orders of which it may be necessary to make use in time of war." Thus, eight years before this war began, the German military authorities were not only preparing their officers to wage war in a manner wholly contrary to The Hague regulations, but also were looking forward to the use of these proclamations in French or Belgian territory. Among its forms, ready for use by inserting names, date, and places, are the following:

"A fine of 600,000 marks in consequence of an attempt made by —— to assassinate a German soldier, is imposed on the town of O. By order of ——.

"Efforts have been made, without result, to obtain the withdrawal of the fine.

"The term fixed for payment expires tomorrow, Saturday, December 17, at noon ——.

"Bank notes, cash, or silver plate will be accepted."

"I have to acknowledge receipt of your letter dated the 7th of this month, in which you bring to my notice the great difficulty which you expect to meet in levying the contributions. . . . I can but regret the explanations which you have thought proper to give me on this subject; the order in question which emanates from my government is so clear and precise, and the instructions which I have received in the matter are so categorical that if the sum due by the town of R—— is not paid the town will be burned down without pity!"

Ruthless Destruction Ordered.

"On account of the destruction of the bridge of F——, I order: The district shall pay a special contribution of 10,000,000 francs by way of amends. This is brought to the notice of the public, who are informed that the method of assessment of the said sum will be enforced with the utmost severity. The village of F—— will be destroyed immediately by fire, with the exception of certain buildings occupied for the use of the troops."

These forms have been of great use to the German commanders in Belgium and northern France. The closeness with which they have been followed in these conquered lands, during the present war, may be seen by reading these two proclamations:

"The City of Brussels, exclusive of its suburbs, has been punished by an additional fine of 5,000,000 francs on account of the attack made upon a German soldier by Ryckere, one of its police officials.

"The Governor of Brusesls,
"BARON VON LUETTWITZ."
November 1, 1914.

Placard posted on the walls of Luneville by order of the German authorities:

"Notice to the People:

"Some of the inhabitants of Luneville made an attack from ambuscade on the German columns and wagons (trains). The same day (some of the) inhabitants shot at sanitary formations marked with the Red Cross. In addition German wounded and the military ambulance were fired upon.

"Because of these acts of hostility a fine of 650,000 francs is imposed upon the commune of Luneville. The mayor is ordered to pay this sum in gold or silver up to 50,000 francs, September 6, 1914, at nine o'clock in the morning, to the representative of the German military authority. All protests will be considered null and void. No delay will be granted.

"If the commune does not punctually obey the order to pay the sum of 650,000 francs, all property that can be levied upon will be seized.

"In case of non-payment, visits from house to house will be made and all the inhabitants will be searched. If anyone knowingly has concealed money or attempted to hold back his goods from the seizure by the military authorities, or if anyone attempts to leave the city, he will be shot.

"The mayor and the hostages taken by the military authorities will be held responsible for the exact execution of the above orders.

"The mayor is ordered to publish immediately this notice to the commune.

"VON FASBENDER."

News of the State

Condensed for Busy Folks

P. M. Kerst, chief national bank examiner of the Ninth Federal Reserve district, has notified the Comptroller of the Currency of his resignation, to take effect the first of the year.

Mrs. Fred Nelson and her 3-year-old son Buster were burned to death when their farm home, north of Albert Lea, was destroyed by fire. Pouring kerosene on the stove is said to have caused an explosion.

Secretary of Labor William B. Wilson and mediation board members who are to investigate the present labor situation in the Twin Cities, have arrived in St. Paul and are engaged on the work of their mission.

Faith of the rivermen in continuance of the revival of river trade and confidence in a greater excursion season than ever before was indicated in reports which have reached Winona of the construction at the Corondolet boat yards near St. Louis of a new excursion boat for use at Winona.

Fifty-four persons, mostly men, sustained injuries when a Duluth & Iron Range railroad train left the track at Hinsdale, near Tower. The injured were taken by relief trains sent from Tower, Ely and Duluth to hospitals in Tower and Soudan. Three coaches slid down a 25 foot embankment and then turned on their sides.

After being 43 years in St. Peter state hospital for the insane Mrs. "Baby" Anna Klein returns to her children, who believed all this time she was dead, at 645 East Central Park place St. Paul. A remark of an old employe of the city hall to the judge of probate when the will of John Klein was probated started the investigation which led to the discovery. Mrs. Klein is now 73 years old and will have the best that money can buy for her the remainder of her natural life.

Fire of unknown origin destroyed one of the barns at the Hastings state asylum. A number of hogs kept in the barn were removed without loss.

Only American citizens or men having their first papers will be accepted to positions on the faculty of the University of Minnesota henceforth, according to a ruling made by the board of regents.

The body of an unidentified man was found on a hay meadow on the Grasswell farm, just outside of Willmar. It was found in the snow by Edward Anderson, who rents the farm. The coroner decided the man had frozen to death.

The funeral of Anson R. Spear, president of the Minnesota Association for the Deaf, who died suddenly in St. Paul, was held at Minneapolis. Mr. Spear, was deaf himself and devoted himself to bettering conditions for others similarly afflicted.

Two hundred members of the Crookston Commercial club were present at the War Dinner' at the club rooms. The dinner was prepared by the freshmen girls of the local high school and only food recommended by the food administration was served.

A verdict in favor of the city of St. Cloud was rendered by the jury in the case of Jennie A. Pipps against the city of St. Cloud in district court. The city had offered the plaintiff $300 for land in condemnation proceedings, but this was claimed to be too low.

The Norwegian society is planning to erect a monument to the Civil war hero, Col. Hans Heg of the Fifteenth Wisconsin volunteers, who died in the battle of Chickamauga. The board of directors will meet at Minneapolis Jan. 26 to plan details of the monument project.

Railroads are prohibited by a State Safety commission order from carrying liquor into Polk county, which is dry under local option. The order was designed to correct conditions complained of at East Grand Forks and was reccommended by the mayor of that city.

Warren J. Miller, Crookston high school instructor in English, has resigned to enlist in his country's service. He passed his examination in Minneapolis for a positon as a musician in the naval reserves. Mrs. R. C. Trumbo will have charge of Mr. Miller's classes.

"White ways" will continue to blaze in Minnesota until after Christmas, through an order issued by J. F. McGee. Federal fuel administrator, who directed that beginning Dec 26 not more than one light on a street fixture be used where the current is produced by coal.

Porkless days and wheatless meals, in addition to the regularly observed meatless and wheatless days, are recommended by the federal food administration and announced by A. D. Wilson, its chief representative for Minnesota. One porkless day each week and one wheatless meal each day, the former on some day other than Tuesday and the latter every day as well as Wednesday are suggested. The request is being made of housewives and other food dispensers.

John Rhames, pioneer Detroit business man, is dead after a sudden stroke of heart failure. He is survived by his widow and several brothers. He operated a line of livery busses for many years until automobiles became popular and had since run a string of taxicabs.

Farmers are hauling heavy loads of wood, ties and other timber to Baudette daily and the wood shortage due to the lack of snow has been postponed for a time, although there is not enough snow on the ground to insure a great deal of it being hauled in by sleds.

SHORTAGE OF SEED CORN IS SERIOUS

STATE FOOD COMMITTEE CALLS FOR SURVEY TO ASCERTAIN ALL AVAILABLE SUPPLIES.

BIG RECRUITING DRIVE ENDS

Nearly 4,000 Young Men of Minnesota Offer Services To Country For War in First Two Weeks of Month.

St. Paul.

So serious is the seed corn shortage believed to be that the crops division of the state food committee has called for an immediate survey of available supplies. C. P. Hill, scretary, has written to high school superintendents asking that high school agricultural instructors be released for ten days or two weeks to help make the survey. County agents will work with them, and as many farms as possible will be vited.

Mr. Bull states that the seed corn shortage is being intensified by action of other north central states in buying from Minnesota's stock to make up their own shortages.

Much seed corn that has been saved is said to be wet and mouldy, of questionable germinating value, because of unfavorable weather in the curing season. Survey forces are advised to help farmers in making provisions to dry corn by artificial heat, where it has not already spoiled.

✣ ✣ ✣

Big Recruiting Drive Ends.

Final details of the biggest recruiting drive ever conducted in Minnesota, have been wound up at recruiting stations of the army and navy in the cities of the state where recruiting was done. Totals for both branches of the service showed that nearly 4,000 volunteeers were accepted in Minnesota in the first two weeks of December. A few less than 3,000 joined the army. Navy enlistments fell a few short of 1,000. Included in the army figures was the total for the largest naval recruiting week on record, 451 men in seven days from Dec. 6 to 13.

Figures received from Washington showed that the army alone had drawn 7,593 recruits from Minnesota since April 1. At that time the state was assigned a voluntary quota of 4,150, which has nearly been doubled.

High figures set by the navy recruiting force last spring, were surpassed on several days recently, Lieutenant George Treadwell, chief recruiting officer, annouunced. Major John D. Yost, head of army recruiting for the state, said the drive had been the greatest in his experience. Major Yost gave credit to the press of the northwest for making the big drive possible by keeping the public informed as to the possibilities.

✣ ✣ ✣

Producers Want Member.

Urging that he allow a producing farmer to sit and advise with the fair food price committee of the state food price committee of the state food administration, the Hennepin County Farm Bureau association sent a resolution to A. D. Wilson,state food administrator after a meeting, and named J. B. Irwin, farmer and president of the Twin City Milk Producers' association, as the man for the place.

Farmers contend that there should be on the committee representatives of the various lines of food merchandising and commission a man to represent interests of those producing foods on the farm and requested Mr. Wilson to allow some such representative to at least confer with the fair food price committee.

✣ ✣ ✣

Bentall Gets Third Stay.

A third stay of sentence has been awarded J. O. Bentall, Socialist candidate for governor last year. who was convicted and sentenced to spend one year in prison for inducing his hired man not register for selective draft.

The stay was continued so that T. E. Latimer, his attorney, can argue for a new trial. When first rentenced by Judge Booth, Bentall was given a stay of 30 days. The stay was later continued until December 15 to give his attorneys time to perfect an appeal. It was asked again that the stay be continued until the return of Mr. Latimer, who is in Washington filing briefs against the draft law now being tested before the United States supreme court.

✣ ✣ ✣

War On Minnesota Rodents.

The State Public Safety commission has declared war on rats, and has ordered that they be trapped, shot, poisoned and otherwise destroyed in furthering the government's food conservation plans. It is estimated that rats destroy each year $200,000 worth of food products. The commission suggests that the work of extermintion be organized by communities in order that it be effective.

✣ ✣ ✣

To Work Out Budget.

The Minnesota State Hygene commission has named committees to work out a budget plan for the commission and seek an executive secretary. The commission was organized to control infectious diseases, especially those that menace the efficiency of the army. Dr. Henry Wireman Cook, Dr. R. O. Beard and Mrs. Gustav Schwyzer compose the committee. Charles L. Sommers, chairman of the commission, will head a committee o nine members to prepare the tempoary budget as soon as posible.

UNCLE SAM ASKS MEN TO ENROLL FOR WAR WORK

PUBLIC SERVICE RESERVE BEING INAUGURATED BY THE DEPARTMENT OF LABOR.

Labor Is Urgently Needed in the Shipyards and Factories—Men Not Now Engaged in Producing War Material to Be Called.

Washington.—In an effort to get men for work in the shipyards and in the industries producing war material, the department of labor is inaugurating a public service reserve and a campaign has been started to enroll men for the service. William Edwin Hall is the director of the public service reserve and state directors and local organizations are being perfected in every state.

"The primary object of this campaign," said Mr. Hall, "is to obtain a large list of skilled and semi-skilled men who are not now producing war material or doing work useful to the prosecution of the war, and to get them into the shipyards and the factories which must be maintained at the highest speed if industry is to meet the insatiable demands of a large army at the front.

"It appears from published reports, such as the arrival of the Rainbow Division in France, that the number of American troops at or near the firing line is constantly increasing, and we civilians whom these troops have gone over there to protect, would be shamefully derelict in our national duty and quite wanting in patriotism if we did not make every personal sacrifice to keep our soldiers 100 per cent supplied.

Labor Needed in War Work.

"A number of the non-essential industries are employing labor which is urgently needed for war work—in the shipyards, for example. One is surprised to see how many kinds of workers are needed to build a ship. The shipping board has prepared for the public service reserve a list of 88 different "peace" occupations from which men must—absolutely must—be drawn in order that our tremendous shipbuilding can be carried out in time. You often hear it said that 'ships will win the war,' but today it is being put in a little different way by those who know the situation: A failure on the part of American civilians to build the necessary number of ships will make it impossible for the United States to continue to fight. A lack of ships may lose the war.'

"The United States public service reserve," explained Mr. Hall, "is working at high speed today to obtain all these men needed for shipbuilding, for making equipment, for gun manufacturing, for mechanical draughting, for hundreds of other vital operations, from the 'non-essential industries'—that is, from industries which are important to a country at peace but, in the final analysis, virtually unnecessary to a country at war.

"Our effort is always to obtain the workers for war industry without crippling the peace industry. We will not draw away an over-production of employees from any one locality, from any one industry, from any one employer. War means suffering. A considerable disturbance of industry is inevitable. The public service reserve proposes to bring about the necessary shifting of labor with just as little disturbance as possible. We want no industry and no employer to have to bear any more than a fair, legitimate share of the burden which the peremptory demands of war throw upon all of us."

Differs From Army Enlistment.

"Men who enroll in the United States public service reserve state their trade and suggest other classes of work they could do, if necessary, for the war. The enrolled men will remain at their present jobs and when they are notified that an opportunity to put them into war work has arisen, they are under no obligation to accept the new jobs unless satisfied with wages and conditions. Thus their enrollment in the reserve differs from enlistment in the army, where the soldier has no choice but to obey.

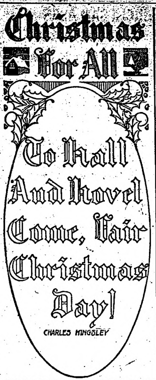
"Every day more and more American workers are beginning to feel in their hearts that in this critical period of the nation's history they should be devoting their energies to the actual war needs of their country. By enrolling in the United States public reserve they enjoy a happier conscience, for they know that they have thereby declared their patriotism and that the moment a war indusry needs men of their type they will be given a chance to serve the country without leaving civilian life."

Paid $8 for Auto Glasses for Bulldog.

To prevent the flow of tears in her bulldog's eyes when he went motoring, a Chicago woman recently had him fitted for automobile goggles. The oculist who fitted the goggles to the bulldog charged $8.

Woman Becomes Navy Radio Operator.

Miss Abby P. Morrison of New York city is the first woman in the United States to become a naval wireless operator. She had passed the tests making her a first-class electrician of the radio bureau of navigation.



How Washington Celebrated Christmas

IT IS interesting to look back upon a Christmas day at Mount Vernon, with the Father of His Country as host and his charming wife as hostess. Christmas at Mount Vernon in the peaceful days which followed the Revolution was always exceedingly merry. The Virginians of those days, being cavaliers, made the most of the holiday, which the grim Puritans of New England practically ignored, says the Philadelphia Press.

Though generally serious, Washington could unbend considerably on such an occasion. Mount Vernon was always crowded at this period, and the celebration was of a luxurious character. The Christmas dinner was served at three o'clock in the "banquet hall," and probably no fewer than 30 persons sat down to the repast.

For this special occasion the hostess always got out her handsome service of pure silver, most of which had belonged to her when, as the widow Custis, she had married Mr. Washington, and there was also a big display of cut glass.

An oddity, as nowadays it would be considered, was the arrangement of the table, upon which all the dishes to be served, including even the puddings and pies, were placed at once. No wonder that in such days the festive board was said to "groan" beneath the weight of viands.

As a matter of course, at the Christmas dinner, as well as all other occasions, the table was waited upon by slaves, who did duty as house servants. Two were allotted to each guest, so that quite a number were required. All of the eatables had to be conveyed a considerable distance, the kitchen being detached from the mansion, with which it was connected by a covered way.

At the houses of the great Virginia families at that period it was customary for the slaves to wait on the table in the ordinary plantation garb. But at Mount Vernon many things were on a scale of exceptional luxury, and the negroes who performed such service were clad in Washington's own livery of red, white and gold, which was handsome and striking.

The necessity of supper was removed by a great prolongation of the dinner, at which each person was expected to eat all that he or she possibly could. In fact, it was the duty of the hostess gently to persuade her guests to gorge themselves to repletion, while the host made it his business to press wine and other drinkables upon the men to an extent which in these times would be considered most imprudent.

At a certain period of the meal it was Washington's custom to rise from his chair, holding a glass of Madeira in his hand and bowing right and left, to say, "Gentlemen, I drink to my guests." The natural response at the instance of the most distinguished guest present was a health drink to Lady Washington.

Following the dinner a good, long evening was indulged in with pastimes appropriate to Christmas. Blind man's buff and hunt the slipper were not sufficiently undignified in the eyes of Washington to be indulged in. The Washington family Christmas gifts were exhibited, and Nellie Custis was always called upon to play on her harpsichord.

A colored fiddler, one of the slaves on the plantation, in picturesque plantation garb would be called in at a certain period, and when he would start some merry music the young people chose partners for the dance. But the older ladies and gentlemen preferred cards. Small stakes were usually played for, but gambling for money to a considerable amount was always most objectionable to Washington. As for Mrs. Washington, she would invariably enter into none of the general festivities, but would be the host to such part of her guests who would not care to indulge in either dancing or cards.

It was at a late hour on the morning following Christmas that the guests would take their departure and the Washington household would quiet down to its ordinary routine.

The Christ Cradle

A Christmas Ballad

By MARGARET J. PRESTON.

["Christ cradle" is the old Saxon name for mince pie.]

'TWAS the time of the old crusaders,
And back with his broken band
The lord of Lancarvan castle
Had come from the Holy Land.

It was Christmas eve in the castle;
The Yule log burnt in the hall,
And helmet and shield and banner
Threw shadows upon the wall.

And the baron was telling stories
To the little ones at his knees
Of some of the holy places
He had visited overseas.

Then he spake of the watching shepherds,
Who saw such marvelous sights
And the song that the angels chanted
That first of the Christmas nights.

He told of the star whose shining
Outsparkled the brightest gem;
He told of the hallowed cradle
They showed him at Bethlehem.

And the eyes of the children glistened
To think that a rack sufficed,
With only the straw for blankets,
To cradle the baby Christ.

"Nay, dry up your tears, my darlings,"
Right gayly the baron cried,
"For nothing but smiles must greet me!
I'm home, and it's Christmastide!

"Come wife; I have thought of a cradle,
Another than this, I say,
Which thou in thy skill shall make me
To honor this Christmas day.

"We would not forget the manger,
So choose of thy platters fair
The one that is largest, deepest,
And cover it in thy care.

"With flakes of the richest pastry,
Wrought cunningly by thy hands,
That thus it may bring before us
The wrap of the swaddling bands.

"And out of thy well stored larder
Set forth of thy very best.
Is aught that we have too precious
To honor this Christmas guest?

"Strew meats of the finest shredding
The straw was chopped in the stall;
Bring butter and wine and honey
To lavish around them all.

"Set raisins and figs of Smyrna
That draw to the east our thought;
Let spices that call of the Magi,
With their gifts, to mind be brought.

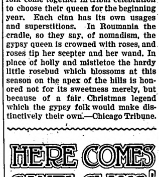
"Let sweets that suggest frankincense,
Let fruits from the southern sea
Be given ungrudged. Remember,
His choicest he gave for thee!

"Then over the piled up platter
A cover of pastry draw,
With a star in its midst to mind us
Of that which the wise men saw.

"Christ's cradle is what we'll call it,
And ever, sweet wife, I pray,
With such thou wilt make us merry
At dinner each Christmas day!"

Gypsies' Christmas.

The gypsy Christmas is a love feast and a carnival in one. The wandering folk come together in tribal celebration to choose their queen for the beginning year. Each clan has its own usages and superstitions. In Roumania the cradle, so they say, of nomadism, the gypsy queen is crowned with roses, and roses tip her scepter and her wand. In place of holly and mistletoe the hardy little rosebud which blossoms at this season on the apex of the hills is honored not for its sweetness merely, but because of a fair Christmas legend which the gypsy folk would make distinctively their own.—Chicago Tribune.



HERE COMES SANTA CLAUS!

OUTPUT OF GASOLINE GREATLY INCREASED

FREDERICK KORMANN, DISCOVERER OF NEW PROCESS.

Photograph shows Mr. Frederick Kormann, whose discovery of a remarkable process for distilling motor spirits has increased the output of gasoline twelve fold. The shortage will be overcome and, through the patriotic tender of the discoverer, the United States government has been given the free use of the process during the period of the war. The process makes use of that which is now waste in the manufacture of gasoline, and increases the output of 6 per cent gas from every barrel of crude oil to 52 per cent gas. Kormann is a professional chemist and has been working for several years on oil and gasoline chemistry.

CARE OF BATTERIES

Most Owners Are Now Familiar With Use of Hydrometer.

MUST BE HANDLED PROPERLY

Most Common Mistake Is in Taking Readings Immediately After Distilled Water Has Been Added—Rectify Errors.

Due to the efforts of storage battery manufacturers toward educating the motoring public in the necessary care of their batteries, most battery owners are now familiar with the use of the hydrometer for testing the battery solution.

Motorists sometimes deceive themselves, however, by using the hydrometer under improper conditions.

Hydrometers are recommended to battery users for testing the battery's condition, because they are the simplest and most understandable devices available for the average motorists' use. At best they can serve only to indicate approximately the state of charge or discharge of the battery, and unless used properly, they tell nothing of value.

Make Errors.

The most common error among motorists testing their own batteries is taking hydrometer readings immediately after distilled water has been added. The solution has been brought to the proper level and presumably is in ideal proportions for a test.

As a matter of fact a hydrometer reading under these conditions is very misleading. The water added has not had a chance to mix with the rest of the solution, and the fluid drawn into the hydrometer is a very weak mixture which shows a low gravity test. From such a test an inexperienced motorist is apt to conclude that his battery is decidedly run down and needs recharging, whereas, the battery may be in a fully charged condition, when a strong recharge would do more harm than good.

Up to Proper Level.

To get the most out of hydrometer tests, motorists should bring the battery solution up to the proper level, by the addition of distilled water, and then defer taking a reading of the solution until the automobile has been run a few hours and the water, through the generator charging process, has had an opportunity to thoroughly mix with the rest of the solution.

If the hydrometer is regularly used in this way and the motorist will occasionally avail himself of such testing service as may be had at a battery service station, minor irregularities in the battery can be rectified before they become serious.

TO ADJUST VALVE TAPPETS

Those Parts of Engine Which Become Hot in Operation Must Be Given Attention.

Do not forget that those parts of the engine which become hot in normal operation must be adjusted when they are hot. The valve tappets, for example, should not be adjusted when cold, because the clearances will not be correct after the metal has expanded.

PORTABLE LIFT FOR AUTOS

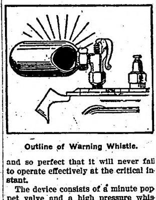
Garage Pit Is Not Necessary to Make Repairs Under Car If Recent Invention Is Used.

No garage pit is needed to make repairs beneath an auto conveniently, if an automobile lift of recent invention is available. This lift, which is described in Popular Mechanics, is a demountable device which raises and lowers the vehicle by its own weight, and will hold it safely at a convenient height for a workman to make repairs while seated beneath the chasis. It consists of two independent units, each consisting of a tilting runway mounted on a horse, which in turn is supported by a wooden base. Across the horse the trackway is centrally hinged. It has flanges to guide the wheels and is of sufficient length to reach the floor and form an incline of suitable pitch. Two cylinders with pistons cushioned on heavy oil support each runway, these cylinders being connected with a pipe which allows the oil to flow from one end to another as the car is raised or lowered. In operation the car is either driven up the inclined runways under its own power, or hauled up by pulleys. When its weight passes center, the runways automatically level themselves.

"SAFETY FIRST" IN WHISTLE

Warning Blast With Carrying Power Above Other Noises of Street Is Most Effective.

"Safety first" demands that a warning whistle shall have a carrying power above that of other noises of the street and that it shall be so simple and so perfect that it will never fail to operate effectively at the critical instant.



Outline of Warning Whistle.

The device consists of a minute poppet valve and a high pressure whistle two inches in diameter made of aluminum. It is mounted in the valve cap of one cylinder, where a portion of the exploded gas, at 250 to 300 pounds pressure, blows it.

WAR AND THE PLEASURE CAR

No One Would Think Gasoline One of Necessaries of War by Its Lavish Use for Autos.

Gasoline is one of the necessaries of war. Yet no one would think it was, witnessing from day to day its lavish use in our streets and highways as an instrument of personal luxury, says the New York Tribune. There has been no appreciable diminution since war was declared of pleasure or other needless riding in automobiles. That is one of the first signs of the nonexistence here of war conditions and a war consciousness which strikes the eye of every visitor from Europe.

GREEN'S AUGUST FLOWER

Has been used for all ailments that are caused by a disordered stomach and inactive liver, such as sick headache, constipation, sour stomach, nervous indigestion, fermentation of food, palpitation of the heart caused by gases in the stomach. August Flower is a gentle laxative, regulates digestion both in stomach and intestines, cleans and sweetens the stomach and alimentary canal, stimulates the liver to secrete the bile and impurities from the blood. Sold in all civilized countries. 30 and 90 cent bottles.—Adv.

"Why is it that pantomimes don't pay?"

"How can they when money talks?"

KIDNEY SUFFERERS HAVE FEELING OF SECURITY

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root; kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

Swamp-Root is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

According to verified testimony it is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best.

If you are already convinced that Swamp-Root is what you need, you will find it on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

About 100 women are employed in the British national physical laboratory.

THE TRUTH ABOUT ECZEMA AND PILES

Thousands and thousands of people, says Peterson, are learning every week that one 30 cent box of Peterson's Ointment will abolish Eczema and banish piles, and the grateful letters I receive every day are worth more to me than money.

I had Eczema for many years on my head and could not get anything to do it any good. I saw your ad and got one box and I owe you many thanks for the good it has done me. There isn't a blotch on my head now, and I couldn't help but thank Peterson, for the cure is great. Mrs. Mary Hill, 420 Third Ave., Pittsburgh, Pa.

I have had itching piles for 15 years and Peterson's is the only ointment that relieves me, besides the piles seem to have gone. A. B. Ruger, 1127 Washington Avenue, Racine, Wis.

Use Peterson's Ointment for old sores, salt rheum and all skin diseases. It banishes pimples and blackheads in less than 10 days and leaves the skin clean, clear and pleasant to look upon. Druggists guarantee it. Adv.

WAR TALKS

By UNCLE DAN

Number Five

Jimmie and a German Boy Clash—Must Do Three Things to Save Country.

It was a warm evening, so Uncle Dan went out to a lawn seat under the spreading branches of the great tree that suggested the farm's name of Oak Hill. Billie and Jimmie had been laying for him, so Uncle Dan was captured by the boys on short order.

"Say, Uncle Dan," Billie began. "We had a red-hot argument at school yesterday with Carl Newman. Carl said that German schools were miles ahead of our schools and that no one could come up to the educated German. Well, Jimmie got hot under the collar and handed it back to him good and plenty. Jimmie said if their education taught them to torpedo Lusitanias, sink hospital ships, murder hundreds of women and children, make slaves of the Belgians, poison wells, destroy fruit trees and commit all sorts of crimes, then we did not want that kind of education here. What do you think about it, Uncle Dan? I told Jimmie you spent a lot of time in Europe and knew all about schools, so give us your opinion."

"Well," replied Uncle Dan, deliberately, "the German schools are very thorough; they furnish exceedingly valuable and practical instruction. The industrial training given there is probably the best to be found. The schools as a whole, however, in my opinion, appeal to the head only, and never to the heart. The aim and trend is to make the individual blindly submissive to the Prussian plan of world dominion; they teach that it is the destiny of Germany to rule the world, and that to the glory and advance of Germany, in this plan, all things must give way; that the kaiser as head of the state, can do no wrong if he carries forward the plan of world control. Some of the greatest teachers and preachers even defend and justify her heartless crushing of Belgians and the many other atrocious crimes she has committed in this war. Thank God, our American education reaches both the head and the heart. It is an education with a soul, and we must maintain the high ideals we have fixed. In a word, in Germany, the people are taught that they exist for the government, while here the government exists to serve the people."

"Just wait a minute," interrupted Billie. Say that over again slowly, so I can write it down."

Uncle Dan, smilingly, complied.

Billie exclaimed: "Now, we will hand that nut out for Carl to crack. Carl, you know," continued Billie, "has a very smart father who keeps him posted on the German arguments. Carl said our government was only an experiment anyway; that it would not last twenty years, and that it might burst up any old time. Jimmie asked him if Germany was so mighty good, why they did not go back there to live."

"Our government will go on forever, won't it, Uncle Dan?"

"Now," said Uncle Dan, "you are raising a big question, and one that has troubled me for years. Our government is still in the experimental stage; in fact, it is the greatest experiment ever undertaken, and if popular government is to be successful, a few things must be done, otherwise, to paraphrase the great Lincoln, the government of the people, by the people and for the people, will perish. It is my firm conviction," said Uncle Dan, in a very impressive manner, "that if our country is to go on, as we hope and pray, we must very quickly do at least three things, and I will name them in the order of importance as it appears to me:

"First, adopt compulsory universal military training of all young men physically fit before they reach the age of twenty years.

"Next, require that every foreigner who comes here to live must, within a reasonable time, say a year, declare his intention of becoming an American citizen and take the necessary steps to do so, thereby, from that moment, assuming all the obligations of citizenship of our country, and that means he must defend our flag upon equal terms with our native born, and if he is not willing to do this, he should be sent back from whence he came."

"That's the stuff," exclaimed Billie.

"And, finally, enact such legislation as will make voting compulsory. Popular government is based upon the participation of all and the rule of the majority, and democracy cannot continue and be successful unless we live up to the spirit of the institution.

"The first step, however, is the passing of the Chamberlain bill for universal military training. If you will get the leading citizen, and especially the editor of your paper, to write personal letters to your congressman and both senators, urging their support, it will help enormously.

"I see by the morning papers," said Uncle Dan, "that the Rotary clubs of the entire country, the livest, most efficient organization to be found, have unanimously decided to get back of the Chamberlain bill and give it loyal and enthusiastic support. They will work with the Universal Military Training league to accomplish this important piece of legislation, which will do more than anything else to make us a real nation with a common viewpoint, bring us back to sane living and teach us the patriotism of service."

Utilizing Rice Hulls.

Experiments have been made with rice hulls in combination with different binding agents, but while the resulting briquets gave every satisfaction from the standpoint of heating, yet the initial cost of the various binding agents made their cost too high for practical purposes. The experiments, however, are being continued, and it is hoped that in the future a briquet can be manufactured that will be satisfactory from an economic standpoint.

A Leaking Faucet.

When the faucets in the bathroom or kitchen leak or do not allow the water to flow freely they need a new washer, and the washers cost five cents each. To put on the washer, turn off the water, the rod is usually under the sink or in the basement, and unscrew the faucet; take off the worn-out washer and slip on a new one and turn your water on again and presto! the work is done and no repair bill to pay.

Make Windows by Hand.

In making stained-glass windows every bit of the work is done by hand, and it is amazing to realize how many times each piece of glass must be handled. An operator tells of counting up one day and finding that no less than twelve times were necessary. All the leadwork is done by hand too, even the opening of the little slots into which the glass is fastened.

Record Floods in China.

The Celestial kingdom has been the scene of some of the most terrible floods on record, observes London Tit-Bits. In 1851 the Yellow river overflowed and destroyed nearly 2,000 villages and towns and 5,000,000 people. Two years later there were great inundations in Mongolia, caused by typhoons, resulting in a death roll of 6,000.

Do Your Work Properly.

Make up your mind that you will do what you have to do the very best you know how. There is very little work that is really difficult. But all good work is painstaking. If you put your whole soul into your work, you will learn to enjoy it, and you will become constantly better and more worth while.

Cupid Makes Early Call.

An American professor who has spent his life investigating and has collected the evidence of 1,703 young people, declares that both sexes start being wounded by Cupid's darts at the age of three and that a woman's love reaches maturity at twenty-two and a man's at twenty-four.

Velvet-Making.

Velvet was developed and originated from fur in China. Thence velvet-making was introduced into India, and in the fourteenth century into Italy, where that sort of fabric especially appealed, and where the art of velvet-making reached its height.

The Potato.

The potato was first introduced into Spain by Hieronymus Cardan, a monk, in 1553; into England by Sir John Hawkins and Sir Francis Drake in 1563, and into Ireland by Sir Walter Raleigh in 1580.

Boys Drowned, Cat Escaped.

The tables were turned in a tragic manner at Port Elizabeth, South Africa, recently when two young boys who attempted to drown a cat—at the request of the animal's owner—were themselves drowned in a small bay about three miles from the city. The cat struggled when the lads tried to hold its head under the waves and before the boys realized their danger they were swept out to sea by the outgoing tide. The cat escaped from the water and returned to its old home.

AMERICAN MANNERS OF TODAY

Prevailing Bearing in Thoroughfares and Street Cars Indicates That Courtesy Is on the Decline.

As for manners, we are kindhearted as a people and civil when appealed to, but no one would suspect it if our bearing in thoroughfares and street cars be a criterion. The spirit of the age is first come, first served; to be waived only in favor of the crippled and the positively infirm. Courtesy in the old-fashioned sense—the deference of the young for the seniors, of the stronger for the weaker sex, of the vigorous for the frail—if not extinct is so sporadic as to be noticeable when manifested, Robert Grant writes in the Yale Review. The young men who push their way forward in public conveyances retain without compunction the seats for which they have struggled.

Here again we have the philosophy of the tired business man: "I got there first; we are all equals in the United States, and I want to read my newspaper." The apotheosis of naturalness, and in self-defense we all more or less subscribe to it; but after all, it is natural for pigs to struggle for places at a trough. Well may we ask ourselves if it is impossible to safeguard independence, initiative and equality except at the cost of all the social graces that prevailed when society was more artificial.

Guy McEnelly returned Friday evening from Crookston, to spend the vacation from his school duties at his home here.

Mr. and Mrs. Tronnes and family left Saturday for Mavie to visit with relatives.

Beet and Wheat Food Value.

That there is more food value in one acre of beets than in four of wheat is the contention of German agricultural scientists.

A Question.

Why don't we get dimples instead of wrinkles?—Louisville Courier-Journal.

MAY USE KENTUCKY STONE

Product of Blue Grass State Believed as Good and Cheap as Bavarian Article.

It is believed that after the war is over lithographic stone quarried in Kentucky may be put on the market as cheaply as the Bavarian stone which has been the principal source of supply for a long time. Small quantities of the Kentucky stone have been sold already, but the high cost of labor in this country and the difficulty of working the stone have kept it out of serious competition with the foreign product.

The European stone occurs in thin layers, which require little but planing and polishing after being removed from the quarry. The American stone is in beds from three to ten feet thick and must be sawed into thin layers before it is ready for use.

The Bavarian quarries have been worked so long that vast piles of waste have accumulated that must be moved from time to time, thus adding to the cost of production. The American quarries have found a market for the crushed refuse from their quarries and this by-product helps reduce the cost.

The better grades of lithographic stone bring five to six cents a pound for slabs ten by twelve inches, and the poorer grades a cent and a half a pound.

A Spectacled Dog.

A short time ago, an article was widely published about a valuable hunting dog which had been fitted with eyeglasses for astigmatism. Probably most people who read it, laughed and thought it a fake.

The modern science of fitting eyeglasses, however, makes it possible to fit a dog, or any other dumb animal, with a lens which will correct its eyesight. Up-to-date methods have brought about the invention of instruments by which the error of the human eye can be accurately measured, and lenses to correct the error prescribed without asking the patient a single question. The "silent method" is very rarely used exclusively, however, except in the case of the foreigner, or our friend the dog, when no interchange of thought can be effected and the examiner must rely entirely upon the findings of his instruments.—Wellsworth Magazine.

The Thin People.

Overeating is a common cause of emaciation, paradoxical as this statement may seem. Many of our thinnest neighbors are the biggest eaters of the community, Physical Culture Magazine, says. It is an old-fashioned saying that these people "eat so much that it makes them thin to carry it around." In any case, it is not a question of the amount of food one swallows, but a question of how much is digested and assimilated. Many persons will gain in weight upon discontinuing the three-meal plan and adopting the plan of two meals per day. The stomach is then no longer overburdened or overworked, and the digestion is so much more perfect and the health so improved that a gain in weight results naturally.

Carnauba Wax.

Carnauba wax is made from the leaves of the carnauba plant, indigenous to the state of Piauhy, Ceara, and Rio Grande do Norte, in northeastern Brazil, whose roots are used locally as medicine, whose branches are used for bridge and housebuilding because they resist the attacks of insects, and whose fibers are used in rope and paper making; the wax has been used extensively in adulterating beeswax, but is finding an honest market on its merits, not only for candle manufacture, but for coating the insulating material of electric wires, etc.; the annual production of wax in Rio Grande do Norte is about 450 tons a year, valued at about $250,000; perhaps three-fourths of this is exported, but the forests of carnauba plant can produce, if developed, many times this quantity.

OUR DEFINITE TYPE.

Our soldiers abroad have drawn many comments and not a few compliments. They have been looked upon curiously, no doubt, because while the American tourist and the American salesman are reasonably well known across the sea, the American fighting man is quite a new personality. Under the present circumstances there may be a tendency to flatter the newcomers. They are there as helpers in a righteous cause; they are brothers in arms; they are engaged in humanity's business, and they are a long way from home. It is quite natural that the warmth of the welcome tendered them and the pleasant things said of them, should be emphasized by the unusual character of present conditions. Now and then comments of a thoughtful character, thoughtful and well expressed, have been encountered, says Cleveland Plain Dealer. Among these the estimate of the American soldiers made by the London Standard is especially good reading. The writer says: "Lean, lithe, straight-backed, sallow, thin-lipped, set-jawed, they impressed everybody as doers rather than [illegible] men of few words, who look you straight in the eye, take your measure at a glance, give you their [illegible] in a rough epigram and then get to business."

Some Grievance!

The railroad official invited the stern citizen to communicate his troubles.

"I want you to give orders," demanded the visitor, "that the engineer of the express which passes through Elm Grove at about 11:55 be restrained from blowing his whistle on Sunday mornings."

"Impossible!" exploded the official. "What prompts you to make such a ridiculous request?"

"Well, you see," explained the citizen, in an undertone, "our pastor preaches until he hears the whistle blow, and that confounded express was 20 minutes late last Sunday."—Lamb.

Product of Blue Grass State Believed as Good and Cheap as Bavarian Article.

It is believed that after the war is over lithographic stone quarried in Kentucky may be put on the market as cheaply as the Bavarian stone which has been the principal source of supply for a long time. Small quantities of the Kentucky stone have been sold already, but the high cost of labor in this country and the difficulty of working the stone have kept it out of serious competition with the foreign product.

The European stone occurs in thin layers, which require little but planing and polishing after being removed from the quarry. The American stone is in beds from three to ten feet thick and must be sawed into thin layers before it is ready for use.

The Bavarian quarries have been worked so long that vast piles of waste have accumulated that must be moved from time to time, thus adding to the cost of production. The American quarries have found a market for the crushed refuse from their quarries and this by-product helps reduce the cost.

The better grades of lithographic stone bring five to six cents a pound for slabs ten by twelve inches, and the poorer grades a cent and a half a pound.

A Spectacled Dog.

A short time ago, an article was widely published about a valuable hunting dog which had been fitted with eyeglasses for astigmatism. Probably most people who read it, laughed and thought it a fake.

The modern science of fitting eyeglasses, however, makes it possible to fit a dog, or any other dumb animal, with a lens which will correct its eyesight. Up-to-date methods have brought about the invention of instruments by which the error of the human eye can be accurately measured, and lenses to correct the error prescribed without asking the patient a single question. The "silent method" is very rarely used exclusively, however, except in the case of the foreigner, or our friend the dog, when no interchange of thought can be effected and the examiner must rely entirely upon the findings of his instruments.—Wellsworth Magazine.

The Thin People.

Overeating is a common cause of emaciation, paradoxical as this statement may seem. Many of our thinnest neighbors are the biggest eaters of the community, Physical Culture Magazine says. It is an old-fashioned saying that these people "eat so much that it makes them thin to carry it around." In any case, it is not a question of the amount of food one swallows, but a question of how much is digested and assimilated. Many persons will gain in weight upon discontinuing the three-meal plan and adopting the plan of two meals per day. The stomach is then no longer overburdened or overworked, and the digestion is so much more perfect and the health so improved that a gain in weight results naturally.

Carnauba Wax.

Carnauba wax is made from the leaves of the carnauba plant, indigenous to the state of Piauhy, Ceara, and Rio Grande do Norte, in northeastern Brazil, whose roots are used locally as medicine, whose branches are used for bridge and housebuilding because they resist the attacks of insects, and whose fibers are used in rope and papermaking; the wax has been used extensively in adulterating beeswax, but is finding an honest market on its merits, not only for candle manufacture, but for coating the insulating material of electric wires, etc.; the annual production of wax in Rio Grande do Norte is about 450 tons a year, valued at about $250,000; perhaps three-fourths of this is exported; but the forests of carnauba plant can produce, if developed, many times this quantity.

OUR DEFINITE TYPE.

Our soldiers abroad have drawn many comments and not a few compliments. They have been looked upon curiously, no doubt, because while the American tourist and the American salesman are reasonably well known across the sea, the American fighting man is quite a new personality. Under the present circumstances there may be a tendency to flatter the newcomers. They are there as helpers in a righteous cause; they are brothers in arms; they are engaged in humanity's business, and they are a long way from home. It is quite natural that the warmth of the welcome tendered them and the pleasant things said of them, should be emphasized by the unusual character of present conditions. Now and then comments of a thoughtful character, thoughtful and well expressed, have been encountered, says Cleveland Plain Dealer. Among these the estimate of the American soldiers made by the London Standard is especially good reading. The writer says: "Lean, lithe, straight-backed, sallow, thin-lipped, set-jawed, they impressed everybody as doers rather than [illegible]; men of few words who look you straight in the eye, take your measure at a glance, give you their opinion in a rough epigram and then get to business."

Some Grievance!

The railroad official invited the stern citizen to communicate his troubles.

"I want you to give orders," demanded the visitor, "that the engineer of the express which passes through Elm Grove at about 11:55 be restrained from blowing his whistle on Sunday mornings."

"Impossible!" exploded the official. "What prompts you to make such a ridiculous request?"

"Well, you see," explained the citizen, in an undertone, "our pastor preaches until he hears the whistle blow, and that confounded express was 20 minutes late last Sunday."—Lamb.

WANTED!

Farmers to bring in their hogs to u and get the highest market price for same. We an handle them at any time.

The City Meat Market

C. H. ROSSMON, Proprietor,

Goodridge, - - - Minnesota

Season's Greetings

We take this opportunity of extending to our patrons and friends the greetings of the season. Wishing you a Bright and A Happy New Year and thanking you for past favors, We are

Yours sincerely,

H. Christianson & Son,

Goodridge, - - - Minnesota

AN OPPORTUNITY

To supply yourself with Drygoods, Shoes, Overshoes, Rubbers, Caps, Mittens, Shirts, Underwear, Hose etc. at the most reasonable prices consistent with the present high cost of everything.

When in need of anything in the above line, call on us, we are here to supply your needs. All we ask is a chance to do so.

When in town make it a point to do your trading at our store, we will appreciate your business.

P. C. HALVORSON

Goodridge, Minn.

INTENTIONAL DUPLICATE EXPOSURE

TEUTONS MASS FOR NEW DRIVE

Heavy Onslaughts Expected In Many Sectors Along Whole of Italian Front.

BIG BATTLE PREDICTED

Teuton Prisoners In Hands of Italians Says Enemy Is Preparing For Furious Attack to Come Before New Years Day.

With the French Armies in Northern Italy, Dec. 25.—(By the Associated Press)—Losing the Monte Asolone positions within 24 hours after they had captured them, thus being unexpectedly balked in their march toward the plain the Austro-German forces are concentrating heavily, according to reports, north and northeast of this important approach to dominating Monte Grappa.

A new and unexpected vigorous onslought on the barriers to the plains is expected soon, not only at Grappa itself, but on the Asiago plateau and possibly on the Lower Piave, where enemy troop concentrations also are recorded.

Although expert opinion appears to be approaching unanimity that the Austrians have given up hope of breaking through the Italian line at present, so far as to force another great retreat, information indicates the enemy wants to achieve another big success by capturing all peaks commanding the plain and would vastly prefer a position at the northern limit of the plain, where climatic conditions would favor his troops, while possession of the peaks would enable him to control the territory for miles in front of them.

Enemy Far From Objective.

A visit to the Grappa sector, however, is sufficient to reveal convincingly how far the enemy is from achieving these objectives and how formidable the Italian positions are backed up by a rejuvenated army. Immediately after the regaining of the Asolene heights, the correspondent found it possible to proceed to a vantage point slightly south and west of Grappa, which, at the time, was being viciously bombarded with shrapnel by the enemy, who had lost it a few hours before.

Had the enemy been able to hold it and capture Monte Grappa, which latter is the enemy's objective as the completely dominating position of the entire range, this key position would have been seriously menaced.

Their rebuff at this important point, however, keeps the Austro-German forces not only at a considerable distance from the plain they are seeking, but makes their progress toward it difficult now that the weather conditions are increasing in severity.

ARGENTINA POPULACE RIOTS

President's Part In Luxburg Plot Stirs Country.

Buenos Aires, Dec. 24.—As the result of the publication of the telegrams sent by Count von Luxburg, the former German minister to the Berlin foreign office, it again has been necessary to call out mounted patrols to disperse crowds of people who demanded a rupture of relations with Germany.

The mob, which shouted "Long Live the Republic" and "Death to President Irrigoyen" was dispersed after a fight with the mounted police in the Calle Florida. Heavy guards again have been placed over the property owned by Germans in the city and mounted men also are guarding the offices of the newspaper La Union, for which Count von Luxburg obtained a subsidy.

In political circles certainty is expressed that Congress will demand explanations from the government regarding the state of affairs as exposed by the Von Luxburg telegrams.

SUSPEND WEEK TO SAVE FUEL

Request Is Made of Factories In Michigan.

Washington, Dec. 24.—Fuel supplies in Michigan have reached such a low ebb that Administrator W. K. Prudden has asked manufacturers in that state to suspend operations of industrial plants from midnight tonight until midnight December 29. The only exceptions are factories making war munitions needed for prompt shipment.

Mr. Prudden's request was contained in telegrams sent after a conference here with Fuel Administrator Garfield.

"A patriotic response and adaptation of within request may obviate issuing positive orders covering a longer period," the message said.

Eliot Keeps Kaiser's Decoration.

Boston, Dec. 22.—Charles W. Eliot, president emeritus of Harvard, holder of the Order of the Prussian Crown, conferred several years ago by Kaiser Wilhelm, will retain it. He says he sees no reason why he should revoke it. President Eliot, one of New England's foremost patriots, has been among prominent Americans who received this decoration. When asked what he would do about it, he said: "I intend to keep it. It is an order I received from the kaiser several years ago. I see no reason to return it.

GETTING BRITISH GUNS PLACED IN CAPTURED GROUND FOR ANOTHER SMASH AT THE GERMANS

Photo From Western Newspaper Union

British activity in newly captured territory, where a big gun is being placed in position for another drive and an ammunition train is arriving. At the right is a soldier who finds a "dud," or unexploded German shell, makes a fine back rest.

GIVES COLOMBIA CANAL

Germany Promises U. S. Water way as Bait.

Teutons Even Resort to Moving Pictures to Spread Propaganda in America.

Cristobal, Canal Zone, Dec. 25.—Spanish language newspapers in many of the large towns in Latin America are spreading a formidable German propaganda, which is also being distributed in letters and by mail all over central and southern parts of the hemisphere by innumerable personal letters, and by commercial travelers, many of whom are native Latin Americans empoyed in the German interest. Even moving pictures are resorted to.

In Colombia they point to the United States as the international brigand that robbed Colombia of Panama, and they promised Colombians restoration of their lost province if Germany wins, as well as control of the Panama canal. They disclaim any intention to acquire any territory or to extort any direct political influence; they say that Germany will simply right the wrongs perpetrated by the United States and Great Britain, and that Germany's sole reward will be large commercial activity, from which the natives will also greatly benefit.

KAISER PLANS PEACE MEET

Would Call All European Rulers In Conference.

London, Dec. 24.—A dispatch to the Exchange Telegram from Copenhagen says:

"The Berliner Zeitung says Emperor William has informed his government that he contemplates going to Brest-Litovsk if the diplomats arrive at an agreement, in which case he will endeavor to assemble all the sovereigns and regents of Europe in a peace conference, as was done after the Napoleonic wars.

"The emperor is credited with having declared that everybody wants peace and that the future offers so many great tasks that all states must co-operate in them."

ARE BAGGING MORE U-BOATS

Allies Getting More and More Submarines, Daniels Declares.

Washington, Dec. 24.—Secretary Daniels has confirmed Lloyd George's announcement that more German U-boats are being bagged by the Allies. While not disclosing figures or the extent of American participation in the sinkings or captures, Daniels confidently predicted that the submarine will fail in its purpose.

While cautioning that ship losses from submarine attackss will continue to rise and fall, he added:

"You may be sure that we are getting more and more submarines."

FRENCH TO USE RETAKEN SOIL

To Be Planted To Wheat To Feed Million People.

Paris, Dec. 24.—The 325,000 acres of wheat land retaken from the enemy this year in northern France may be made to produce enough wheat next year for 1,000,000 men, according to the estimate of a mission apointed by the agricultural department, which has been examining the liberated territory.

To Probe Stockyard Labor.

Chicago, Dec. 23.—The federal mediation board will investigate the labor situation at the Chicago stock yards. Threats of the 30,000 employes at the stockyards to strike unless packers meet their demands brought Secretary of Labor Wilson and board members here. They held an informal conference, preliminary to the session. The hearing will be secret, Max Lowenthal, secretary, announced. The packers' side will be the first presented. Packers denied that there was any cause for the board holding hearings.

HURLEY TAKES ENTIRE BLAME

Assumes Full Responsibility For Success or Failure of Shipbuilding Program.

OUTLOOK IS HOPEFUL

Tells Senate Committee But One Vessell Has Been Finished to Date But Prospects For Future Are Brighter.

Washington, Dec. 24.—Chairman Hurley of the shipping board, testifying at the Senate commerce committee's investigation, shouldered full responsibility for the success or failure of the governments' shipbuilding program.

Called as the first witness Mr. Hurley admitted that there have been delays, but declared that the recent reorganization of the board's emergency fleet corporation for the first time gives the chairman of the board proper authority and fixes responsibility where it belongs. "The dual organization of the board and the corporation," he said, "has been done away with and the present general manager of the corporation answers directly to the chairman."

Accepts Blame If Plans Fail.

After testifying that he personally approved and accepted all ships contracts as president of the emergency fleet corporation, Mr. Hurley was questioned by Senator Harding.

"All the finances of this big program rest in your hands:"

"Yes, sir."

"Not in the hands of the shipping board?"

"No, sir."

"Then, if the whole thing fails, it will be your fault?"

"Absolutely," said Hurley firmly.

New Legislation Not Needed.

"The present organization," Mr. Hurley said, "is the only way that ships can be built. We do not need additional legislation. If the head of the institution does not build ships it is because of his inefficiency and not because of faults of the organization."

MINIMUM WAGE LAW VALID

Commission Long Inactive Upheld By Supreme Court.

St. Paul, Dec. 22.—Minnesota's minimum wage law, passed in 1913, has been upheld by the state supreme court as a valid exercise of police power. The decision, written by Judge Oscar Hallam, reverses the district court of Ramsey county, which issued an injunction against enforcement of the orders of the minimum wage commission. It holds that the power given to the commission by the legislature was not legislative power.

The commission created under the law has ceased to be active since the district court injunction was issued.

Krupp U-Boat Plant Enlarged.

Geneva, Dec. 24.—The Krupps have recently quadrupled their naval plant near Kiel, according to a dispatch from Berlin by way of Berne to La Suisse. This was done at the request of the German government to make up losses in submarines, which the dispatch asserts have been heavier than the German admiralty admits.

Collision of Planes in Midair.

Ft. Worth, Texas, Dec. 24.—One officer and two cadets of the Canadian Royal Flying corps were killed instantly when the two airplanes in which the men were flying collided in midair. The aviators were flying at a height of several hundred feet when the crash came, throwing the machines to the ground. The dead are: Second Lieut. R. G. Genner, Kingston, Ont., Cadet C. A. Baker, Kent, England and Cadet A. Eden, Kingston, Jamaca. The three came from the British aviation training fields in Toronto.

ITALY STANDS FIRM

Nation Takes Strong Position Against Separate Peace.

Will Not Take Any Action Not Loyal To Allies, Says Deputy Giolitti in Speech.

Rome, Dec. 24.—Deputy Giolitti announced in the chamber of deputies, in the course of a speech, that Italy will never support a separate Italian peace or take any action not loyal to the Allies.

M. Golitti is one of the most prominent political leaders in Italy, and such a statement as the above from him is of tremendous significance, particularly in view of the fact it was Giolitti who was foremost leader of Italy's entrance in the war with the Allies.

M. Golitti at the outbreak of the war favored Italy's acceptance of the promises made by Germany and Austria on her warring on England and the Allies. From this he has been held to be strongly pro-German.

M. Giolitti has a strong following in Italy, and such an announcement as the one above from such a leader means practically complete harmony in Italy's determiantion to wage war unceasingly against the Central pow-

PACKERS WITHHOLD RECORDS

Swift and Co. of Chicago Refuse To Give Information.

Washington, Dec. 22.—Swift & Co. of Chicago have refused to deliver to the Federal Trade commission records desired by the commission in its investigation of the packing industry and drastic action will be taken in court to force their production, Francis J. Heney announced at the resumption of the commission's inquiry.

It was said that when the commission's investigators went to Chicago they received only evasive replies from the officers of Swift & Co., and that direct demand for the records had been refused. To obtain the papers which relate to the ownership of the Chicago stockyards and other details of the meat industry the commission will go into a federal court and ask an order compelling the company to produce them.

TO TRADE VESSELS FOR FOOD

Holland's Agreement With U. S. Contemplates Use of Ships.

The Hague, Dec. 23.—Holland's agreement with the United States over food supplying contemplates the use of a great part of Dutch shipping, Foreign Minister Loudon told the chamber of deputies He announced his belief in an early conclusion of such an agreement.

The pact, it was stated, would provide Holland with necessary foodstuffs from the United States, in return for Holland placing at America's disposal a great part of Holland's merchantmen.

$2,000,000 More for Belgium.

Washington, Dec. 24.—Two million dollars more loaned to Belgium brought the total of American credits to that country to $60,900,000. Credits to all Allied countries now aggregate $3,887,900,000.

Germans Laying for Sammies.

Berne, Dec. 24.—The Germans are boasting that they intend to seek out American troops on the west front and "give them a lesson," according to Bulgarian officers now here.

Educator Is Believed Suicide.

Palo Alto, Cal., Dec. 24.—Prof. Ernest W. Poncer, professor of mathematisc at Stanford university, was found dead in the kitchen of his home with a big shotgun wound in his breast. A shotgun, with which the wound was evidently inflicted, lay nearby. The police believe Poncer committed suicide. Professor Poncer was of German birth and before America entered the war was a strong defender of Germany's cause. In recent months, however, he has been silent, moody and despondent.

CHAOS IS RULER IN ALL RUSSIA

Arrest of Ukraine Leaders Precipitates Armed Crisis and Quick Release Follows.

NORTH BEING STARVED

Rada Wants Peaceful Settlement of All Questions But Will Accept Challenge of Civil War and Stop at No Obstacles.

London, Dec. 25.—Members of the Ukraine revolutionary staff have been liberated in accordance with the demands of the Ukraine government, a Reuter's dispatch from Petrograd says.

London, Dec. 24—The breach between the Ukraine rada and the Workmen's and Soldiers' deputies has been widened by the arrest of 40 members of the Ukraine revolutionary staff at Petrograd.

The rada has sent an ultimatum to the Bolsheviki headquarters threating forcible steps unless the staff is released.

The Don Cossacks have assured the Ukraine rada of their defensive support.

The rada, replying to an ultimatum of the Bolsheviki, insists on creation of a federal Socialist republic, embracing Maximalists and Socialists, which it contends alone can be competent to decide the question of peace for the whole of Russia. The rada declares itself favorable to settling by peaceful methods political and national questions, but asserts that if the commissaries assume the consequences of civil war it will accept the challenge and stop at no obstacles.

North Being Starved.

One reason for the quarel is the rada's refusal to permit breadstuffs to be sent to Northern Russia in consequence of refusal by the commissaries to issue money to meet needs of the Ukrainian government. This stand, it is stated, threatens eventually to starve the north, especially as General Dutoff's Cossacks held Chiliabinsk, thus preventing the transmission of supplies from Siberia. In the meantime the Ukraine has begun to issue its own notes.

Rada Controls Odessa.

Ukranian troops are said to be concentrated between Homel and Bakhmatch, while Bolsheviki forces are gathering at Minsk.

The Maximalist troops trying to reach Kiev were stopped by torn up railroad tracks.

The Rada is said to be in complete control of Odessa and to have been joined by the Black sea fleet. The Bolsheviki have occupied Proskurov, in Podolita. The Syzran Soviet is said to have disarmed four Cossack regiments there. All reports continued disconnected, however, and often contradictory.

SWITZERLAND HAS NO FEAR

Rumor of German Drive Through Country Discounted.

Berne, Switzerland, Dec. 24.—Public opinion in France may be reassured regarding the report in circulation in that country that an Austro-German offensive through Switzerland is in preparation, Gustav Ador, Swiss foreign minister, told the correspondent of the Paris Petit Journal.

"My sincere personal opinion," said M. Ador, "is that we need not have the slightest fear of such an attempt. Germany has other things to do on the western front than get the Swiss army on her back, and from an economic point of view Germany has every interest not to make an enemy of Switzerland."

BERLIN PAPER SUSPENDED

Vorwaerts Suspended For Publishing Displeasing Story.

Amsterdam, Dec. 24.—The Berlin Socialist newspaper Vorwaerts has been obliged by the government to suspend publication for three days.

Voerwaerts in a recent article attacked the system of the German food controller, Von Waldo, declaring that great masses of German people were not only hungry, but literally starving. It also accused the "war profiteers and millionaires" of hoarding great supplies of food

Conscription Loses in Australia.

Ottawa, Dec. 24.—A majority of 174,000 votes against conscription is shown by the complete returns on the referendum in Australia, says a Reuter dispatch from Melbourne. The vote was 938,000 against and 764,000 for. Votes cast by the Australian troops on the question are being counted in London.

Insurance for French Soldiers.

Paris, Dec. 24.—Insurance for all soldiers by the government is subject of a bill introduced in the Chamber of Deputies. The sum proposed to be paid is 1,000 francs for combatants and $500 francs for noncombatants. Each insured person may obtain payment of the policy in advance, within three months after cessation of hostilities, provided he is able to prove an intention to spend the maney for the purchase of tools or other objects necessary for resumption of his livlihood following the war.

Save 9½c. By Buying Ever Reliable
CASCARA HILL'S BROMIDE QUININE
No advance in price for this 20-year-old remedy—25c for 24 tablets—Some cold tablets now 30c for 21 tablets—Figured on proportionate cost per tablet, you save 9½c when you buy Hill's—Cures Cold in 24 hours—grip in 3 days—Money back if it fails. 24 Tablets for 25c. At any Drug Store

BLACK LEG LOSSES SURELY PREVENTED by CUTTER'S BLACKLEG PILLS
Low-priced, fresh, reliable; preferred by western stockmen, because they protect where other vaccines fail.
Write for booklet and testimonials.
10-dose pkg. Blackleg Pills, $1.00
50-dose pkg. Blackleg Pills, $4.00
Use any injector, but Cutter's simplest and strongest. The superiority of Cutter products is due to over 15 years of specializing in VACCINES AND SERUMS ONLY. INSIST ON CUTTER'S. If unobtainable, order direct.
The Cutter Laboratory, Berkeley, Cal., or Chicago, Ill.

Clothes and Mental Attitude.

Clothes do help the mental attitude more than many realize. Let us not fail to take advantage of this means of keeping ourselves well balanced, of keeping emotions under control, now and all through the time that our men are fighting so valiantly, so surely, for our safety and the safety of those who shall come after us.—Exchange.

Rather Mixed.

"I would not dignify that charge with my notice."

"No, I suppose a reply wouldn't answer."

CUTICURA HEALS SORE HANDS
That Itch, Burn, Crack, Chap and Bleed—Trial Free.
In a wonderfully short time in most cases these fragrant, super-creamy emollients succeed. Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub Cuticura Ointment into the hands for some time. Remove surplus Ointment with soft tissue paper. Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Sparing Him.

"Butter is high, dearie," ventured the economical husband.

"I know it. So shut your eyes."

"Eh?"

"And then you won't see how much I have to put on your toast."

Never Repeat Mistakes.

If you are a human being you make mistakes. If you are a wise one you do not make the same one twice.

BOSCHEE'S GERMAN SYRUP
Why use ordinary cough remedies, when Boschee's German Syrup has been used so successfully for fifty-one years in all parts of the United States for coughs, bronchitis, colds settled in the throat, especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectoration in the morning, gives nature a chance to soothe the inflamed parts, throw off the disease, helping the patient to regain his health. Sold in all civilized countries. 30 and 90 cent bottles.—Adv.

A Foolish Query.

"In a certain office building I saw the other day a placard posted near the elevator, calling attention to the necessity of conserving coal, and stating that in view of such need:

"Our elevator service will be reduced. Our lighting service will be reduced."

At the bottom of which some tenant had feelingly written:

"Will our rent be reduced, too?"—Boston Bost.

The Quinine That Does Not Effect Head
Because of its tonic and laxative effect, Laxative Bromo Quinine can be taken by anyone without causing nervousness or ringing in the head. There is only one "Bromo Quinine." E. W. GROVE'S signature is on box. 30c.

The Long Farewell.

Fresh—Did he kiss his girl good-by?

Soph—No, he kissed her "so long"—that I began to get nervous.

When a man feels like swearing—then silence is golden.

A toilet preparation of merit. Helps to eradicate dandruff. For Restoring Color and Beauty to Gray or Faded Hair. 50c. and $1.00 at Druggists.

"CONTRABAND"

A Thrilling War Story of the North Atlantic

By RANDALL PARRISH

Copyright A. C. McClurg & Co.

CHAPTER XXVI.

We Sight a Boat.

What immediately followed; how we made ourselves shipshape the best we could, and held on for the next few hours, has comparatively but little to do with the interest of this story. Leayord brought the two men on deck, and as Dade was no sailor, but more likely to prove faithful, he was sent down the ladder to assist Masters in the fireroom. Dugan took the change in administration aboard with sea-going philosophy, seemingly feeling no animosity because of the rough handling received, and went to work under my orders with hearty good will. We were all four of us capable seamen, and an hour of hard work placed the Indian Chief in very fair condition, so far as deck and running rigging was concerned. At the end, however, standing on the forecastle, and staring aft, I had faith that we could handle the hooker, even with that small crew, and bring her safely into the harbor of St. John's. Our earlier weather predictions were not yet verified, at least to any serious extent. Indeed there was nothing particular to worry about, excepting that temporary steering apparatus, and it had worked long enough now so as to give me confidence.

"What do you make of it, Mr. Leayord?" I questioned, indicating both sea and sky by a wave of the hand. "Was it a circular storm, leaving us outside of its radius?"

"No, sir; it's not that," and he drew the back of his hand across his lips. "Dugan an' I talked about it on the mainyard yonder, an' 'tis our judgment, sir, that it's just a slow brooder. There won't be no quick change, but the weather 'll just gradually get heavier until we're scuddin' under bare poles. It'll be maybe termorrow night before we gets its full weight."

"But you have no doubt we'll weather it?"

"Barrin' an accident. When do you expect to make that port, sir?"

"St. John's? Well, we're a bit off our course now. I'm afraid we may be another night afloat."

He stood motionless, one hand shadowing his eyes, as he gazed out over the port rail.

"I was a' thinkin' o' them poor cusses out there in the boats, sir," he said finally. "I'm bettin' that most o' them wish they wus back on this deck by now."

"No doubt; but there's no way we can help them, and we've got our own work to do. You and Olson go below."

I watched the two disappear through the companion, spoke a word to Dugan, posting him where he could hear me call if necessary, and then went aft to the wheel. I had not realized the full weight of the gale until I reached the top of the ladder, and stood erect without any protection from the cabin. For an instant I had to grasp the side rail, shading my eyes with an arm; then I struggled forward, until my hands gripped the wheel.

"Why didn't you call for help?" I asked. "This was too much for any woman. I never realized forward how it was blowing."

She swayed against me, clinging to my sleeve.

"It—it does kick some," she panted, "and I was almost afraid I might let go. I—I am glad you came. I couldn't hold to the course, but—but that doesn't matter, does it?"

"Not at all; we are in no shape to fight the storm, with only one man in the stokehole. You will have to creep to the ladder."

"You—you wish me to go below?"

"I order you to."

"And you are going to remain at the wheel—alone?"

"Dugan is forward, within easy call. I have sent the two mates below for an hour's rest. There is nothing for us to do now, but hold on until the storm abates. I'll simply lash the wheel, and stand by. You are absolutely exhausted, and must get below—you will go?"

"Yes if—if you think it best. I am so tired—the strain of it; the fear I could not hold out—"

"I know." I bent and kissed her, and she clung to me. "But do not think of that any longer; you must go to your room at once and lie down."

"But you will stay on deck all night?"

"Not unless the storm increases. In an hour or so I'll call the others, and lie down myself. Come, dear, you belong in the watch below."

That certainly seemed a lonely deck after she had disappeared down the ladder. I had served many a quiet watch at sea, many a memorable one, but that hour taught me the real lesson of loneliness. We were driving forward recklessly into a wall of darkness, utterly impenetrable to the eye. What horror might be lurking just ahead of the plunging bow, no imagination could picture. From where I stood, clutching the spokes of the wheel, I could not even trace the yards of the mainmast, nor could I perceive on either side the water through which we drove. Yet it was not this which pulled so at my nerve. I had stood at the wheel often before guiding a great ship through impenetrable blackness, and amid the immensity of the ocean. But then I was one of a crew, alert and ready, merely performing my part of a given task. But now I could not drive from me the consciousness that I stood there alone; that on all that space of deck forward only one solitary man crouched in the blackness; that below in the engineroom, and stokehole, only two more; already worn and weary with toil, stuck grimly to their work; that under my control this great freighter, loaded almost to the deck beams, was flying before the storm, plunging through the wild waters of the mid-Atlantic, with death hovering above in the shriek of the storm. Yet I clung to it grimly, no longer making any attempt to hold any settled course, but merely choosing the easier way in which to meet the force of the storm.

It was two o'clock when, too thoroughly wearied to stand the strain longer, I sent Dugan below to call the mates. Leayord was the heavier man, and the more experienced sailor, so, at my suggestion, he took the wheel, while Olson went forward. I can recall creeping down the ladder, and staggering down the stairs, but nothing more. I must have been asleep even before I reached the berth in the captain's stateroom.

A hand shook me, and I opened my eyes. For an instant I was too dazed to comprehend. The port was closed, but daylight streamed through the thick glass illuminating the stateroom, and I recognized Olson bending over me.

"I had to call you, sir," he explained kindly. "The main royal has broke loose, an' it'll take all hands ter stow it again in this wind; besides that feller Dugan he's gin out entirely, an' there's got ter be another hand sent below to the stokehole."

I sat up, already thoroughly awake.

"What time is it?"

"Goin' on half after four, sir."

"Why I thought I had just dropped off. Any increase in the weight of the gale, Olson?"

"No, sir; I don't think the wind is quite so heavy, and it's gettin' more steadylike, but there's considerable sea."

"I can tell that the way the ship pitches; she's taking water forward."

"Tons o' it; the damned hooker is loaded so deep she's more like a wharf than a ship."

It was a wild scene enough when I emerged from the companion and paused a moment in the protection of the cabin to view the deck forward. Huge crested waves burst over the forecastle heads, cascading down onto the main deck, and sweeping aft to the scuppers amidships. The vessel staggered under the repeating blows, yet recovered with a buoyancy which gave me renewed courage, plunging forward again to meet the next assault. The continuous boom as they struck against our bows, the mad flapping of the loosened canvas aloft, the ceaseless shrieking of the cordage, made a pandemonium of noise which rendered the human voice almost useless. I put my lips to Olson's ear.

"Can the three of us pass those gaskets?"

"It's got to be done, sir, unless we let the sail go; but it's goin' to be no boy's job."

"Where's Dugan?"

"Hangin' there to the shrouds, a' waitin' for us."

"Then come on; the sooner it's over with, the better."

We went up the ratlines like snails every burst of wind driving us flat against the ropes, where we hung on grimly. Dugan was first to lay out upon the footropes, and I felt no regret when Olson slipped past me in the top, bawling in my ear:

"Let me go next, sir, you haven't been at this sort o' job lately."

However, I made it in my turn, the wind driving me flat against the spar, the footrope dancing madly beneath my weight, the flapping canvas of the loosened sail as stiff as iron. Dugan had the worst of it, but he clung there like a cat, stubbornly fighting inch by inch as he drew in the cloth. He must have had the strength of a giant, and the grip of a vise. It was a ten-minute battle, and when I got safely back into the maintop every muscle of my body throbbed with pain, and I sank down against the mast, struggling to regain my strength. I had my head buried in my arm, conscious only of the wild leaping of the mast, and the sickening sensation caused by its constant swaying, when Dugan's shout sent the blood pounding to my heart. He stood upright, clinging to a stay, staring forth into the smother off the port bow.

"Look, sir! There's a boat! See, yonder; she'll top the crest in a second—there!"

I had a glimpse of something—a black speck in the midst of the breaking spray—but could not be sure of what it was.

"Are you certain it is a boat?" I questioned. "The thing had no shape to me. What do you say, Olson?"

"A boat, sir; there was a slip o' sail hoisted; it's my notion she's hoved to, ridin' to a drag. There she is again."

Aye, I got a fair view that time, as the cockle-shell was thrown high up on the crest of the wave. It was sickening to see that black object hurled high up against the sky, and then disappear utterly into the hollow. The boat must be hove to; there would be no living otherwise in that sea, and the very fact that it remained afloat was evidence of sailors aboard. I drew myself to my feet, clinging with one hand to a stay, hollowing the other to make my voice reach the deck below.

"Mr. Leayord!"

"Aye, aye, sir."

"There is a small boat off the port quarter, riding to a drag."

"A what, sir?"

"A ship's boat off the port quarter—too far away to tell what's aboard her. Can you let her head fall off a point?"

"Not without another hand at the wheel; it takes all my strength to hold her as she is."

"Jump down, Dugan, and lay aft; we must get that boat to leeward, if we help those fellows in this sea."

"Aye, aye, sir."

He scrambled over the top, but Olson and I were content to use the lubber's hole, reaching the deck later, and glad enough to be there alive. I dived into the cabin after a glass, stopping long enough to explain what we had sighted to Vera, who appeared in her stateroom door, fully dressed.

"You have not been in bed?" I asked, indignantly.

"Oh, but I have; indeed I have. Why I must have slept four hours, but I lay down fully dressed. I—I didn't know what might happen. Could you see if there were men in the boat?"

"No, not to distinguish them with the naked eye; the glass will reveal that; but the boat must be occupied to keep afloat in this sea."

"Who can they be, do you suppose—shipwrecked sailors?"

"It would be my guess it will prove to be one of our own boats we've overhauled."

"But how could we?"

"The wind changed after midnight, and, with only the one hand at the wheel, we were obliged to pay off, and run before it. It is not impossible that we are back in almost the same section of sea where we left those fellows. Come up on deck, and we'll know shortly."

She went in for a wrap, but joined me almost immediately. I must have been five minutes locating the boat, yet finally caught it fairly on the crest of a wave. Even at that distance two recognized faces leaped instantly into the circle of vision—Liverpool and McCann.

CHAPTER XXVII.

A Dead Man in the Cabin.

The glimpse was but for an instant, the boat disappearing as it dropped into the hollow.

"It's our own quarterboat," I announced shortly, endeavoring to keep my glasses trained on the right spot. "McCann, and those devils with him."

"Then, shall we stand by, sir?" asked Leayord. "Why should we be picking up that scum?"

I glanced aside at him.

"Why, Mr. Leayord? Well, one reason is, we are American seamen. Those fellows can scarcely hurt us now, and a hand or two more aboard will help us to make port. We've got to have firemen below, and Rapello would be able to spell Masters in the engineroom. I look on their coming as a Godsend. Let your helm off another point—there, steady now; hold her just as she is."

Again I caught the boat in the focus of the leveled glasses; it was measurably nearer now, but I could only see four men aboard the craft, the other two being White and Rapello. The tiller was gone, the man at the stern, Jim White, steering by means of a long oar; the sail had been whipped into rags, and a canvas shirt substituted. One man was on his knees bailing furiously, and Tony had an arm in a sling. So intent was I in this endeavor to decipher the details of the tragedy through the glass, I was unaware that Vera had climbed the ladder, and now stood beside me, clinging to the rail. Her voice aroused me to her presence.

"Why, there are only four of them?"

"Yes; they must have passed through Hades last night," I answered. "Here, take the glass; there are two bodies lying in the bottom of the boat."

"Can you manage the wheel alone for a bit, Mr. Leayord?"

"I can try, sir."

"Miss Carrington, would you mind giving the mate a hand?"

She fought her way across to him without a word, leaving the glass on the deck.

"Good; hold her as she is, and have Masters slow down. It is going to be a ticklish job to get those fellows on board; has anyone a suggestion?"

"A running noose from the lower main-yard, sir," said Olson.

"That will take only one at a time."

"Two, if they're quick enough about it; but it's the only way, sir. That boat wouldn't live a second close in alongside."

"Right you are; you and Dugan lay out on the yard and get the whip rigged; pick a strong cord and see that it fits the pulley block. I'll keep to the deck, and ease them in. Pass the end down to me; lively now."

Those in the boat saw what we were attempting, realizing at once that we meant to take them aboard. The relief felt was instantly expressed by the waving of hands, and a faint cry reached us across the water. McCann even endeavored to stand up, but was jerked down again. No doubt the recognition of the ship had left them in total despair of rescue, their one thought being that we would permit them to drift by, rather than take them aboard again. The gap between us slowly closed, I could see their faces clearly, uplifted in agonized appeal. They were haggard, crusted with salt, piteous enough in their silent pleading to make me forget the past.

"Boat ahoy!" I roared. "Keep well away from the side; we'll whip you in from the main yard. Have you oars?"

"One pair, sir."

It was Liverpool, and I was glad to note the tone of respect in his answer.

"Then hold her back, and drift in slowly stern first; you get the idea. Are those dead men?"

"One of them is; Dubois has his leg broken."

"We'll send a sling down; put Dubois in first, and the rest of you stand by. Are you ready now?"

"Aye, aye, sir."

Olson joined me at the rope, Dugan remaining outstretched on the yard, the ship held motionless except for the rise and fall of the waves. The boat drifted cautiously in stern first, held by the two oars in the hands of Liverpool and White. The former roughly assumed command.

"Get up there, McCann; on your knees now; for heaven's sake don't miss that rope, and hold on hard; take a turn around that thwart amidships—no! don't make fast! Give Tony the end; he has one hand yet. Now get Dubois into the sling; d—— you, man, you've got to; we can't leave these oars. Take a grip there, Dubois, and help yourself. That's better." He lifted his arm in signal. "All right, sir, swing away!"

It was a good half hour's job, and a hard one; twice the boat nearly swamped, and went down. Liverpool was the last to leave the boat, already half filled with water. As he rose slowly, gripping the rope with his hands, unable to get foot in the noose, the deserted craft floated away, the dead body of Watson half covered with water.

The four of them made a sorry looking bunch on the deck, but now that they were safe, my feeling of sympathy had vanished. I could only recall their treatment of us, and the danger we still ran in having them once again aboard. Nothing was to be gained by soft words with such as they. I stepped across to front them, and Olson and Dugan joined me.

"Now, look here," I said grimly. "We've taken you aboard because we're human beings; but there's going to be no mistake as to your exact status on this ship. You'll take your orders from me, and I'll kill the first man-jack of you who shows a sign of treachery. What became of Sachs?"

McCann was still gasping from his drop into the sea, and could not answer, although I addressed my question to him. Liverpool replied:

"He knifed Watson, and Dubois knocked him overboard with an oar; he never cum up."

"Was it in the fight Dubois got hurt?"

"No, he was hit by the boom, an' Tony there broke his arm when he fell into the boat off the ship's ladder."

"All right; three of you are fit for work, and Tony can stand watch in the engineroom. Have you had anything to eat?"

"Yes, sir, in a way; there was food in the boat."

"Then you have fared in that respect better than we have. White, you go below and hustle coal; you climb down also Tony, and relieve Masters. Tell him to lie down and get some rest. Move along now; I'll be down there myself presently."

I turned to McCann. "Get up from there; you are a hand on board this ship the rest of the voyage. Do you understand? Answer me—do you?"

"Yes."

"Do better than that."

"Yes, sir."

"Very well; now you and Liverpool pick up Dubois, and put him in number seven stateroom. Make him as comfortable as possible, but don't be long about it. Then report on deck to Mr. Olson; he'll keep you busy, and out of mischief. A word with you, Olson."

The second mate crossed the deck with me to the rail; the drifting boat had disappeared, having either sunk, or being hidden in the hollow of the great surges. The screw was beginning to revolve once more with power, the planks trembling under foot and a bit of sunshine was streaming through the clouds overhead. I stood silent a moment, endeavoring to think out the situation, and Olson waited patiently, his eyes sweeping the sky and then the sea.

"What do you think of our guests?" I asked finally. "Can we trust them at all?"

"Not so far as you could swing a bull by the tail, sir," he answered soberly. "They ain't forgot the night in the boat yet, but there's just as much devil in 'em as there ever was."

"Your opinion is, they will never help sail this ship into St. John's, if any villainy will save them?"

"That's it, sir; they're so black now, they won't mind a little more."

"That's my judgment; we must keep them apart as much as we can, and have an eye on them all the time. How about Dugan?"

"He talks straight enough, and to my notion means to play square."

"That was my impression; he's Irish, and hot-headed, but no criminal. We ought to be able to keep the fellows separated. Besides I'll be about most of the time."

"How long do you suppose it will be, sir?"

"Today and another night likely; I can tell better when I get an observation at noon. It will not give them much time for plotting."

I sent the two forward with Olson when they returned to the deck from the cabin, and he busied them gathering up the riffle about the forecastle caused by the night's storm. McCann moved as though scarcely able to exert himself, but Red took hold as if glad to be occupied. Vera came down the ladder, and we spoke together briefly, about what had occurred. She finally volunteered to get some food ready, and I went below with her, rousing up Dade, and putting him at work under her orders. An hour later all aboard enjoyed a warm meal, eating alike in the after cabin.

(TO BE CONTINUED.)

Smoking Backwards.

The peculiarities of the ancient smokers are themselves a study as well as an education. The negritos smoke with the lighted end of the cigar in their mouth—let the reader picture in his mind a man smoking with the lighted end of a cigar or cigarette stuck calmly in his mouth; no fear of burning the tongue or other possible harm; just smoking and enjoying the weed as would the most unconcerned among white men, who prefer the lighted end the other way around.

An Unexpected Thrust.

He—It seems we have to economize on our wool, my dear.

She—Then you had better begin with the lot of it that people are always pulling over your eyes.

The motor of a new motorcycle is carried over the front wheel and provides direct drive by friction.

Platinum Substitutes.

Since the development of "palau," the palladium-gold substitute for platinum, trials have been made with mixtures of these two metals in varying proportions. The alloy containing 60 to 90 per cent of gold is to be known as "rhotanium," and has a specific gravity of 16 to 18.5, is malleable and ductile and can be welded without flux or other agent. It proves entirely satisfactory for most chemical and electrical purposes for which platinum is used, though it is not suitable for use with hot concentrated nitric acid, nor for electrolytic anodes. For jewelry it is thought to be even superior to platinum, as it is harder and stronger and takes a better finish and it has practically the same color, can be worked as readily and does not tarnish or corrode.

Boy Strangles Leopard.

Strangling a leopard with his bare hands was the feat performed by a lad in South Africa. The leopard, a full-grown female, had in the course of a few nights destroyed as many as seven calves, writes a correspondent. Ultimately the spoor was found, and a chase resulted in her being brought to bay by a large hunting dog owned by the farmer, and which was then with one of his native boys some little distance from the line, taken by him in the pursuit. The leopard made no attempt to take refuge in a tree, as is usual, but halted. The dog immediately tackled her, gripping the hindquarters. With the dog still hanging to her she sprang at the boy, carrying him to the ground. The boy, who is of unusually powerful build, succeeded in gripping the animal by the throat, and the two struggled on the ground. When the farmer arrived the leopard had been effectually strangled and was relaxing its grip off the boy, who was badly injured.

Be Contented.

Let none repine at their station and waste their time longing for other things than such as they have, greater things, more congenial, or things of apparently superior promise. The scale of our stewardship may be small, the items of it meager, the situation obscure, the duty to which we are called insipid and irksome in the extreme, yet in the faithful discharge of our obvious calling lie all the possibilities of discipline, all that is necessary to fit us for great destiny. Our consuming solicitude should be that we grasp the circumstances of the hour, learn their lessons, extract whatever they have to give of knowledge and strength.—Exchange.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

LAMB AND DOG.

"Now you know," said Peggy, "it's entirely too much to expect of me."

"I have no idea what you are talking about," said the pony, neighing.

"It's that lamb," said Peggy. "I love the keeper and I see that nothing harms him and then that silly little lamb follows him around and the keeper pets him. It's almost more than I can bear. Oh, but I'm jealous!"

"You most certainly are," said the pony. "But I know how much the keeper loves you, even if you're only a dog and not a pony."

"I don't want to be a pony," said Peggy, "neither do I want to be a lamb. I am glad I am a dog, for you know my family belongs to the bulldog family and we're famous for being great fighters."

"Dear me," said the pony, "then I had better not talk to you and argue with you if that is the case."

"Never fear, pony dear," said Peggy, politely, and the pony bowed because Peggy was so friendly and, too, because Peggy had made up a poem in his honor, a very short poem, to be sure, but still it rhymed!

"But what makes me so glad that I belong to the bulldog family is because many creatures are afraid of us. Now my keeper looks after the bears. The brown bears are all right, but those polars," and Peggy shook her head and let her tail droop: "those polars," she continued, "are just about the crossest creatures.

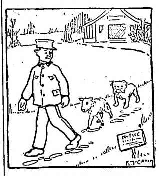
"Mrs. Polar is far more cranky than Mr. Polar and when the keeper goes to feed them I have to bark hard at Mrs. Polar so she'll get far off into a corner. She doesn't know my language, but she knows my bark sounds as if it meant something pretty bad if she didn't behave herself, and so she keeps out of the way."

"I've often heard the keeper telling people that you always looked after him," said the pony.

"Ah, yes," said Peggy wagging her tail, "the keeper loves me."

Just at that moment Peggy saw the keeper coming along with food for all the animals under his charge.

"Hello, Peggy, good dog!" said the keeper. And he patted Peggy, while Peggy's eyes looked so happy and her tail wagged and her teeth, that looked so big and terrible when she barked at Mrs. Polar, now seemed to smile and almost grin.



They Each Trotted Behind.

"Good-by, Pony," said Peggy. "I must be going with the keeper."

"Good-by!" neighed the pony, who wandered off to eat some hay.

The keeper fed the different animals and Peggy went along by his side. From time to time the keeper stopped to pat Peggy and call her a good dog.

But when they reached one of the animal's yards, out came a small white lamb.

"Hello, Sammy!" said the keeper.

Sammy bleated his "Hello!" and followed the keeper, too.

"My two little pets," said the keeper, "so faithful and loyal." And both the animals were very happy. They each trotted behind, the brown bulldog and the white lamb. Sometimes the keeper would speak to Sammy, the lamb, and sometimes to Peggy, the dog.

After all the animals had been fed they went back to a little house, where the keeper kept food for the animals.

He was rather tired, so he sat down to rest, and now Peggy jumped upon him, his feet in the keeper's lap and his head nudging his hand so the keeper would take the hint and pet her.

But Sammy was there, too! And Sammy wanted to nestle up and be petted. "Well, Sammy," said the keeper, "what do you think of Peggy looking at you and wanting all the petting herself?"

Sammy didn't answer, but just bleated and nestled closer.

"Well, Peggy, what do you think of Sammy, looking so fine and handsome today?" Peggy didn't answer, but tried to push the lamb away every time he drew near to be petted. Peggy was certainly very jealous, but when the keeper petted both and told them both how fond he was of them Sammy and Peggy were happy and contented.

Equal to Emergency.

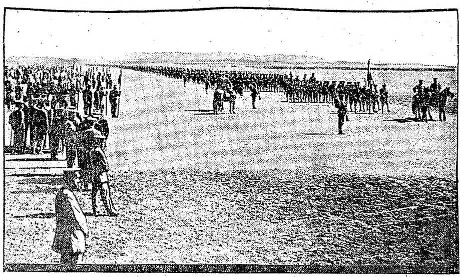
The best way to learn to be equal to the big emergency is to be equal to the small ones. It is all nonsense to suppose that the girl who bursts into tears over some trivial vexation is going to stand up bravely to the big trials of life. The people who distinguish themselves in an emergency are those who have practiced self-control in the commonplace, everyday routine.—Girl's Companion.

GOING OVER THE TOP ON SNOW-COVERED GROUND

COMMITTE ON PUBLIC INFORMATION

Scene in an American army training camp where the men are making a charge from the trenches over snow-covered ground, the conditions being such as are encountered in France now.

CHINESE TROOPS TO FIGHT ON FRENCH FRONT



This photograph shows a review of some of the Chinese troops that, according to uncontradicted reports, are to be sent to the west front in France to help in the war against Germany.

TO THE GIRL BACK HOME

FRENCH OFFICIAL PHOTO

Even under extreme danger the soldier's thoughts drift toward home. A French soldier at outpost duty snatches a few moments to write words of encouragement to the girl he loves.

For Toothache.

Oil of cloves may be used successfully for a little while, but you must not continue with it too long or it may lead to congested toothache, says an exchange. Put just one drop on a piece of wadding and push the wadding firmly but gently into the hole in the aching tooth. It may stay there for two or three days, and should then be renewed.

Spirit rubbed on the gums will give relief for a few minutes. It is also a good plan to rub baking soda round the tooth and then rinse out the mouth with warm water.

If the trouble is caused by an abscess, nothing is better than a poultice of linseed meal mixed with vinegar instead of water. Measure out three tablespoonfuls of meal. Boil enough vinegar to mix the meal into a moist paste. Stir it up very quickly, wrap it up in a piece of old, soft flannel, and apply it to the face as hot as is bearable. It should not be made before the patient is ready for it; but if a delay occurs, and it has to be kept [illegible] for [illegible] minutes, you should [illegible] and [illegible] it into

WOMEN LOADING SHELLS FOR THE ALLIES

Portuguese women at Lisbon loading a vessel with shells for shipment to France. These shells, which weigh about 90 pounds each, are made in the munition factories of Portugal.

PLENTY OF GOOD FRESH AIR

Ventilation Prepares One to Maintain a Condition That Will Throw Off Illnesses.

The last generation feared cold, fresh air, in just about the proportion that this present age courts it. Plenty of good air gets one in a good condition, so that one is able to resist and throw off colds or other illnesses caused by germs, but one should be careful not to overexpose, observes a physical culture expert.

Of course it is not wise to sit in draughts, though they are not so harmful as bad air. It is said that the harm caused by one hour's breathing bad air cannot be undone by breathing good air for the other twenty-three.

Every woman wants to feel that her house is well ventilated. She does not like to think that her family is being poisoned by the air it breathes. There should be one or two windows always open, though there should be no draught. If only one window is opened pull it down from the top as well as up from the bottom. An open fireplace is an excellent ventilator.

Road to Success.

Do not disdain the trivial task that you know is yours to perform. Study it well. Remember, all great achievements are a composite of many details, tiny matters that make possible admirable results. We all want to succeed, to get beyond the half-way station; for we long to reach the City of Success, but if we neglect details, the "little things" so essential to our progress, we shall only find ourselves where all drones and indolent individuals eventually find themselves, sidetracked in the Land of Failure.—Exchange.

JERUSALEM MOST FOUGHT FOR CITY IN THE WORLD

Seat of Christian Religion Wrested From Moslem After 1,200 Years' Rule.

CROSS DISPLACES CRESCENT

Down Through the Ages the Holy City Has Been Prey of Half the Races of the World and Has Been Destroyed and Rebuilt Many Times.

The capture of Jerusalem by the British forces marks the end, with two brief interludes, of more than twelve hundred years' possession of the seat of the Christian religion by the Mohammedans. The last Christian ruler of Jerusalem was the German emperor Frederick II, whose short-lived domination lasted from 1229 to 1244.

In sentiment and romantic aspect the capture of Jerusalem far exceeds even the fall of fable-crowned Bagdad.

Since the days when David wrested it from the hands of Jebusites to make it the capital of the Jewish race, Jerusalem has been the prey of half the races of the world. It has passed successively into the hands of the Assyrians, Babylonians, Greeks, Romans, Persians, Arabs, Turks, the Crusaders, finally to fall before the descendants of that Richard the Lion Hearted who strove in vain for its possession more than seven hundred years ago.

The historic city has been destroyed and rebuilt times without number, only to finally fall for the second time into the hands of Christian British.

Great Moral Victory.

The gigantic British encircling strategy took in, on the south, the little town of Bethlehem, where Christ was born, 2,017 years ago. There seems to be no doubt that the capture of Jerusalem is one of the most stupendous moral victories of the war.

It is a unique fact that British leaders and British armies now, as in the centuries past, are still the tenacious, successful foes of Mohammed's people. In the twelfth century Richard Coeur de Lion, in penitence for fancied sins, decided to absolve himself of mundane taints by engaging in an altruistic campaign for the deliverance of Jerusalem to Christian control. In a series of campaigns he fought the mighty Saladin through many sanguinary battles to a truce. He found it impossible to maintain a maximum fighting strength through the extreme line of communications. Disease and misfortune reduced his armies to nomadic bands, which were, some of them, taken as slaves by the Mussulmans. Others roamed the continent for years or engaged in mercenary wars wherever they found chieftains willing to employ them.

Richard himself became a fugitive, was arrested by enemies while struggling his way through Austria, and only released when friends in Britain raised enormous ransoms.

Interesting Campaign.

It is an interesting campaign that has just been successful in restoring Jerusalem. A glance at the geographical nature of the land over which the British advanced from Gaza to Jaffa to Jerusalem is intensely interesting.

Gen. E. H. H. Allenby, commander of the British forces that captured Jerusalem.

Palestine, an almost regular rectangle, may be divided into four equal parts lengthwise for this purpose. The strip along the Mediterranean sea is flat country, a continuous plain. The next strip to the east is mountainous. It resembles in general character the Catskill country of New York state, except that the hills and mountains are not so heavily wooded.

The third strip from the coast is a great depression through which the River Jordan flows.

The fourth is the plateau land which rises beyond the Jordan.

By taking the coastal route the English were able to advance with little trouble from natural obstacles. Some distance above Askelon the invading army apparently forked, one branch continuing up the coast to Jaffa and the other turning northwestward toward Jerusalem, which lies in the hilly country.

Story of Jerusalem.

The Tell el-Amarna tablets reveal there was an important town on the site of Jerusalem in the fifteenth century B. C., called Ursalimi. The earliest mention of the place in Scripture is in Gen. 14:8, where Melchisedek is called "King of Salem." It next appears as the Jebus, the stronghold of the Jebusites, which long held out against the Israelite invaders.

With King David a new chapter opens, for it was he who made the final conquest of the fortress, joining the lower city with the citadel of Mount Zion. The first temple there was built by Solomon, and the story of its construction and the articles used as outlined in the Scripture story give some idea of its magnificence.

After the revolt of Jeroboam, the city was successively attacked by Sheshak, king of Egypt, 935 B. C.; the Philistines and Arabs, 850 B. C.; Jehoash, king of Israel, 786 B. C., all of whom inflicted more or less damage.

In 701 B. C. Sennacherib laid siege to Jerusalem, but was forced to withdraw. In 597 and more effectually in 586 Babylon took possession of the city, sacked it and deported the "elite" of its inhabitants to Babylon. Jerusalem was then reduced to the position of an insignificant town.

A new chapter begins with the return of the exiles under Zerubbabel and Jeshua 536 B. C. A new temple was begun in 535 and after a long delay caused by the machinations of the Samaritans, was completed in 515. Ezra, with another band of captives returned there in 458 and established the law, while Nehemiah rebuilt the wall, and again Jerusalem became the shrine of Israel.

Lapse in History.

We know practically nothing of its history for more than a century, until in 332, Alexander the Great conquered Syria. The gates of Jerusalem were opened to him, and he left the Jews in peaceful occupation.

The revolt of the Maccabees brought, however, a fresh succession of troubles upon it. It was besieged by the Greeks in 139, 134, 65 and 63 B. C., and the temple was pillaged in 55 B. C. The Roman domination under Herod brought an interval of peace. Herod built a palace, restored the citadel Antonia, and in 19 B. C. began the erection of the third temple.

Jerusalem is very closely identified with the earthly life of Jesus Christ. It was to the great Jewish festival there he was taken by his parents. Here they lost him and on returning found him conversing with the wise men.

It was to the city he looked when he uttered his plaintive cry, "O Jerusalem, thou that killest the prophets and stonest them sent unto thee," finishing by predicting its doom, which occurred just over seventy years later.

It was to Jerusalem he went for the last week of his life, "the Passion week," as we term it, and on entering the city on an ass the thronging crowds cast down branches of palm trees, hailing him as king.

Walk to Golgotha.

His mock trial in Pilate's hall and walk to Golgotha outside the city, where on the cross the world's Redeemer was crucified, add most profound interest to Jerusalem. It was within sight of the city, with the disciples around him, that Christ ascended to heaven, leaving for his followers the command to go out into all the world and preach the gospel to every creature, and to begin the story of the evangel in Jerusalem.

Here 40 days later Peter preached to the thronging crowds assembled at Jerusalem for the Passover. This marvelous sermon created such a powerful impression that 3,000 responded to his summons.

In the early days of the Christian era the Jews were in constant revolt against the Roman power. At length Titus, son of Vespasian, was sent to take and destroy the city. In spite of a heroic Jewish defense and after a siege of 143 days it fell to Titus in 70 A. D.

The greater part of the populace was put to the sword and the city entirely razed by the plow. So that, according to Christ's prophecy, not one stone remained upon another. The numbers who perished in this siege, according to Josephus, amounted to above a million souls, and the captives to almost a hundred thousand.

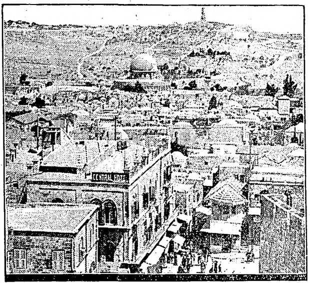
In 134 A. D. the rebellion of Bar Cochba was the signal for another devastation, but in 136 Hadrian rebuilt the city, called it Aelia Capitolina, and generally paganized it. When the Roman empire eventually became Christian, the Jews acquired the right to visit Jerusalem annually to lament over the ruins of their loved city.

In 333 the Church of the Holy Sepulcher was founded. In 362 Julian attempted to rebuild the temple, but was prevented.

The next important epoch was about 460, when the Empress Eudocia visited Palestine and expended large sums on the improvement of the city. A church was built above the pool of Siloam, and after having completely disappeared for many centuries it was recovered by F. J. Bliss when making his exploration of Jerusalem.

The empress also erected a large church in honor of St. Stephen north of the Damascus gate. The site of this church was discovered in 1874 and it has since been rebuilt.

In 532 Justinian erected important buildings, fragments of which remain incorporated with the mosque, but these and the other Christian buildings were ruined in about 614 by the destroying King Chosroes II.



(Copyright, by Underwood & Underwood.)

Heart of Modern Jerusalem.

Justinian a Builder.

A short breathing space was allowed the Christians after this storm, and then the young strength of Islam swept over them. In 637 Omar conquered Jerusalem after four months' siege. Under the comparatively easy rule of the Ommiad caliphs Christians did not suffer severely. Though excluded from the temple area, they were free to use portions of the Holy Sepulcher.

This, however, could not last under the fanatical Fatimate caliphs, who succeeded them, and the suffering of the Christians then led to that extraordinary series of invasions commonly called the Crusades. The Crusaders were a semireligious and a semi-military movement. They represented the passions and ideas of Europe in the twelfth and thirteenth centuries—its chivalry, its hatred of Mohammedanism and its desire to possess the spots hallowed by the sufferings of our Lord. Their long continuance shows the intensity of the sentiments which possessed them. During this period Palestine was harried for about a hundred years and the undying tradition of which no doubt retarded the final triumph of Christianity over the Arab. In 1247 Jerusalem became subject to Egypt for 270 years until the Ottoman sultan, Selim I, conquered Syria in 1517, and Turkish possession has continued to the present day and under rule practically without a history.

Singularly Situated.

In 1187 Jerusalem fell to Saladin, who rebuilt its walls. From 1229 to 1241 the German Christians held Jerusalem, but in 1244 a fearful massacre swallowed up the last relics of Christian occupation. In 1517 it was conquered by the Sultan Selim I, and since then it has been a Turkish city. Selim's successor, Suleman the Magnificent, restored the fortifications, which since that time have been little altered.

The situation of Jerusalem is in several respects singular among the cities of Palestine. Its elevation is remarkable, occasioned not from its being on the summit of one of the numerous hills of Judea, like most of the towns and villages, but because it is on the edge of one of the highest tablelands of the country.

Although to a certain extent the four hills on which it is built—Zion, Moriah, Acra and Bezetha—may still be distinguished, their actual boundaries cannot be traced. The contour of these hills has been changed by the accumulation of debris of past centuries. Jerusalem is connected with its port, Jaffa, by a carriage road 41 miles and by a meter-gauge railway 54 miles, which was completed in 1892 and worked by a French company.

Prior to 1858, when the modern building period commenced, Jerusalem lay wholly within its sixteenth-century walls, and even as late as 1875 there were few private residences beyond their limits. At present Jerusalem without the walls covers a larger area than that within.

The last census gave the population as 60,000—Moslems 7,000, Christians 13,000, Jews 40,000. During the pilgrimage season it is increased by about 15,000 travelers.

PUBLIC ROADS

OPERATION OF A ROAD DRAG

Mistake for Operator to Think That All He Has to Do Is to Drive Team—Get Best Angle.

Whenever the road drag has been tried and pronounced a failure it is safe to say that it was not used often enough or else it was used at the wrong time or in the wrong way. Some operators seem to think that all they have to do is to drive the team and the drag will automatically do the work, but this is a sad mistake.

In the first place the manner of hitching the team to the drag greatly affects its operation. If a short hitch is used the tendency is to raise the front edge of the drag, while a longer hitch makes it cut deeper and move more material. The correct length of hitch to use depends upon the height of the team, arrangement of harness, etc., and must be determined by trial.

Operating a Road Drag.

The amount of skew or angle which the drag makes with the center line of the road also affects the results. The greater the skew (i. e., the smaller the angle between the drag and the center line of the road) the more earth will be moved toward the center. Usually this skew angle should be about 45 degrees, but here again the judgment and experience of the operator must be brought into play.

The driver can control the operation to a large extent by shifting his position upon the drag. When he approaches a high spot in the road he can step foward the front, thus making the blade cut deeper, while at a depression he can step toward the rear, in this way raising the cutting edge and dumping the earth which is being pushed ahead of the drag. By stepping toward the end of the drag nearest the center of the road he can increase the skew and so move more earth toward the center line, while stepping to the other end of the drag has the opposite effect. In road dragging it is especially true that "practice makes perfect" provided that common sense is used along with the practice.

HOW TO PREVENT ROAD DUST

Breaking Up of Ridges Formed When Roadbed Is Wet From Standing Water Causes Trouble.

Dust in the road is largely caused by the breaking up of the ridges formed when the road bed is wet from standing water. If the roadbed is kept well crowned and smooth water will run off. The surface will soften up some in case of a long rain, but it will not be nearly so bad as when there are ruts which hold the water. The wheels of each passing vehicle make the rut a little deeper. The best way to keep the roadbed smooth is to run over it wtih the road drag. This should be done soon after it rains. The soil is then soft so it can be easily scraped off and dropped into any depressions. The harrow also lays the soil down in layers. It sort of plasters it down, which makes a harder surface than when the soil is dumped onto the roadbed. The road drag is the most effective dust preventer except oiling the roads.

ATTENTION TO SIDE DITCHES

Provision Should Be Made to Remove All Surface Water Rapidly—Guard Against Erosion.

Special attention should be paid to providing side ditches which will remove all surface water rapidly. Side ditches on long, steep grades should be protected against serious erosion by riprap, transverse timbers or other beams. Culverts and bridges should be of ample size and be built as permanent structures. Drain tile should be laid to carry off underground water. Side ditches which are kept clean and have sufficient slope to lead the water away are usually preferable to tile drainage, but the latter is necessary in some places.

Agitation in Winter.

Good roads agitation always shows a more rapid pulse during winter, and converts a great number of people who object to traveling over highways that look like an Alpine mountain range. But man has a short and brittle memory. When summer comes and the roads lie down flat again public enthusiasm also lies down and buttons the flaps on its coin pocket.

Drag Whenever Possible.

Drag whenever possible at all seasons of the year.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

INJURY BY RODENTS

Well Fed Rats Breed Often and Have Very Large Litters.

INJURE PRODUCE IN STORES

Not Only Foodstuffs and Forage, but Textiles, Clothing and Leather Goods Are Often Ruined—Cut Off Food Supply.

(Prepared by the United States Department of Agriculture.)

The effect of an abundance of food on the breeding of rodents should be kept in mind. Well-fed rats mature quickly, breed often, and have large litters. Poorly fed rats, on the contrary, reproduce less frequently and have smaller litters. In addition, scarcity of food makes measures for destroying the animals far more effective.

Merchandise in Stores.—In all parts of the country there is a serious economic drain in the destruction by rats and mice of merchandise held for sale by dealers. Not only foodstuffs and forage, but textiles, clothing, and leather goods are often ruined. This loss is due mainly to the faulty buildings in which the stores are kept. Often it would be a measure of economy to tear down the old structures and replace them by new ones. However, even the old buildings may often be repaired so as to make them practically rat-proof; and foodstuffs, as flour, seeds, and meats, may always be protected in wire cages at slight expense. The public should be protected from insanitary stores by a system of rigid inspection.

CAGE TRAP WITH SPLENDID CATCH OF RATS.

Household Supplies.—Similar care should be exercised in the home to protect household supplies from mice and rats. Little progress in ridding the premises of these animals can be made so long as they have access to supplies of food. Cellars, kitchens, and pantries often furnish subsistence not only to rats that inhabit the dwelling, but to many that come from outside. Food supplies may always be kept from rats and mice if placed in inexpensive rat-proof containers covered with wire netting. Sometimes all that is needed to prevent serious waste is the application of a defective part of the building.

Produce in Transit.—Much loss of fruits, vegetables, and other produce occurs in transit by rail and on ships. Most of the damage is done at wharves and in railway stations, but there is also considerable in ships' holds, especially to perishable produce brought from warm latitudes. Much of this may be prevented by the use of rat-proof cages at the docks, by the careful fumigation of seagoing vessels at the end of each voyage, and by the frequent fumigation of vessels in coastwise trade; but still more by replacing old and decrepit wharves and station platforms with modern ones built of concrete.

Where cargoes are being loaded or unloaded at wharves or depots, food liable to attack by rats may be temporarily safeguarded by being placed in rat-proof cages, or pounds, constructed of wire netting. Wooden boxes containing reserve food held in depots for a considerable time or intended for shipment by sea may be made rat-proof by light coverings of metal along the angles. This plan has long been in use to protect naval stores on ships and in warehouses. It is based on the fact that rats do not gnaw the plane surface of hard materials, but attack doors, furniture and boxes at the angles only.

Packing Houses.—Packing houses and abattoirs are often sources from which rats secure subsistence, especially where meats are prepared for market in old buildings. In old-style cooling rooms with double walls of wood and sawdust insulation, always a source of annoyance because of rat infestation, the utmost vigilance is required to prevent serious loss of meat products. On the other hand, packing houses with modern construction and sanitary devices have no trouble from rats or mice.

Garbage and Waste.—Since much of the food of rats consists of garbage and other waste materials, it is not enough to bar the animals from markets, granaries, warehouses and private food stores. Garbage and offal of all kinds must be so disposed of that rats cannot obtain them.

In cities and towns an efficient system of garbage collection and disposal should be established by ordinances. Waste from markets, hotels, cafes and households should be collected in covered metal receptacles and frequently emptied. Garbage should never be dumped in or near towns, but should be utilized or promptly destroyed by fire.

Rats find abundant food in country slaughterhouses; reform in the management of these is badly needed. Such places are centers of rat propagation. It is a common practice to leave offal of slaughtered animals to be eaten by rats and swine, and this is the chief means of perpetuating trichinae in pork. The law should require that offal be promptly cremated or otherwise disposed of. Country slaughter-houses should be as cleanly and as constantly inspected as abbatoirs.

Another important source of rat food is found in remnants of lunches left by employees in factories, stores and public buildings. This food, which alone is sufficient to attract and sustain a small army of rats, is commonly left in waste baskets or other open receptacles. Strictly enforced rules requiring all remnants of food to be deposited in covered metal vessels would make trapping far more effective.

Military training camps, unless subjected to rigid discipline in the matter of disposal of garbage and waste, soon become centers of rat infestation. Waste from camps, deposited in covered metal cans and collected daily, should be removed far from the camp itself and either burned or utilized in approved modern ways.

Ingredients in Eggs.

Lime, nitrogen and phosphoric acid are the principal ingredients in eggs.

GIVE FEED ANIMALS RELISH

While Preference for Certain Food Is Formed by Habit, It Is Better to Cater to It.

Animals are much like human beings in that they have their own individual preference for certain foods. While this preference is formed by habit, to get the best returns with the feeds, it is best generally to cater to the animal's appetite.

Some horses will not do well without oats in the ration. Others do not especially care for oats, but require corn, some require more hay than others, some must have ground feeds. To get the best results such animals should be humored.

Our problem in feeding is to watch the animals and see that they get the feeds they require and no more. Feed left in the trough or scattered on the ground out of reach of animals does not produce.

Even in feeding cattle a skillful feeder will soon learn the different animal's peculiarities and meet their requirements in such a way as to get economical gains. If he does not watch closely he is likely to waste feed while some of the animals are not getting enough.

DRY FEED INSTEAD OF SLOP

Doesn't Freeze Up to Insult Appetite of Hog in Winter—Germs and Odors Are Avoided.

The farmer whose pigs have lost their avidity for slop should try feeding the slopstuff dry. Many a time pigs may be found fastidiously nosing through thick slop, when if dry middlings be placed in a trough hard by they will devour it in fierce competition. Some men like milk toast, and some men don't like milk toast; that is the way with pigs. Try raising a bunch of pigs on dry middlings instead of slop of middlings, and the chances are that the pigs will demonstrate the success of the experiment. Germs and odors don't accumulate around a trough in which dry feed is provided; dry feed doesn't freeze up to insult the appetite of a hog, like slop may do in winter.

DAIRY FACTS

BUILDING UP A DAIRY HERD

Essentials Are Careful Selection, Intelligent Breeding and Skillful Management.

Careful selection, intelligent breeding and skillful management are fundamental in the profitable upbuilding of the dairy herd. By the use of economy and good judgment the improvement of a herd need not be expensive.

Careful selection is the first step in the building up of a dairy herd. Selection naturally begins with the elimination of all low producers. Every owner of dairy cows should establish a definite standard and all cows that do not measure up to the requirements should be rejected. One hundred and fifty pounds of butterfat a year is a fair minimum for most localities. Whether a cow is to be rejected or retained should depend ordinarily on production as shown by the Babcock test and the scales. Only the best heifer calves from the most productive cows should be raised.

High-Producing Holsteins.

FEED CALF SEPARATOR MILK

When Given Alone It Is Liable to Cause Indigestion—Feeding Is Vastly Important.

Separator milk is not a balanced ration for calves. On this feed alone, and the way it is usually given to them, they are liable to get indigestion, as shown by a bloated condition, capricious appetite and diarrhea. Most of the trouble can be avoided by adding a handful of oil meal, to cornmeal or cottonseed meal, to supply, in a way, the fat that has been removed in the skimming.

The milk should be given to them warm and never when it is frothy. Never allow a calf to drink all of the milk that it wants at one meal. It is a bad practice to allow several calves to drink out of one trough, some of them will get too much. Care in feeding calves is of vastly more importance than "cures" for calf scours.

CONTAMINATED AIR IN MILK

Easy to Understand How Foul Odors Are Introduced in Unclean and Unventilated Stable.

If the milking is done in a stable that is unclean and unventilated, filthy and filled with foul odors, it is readily understood how the streams of milk passing from the udder to the pail will force the contaminated air into the pail and impart to the milk its foul odors. The use of the separator under similar conditions must produce similar results.

Odors and flavors are also produced in the milk after it has been drawn, by the introduction into it of undesirable germs in the dust from the stable and the cow and from lack of cleanliness of vessels used in handling it.

FEEDING SILAGE TO CALVES

Begin Early With Small Amount in Connection With Other Roughage, Increasing Gradually.

Calves should become acquainted with silage early in life, beginning with a very small quantity in connection with other roughage and increasing gradually. In this way the young animals develop normally, making rapid gains while the cost is kept at the minimum.

SOLVE DAIRY FEED SHORTAGE

Dairyman Can Make What They Have Go Further by Adopting Plan of Food Conservationists.

Dairymen can solve the feed shortage by the same method other people are using to solve the food shortage. They can make what they have go further. If food economies can result in feeding more people with the same amount of food, the same feed can feed more cows.

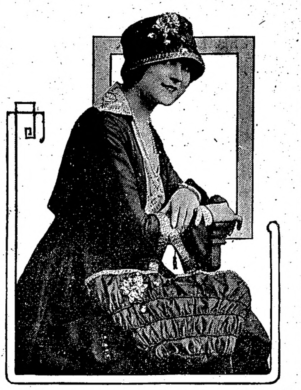
JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter
We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

What Well Dressed Women Will Wear



PROMINENT IN THE WINTER STYLES' PARADE.

People are flocking South in winter like the birds. Railroads have annihilated distance so that the journey between lands of snow and lands of sun is measured by a few hours. The wonder is that anyone who can possibly help it endures the sting of Northern winters for months and months, especially as the genial South has many allurements besides its climate. Among them are the smart clothes that the fair Southern tourist indulges in.

This business of furnishing apparel for winter tourists' wear has become an important factor in establishing fashions and all womanhood is interested in the parade of styles at Palm Beach, Coronada and other centers where people of wealth assemble. The best things that money can buy are seen in these places and they tone up the dress of women all over the land.

For instance, the hat and bag to match shown in the picture above is one of many beautiful matched sets made in anticipation of the demand for smart and novel dress accessories which comes into a rush just about Christmas time or immediately after the holidays. Of course milady of fashion is accompanied everywhere by her knitting bag, and she may have several of these indispensables made to wear with several hats. This set will be just as appropriate in the North as in the South. The small hat is of black taffeta and is a simple affair, shirred over cords. It is faced with a color and bound about the edge with gold braid. The small blossoms applied to it are made of ribbon and are lovely examples of millinery art.

The bag, in the shape of an old-fashioned basket, is made in the same way and its lining matches that of the hat. Its handles are of the gold braid lined with silk and it is flower-trimmed like the hat with ribbon flowers. The shape is a happy thought of the designer giving a quaint flavor of old times to a most up-to-date accessory.

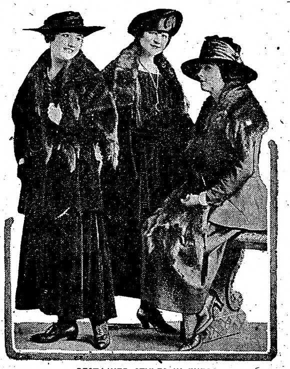
Next to the natural shape of the fox pelt, with head, tail and legs, square capes and straight, wide scarfs of medium length, are the best-liked styles in fur neck-pieces. This is only a general and rather vague description of the great variety of fashionable neck-pieces that smart women find indispensable in all climates. They are as much liked to throw about the shoulders at indoor affairs, after coats have been taken off, as for outdoor wear.

One of the cleverest new scarfs is made of Hudson seal, and is about a yard and a half long and in the neighborhood of fifteen inches wide. At each end of the scarf there is a small pocket, hardly discernable, but quite equal to keeping the hands warm. Along the edge of the scarf, on one side, there is a band of martin fur, four inches wide. It is only half as long as the scarf and therefore does not reach to the ends on either side. It protects the back of the neck and proves a becoming addition to this novel neck-piece.

Another novelty in the same combination is a short sleeveless mantle of sealskin with a wide shawl collar of martin. The mantle is merely a square cape at the back and front, joined at the shoulders.

In the group of neck-pieces shown above, it will be noticed that short tails of fur, along with legs and claws, have returned to favor as a finish; also that neck-pieces are scarfs that look like capes, or capes that look like scarfs, lending themselves to a casual adjustment that is considered very chic. The square cape of kolinsky at the left has a narrow flat collar of the same fur. The scarf at the center is of Hudson seal with fox collar. At the right a longer flat scarf is shown, and this is developed in fox fur. It is liked for all the rarer furs as well as sable, mink, martin. Ermine is at its best in small scarfs and collars or as a trimming on other flat furs.

Julia Bottomley



BEST-LIKED STYLES IN FURS.

TIMING AUTO RACE

Passing of Each Car Recorded to Fraction of Second.

IMPORTANCE OF SMALL WIRE

Little Strand Is Connected With $5,000 Timing Device, Which Automatically Records Time of Different Machines.

It is doubtful if in the excitement of watching one of the big automobile races, where human life and small fortunes in prize money are at stake every minute, with the demon cars catapulting around the track to the accompaniment of endless reverberating exhausts spitting forth fire and smoke, the layman in the grandstand has any appreciation of the ceaseless efforts in the press stand, across the track, to furnish him with absolute accurate detailed records of the event in progress.

At intervals throughout the race he is informed as to what cars are leading, the time of the race to that point, the rate of speed, the number of laps, made, etc.

While the crowd is busy following the progress of the various racers around the track, with an occasional thrilling brush on the back stretch bringing them involuntarily to their feet to cheer some favorite driver, the scorers and timers are tirelessly checking each car as it crosses the little wire stretched across the track, which marks the completion of a lap.

Mission of Small Wire.

Only the official starter, judges, referees, timers, scorers, and the drivers themselves realize the true mission of this small wire—which often escapes the notice of even those spectators in the grandstand sitting nearest it. Few know that in races sanctioned by the American Automobile association this unpretentious little wire is connected with a $5,000 timing device, owned by Starter Fred J. Wagner, which automatically records the time of each car to a hundredth part of a second, observes a writer in the New York Evening Post.

There are but two such devices in America, the other being the property of the Indianapolis Speedway, and used to time all the big races held there. The outfit consists of a time registering device run by a motor and storage battery and a chronometer. The wire which crosses the track is fastened at one end to an electric break-maker.

The operation is this: Whenever a car passes over the wire a "break" is made in the electric current, and this causes the timing device to record the time of crossing. A striking arm imprints the exact time on a strip of paper which passes through the machine. This paper is automatically shifted forward to receive the next impression. The machine recovers from each operation quickly enough to permit the registration of two cars passing over the wire within five hundredths of a second of each other.

Tell Exact Number of Laps.

An assistant calls out the number of each as it passes and the official time recorded by the machine. The scorers also record these numbers as they are called out with small counting machines, and are able to tell the exact number of laps each car has completed at any stage of the race. The position and number of the leading car is indicated by the chief scorer to the starter in time that he may give it the green flag on the next to the last lap of the race. The checkered flag indicates the completion of the race.

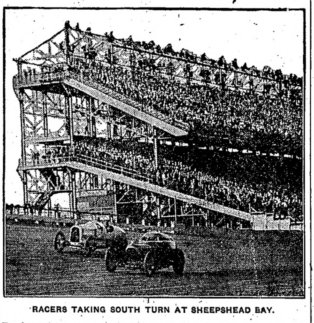
Hardly less important than the timing and scoring, but more apparent to the crowds in the grandstand, is the pit service rendered to each car in the field of racers. Across from the grandstand is a series of compartments, each fronting on the track, commonly known as pits.

Each contestant is entitled to have five attendants, including the team manager, in the pit assigned to his car. But only two attendants are permitted to make replacement of gasoline, oil, water and tires, or crank the motor, when the contestants car is at a standstill at the pit. They are not allowed to make any mechanical repairs or adjustments to the car. These must be made by the driver or his mechanician.

The pit attendants keep a record of the laps made by the car assigned to them and see that the proper tools for emergency uses are at their finger ends when needed. They also see that a reserve supply of tires is available to make any changes that may be necessary. In case of a tire change the entire wheel is removed and replaced by another wheel with tire already mounted. So expert are some of these pit men that tire changes are effected by them in twenty seconds.

Can Signal to Contestants.

Each team of pit men has a system of signals by which they are able to convey to their driver any information desired. They indicate to him the position in the race in order that he may regulate his speed accordingly. After a driver has driven a few laps in a race and has passed another car or has been passed by other cars and becomes bunched with several other drivers—a common experience—he often loses track of his position among the drivers. Here is where the signaling from his pit is invaluable to him. Racing drivers have been known to win important races unknowingly, having lost count of their position in the race.



RACERS TAKING SOUTH TURN AT SHEEPSHEAD BAY.

LUBRICATION WANTS OF CAR

Unless Looked After Carefully Automobile Will Not Run in a Comfortable Spirit.

You may have noticed that some cars seem to run forever. The owners have had them for ten years or more, and like them so much that they will not part with them. It is because they take care of them and look after the lubrication wants in very much the same way as a careful horse owner looks after the wants of his faithful animal.

If the horse is not fed the proper foods and given the proper attention at all times he will not be able to give the service.

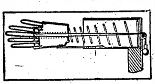
The automobile is the same in that respect. Unless you give it the proper attention it will not run in a comfortable spirit, and it will make known its discomforts by a series of wails, grunts and squeaks that will make your motoring an unpleasant experience.

SIGNAL FOR AN AUTOMOBILE

Washington Invents Device to Represent Human Hand, Operated From Inside of Car.

The Scientific American in illustrating and describing an automobile signal, invented by E. P. Goodwild of Spokane, Wash., says:

The principal object of the invention is to provide an automobile signal formed to represent a human hand, which is so constructed that it may be operated from the inside of a closed car for signaling an intention to stop or turn, to approaching vehicles, the device may be actuated quickly by a spiral spring whose tendency is to force the hand outwardly, whereby to move the fingers and thumb into extend position, this may be accomplished without necessitating the operator moving from his driving position.



Automobile Signal.

TO MEND LEAKY WINDSHIELD

When Heavy Storm Is Encountered Trouble May Be Averted by Overlapping Glass Panes.

With the slanting type of windshield water is very likely to leak through the slight opening between the two panes of glass when a heavy storm is encountered. This trouble may be obviated by making one of the panes overlap the other, which, of course, calls for the fitting of a new upper or lower half.

News of the State

Condensed for Busy Folks

The new grade school building at Bemidji, the Lincoln school in the Fifth ward, will be completed during the holiday vacation, and about the first of the year an elaborate dedication service will be held.

Mrs. E. T. Howard, for over fifty years a resident of Red Wing, died at the Red Wing hospital. She was 75 years of age and the widow of the late E. T. Howard, prominent in the business circles of that city fifteen years ago.

While at Cambridge shopping, Mrs. Eric Terrell of East Cambridge fell in front of the E. F. Gillespie store and although she was taken to a physician's office, nothing could be done for her. She lived only a few minutes after being taken to the office

An appropriation of $1,500 was made by the Clay county board at Moorehead to be used for the purchase of uniforms for the Moorehead Home Guard, the appropriation being made subject to the approval of its legality by County Attorney C. B. Dosland.

The lumber sheds, office building and entire stock of lumber of the Rudd Lumber company at Braham was destroyed by fire. The loss is estimated at $15,000, covered by insurance. The origin of the fire is not known, but is thought that defective wiring was the cause.

Funeral services have been held at Endid for John Schuldt, one of the pioneers of this section of Polk county, who died at the home of his daughter, Mrs. John Geise. He was alone in the home and when found sat in his chair dead, having expired while reading and smoking beside the fire.

George Morrison, formerly clerk at the Arlington hotel at Hibbing, was arrestetd by the Indian agents as he stepped off a street car, charged with importing liquor into dry territory. It is alleged that several quarts of liquor were found on him. Morrison was taken to Virginia for a hearing.

The annual convention of the Northwest Central Minnesota Educational Association was held at Moorehead last week at the state normal. On Friday night a county loyalty rally was held at the normal school auditorium and Dr. Marion L. Burton, president of the University of Minnesota spoke.

Reports have reached Brainerd of a car loaded with Finns and booze which ran into a high bank near Riverton, everything falling out except the liquor. The Finns then hired a teamster to carry them and their cargo, the towline broke, the teamster fell down and got hurt and the team ran away.

A large service flag bearing the figures "6863" has been unfurled from the district headquarters of the Northwestern Telephone company at Minneapolis, denoting that 6,863 employes have gone into some branch of the service since the declaration of war. Of this number the Minneapolis branch has given 112 men.

In view of the increasing shortage of pennies, a movement to give postage stamps as change has been inaugurated in Minneapolis department stores. Several stores reported that they had started such a plan and that it was working successfully. Shortage of pennies in the northwest has become so acute that bankers in small towns have declared an embargo on coppers.

The Swedish Lutheran congregation at Deerwood, which had extended a call to Rev. Ternberg to take the pastorate has received his refusal.

The Federated Farmers' club of Beltrami county has asked the state legislature to reimburse counties for money paid out in bounties on wild animals.

Donald Dow, alias Fred Anderson, convicted of the murder of George Sheffield, Great Northern operator at Moorehead, shot and killed in a holdup there in September, has been taken to the Minnesota penitentiary to begin a life sentence.

Sale of horse meat in Minneapolis in special markets will be allowed if the council acts favorably upon recommendation of the health and hospital committee which approved an ordinance providing for sale of this meat and allowing it to be served in restaurants.

With the purchase for $100,000 of the Dan Patch line cut-off from Auto Junction to Luce Line Junction by C. T. Jaffray and associates plans were set in motion for re-construction of the road from Minneapolis to Northfield and Faribault at a cost of $750,000, according to an announcement made by Mr. Jaffray.

H. E. Flynn, one of the state high school inspectors, represented the Minnesota state high school board in a conference in Washington on war industrial work in public schools. The conference was called by C. A. Prosser, director for the federal board for vocational education, and the call was sent to all state boards charged with administering federal aid under the Smith-Hughes vocational education act.

The grand jury at Mankato has completed its work, returning five indictments as a result of its special labors in the field of alleged disloyalty in the county. The parties indicted are accused of having uttered statements of a disloyal nature. It is rumored that one or two of the accused are women.

A carload of apples is to be sent to American soldiers in France by the Minneapolis Wholesale Credit Men's association. The apples were contributed by merchants on "Commission Row" to a committee of the credit Men's association.

FOOD INVENTORY STARTED IN STATE

SURVEY TO BE BROAD COVERING MORE THAN ONE HUNDRED DIFFERENT KINDS OF FOOD.

MORE WINTER WHEAT AND RYE

Government Crop Estimate Shows Farmers of State Have Patriotically Answered Country's Call For More Acreage.

St. Paul.

The comprehensive inventory of food resources to be conducted in the United States has been started in Minnesota.

Many wholesalers state that they had received inventory blanks from the Washington office of the food administration to make a report on the stock of foodstuffs on hand.

The salesman of the large wholesale concerns have been enlisted by the food administration officials to explain to the merchants in the smaller communities what the government expects of them when they make out their inventories. While the salesmen have been supplied with blanks, the retail merchants will not receive them for a few days.

The survey will be broad, the questionnaires containing questions relative to the eighty-six items and covering more than 100 different foods.

Officials in the office of A. D. Wilson, food administrator for Minneapolis, said they had not been advised of the start of the inventory, but believed it was being conducted from the Washington office.

Schedules also will be sent soon to a number of selected homes, returns from which will be used to compute a general average of the food on hand in the homes throughout the state.

✣ ✣ ✣

Acreage of Winter Wheat and Rye.

Estimates compiled by the bureau of crop estimates, United States department of agriculture indicate that farmers have patriotically responded to the call for increased acreage of both winter wheat and rye. Figures for Minnesota given out from the office of the Minnesota field agent, Paul H. Kirk, at Fergus Falls, make the following showing:

Winter wheat—Preliminary estimate, area planted in fall of 1917 89,000 acres as compared with 87,000 acres last year. The increase of acreage is largely in the south central part of the state where crop is increasing in acreage. Conditions Dec. 1, was 93 per cent normal, compared with 92 a year ago and 93 the four year average. Soil conditions and growth were favorable in the south central counties.

Winter Rye.—Preliminary estimates of area planted in fall of 1917 452,000 acres as compared with 430,000 last year. The dry fall seriously hampered the seeding of fall rye in the northwestern part of the state, where under favorable conditions the acreage would have been considerably increased. However, with favorable spring weather spring rye will be planted. Condition, Dec. 1, was 90 per cent of normal compared with 90 a year ago and 92 the ten year average on Dec. 1.

The extreme dryness in the northwestern part of the state was unfavorable to the best growth and development of crop. The crop in other parts of the state is reported as having made a most excellent growth and goes into the winter under the most favorable conditions.

Mr. U. G. Purssell, Meteorologist of the U. S. Weather Bureau, Minneapolis says, "Weather conditions were unusually fine during November. The precipitation was sufficient over the entire state. No sub-zero temperatures were recorded.

✣ ✣ ✣

State Offers Cheap Wood.

Dead and down cord wood at 25 cents a cord will be offered by the state through a resolution adopted by the Public Safety Commission. Sales on application to the state auditor will be limited to 100 cords to a customer to prevent commercial dealing, according to the plan developed by Oscar Arneson of the State auditor's office. Means to provide fuel for residents in Northern Minnesota was adopted following the report of J. F. McGee, Minnesota fuel administrator, that only 380,000 tons of coal remain on the docks at the head of the lakes.

✣ ✣ ✣

1111 Gopher State Banks.

There are 1,111 active state banks in Minnesota, F. E. Pearson, state superintendent of banks announces. The number will be increased soon by the opening of the Interurban State bank at St. Paul, articles of which have been approved.

* * *

Bank Renews Appeal for Charter.

The Minnesota Public Safety Comsion still has under consideration the request of organizers of the Hutchinson State bank for a reconsideration of the order denying them a charter. The commission heard from Burt W. Day of Hutchinson, who said that S. J. Boelter and W. H. Hartman, president and cashier of the new bank, are loyal Americans, but that 85 out of the 196 stockholders are residents of Acoma, Cedar Mills, Brookfield, and Boon Lake townships, where there has been poor response to war apeals.

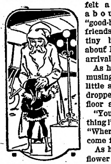
Old Year's Party

By Marguerite Hope

It was New Year's eve and a thin old man with a wizened face was sitting by the fireplace. At first sight you would have said that he was rather a disagreeable old chap, but on closer inspection you found out that he had very bright eyes and quite a humorous smile round his mouth.

It was surprising that Old Year was feeling rather sad. It was his last night on the dear old Earth. The next morning, long before it was daylight, he must fly away in a big snowstorm, and New Year, all fresh and rosy and splendid, would take his place.

Old Year wasn't the least afraid of what the future might bring, only he felt a little sad about saying "good-by" to his friends, and a tiny bit jealous about New Year's arrival.



As he sat there musing a pretty little snow flower dropped on the floor at his feet.

"You beautiful thing!" he cried. "Where did you come from?"

As he spoke the flower expanded, throwing its petals all over the floor, and a little man stepped out. He was white from head to foot.

"Bless me! If you aren't Brother January!" said the old man. "What brings you to visit me? It's only the thirty-first of December."

"But I'm last January," said the little fellow. Old Year laughed. "Of course you are. You came in my waistcoat pocket and popped out before the others—they were afraid of the cold."

"Oh! glad you haven't quite forgotten me. Now listen, Old Year, we Months have a great scheme for tonight. We're going to feast you in the Ice Palace on Time Mountain. We shall all be there, the whole lot of us, and you must come, too."

"You're very kind," said Old Year, "but really I'm so tired I'd rather sit here and dream away my last hours."

"Now, don't talk like that, Old Year, the party can't take place if you don't come. How can we Months hold together without you?"

Old Year smiled. "All right," he said, "I'll come, but all my clothes are worn out."

"Another excuse," cried January. "Come along, they're all waiting. Besides, there's a surprise outside."

Old Year started at the word "surprise," and then he strode out of the house with January on his shoulders.

Now although he had lived every minute of the year there was one thing that Old Year had never done—he had never flown in an airplane. So imagine his astonishment when he saw a great white biplane covered with silver frost outside his door. A gay, breezy little fellow, whom he recognized as March, sat in the pilot's seat. He wore silver goggles and looked every inch an aviator.

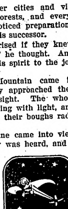
Old Year and January got in behind the pilot, and soon the great silvery bird was soaring up into the cold, starry night.

They passed over cities and villages, lakes and forests, and everywhere Old Year noticed preparations for the coming of his successor.

"They'd be surprised if they knew where I was now," he thought. And then he gave up his spirit to the joy of the flight.

Finally Time Mountain came in sight, and as they approached they saw a dazzling sight. The whole mountain was blazing with light, and the trees shone as their boughs radiated electricity.

When the airplane came into view a great cry of joy was heard, and a chorus of happy voices cried: "Hurrah! for Old Year!" March executed a wonderful volplane and softly the Silver Bird settled to earth at the foot of the mountain. Thousands of little people rushed to greet the Old Year. These were the Minutes and the Seconds. They were dressed in red, sparkling with electricity, and they talked very fast.



Old Year patted them kindly with his big hands. They flew round him very quickly, and in some magic way Old Year was carried to the top of the mountain. There he saw a wonderful ice palace and over the door was written in huge letters "In Honor of Old Year."

Accompanied by the Minutes and seconds Old Year entered the palace, and in the great bright hall he saw 12 of his dearest friends, the Months. Very beautiful they looked in artistic groups about the hall.

January, February and March were standing together in a miniature park, with a lake in the middle of it; they wore winter dresses and February was in skating costume.

April and May were sitting on a grass bank. April was dressed like a beautiful Bloodroot, in a pure white dress, with yellow stars in her hair, and she wore shoes and stockings of a blood red color. May was lovely; she looked like daffodils on a moss bank, and tiny streams trickled off her dress. June was a glorious mass of roses and green leaves. She fluttered with pleasure as Old Year approached her, and threw a rose at him crying: "In memory of the happy morning when you bade me live."

July was resplendent and Old Year felt warm all through when he got near to her. "Beautiful summer month," he murmured, "is this the last time I'll feel you?" As he said this May let one of her little streams trickle down—she was crying for the Old Year.

August wore a sailor costume and smelled of blue grass. September and October were a mass of colors. It wasn't very long since Old Year had visited them, so they were quite familiar with him. October tossed some of her pretty leaves into his face. This was her way of kissing.

November looked hale and hearty, and December, in snowy robe, carried a Christmas tree over his shoulder.

After exchanging kindly greetings with the whole company, Old Year stepped up to June and asked her to open the ball with him. For reply she strewed him with her petals, and then such a dance began as never was seen before. The Minutes flew in by the windows, and the Seconds jumped out of the cracks in the ice floor. Everyone was giddy with joy and excitement, and Old Year, who a few hours before was meditating by the fire, now danced till even lively June began to weary. Then he took sweet April in his arms and the little red feet and legs positively twinkled round the hall. March executed a wild dance with October, and blew so hard that bits of his partner's dress were strewn over the floor.

At half past eleven some of the Minutes screamed out that supper was served, and Old Year and his friends flew to take their last meal together. Every imaginable dainty was on the table and the dancing had made the revelers hungry.

The Minutes and Seconds ate like lightning, and then one after another, they fell asleep round the table. They would never wake again, but their short lives had been very happy. Then the Months began to get sleepy, and Old Year too. He sank into a big chair and tired June fell into his arms and slept cozily in their embrace. At last December and Old Year were the only ones awake. Then the clock struck midnight, and they closed their eyes and slept, too.

At this moment some beautiful snowflakes flew in through the windows. They formed themselves into a kind of blanket and wrapped Old Year tenderly in its folds. Just as they were going to cover up his face a pale blue spirit floated over him and kissed his sleeping brow. It was the Spirit of New Year kissing the Spirit of Old Year.

More Time to Work.

One good New Year's resolution is to complain less and work more.

A New Year's GREETING to All Our Friends

By Mr. and Mrs. Eugene T. Skinkle

If you were superstitious
I'll tell you what we'd
do:
We'd send a bunch of
lucky charms to all of
yours and you;
A swastika, a rabbit foot,
a four leaf clover, too,
A lucky stone, a dry wish
bone, also an old horse
shoe.

But then you know there
is no show for these
old charms of yore,
They've had their day, and
passed away with myths
that's gone before:
So we will send to you,
dear friend, our greeting
full of cheer,
Our kindest love—hovering
above—you all
throughout the year.

OUTSIDE PALE OF HUMANITY

Frightfulness Taught by German Leaders Belongs to Age of Barbarism.

SOLEMN PLEDGE MERE WORDS

Kaiser's Statesmen Had No Intention of Keeping Faith With Their Agreement on International Law —Horrors Told by Diaries.

In giving to the American people the knowledge of German inhumanity in Belgium, says a pamphlet issued by the committee on public information, the evidence is drawn mainly from German and American sources. The German sources include official proclamations and other official utterances, letters and diaries of German soldiers, and quotations from German newspapers. The "Rules for Field Service" of the German army advises each soldier to keep such a diary while on active service.

In the wars waged in ancient times it was taken for granted that conquered peoples might be either killed, tortured, or held as slaves; that their property would be taken and that their lands would be devastated. "Vae victis!—woe to the conquered!" For two centuries or more there has been a steady advance in introducing ideas of humanity and especially in confining the evils of warfare to the combatants. The ideal seemed to have become so thoroughly established as a part of international law that the powers at The Hague thought it sufficient merely to state the general principles in Article XLVI of the regulations: "Family honors and rights, the lives of persons and private property, as well as religious convictions and practice, must be respected. Private property cannot be confiscated." Germany, in common with the other powers, solemnly pledged her faith to keep this article, but her military leaders had no intention of doing so. They had been trained in the ideas voiced by Gen. von Hartmann 40 years ago: "Terrorism is seen to be a relatively gentle procedure, useful to keep the masses of the people in a state of obedience." This had been Bismarck's policy, too. According to Moritz Busch, Bismark's biographer, Bismarck, exasperated by the French resistance, which was still continuing in January, 1871, said:

"If in the territory which we occupy, we cannot supply everything for our troops, from time to time we shall send a flying column into the localities which are recalcitrant. We shall shoot, hang and burn. After that has happened a few times, the inhabitants will finally come to their senses."

Horrors Told in Soldiers' Diaries.

The frightfulness taught by the German leaders held full sway in Belgium. This is best seen in the entries in the diaries of the individual German soldiers.

"During the night of August 15-16 Engineer Gr—— gave the alarm in the town of Vise. Every one was shot or taken prisoner, and the houses were burnt. The prisoners were made to march and keep up with the troops." (From the diary of noncommissioned officer Reinhold Koehn of the Second battalion of engineers, Third army corps.)

"A horrible bath of blood. The whole village burnt, the French thrown into the blazing houses, civilians with the rest." (From the diary of Private Hassemer of the Eighth army corps.)

"In the night of August 18-19 the village of Saint-Maurice was punished for having fired on German soldiers by being burnt to the ground by the German troops (two regiments, the Twelfth landwehr and the Seventeenth.) The village was surrounded, men posted about a yard from one another, so that no one could get out. Then the Uhlans set fire to it, house by house. Neither man, woman, nor child could escape; only the greater part of the live stock we carried off, as that could be used. Anyone who ventured to come out was shot down. All the inhabitants left in the village were burnt with the houses." (From the diary of Private Karl Scheufele of the Third Bavarian regiment and landwehr infantry.)

"At ten o'clock in the evening the first battalion of the One hundred and Seventy-eighth marched down the steep incline into the burning village to the burning village to the north of Dinant. A terrific spectacle of ghastly beauty. At the entrance to the village lay about fifty dead civilians, shot for having fired upon our troops from ambush. In the course of the night many others were also shot, so that we counted over 200. Women and children, lamp in hand, were forced to look on at the horrible scene. We ate our rice later in the midst of the corpses, for we had had nothing since morning. When we searched the houses we found plenty of wine and spirit, but no eatables. Captain Hamann was drunk." (This last phrase in shorthand.) (From the diary of Private Philipp of the One Hundred and Seventy-eighth regiment of infantry, Twelfth army corps.)

Writing from Belgium in 1916 Irvin S. Cobb said:

"Briefly what I saw was this: I saw wide areas of Belgium and France in which not a penny's worth of wanton destruction had been permitted to occur, in which the ripe pears hung untouched upon the garden walls; and I saw other wide areas where scarcely one stone had been left to stand upon another; where the fields were ravaged; where the male villagers had been shot in squads; where the miserable survivors had been left to den in holes, like wild beasts."

Even Soldiers Horrified.

Some German soldiers, we are glad to see, showed their horror at the foul deeds committed in Belgium.

"The inhabitants have fled in the village. It was horrible. There was clotted blood on all the beards, and what faces one saw, terrible to behold! The dead, 60 in all, were at once buried. Among them were many old women, some old men, and a half-delivered woman, awful to see; three children had clasped each other, and died thus. The altar and the vaults of the church are shattered. They had a telephone there to communicate with the enemy. This morning, September 2, all the survivors were expelled, and I saw four little boys carrying a cradle, with a baby five or six months old in it, on two sticks. All this was terrible to see. Shot after shot! Thunderbolt after thunderbolt! Everything is given over to pillage; fowls and the rest all killed. I saw a mother, too, with her two children; one had a great wound on the head and had lost an eye." (From the diary of Lance Corporal Paul Spielman of the Ersatz, first brigade of Infantry of the Guard.)

". . . In the night the inhabitants of Liege became mutinous. Forty persons were shot and 15 houses demolished, 10 soldiers shot. The sights here make you cry.

"On the 23rd of August everything quiet. The inhabitants have so far given in. Seventy students were shot, 200 kept prisoners. Inhabitants returning to Liege.

"August 24. At noon with 36 men on sentry duty. Sentry duty is A 1, no post allocated to me. Our occupation, apart from bathing, is eating and drinking. We live like God in Belgium." (From the diary of Joh. van der Schoot, reservist of the Tenth company, Thirty-ninth reserve infantry regiment, Seventh reserve army corps.)

"Behaved Like Vandals."

"August 17. In the afternoon I had a look at the little chateau belonging to one of the king's secretaries (not at home). Our men had behaved like regular vandals. They had looted the cellar first, and then they had turned their attention to the bedrooms and thrown things about all over the place. They had even made fruitless efforts to smash the safe open. Everything was topsy-turvy—magnificent furniture, silk, and even china. That's what happens when the men are allowed to requisition for themselves. I am sure they must have taken away a heap of useless stuff simply for the pleasure of looting."

"August 6th crossed frontier. Inhabitants on border very good to us and give us many things. There is no difference noticeable.

"August 23rd, Sunday (between Birnal and Dinant, village of Disonge). At 11 o'clock the order comes to advance after the artillery has thorough-up prepared the ground ahead. The Pioneers and Infantry regiment 178 were marching in front of us. Near a small village the latter were fired on by the inhabitants. About 220 inhabitants were shot and the village was burnt—artillery is continuously shooting—the village lies in a large ravine. Just now, six o'clock in the afternoon, the crossing of the Maas begins near Dinant . . . All villages, chateaux, and houses are burnt down during this night. It was a beautiful sight to see the fires all round us in the distance.

"August 24.—In every village one finds only heaps of ruins and many dead." From the diary of Matbern, Fourth company, Eleventh Jager battalion, Marburg.)

All Male Inhabitants Shot.

"A shell burst near the Eleventh company, and wounded seven men, three very severely. At five o'clock we were ordered by the officer in command of the regiment to shoot all the male inhabitants of Nomeny, because the population was foolishly attempting to stay the advance of the German troops by force of arms. We broke into the houses, and seized all who resisted, in order to execute them according to martial law. The houses which had not been already destroyed by the French artillery and our own were set on fire by us, so that nearly the whole town was reduced to ashes. It is a terrible sight when helpless women and children, utterly destitute, are herded together and driven into France." (From the diary of Private Fischer, Eighth Bavarian regiment of infantry, Thirty-third reserve division.)

Too Many Servants in Britain.

Duncan Miller asked the minister of national service, says the London Times, whether his attention has been called to the number of advertisements for servants in households of one, two or three persons, where seven to ten indoor servants are already kept; and whether he proposes to limit the number of indoor servants employed in each household. The minister of national service replied that he had already pointed out how essential it is, in the national interest, that no person should employ more servants than are absolutely necessary. The minister trusts that the awakened consciences of those who have in this respect failed to appreciate their duty will provide an immediate and sufficient remedy. If not, he will tell his plan in the general statement on man power.

AGRICULTURE THE MAINSTAY OF THE NATION

The United States and Canada Have a Great Responsibility.

This is the day when the farmer has his innings. The time was when he was dubbed the "farmer," the "mossback," and in a tone that could never have been called derisive, but still there was in it the inflection that he was occupying an inferior position. The stiff upper lip that the farmer carried, warded off any approach that his occupation was a degrading one. His hour arrived, though, and for some years past he has been looked up to as occupying a high position.

Agriculture, by a natural trend of economic conditions, stands out today in strong relief, as the leader in the world's pursuits. Never in the nation's history have the eyes of the world been so universally focused on the farm. The farmer is the man of importance; the manufacturer of its most necessary product, and he now enjoys the dual satisfaction of reaping a maximum of profit, as a result of his operations, while he also becomes a strong factor in molding the world's destinies.

Manufacturers, business men, professional men and bankers realize the importance of agriculture, and gladly acknowledge it as the twin sister to commerce. In commercial, financial and political crisis, the tiller of the soil takes the most important place. Maximum prices, the highest in many decades, show the world's recognition of the necessary requirement for more farm stuffs. The time was coming when this would have been brought about automatically, but war time conditions urged it forward, while the farmer was able to secure land at reasonable prices. Throughout several of the Western states this condition exists, as also in Western Canada.

Never has such a condition been known in commercial life. It is truly an opportunity of a lifetime. Large and small manufacturing concerns and practically every other line of business have been limited in their profits to the point of almost heroic sacrifice, while it is possible today to reap dividends in farming unequaled in any other line.

Thirty, and as high as fifty bushels of wheat per acre at $2.20 per bushel and all other farm produce on a similar basis, grown and produced on land available at from $15 to $40 per acre represents a return of profit despite higher cost of labor and machinery, that, in many cases runs even higher than 100% of an annual return on the amount invested. Such is the present day condition in Western Canada. How long it will last, no one can foretell. Prices for farm produce will likely remain high for many years. Certainly, the low prices of past years will not come again in this generation. The lands referred to, are low in price at present, but they will certainly increase to their naturally productive value as soon as the demand for them necessitates this increase, and this day is not far distant. This demand is growing daily; the farmer now on the ground is adding to his holdings while prices are low; the agriculturist on high priced lands is realizing that he is not getting all the profit that his neighbor in Western Canada is securing; the tenant farmer is seeking a home of his own, which he can buy on what he was paying out for rent, and many are forsaking the crowded cities to grasp these unprecedented opportunities.

The tenant farmer, and the owner of high priced land, is now awakening to the realization that he is not getting the return for his labor and investment that it is possible to secure in Western Canada. Thousands are making trips of inspection to personally investigate conditions and to acquaint themselves with the broadening benefits derived by visiting Western Canada. Such trips awaken in a progressive man that natural desire to do bigger things, to accomplish as much as his neighbor, and frequently result in convincing and satisfying him that God's most fertile outdoors, with a big supply of nature's best climatic and health-giving conditions lies in Western Canada.

The days of pioneering are over; the seeker after a new home travels through all parts of the country on the same good railway trains as he has been accustomed to at home, but on which he has been accorded a special railway rate of about one cent a mile. He finds good roads for automobiling and other traffic; rural telephone lines owned by the provincial governments; rural schools and churches situated conveniently to all; well appointed and homelike buildings, and everywhere an indication of general prosperity; cities and towns with all modern improvements, and what is the most convincing factor in his decision, a satisfied and prosperous people, with a whole hearted welcome to that country of a larger life and greater opportunities.

To Western Canada belongs the distinguished honor of being the holder of all world's championships in wheat and oats for both quality and quantity. For many years in succession Western Canada has proven her claim for supremacy in the most keenly contested National exhibitions and to her is credited the largest wheat and oat yields America has known. The natural conditions peculiar to Western Canada and so adaptable to grain growing has been an insurmountable barrier for her competitors to overcome. In the last few years the yields of wheat and oats per acre have surprised the agricultural world. As much as sixty bushels of wheat per acre has been grown on some farms, while others have furnished affidavits showing over fifty bushels of wheat per acre, and oats as high as one hundred and twenty bushels per acre. One reputable farmer makes affidavit to a crop return of over fifty-four thousand bushels of wheat from a thousand acres. While this is rather the exception than the rule, these yields serve to illustrate the fertility of the soil and the possibilities of the country, when good farming methods are adopted. Western Canada can surely lay undisputed claim to being "The World's natural bread basket."—Advertisement.

Newfoundland's Sailing Fleet.

Losses of sailing vesels in the Newfoundland trade through storms, German raiders and submarines since the war started have been more than made up by building within the colony and purchases abroad, observes a correspondent. The Newfoundland sailing fleet now numbers 125 vessels, and 17 more are on the sticks, the total of 142 making the largest locally owned fleet in a generation. This is exclusive of boats used only in the island trade. The fleet, made up of schooners ranging from 100 to 400 tons, has a capacity which will enable the colony to take to foreign markets in Newfoundland bottoms the entire catch of cod in island waters, estimated at about 1,500,000 quintals or 168,000,000 pounds.

Catarrhal Deafness Cannot Be Cured
by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces. ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

River of Liberty Pennies.

A new dignity is thrust upon the little bronze coin—useful chiefly hitherto as a means of furnishing us with the world's intelligence. Now the penny takes the front line as a fighter for freedom. Soldiers and sailors will be clothed and armed and fed by them; enemy trenches will be shattered by them; the flag will be carried forward on their current to speedier and greater victory. Why so mean as to grudge them a grouch at the inconvenience? Fit emblem of democracy, let there be reverence and gladness in their giving, whether from the hand of a little child or the coin pocket of a millionaire. Let us be a nation of cheerful taxpayers. All hail the Liberty pennies.—Chicago Evening Post.

Important to Mothers
Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it
Bears the Signature of Chas. H. Fletcher
In Use for Over 30 Years.
Children Cry for Fletcher's Castoria

A Vivid Description.

Recently a man bought a second-hand automobile, which turned out to be a cripple on four wheels rather than a pleasure vehicle. He was describing some of the patient's symptoms to a friend.

"I take it, then, that she rattles a a good deal when you run her?" said the other man.

"Rattles!" said the owner of the car. "She sounds like a skeleton having a shaking fit on a tin roof!"—Tid-Bits.

Hotels Favor Conservation.

More than 90 per cent of the better class hotels of the United States have signed pledges for food conservation including one meatless day and one wheatless day each week.

Poverty Might Help.

Prosperity makes beasts of some men. In a case like that poverty may come along and make men of them.

To Cure a Cold in One Day
Take LAXATIVE BROMO QUININE Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 30c.

A Hard Proposition.

"It takes you a long time to sell that lady a cage for her parrot."

"I'm doing the best I can," said the clerk.

"Our stock is large. Can't you suit her?"

"I think I could suit her, but she's trying to get the parrot to make a selection."

First Chinese Woman Voter.

The first Chinese woman to cast her vote in the San Francisco primaries was Mrs. Ton King-chong, wife of the first member of the Chinese communities in the United States sent to the Chinese parliament.

The Poor Are Cheerful.

There is more cheer among the poor than there is among the rich—there are so many more poor people in the world.—Exchange.

A Fitting Title.

"What does Dauber call his sketch of the moonshiners' camp?"

"A study in still life."

When Your Eyes Need Care Try Murine Eye Remedy
No Smarting—Just Eye Comfort. 50 cents at Druggists or mail. Write for Free Eye Book. MURINE EYE REMEDY CO., CHICAGO

Chinese Plant Statuettes.

Chinese gardeners sometimes plant statuettes of tiny men firmly in pots, just like real plants, and then train live evergreens to grow up over these statuettes. The vines thus form a kind of robe for the statuette men, their white faces and hands protruding from the green leaves.

An Arab's Saying.

"It is well that all men are not rich. Riches corrupt the soul, but virtue enlarges the hope." These words were found in the parchment of an Arabic treatise by some ruler, and 'tis no doubt the bitter verdict of many that are rich today.—Exchange.

What Might Have Been.

"What are you worrying about?" "If I eat eggs I think about the chickens they would have produced, and if I eat chickens I think about the eggs they might have laid; and it's becoming difficult for me to enjoy anything."

Uncle Eben's View of Life.

"Life," said Uncle Eben, "is like a trip in a flivver. If you misses de right way, the harder you travel de worse you gits lost."—Washington Star.

Culture Not Enough.

"Culture is dust and ashes if the spiritual foundations are not well laid, and it takes two, a man and a woman, to lay those foundations."—Dorothy Canfield.

Sugar the Most Common Sweet.

The world has a sweet tooth. It would be difficult to find individuals and probably impossible to find a people who do not like sweets. And of all sweets the most common is sugar, practically all of which is produced from the sugar cane and the beetroot, the beetroot being the source of somewhat more than half the supply. Sugar not only pleases the palate, but it helps to sustain the body, for though it is not sufficient itself, it forms a very useful component of foods, being easily soluble and assimilable.

Injecting Ink Into the Eye.

Sometimes when a scar has been left on the cornea of the eye it is most unsightly. Oculists used to tattoo these scars with India ink, but the method was not satisfactory and has almost been abandoned. Dr. F. H. Verhoeff of Boston describes in the Journal of the American Medical association the delicate operation by which he injects India ink with a hypodermic syringe into such scars, and says the results are far superior to the old-fashioned tattooing.

Garden Hose Restores Vision.

Garden hose, at full pressure, restored a man's sight at San Rafael, Cal., recently. The man, Charles Brown fell 40 feet from the roof of his home. Neighbors turned the garden hose on his head as a first aid measure and after an examination Brown was found to be the better instead of the worse for his tumble. His vision was completely cured. He is wondering whether it was the fall or the garden hose that was responsible.

WAR TALKS

By UNCLE DAN

Number Six

Billie and Jimmie Will Take Military Training.

"I am mighty sorry, Uncle Dan, that this is your last night with us. Can't you stay longer? We boys are having a peach of a time," said Billie.

"Well, if you get more out of it in the way of pleasure than I," said Uncle Dan, "you are going some."

"Billie, I have been talking seriously with your father and mother, about sending you to a military academy and they asked me to talk with you about it."

"Whoopee!" Billie screamed, like a wild Indian.

"Now, hold your horses," said Uncle Dan, "and listen to me. You know I sent my boy, Howard, to one of these schools for a year when he was about your age. He was narrow chested, stoop shouldered, rather loose jointed; he had the big head and needed discipline and physical development. He was growing fast and I wanted him to be strong physically."

"Say, Uncle Dan," said Billie, "I believe your description of Howard fits me pretty well, eh?"

"Well," said Uncle Dan, "to be frank I think it does; you need the same thing. Howard did not like it at first. I am told for a few weeks he had 'rough sledding,' but after he found that the only way was to obey orders, he caught the spirit of the institution and liked it. We did not see him for about six months, then he came home for a few days. We were astonished at his appearance. He had gained about 20 pounds in weight, his muscles were as hard as nails, he stood as straight as an arrow, he was courteous, considerate and manly. His awkwardness had disappeared. The change was wonderful and it was all to the good. Here is a photograph showing 'before' and after taking,' and I am sure no patent medicine advertisement could beat it.

Note the result of six months of military training. Compare lines A-A and B-B in cut.

"Well, mother and I were delighted. That was ten years ago, and Howard says the year he spent at the military academy was the best year of his life.

"Now," said Uncle Dan, with great earnestness, "when such training does so much good, makes better citizens and at the same time fits a man to defend his country, why should not Uncle Sam furnish this training at the government's expense? The government has the right to call anyone to serve in case of war, and without training, a man is worth nothing as a soldier. Uncle Sam has splendid new training camps that will soon be available for the purpose, therefore, here is double reason why the Chamberlain bill for compulsory military training should be passed at once, so that every boy physically fit may have this training and not leave it for his parents to pay for. On account of the expense, not one boy in 50 can take the training now. I am glad that you can do so. These big crops and big prices, I find, make the farmers rather 'cocky,' and that the best is demanded by them."

Billie was up with the lark the next morning, more excited and enthusiastic than ever. He had a plan. He knew Jimmie owned a colt worth $100; that he would make almost another $100 on his potatoes if they turned out well, and that he had from his previous savings, bought a $100 Liberty bond. Billie's plan was to have Jimmie cash in and go with him. He was disappointed to find that Jimmie would still lack about $300 of having enough to see him through. His lip quivering, he said: "I'm mighty sorry to leave Jimmie."

Uncle Dan was silent a moment or two, then he asked Billie to go down to the orchard and get him some apples to eat on the train. While he was gone, it was arranged that Uncle Dan and Mr. and Mrs. Graham would advance the money necessary so that Jimmie could go. When Billie returned he was told about it. He ran to the phone and called Jimmie, saying: "Come on over, run just as fast as you can, I've got the greatest news you ever heard of."

Mercurius.

In the mythology of ancient pagan Rome Mercurius, or Mercury, to give the English form of the Latin name, was the divinity of commerce and gain, and was identified by the Romans with the Greek Hermes. A temple was built to Mercurius as early as B. C. 495, near the Circus Maximus, and an altar of the god existed near the Porta Capena by the side of a well. His festival was celebrated on May 25, and chiefly by merchants who visited the well near the Porta Capena to which magic powers were ascribed.

Great Mangrove Swamps.

Mindoro, one of the larger islands of the Philippine group, is a province by itself and contains 3,953 square miles. It is distant from Manila a little more than 100 miles. Along the shores of this island are more than 30,000 acres of mangrove swamps, with large trees in practically virgin growth, conservatively estimated to yield 50,000 tons of bark readily convertible into approximately 17,000 tons of cutch. Just why this growth should have remained untouched for so long is not explained.

Monks Carved Church Seats.

Church seats carved by monks are to be seen within the walls of the ancient church at Clodock on the borders of Monmouthshire. The edifice was built some eight centuries ago and for many years it had interesting relations with Lanthony Abbey while it was the monks of the adjacent monastery that did much of the beautiful carving within its walls. The fine tower is now so dilapidated that it must be speedily restored if it is to be saved from ruin.

Rules Only for the Weak.

It is one of the weaknesses of mankind that it is forever establishing rules, programs, formulae. They serve their purposes for the guidance of ordinary minds. But the pioneers of thought ride rough-shod through the rulers. They gain the ends they desire by refusing to be directed by what someone else has thought before them, by what teachers have insisted upon as binding.—Exchange.

Best Kind of Play Is Work.

One of the best kinds of play is work. Many of the elements of play enter into work if it is performed in the right spirit. The most satisfying forms of play are those in which interest is excited; competition, with desire to succeed and accomplish some definite end, makes the game worth playing. Work is fatiguing and distasteful when it is lacking in these elements.

Take Pains.

Genius has been defined as an infinite capacity for taking pains, and talent, which is a sort of second cousin of genius, has the same characteristics, observes an educator. One who will take pains enough will meet with a measure of success. And no one who belittles the need of patient, plodding work is likely to succeed, no matter what his endowments.

At Sunday School.

"Give an account of Balaam," said the teacher. "Balaam was a prophet who lived a long way off," replied the student. "After a while he went out for a ride on his donkey, and he got very angry with the donkey and hit him, and a voice from heaven said, 'You must not hit the donkey; it is holy ground.'"

Making Bulgarian Milk.

The milk of the Bulgarians, well known all over the world for its superior nutritive quality, is made by exposing it to the sun, the rapid development of the germs under the action of the ultra violet rays being such that when it becomes dry they are in highly concentrated form.

Moss Is Valuable.

"Moss" is the popular name for several kinds of small flowerless plants which flourish in damp places. In mountainous and wet districts tracts of moss are of great service in retaining the water and preventing sudden floods.

Too Particular.

The girl who thinks more of her georgette crepe waist than she does of her beau and refuses to permit it to get mussed will never march to the well-known tune of Mr. Mendelssohn.—Florida Times-Union.

Some Towers.

The height of the Eiffel tower, Paris is 986 feet; of the Blackpool tower, 520 feet; of New Brighton tower, 570 feet, and of the Woolworth building, New York, 750 feet.

Queer Place for Meteorites.

One of the remarkable features of the ocean's floor is the fact that in some places it is covered with the dust of meteorites.

Silent Applause.

Many a vaudeville actress seems to think she's a big thing because she sings through her nose, like an elephant.—Exchange.

Vehicles Bear Owners' Names.

In England all carts and wagons must bear the owner's name and address before being used in a public highway.

Waiting Room For Stop 13.

During the past few weeks S. D. Rouze, a promient young farmer of Cloverleaf township, has been circulating a subscription list to raise funds for the erection of a small waiting room and platform at Stop 13 on the Electric Line. He fonnd very little difficulty in raising enough money and a carpenter has already commenced work on the building, which will be 8 x 10. This stop is ured more than any stop along the line as several children living west of town use it every day when coming to school and a place to get in in case of stormy and cold weather will be appreciated.

Gives Good Concert.

The Kid Band of Thief River Falls were out here New New Years Day and gave the people of Goodridge a concert in the schoolhouse. A fairly large crowd was in attendance but not so many as might have been if it had been arranged for earlier and given more time to advertise it. The "Kids" rendered excellent music which was enjoined by all present.

After the concert a number of business men and others met up with Mr. Greenfield, leader of the Thief River Falls band, and it was decided to have him come out here once a week and organize a band here. He will make his first visit Fridao evening and all those who are interested in getting a band started here are urged to meet up in the schoolhouse promptly at seven o'clock.

At a recent meeting of the State Safety Commission a resolution was passed authorizing State Auditor J. A. G. Preus to sell at private sale dead and down timber and green hardwood located upon state lands.

The resolution was passed as a fuel emergency measure as the Commission is somewhat alarmed over the fuel shortage, and by proper use of wood for fuel in the timber districts this situation may be relcived to a great extent. The amount of fuel wood is limited to from one cord to one hundred cords to any one person at twenty-five cents per cord.

Application must be made to the timber Department of the State Auditor's office for the timber, stating the amount of fuel wood desired and the legal description of the land upon which the timber is located. A form contract will then be issued and sales made in the order they are received at this office. Payment shall be made upon sale after timber is cut, and paid for before removed from the land.

Oscar Arneson,

Supt. State Timber, St. Paul, Minn

Red Cross Notes.

The following have become members of the local branch chapter during the past few weeks.

Ole Bratland, Ed Kivlie, Ole Geving, E. P. Heggestuen, Mrs. John Eidelbis, John Eidelbis, A. W. Hanson, Caroline Vad, Henry Tolefson, Anton Myrom Mrs. Anton Myrom, L. P. Poppenhagen J. H. Kohler, Joe Fisher.

The Goodridge branch of the American Red Cross will give a Basket Social and dance in the Goodridge Hall Friday evening Jan. 11th. Eusic for the dance will be furnished by Greenfields Orchestra of Thief River Falls. Everyone come and help a good cause along.

ANIMAL HABITS NOT CHANGED

Sheep Run to the Hills, Hogs Grunt as a Signal, Dogs Fashion Their Own Bed.

Sheep, when frightened, always run to an elevation, because their ancestors originally came from the mountains. They always follow a leader. because in the dangerous mountain passes their ancestors had to go in single file. Hogs grunt because their feeding grounds were thick woods, where they could not see one another. and sound was necessary to keep them together.

Dogs have a way of turning around several times before they lie down. This looks very foolish now, but when they were wild things centuries ago, they slept in the tall grass and turned around several times to hollow out a bed, and they have never outgrown this habit, but to this late day they will turn around on a rug just as if they were in the tall grass.

Cats have, perhaps, the most traces of old ancestral habits. Many times they do have a trace of the lion or tiger very near the surface. Their uncertain temper, their purring and growling, their sudden bounds, their tendency to scratch, all come from the forest and the jungle.—Indianapolis News.

The Millennium.

Millennium is a term applied in theology to the thousand years during which Satan will be bound and the martyred saints live and reign with Christ—Revelations 20:2-3. This long triumph is to be preceded by the decisive victory of Christ over the adversary, and followed by a general ressurrection and the temporary release of Satan; then come the last judgment and the new heaven and new earth—Revelations 19:21. All that is positively told respecting the millennium can be read in the Scriptures. To the passages indicated various interpretations have been given, and upon the literal interpretation various theories have been built.

Attempts to fix the date of the advent, the second coming, the dawn of the millennium, have been proved by lapse of time to have been failures. Some of the dates that have been fixed for the beginning of the millennium have been 1785, by a man named Stilling; 1836, by Bengel; 1843, by Miller; 1866, 1867 and 1868, by Doctor Cumming; and 1890, by the Mormon church.

The First Lessons.

The happy and prosperous children are those who have before all else the education that comes by reverence, writes Amelia E. Barr. This education is beyond all doubt the highest, the deepest, the widest and the most perfect of all the forms of education ever given to man. A child that has not been taught to reverence God, and all that represents God to man—honor, honesty, justice, mercy, truth, love, courage, self-sacrifice, is sent into the world like a boat sent out to sea, without rudder, ballast, compass or captain. The manipulation table can wait until the child has been taught to reverence all that is holy, wise and good, and the imagination received its first impulse.

Natural Gas.

Natural gas is probably formed in the earth by a process of natural distillation from the animal and vegetable remains of past geological epochs, and is nearly the same product as is distilled from coal in the retorts of gas factories, only instead of the heat of fires the internal heat of the earth, aided perhaps by chemical decomposition, has caused its formation on a magnificent scale.

Nature's Error.

Sufferer writes us that if nature had known what she was about when she made man, she would have given him two noses—one to have a cold in and one for general utility. Then you could get the first one amputated (as in the case of tonsils or an appendix) and live comparatively happily ever after. We will call nature's attention to it.—Exchange.

Spartan Feminine Poise.

Our idea of poise crystallized into definite form when a perfect 36, almost a stranger to us, with whom we happened to be lunching, inadvertently dropped a grape skin down her decolletage and, except for one slight and almost imperceptible wriggle, gave no sign of nervous disturbance as long as we were around.—Ohio State Journal.

Rabbit Hair Supplants Wool.

Rabbit hair is supplanting wool in the felt hat making industry of Australia, where there are thirty factories in operation at present making use of rabbit fur for this purpose. It is said to be superior to the finest merino, and millions of rabbit skins are made use of annually.

Time for Strategy.

There is no such thing as returning to the days of one's youth. If there were and we were asked if the teacher licked us, our reply would be "Not exactly; we made a strategic retirement after almost losing the seat of our trousers."—Houston Post.

WANTED!

AUG 12 1921

U. S. TAKES OVER ALL RAILROADS

President Wilson Assumes Control and Names McAdoo as Director General.

ACTION TO SPEED WAR WORK

Roads Will Be Operated by Present Officials but as One System—Congress to Be Asked to Guarantee Earnings.

Washington.—President Wilson has assumed control of the entire railway system of the country as a war measure. The railroads will be controlled and operated by the government under direction of William G. McAdoo, secretary of the treasury.

Mr. McAdoo's official title will be director general of railways.

In taking over the railways President Wilson has followed largely the plan adopted in England. The government will guarantee each road shall receive a net operating income equal to the average net income of the three years preceding June 30, 1917. The president in his proclamation further assures stockholders and bondholders in the railroads that their interest will be scrupulously protected.

All regular dividends hitherto declared will be paid and the maturing interest upon bonds and debentures will be guaranteed by the government.

Immediately upon reassembling of congress the president will ask for legislation providing definite guaranties upon these points and also providing that the railways shall be maintained "in as good repair and as complete equipment as when taken over by the government."

Facilities Taken Over by U. S.

Under the president's proclamation the following are taken under United States control:

All railroads, comprising 260,000 miles of lines, valued at $17,000,000,000.

All coastwise, lake and river steamship lines.

All terminals, terminal companies and terminal associations.

The Pullman company's sleeping cars and parlor cars.

The packers' and other concerns' private car lines.

All railroad elevators and warehouses.

All railroads telegraph and telephone lines.

The president also will ask legislation enabling him to solve the labor problem of the roads.

The application for a wage increase averaging 40 per cent is now pending. The men have refused to accept compulsory arbitration while the roads were under private control.

This wage question, one of the most serious problems that confronts the government in operation of the roads, must be settled by Mr. McAdoo.

The president's proclamation states he will take possession of the railways through Newton D. Baker, secretary of war. This emphasizes his determination to run the roads strictly as a part of the military system.

War Department Can Handle Draft.

The fact that the railways are under the war department will simplify the matter of drafting men for work, in case an extreme step should become necessary.

The president's advisers do not believe such measures will be needed. The brotherhoods have demonstrated their loyalty and are depended upon to adopt action now that will guarantee enthusiastic continued operation of the roads.

In selecting Mr. McAdoo for the most powerful place in the administration, the president is known to have been influenced by the fact that Mr. McAdoo has a thorough grasp not only of railway and government finance, but also of the world's financial situation. Furthermore, one of the president's advisers stated, he is a man who does things. He can cut through red tape. These two considerations pointed to the secretary of the treasury as the one to untie the transportation knot.

Power Is Great.

The power placed in his hands is greater than any ever before given a single American other than a president.

He will take possession of every railroad and every system of transportation located wholly or in part within United States boundaries. Street railways alone are excepted. All steamship companies owned or controlled by railroads, will come under his control and operation.

The present officers of the roads will remain in their places, but can be removed, or changed, at any time, by order of the director general of railroads. His authority is paramount even to that of the interstate commerce commission, which hitherto has fixed rates and governed the traffic of the lines.

Working Out Plans for Months.

The plan now put into effect has been worked out by the president through a period of several months. Almost immediately after the United States entered the war it became evident the railroads, under private control, would not be able to stand the strain.

The railway heads were willing to do everything the government demanded, but had not the power to force one road to sacrifice its financial interests in behalf of the general good.

In formulating the plan he will present to congress the president studied the system adopted in England and consulted men experienced in the results of the system.

If the English plan is adopted in its entirety the government will order that government freight and officials engaged on government business be carried free. It then will pay out of public funds to each road a sufficient sum to bring that road's operating income up to the average of the three years preceding June 30, 1917.

McAdoo, while director general of railroads, will retain the office of secretary of the treasury, as the president has pointed out, McAdoo's authority as secretary of the treasury "will enable him to co-ordinate the many financial interests involved and which might, unless systematically directed, suffer very embarrassing entanglements."

The attempt of the railroads themselves to provide this single authority and simplified organization in the existing railroads war board and its special operating committee has proved a failure because of physical limitations, although the president pays high tribute to the ability and zeal of the five rail executives whose efforts have been devoted to the task.

Will Use War Board.

The organization effected by the railroads' war board will be the foundation upon which Director General McAdoo will build the structure of government control. It is not unlikely that some, if not all of the members of the war board, will be associated with Mr. McAdoo in administering the management of the unified lines.

In his statement the president refers to the defects of the system of unification attempted under private control. Several railroads have suffered financially and physically from carrying out the orders of the war board, which require them to be utilized in extremely unprofitable transportation in order that the transportation of war materials might be facilitated.

Need Fear No Losses.

Under government control no railroad will incur such losses. The railroads will not be interested in what class of traffic they handle, will not care whether it is profitable or unprofitable. If it is unprofitable the loss will be made good by the government, for the government assures the stockholders the return on their investment they enjoyed (on the annual average) for the three years ended June 30, 1917.

Under government control the railroads are to be assisted in obtaining the capital necessary to finance the vast extensions of trackage and terminals and the building of additional locomotives and cars made imperative by the demands of war.

May Get Loan Later.

The president says that under government control "the financial earnings of the railways need not then interfere with the borrowings of the government." Railroad investments are to be made attractive to investors by the government guarantee. Eventually a loan may be made by the government to the railroads.

It is said, however, in the selection of Mr. McAdoo for director general of railroads that there lies the greatest promise of government assistance to the railroads in financing their operations and extensions.

The president says that he will ask congress, immediately after the holidays, to enact legislation providing that the rail properties under government control shall be maintained in "as good repair and as complete equipment as when taken over" and that the roads shall receive a "net operating income equal in each case to the average net income of the three years preceding June 30, 1917."

Leaders in congress predict that the legislative branch will act without delay upon the president's recommendations.

President Tells Why He Was Forced to Take Over the Railroads.

By WOODROW WILSON.

I have exercised the powers over the transportation systems of the country which were granted me by the act of congress of August, 1916, because it has become imperatively necessary for me to do so. This is a war of resources no less than of men, perhaps even more than of men, and it is necessary for the complete mobilization of our resources that the transportation system of the country should be organized and employed under a single authority and a simplified method of co-ordination which have not proved possible under private management and control.

The committee of railway executives who have been co-operating with the government in this all important matter have done the utmost that it was possible for them to do; have done it with patriotic zeal and with great ability; but there were difficulties that they could neither escape nor neutralize. Complete unity of administration in the present circumstances involves upon occasion and at many points a serious dislocation of earnings, and the committee was, of course, without power or authority to rearrange charges or effect proper compensations and adjustments of earnings.

Several roads which were willingly and with admirable public spirit accepting the orders of the committee have already suffered from these circumstances and should not be required to suffer further. In mere fairness to them the full authority of the government must be substituted. The government itself will thereby gain an immense increase of efficiency in the conduct of the war and of the innumerable activities upon which its successful conduct depends.

The public interest must be first served, and in addition the financial interests of the government and the financial interests of the railroads must be brought under a common direction. The financial operations of the railways need not, then, interfere with the borrowings of the government, and they themselves can be conducted at a greater advantage.

Investors in railway securities may rest assured that their rights and interests will be as scrupulously looked after by the government as they could be by the directors of the several railway systems. Immediately upon the reassembling of congress I shall recommend that these definite guarantees be given: First, of course, that the railway properties will be maintained during the period of federal control in as good repair and as complete equipment as when taken over by the government; and, second, that the roads shall receive a net operating income equal in each case to the average net income of the three years preceding June 30, 1917; and I am entirely confident that the congress will be disposed in this case, as in others, to see that justice is done and full security assured to the owners and creditors of the great systems which the government must now use under its own direction or else suffer serious embarrassment.

The secretary of war and I are agreed that, all the circumstances being taken into consideration, the best results can be obtained under the immediate executive direction of William G. McAdoo, whose practical experience peculiarly fits him for the service and whose authority as secretary of the treasury will enable him to co-ordinate as no other man could the many financial interests which will be involved and which might, unless systematically directed, suffer very embarrassing entanglements.

The government of the United States is the only great government now engaged in the war which has not already assumed control of this sort. It was thought to be in the spirit of American institutions to attempt to do anything that was necessary through private management, and if zeal and ability and patriotic motive could have accomplished the necessary unification of administration it would certainly have been accomplished; but no zeal or ability could overcome insuperable obstacles, and I have deemed it my duty to recognize that fact in all candor, now that it is demonstrated, and to use without reserve the great authority reposed in me. A great national necessity dictated the action and I was therefore not at liberty to abstain from it.

Crosses Potato With Dahlia.

A. Hickman, an aged gardener of Eureka, Cal., has succeded in crossing the Irish potato with the dahlia, the combination producing a species of potato which is believed to be far superior to that found ordinarily on the market. With the new potato one may have flowers for the decoration of his home and, when the plants have reached maturity, potatoes for his dinner.

VALUE OF SENSE OF SMELL

Nose Is Quick to Detect the Minutest Odorous Particles—Four Tastes of Importance.

Since it is more important to be warned of danger than guided to delights our senses are made more sensitive to pain than pleasure. We can detect by the smell one two-millionth of a milligram of oil of roses or musk, but we can detect one two-billionth of a milligram of mecaptan, which is the vilest smelling compound that man has so far invented. If you do not know how much a milligram is, consider a drop picked up by the point of a needle and imagine that divided into two billion parts, Edwin E. Slosson writes in the New York Independent. Also try to estimate the weight of the odorous particles.

What we call flavor or savor is a joint effect of taste and odor in which the latter predominates. There are only four tastes of importance, acid, alkaline, bitter and sweet.

Co-Operative Farming Profitable.

The citizens of Avon, Monmouth county, N. J., bought up at less than market prices a fine lot of potatoes, lima beans, hay and other products, grown on a 95-acre farm leased and cultivated by the borough to lower the cost of living. The borough treasury has netted a profit of about $1,000 on the transaction.

"HUNS" IMPOSED ABSURD FINES

State Department Archives at Washington Record the Story of Sissonne.

COMMUNE UNABLE TO PAY

Von Buelow, on That Account, Threatened to Destroy Home of Prince of Monaco, Who Appealed to President Wilson.

The universally condemned German system of extorting money from captured communities is shown by the following documents published by the committee on public information:

A striking illustration of the fierce brutality of German methods is contained in the archives of the state department, because the prince of Monaco appealed to President Wilson against the injustice of a fine imposed upon a small and impoverished village. The following documents from the state department archives tell the story. They need no comments.

"Paris, Oct. 27, 1914.

"Secretary of State, Washington.

"Prince of Monaco called this morning and asked that the following case be submitted to the president:

"Prince states that General von Buelow for weeks has been inhabiting prince's ancestral chateau near Reims, historical monument, containing works of art and family heirlooms; that Von Buelow has imposed fine of 500,000 francs on village of Sissonne some miles distant from chateau, because of broken glass found on road near village. Sissonne being unable alone to pay has raised with a number of other neighboring villages 125,000 francs, but Von Buelow has sent two messengers from Sissonne to prince that unless latter pays fine for Sissonne the chateau and adjoining village, as well as Sissonne, will be destroyed on November 1st. Prince has answered refusing to pay sum now but willing to give his word to German emperor that amount would be paid after removal of danger of fresh war incidents. Prince now fearful lest returning messengers, as well as male employees on his estate, be shot because of refusal to pay.

"I have arranged meeting this afternoon between Spanish ambassador and prince, to whom I have suggested that matter be presented to German government through Spanish ambassador at Berlin inasmuch as prince's threatened property is in France.

"HERRICK."

Von Buelow's Threat.

"To the Mayor of the Commune of Sissonne.

"It has been conclusively proven that the road between Sissonne and the railway station of Montaigu was, on September 18th, strewn with broken glass along a distance of one kilometer and at intervals of 50 meters, for the purpose, no doubt, of impeding automobile traffic.

"I hold the commune of Sissonne responsible for this act of hostility on the part of its inhabitants, and I punish the said community by levying upon it a contribution of 500,000 francs (five hundred thousand francs).

"This sum must be entirely paid into the treasury of the Etape by October 15th.

"The inspection of the Etape now at Montcornet has been directed to enforce execution of this order.

"The General Commander in Chief of the Army,

"VON BUELOW."

Protest of Prince of Monaco.

Monaco, Oct, 22nd, 1914.

"Sire:

"I forward to your majesty several documents relating to a very grave and urgent matter.

"The General von Buelow has caused to be occupied since one month and a half my residence of Marchais, situated at five kilometers from the village of Sissonne. The general has levied upon the 1,500 inhabitants of this poor ruined village a war contribution of 500,000 francs, of which they are unable to pay more than one-quarter. Moreover, he has sent to me two emissaries bearing a document in which he threatens to destroy my property and the village of Marchais, over and above that of Sissonne, in the event of my not disbursing myself the sum in question before the end of the month of October.

"That is how a Prussian general treats a reigning prince who for 45 years has been a friend to Germany, and who in all the countries of the world is surrounded with respect and gratitude for his work.

"In reply to the summons of the General von Buelow I have given my word of honor to complete the above contribution in order to avert a horrible action accomplished in cold blood, but adding that as a sovereign prince I submit this matter to the judgment of the emperor by declaring that the said sum shall be paid when the Chateau de Marchais will be free from the danger of intentional destruction.

"I am, with great respect, your majesty's devoted servant and cousin.

"ALBERT, Prince of Monaco."

Letter Addresed to Von Buelow.

"Monaco, Oct. 22, 1914.

"To avert from the commune of Sissonne and that of Marchias the rigorous treatment with which you have threatened them, I give my word of honor to remit to his majesty the Emperor William, should the war come to an end without intentional damage being caused to my residence or to these two communes, the necessary sum to complete the amount of 500,000 francs imposed by you upon Sissonne.

"As a sovereign prince, I wish to deal in this matter with the sovereign who, during 15 years, called me his friend and has decorated me with the Order of the Knight of the Black Eagle.

"My conscience and my dignity place me above fear, as also my personal will shall elevate me above regret; but should you destroy the Chateau de Marchais, which is one of the centers of universal science and charity, should you reserve to this archaeological and historical gem the treatment you have given to the Cathedral of Reims—when no reprehensible action has been committed there—the whole world will judge between you and myself.

"I tender to your excellency the expression of my high regard.

"ALBERT, Sovereign Prince of Monaco."

Deportations and Forced Labor.

Until the present war the whole civilized world has boasted of its advance in humanity. This advance has been marked in many fields, and in none had greater progress been made than in the protection to be given to the private citizen in an invaded country. As far back as 1863, in the "Instructions for the Government of Armies of the United States in the Field," the United States declared:

"23. Private citizens are no longer murdered, enslaved, or carried off to distant parts, and the inoffensive individual is as little disturbed in his private relations as the commander of the hostile troops can afford to grant in the overruling demands of a vigorous war.

"24. The almost universal rule in remote times was, and continues to be with barbarous armies, that the private individual of the hostile country is destined to suffer every privation of liberty and protection, and every disruption of family ties. Protection was, and still is with uncivilized people, the exception."

Reversion to Barbarism.

These declarations were made in the midst of our Civil war—one of the world's fiercest conflicts. A half-century later, after more than 50 years of progress, the German government has gone back to the methods used by "barbarous armies" and "uncivilized people." It has deliberately adopted the policy of deporting men and women, boys and girls, and of forcing them to work for their captors; it has even compelled them to make arms and munitions for use against their allies and their own flesh and blood.

No other act of the German government has aroused such horror and detestation throughout the civilized world. Thousands of helpless men and women, boys and girls, have been enslaved. Families have been broken up. Girls have been carried off to work—or worse—in a strange land, and their relatives have not known where they have been taken, or what their fate has been.

Whitlock's Story of Horrors.

In less moving phrases, but in deadly corroboration, the continuation of the report of Minister Whitlock says:

"The rage, the terror, and despair excited by this measure all over Belgium were beyond anything we had witnessed since the day the Germans poured into Brussels. The delegates of the commission for relief in Belgium, returning to Brussels, told the most distressing stories of the scenes of cruelty and sorrow attending the seizures. And daily, hourly almost, since that time appalling stories have been related by Belgians coming to the legation. It is impossible for us to verify them, first because it is necessary for us to exercise all possible tact in dealing with the subject at all, and secondly because there is no means of communication between the Occupations-Gebiet and the Etappen-Gebiet. Transportation everywhere in Belgium is difficult, the vicinal railways scarcely operating any more because of the lack of oil, while all the horses have been taken. The people who are forced to go from one village to another must do so on foot or in vans drawn by the few miserable horses that are left. The wagons of the breweries, the one institution that the Germans have scrupulously respected, are hauled by oxen.

CONDENSATIONS

The Filipinos are asking for information about how to build American barns.

—

The head hunters of Formosa are making it extremely difficult to take camphor from the forests.

—

Mrs. Harrison L. Smith of Saco, Me., has a Killarney rose bush which, in spite of freezing weather, continues to bloom.

Brazil's coffee crop, it is estimated, will exceed in size the crops of other years. As difficulty has been experienced in shipping coffee to former buyers in Europe, indications are that prices will be low.

—

American manufacturers have built one-handled plows for use in Latin America. Tests have proved the worth and popularity of these implements. Farmers in these countries cannot be induced to use a plow having two handles.

BASIS OF PEACE PACT REACHED

Russia and Germany Come to Provisional Agreement On Important Points.

NOW UP TO AUTORITIES

Delegates to Submit Provisional Agreement To Their Governments—Slav Countries to Decide Own Government.

Brest Litovsk, Jan. 1.—via Berlin and London.—Delegates of Russia and the Central Powers, in discussion of issues, have reached a provisional agreement on important points, including liberation of war prisoners and resumption of commercial relations. These, in the event of a general peace will have to be settled among the nations represented in the negotiations.

In respect to treaty relations, an understanding was arrived at regarding restoration of the situation as it existed when the war began.

Ships to be Returned.

It was provided that certain laws adopted during the war shall be cancelled, and that those affected thereby shall be restored to their previous rights or indemnified.

The rules in regard to payment of war costs and damage were defined in greater detail. Provisions were made concerning damages sustained by civilians outside the war area.

An agreement in principles was reached regarding the reciprocal liberation and return to their homes of war prisoners and interned civilians, and also for return of captured merchant vessels.

Speedy resumption of diplomatic and consular relations is embraced in the understanding. It is set forth that there shall be immediate stoppage of aconomic warfare, establishment of commercial intercourse, and organized exchange of commodities.

A substantial understanding was arrived at on which the basis of economic relations shall be settled permanently.

Seceders May Decide.

Regarding the question of occupied territory the Russians made the following proposals:

"In full accord with the public declarations of both the contracting parties that they cherish no bellicose plans and desire to conclude peace without annexations, Russia will withdraw her troops from all parts of Austria-Hungary, Turkey and Persia occupied by her, while the powers of the Quadruple Alliance will withdraw theirs from Poland.

"In this connection the presence of any troops, apart from national or local militia, in the territories which are voting, shall not be permissible until this question is decided."

N. Y. IN GRIP OF COLD WAVE

Lowest Temperature Known Causes Suffering.

New York, Dec. 31—New York city experienced the coldest weather in the history of the local weather bureau when the temperature at 8:30 a. m., went down to 13 degrees below zero.

Twelve theatres in New York and Brooklyn were thrown open to the poor in search of warmth.

Deaths due to cold were reported. A taxicab driver was found frozen to death in his machine in a garage in Jersey City. A baby found dead in its crib is said to have succumbed to the severe cold, and a traction employe was killed when he became numb and fell in front of a street car. Two were frozen to death in Brooklyn.

Dense clouds of vapor caused, harbor men said, by water being warmer than the air, rose from rivers and bay, virtually suspending harbor traffic.

Hundreds of persons driven from their homes when their coal supplies ran out, took refuge in police stations. Misions and lodging houses were kept busy.

JOFFRE FRENCH "IMMORTAL"

Admitted to Membership by Academy —40 Member Limit.

Paris, Dec. 31.—Marshal Joffre soon is to become one of the immortals of the French academy. This became known after a session of the academy, when the following announcement was made.

"The French academy, having been sounded on the subject of the candidature of Marshal Joure, it has shown itself happy to receive to its bosom the glorious victor of the Marne."

Membership in the immortals is limited to 40 members.

Generals Back From Front Testify.

Washington, Dec. 29.—Recently returned from the French front, Major Generals Wright and Greble, commanders at Camps Doniphan and Bowie, have been called before hearings of the senate war inquiry, to testify regarding conditions in the American expedition. After concluding testimony they probably will describe conditions in their own camps. General Gorgas reported that epidemics at Camps Doniphan and Bowie were caused by overcrowding and lack of heavy clothing.

CHAPTER XXVII—Continued.

—18—

After the meal I yielded to my own need of rest, certain I should be on deck all night, and returned to the cabin. I left my stateroom door open, but in ten minutes I was sound asleep.

What awakened me I do not know. I had a confused sense of some heavy body falling, but no other sound. Yet this impression was so strong, so insistent, that I sat up in the berth, and stared out through the open door into the cabin beyond. I neither saw, nor heard anything, yet did not withdraw my eyes when I got to my feet; then I knew that the dark shapeless object, half under the table, was the motionless body of a man. My throat seemed to contract, and choke me, but I forced a quick breath and stepped forward through the door. The dingy cabin was deserted, not another stateroom door open. The table had been cleared of dishes, a decanter of brandy standing alone on the swinging shelf. Underneath, with face concealed in the crook of one arm, lay a man, an ugly gash in the back of his colored shirt, through which fresh blood was oozing, and dripping to the deck. I sprang forward, and turned him over—Dubois.

I could hardly accept the evidence of my own eyes. How had this thing happened? How did the crippled sailor ever get into the cabin? Whose hand could have struck the blow? and for what purpose was it struck? It was murder, a cowardly slash from behind; no wound which could be self-inflicted, but a blow of deliberate purpose. Who aboard would have reason to seek the life of Dubois? I could think of no one; no cause for such a crime. An instant I stared, dazed, into the dead, upturned face, not even knowing where to turn, in which direction to seek the murderer. I felt as though every faculty of both brain and body was paralyzed by the shock. Yet this was but for an instant. I tried the doors of the various staterooms; all opened at my touch, excepting Bascom's, and proved unoccupied. His was locked as usual, and I felt it useless to disturb the man. Leayord was no longer below; he had doubtless awakened and gone on deck, but I discovered Dade asleep in his old berth down the passage, shook him awake, and compelled him to come back with me. The horror of his face at sight of the dead body only intensified my own, but I had grip on my nerves by now, and was determined to learn the truth.

"Stay here until I find out what is happening on deck. There is nothing to be afraid of, you fool; the man is dead. Yes, you can stand over there, but don't leave until I come back, and keep your eyes open."

As I emerged from the companion, leaving the dingy, death-shadowed cabin behind, the open deck was such a scene of quiet as to appear like another world. Vera was still resting in her chair not twenty feet away. She glanced up, smiling a welcome, as I crossed the deck, but the expression of her face instantly changed as our eyes met.

"What is it, Mr. Hollis? Are we again in danger?"

"There has been trouble below. Let me question you before I explain. You have been here for the last hour?"

"Yes; longer even than that."

"Who have you seen enter the companion?"

"I slept at first, but have been awake for some time. Dade came out on deck a few moments, and then went back again; that must have been an hour ago. There was no one else until Mr. Leayord was called to take his watch."

"Who called him?"

"Olson; he was not below more than a minute."

"And Leayord responded immediately?"

"Yes, so quickly I remember thinking he could not have removed his clothes to lie down."

"And when was this?"

"A half hour ago; he stopped and spoke with me before taking charge of the deck."

"No one has entered the cabin since?"

She shook her head.

"No one, I am sure; Mr. Olson did not go below; he is forward there now. Please tell me what has happened?"

"Dubois has been killed," I explained briefly. "I found his body on the cabin deck. The deed was just done; his fall awoke me from sleep, but before I could leave the stateroom the murderer had disappeared."

"He—he was murdered! You are sure?"

"There was a knife wound in the back piercing the heart. The man died without a sound."

She rose to her feet, her face white, her body trembling so that I put out my hands to her support, and instantly her fingers clasped mine.

CHAPTER XXVIII.

A Maniac on Board.

The horror with which she looked into my face held me speechless. Could it be possible that she suspected, knew, the perpetrator of this crime—that she sought to shield him?

"You searched the cabin? You found no one?"

"Only Dade sound asleep in the steward's stateroom. I awoke him, and left him on watch below."

"There was no one hiding in any of the staterooms? You tried the doors?"

"They were all empty. Mr. Bascom's door was the only one locked."

"You—you made him open?"

"No; why disturb him?"

She drew a quick breath, her eyes on my face.

"You—you have not seen Philip Bascom lately?"

"No, not since we had supper together."

"You saw nothing strange then in his actions, or words?"

"Why nothing that I remarked. He seemed about as usual; more haggard, and nervous possibly, but he spoke cheerfully enough. What can you mean?"

"Oh, I do not really know; perhaps I ought not to say such a thing. I meant to have spoken to you about it before, but so much happened, I forgot. I—I suspect Philip Bascom is insane."

"Insane! Good heavens! why do you say that?"

"He has talked to me so strangely. He—he frightened me, and I was hardly able to quiet him."

"And you suspect he killed Dubois?"

"Who else could it have been?"

There was no answer possible. Every other man on board was already accounted for. The truth was borne in upon me irresistibly. I called Leayord.

The mate thrust his head over the forward rail.

"Do you know if Masters is in the engineroom?"

"I think he is, sir."

"Then call down, and have him send White on deck immediately; and pass the word forward to have Mr. Olson come here."

"Aye, aye, sir; is there anything wrong?"

"I will explain presently; just now I want you to remain in charge of the deck."

Olson arrived first, and I barely had time to tell him briefly what had occurred, when White emerged through the deck opening and reported, his eyes blinking in the bright light, and his face grimy with coal.

"You wanted me, sir?" he asked, with no bluster in the gruff voice.

"Aye, White; you possess the strength and nerve for this sort of job. Miss Carrington here suspects that the owner of this ship has lost his mind. I just found Dubois lying on the cabin deck murdered—"

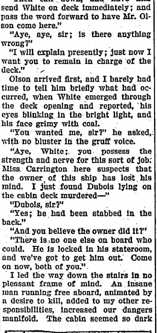
"Dubois, sir?"

"Yes; he had been stabbed in the back."

"And you believe the owner did it?"

"There is no one else on board who could. He is locked in his stateroom, and we've got to get him out. Come on now, both of you."

I led the way down the stairs in no pleasant frame of mind. An insane man running free aboard, animated by a desire to kill, added to my other responsibilities, increased our dangers manifold. The cabin seemed so dark after the brightness of the deck above, that I grasped the stair rail and advanced almost blindly. I had reached the center of the cabin before my eyes discerned that there were two bodies outstretched on the deck instead of one. I involuntarily shrank back, gripping the sleeve of White's shirt, and pointing.



I Almost Fell Forward Into the Room.

"Look here! there are two bodies; he—he has gotten Dade also."

The sailor sprang past me, and dropped to his knees.

"Aye, it's Dade, and the poor cuss is done for, sir—it's another knife thrust in the back."

"And no longer any doubt who did it," echoed Olson, "for there's not another man aboard been aft."

"Right you are," I said, gripping myself ready to act. "And we must get him at once. Come on, both of you; if there's a fight it may take the three of us. He has a knife, and there was a gun in his drawer."

The door of Bascom's stateroom was closed, and I grasped the knob with no thought it would yield to my fingers.

But it did, and I almost fell forward into the room, catching myself, and staring about. The last gleam of the sun streamed in through the stern ports, and every object within was clearly revealed at a glance. The man was not there. I drew back the curtains concealing the bath, but the space was empty; only one of the round ports was partially open, the aperture far too small to admit the passage of a body. The bed had not been slept in, and was neatly made; one drawer of the desk stood open, and papers were scattered on the rug beneath; a chair was overturned on the deck; a chest in one corner had been rummaged, its contents flung aside. My eyes fell on White, his mouth open, his face grotesque in its coating of coal dust.

"Hanged if he ain't got away, sir," he blurted out, "but he never went overboard through that port—a cat couldn't ha' done it."

"No, he's aboard all right," I coincided. "But where? and for what purpose? There is no knowing what a man in his state of mind may do. Good heavens! he could wreck the ship. Get a light, White—take the cabin lantern. Olson and I will have to look behind these doors first, and then we'll explore between decks."

We found nothing, not the slightest trace of the fugitive. Beyond doubt he had gone forward, either seeking to escape, or with the thought that he could attain the deck through some opening amidships. I was cool enough by now to realize the peril we faced between decks, searching for the madman, whom we might encounter at any moment.

"Run on deck, White," I ordered, "and pick up a couple of marling spikes. I have a revolver. Tell Mr. Leayord the situation, and have him keep his eyes open. Better have him warn McCann, and Miss Carrington had best remain near the wheel until we get our hands on this fellow. Hurry back now."

Olson and I remained motionless, our eyes on the black opening leading forward, the dim rays of the lantern falling on the ghastly faces of the two dead men outstretched on the deck. It was a grewsome spot, and my heart was beating like a triphammer. I made sure my revolver was loaded, dropping the weapon into a jacket pocket. White rejoined us, grasping the spikes, one of which he passed over to Olson, who tested the weight in his hand.

"Quiet as a June mornin' up there, sir," he announced, squinting about. "There ain't nobody seen nuthin' of no maniac. I reckon yer better let Olson carry the lantern, so you and I can be sorter free to grip the chap; we're bigger than the mate."

"From what I've seen of Olson he'll do his share of the fighting," I answered, knowing the Swede to be hot-tempered, and touchy about his size. "However, one will have to carry it."

"It's all right, sir," said Olson quietly, "I'll hold the glim, but if that big duffer doesn't stand up to the job, I'll bust glass an' all over his head."

We certainly made a thorough search of it. I doubt if a stray rat got by us without being seen, but from the after-cabin to the engineroom ladder we found no trace of Bascom; no indication even that he had ever passed that way. The effort to locate Bascom's hiding place was absolutely vain—the cunning of the madman overcame our diligence and wit; he had disappeared as though swallowed by the sea, leaving not so much as a clue behind.

Beyond the hole leading to the engineroom below, our advances were blocked by a steel bulkhead, water-tight, pierced by a single door, to be sure, but this was closed and locked securely. "Is there any communication between the forecastle and the hold, White?" I asked, staring helplessly at the steel barrier.

"No, sir; the fo'castle is all above deck."

"How was this door manipulated? Do either of you know?"

"Well, I had charge o' loadin' the after-hold, sir," and Olson scratched his head trying to remember. "That door never was opened but once, when Captain Hadley tested it before we left Baltimore, or maybe after we got out in the Chesapeake. I think it wus opened an' shut frum the bridge, Mr. Hollis."

"That is the usual arrangement, but there is a slot here for a key; still the door is steel, and it looks too heavy for any one man to operate."

I leaned over, and looked down into the lighted engineroom at the bottom of the shaft. All I could see was a great wheel steadily turning.

"Masters."

The engineer stepped into view, and peered up into the darkness; he appeared burly and shapeless.

"That you, captain?"

"Yes. Bascom, the owner, has gone crazy, and has hidden himself somewhere on board."

"Well, I'll be swamped! Can't you find him?"

"Not yet; we've searched every place aft. He hasn't visited you?"

"Not to my knowledge. Tony is back in the fireroom; I'll ask him."

The three of us clung to the ladder gazing down, the light from the lantern revealing our faces. Masters was not gone a moment, but his voice had changed.

"Tony's killed, sir," he called up excitedly. "He's lying on the coal in number one bunker, cut in the back with a knife."

The words were not out of his mouth before we were scrambling down. But our haste gained us nothing. The only trail Bascom had left was the dead Italian, stretched out in the half emptied coal bunker, his lips closed forever. It was a knife thrust which had killed him—just such a thrust as had done for his two mates in the cabin above; but the madman had disappeared. However, here was proof positive that the fellow was still on board; still hiding between decks. He had not reached the open, or flung himself into the sea. Masters could tell us nothing; he had heard no sound, seen no shadow. He had been oiling the machinery, and a man could have slipped down the ladder unobserved, and escaped again in the same way. There was no other entrance to the engineroom; the forward bulkhead was solid; there were two ventilator shafts, but neither was large enough for the passage of a man's body, and the coal chute was kept closed and locked at sea. Nevertheless I had these examined, determined to take no chances, and our lantern penetrated every inch of the engineroom and coal bunkers. At the end, utterly baffled, White gave vent to an oath.

"It beats me, sir," he confessed hoarsely, "unless it's a spook we're a-huntin' for."

"I wish it was; the trouble is it is a man, and a mighty dangerous one. Well, he's not down here, and he must have gone back by way of the ladder. The fellow has either found some means of getting into the hold, or else he's managed to slip on deck and perhaps is hidden in the forecastle—no one messes there now?"

"No, sir."

"Then let's have a look up above; come on, men."

"Yer ain't goin' ter leave me down here all alone, are yer, captain?" questioned Masters anxiously, "with Tony lying' dead in there, an' a murderer prowlin' about?"

"He'll not be down here again, but I suppose you must have a fireman—White, you better stay."

"'Tain't no job I like, sir; I shoveled coal here already for eight hours."

"I'll tackle it, sir," interrupted Olson quietly. "That big boob would throw a fit down here every time he saw a shadow. After you get those hatches off send him in on top o' the cargo. There'd be no danger o' his gettin' hurt if Bascom was a hidin' there."

"Yer a dirty liar! I ain't no more afraid than you are!"

"Then why don't you stay here?"

"I'm plumb tired out shovelin'."

"That will do, men," I broke in sternly. "There will be work enough, and maybe fighting enough for both of you. As long as you have volunteered, Olson, you may take a turn down here, and White will go with me. Keep a sharp eye out, you men below."

The two of us clambered up the iron ladder, the sailor with the lantern in his hand, the marling spike thrust into his belt. I tested the bulkhead door again as we came to it, but it seemed as solid as the steel wall itself, and thoroughly satisfied that it had not been opened since the ship sailed, we mounted to the open deck.

CHAPTER XXIX.

The Work of a Fiend.

In spite of what I knew; of the horror and tragedy I had just left behind; the unspeakable terror of feeling that somewhere aboard, hidden in some black corner, lurked an irresponsible being, with murder in his crazed brain; a being devoid of all impulse, save the frenzy of hate, the desire for destruction, yet the sight of that cool, silent deck, already darkened by the gathering shadows of night, instantly calmed me, and brought back my powers of reasoning. The man was not aft; then he must be forward. It was impossible to hide long on shipboard in the face of an intelligent search. Of one thing I was decided—if the fellow had, indeed, succeeded in slipping forward unobserved, he was never to be permitted to return aft again unseen. I would, first of all, see to it that the decks were guarded, and then the rest of us would hunt him in his hole.

"White, you remain here in front of the cabin, and keep your eyes open. Don't let a shadow get past you aft; you understand?"

"Aye, sir."

"Give me the lantern. There is no knowing what that fellow may do; he might fire the ship, or wreck the engines, unless we get him in time."

"You think he's forward, sir?"

"Where else can he be? I'll put another man at the mainmast, and then run him down."

Leayord, attracted by the gleam of the lantern, leaned out over the poop rail.

"That you, captain? Have you got Bascom yet?"

"No; he has managed to escape, and get forward, but not without leaving another victim behind. Tony Rapello is dead in the stokehole."

"The bloody villain! How did he ever get out of there?"

"Which is more than I can figure out; stole on deck, probably, and then slipped along in the rail shadow. Where is McCann?"

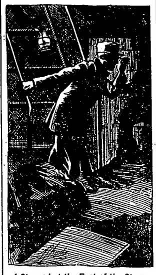
"Just gone forward to fix the ridin' lamps."

"All right; sing out to him to keep his eyes on the deck. There doesn't seem to be a great deal of wind, or sea, Mr. Leayord; do you imagine Miss Carrington could hold the wheel for half an hour?"

"I don't see no reason why she shouldn't, sir; I've seen her do it in worse weather."

"Then ask her, please; I'm likely to need both of you if we round up that fellow. He's crazy and armed, and sure to fight hard. Pick up any weapon you can find, and come down here."

They were beside me almost instantly, eagerly questioning as to what had occurred below, their faces expressive of the deep horror both felt at the situation in which we found ourselves. Under other conditions I know I should have felt sincere sympathy for the suddenly stricken Bascom. His former friendship with Vera, what I knew of his misfortunes, the very conception of the man's character which I had formed myself during our brief acquaintance on board, all tended to make the man an object of pity. The murders he had committed were but the result of a diseased brain, the sudden snapping of responsibility. I could not hate the man, or seek him evil—but I could dread him. That was the whole of it—dread! Here was a man crazed, murderously insane, who had safely tasted blood, whose insanity had been caused by fear, and brooding over a great wrong. In his disordered brain a mad, desperate desire for revenge had overshadowed all else. To obtain this no deed was impossible, no crime too hideous. And this creature was hidden somewhere between decks, and, unless discovered and made captive, held in his hands the fate of every soul on board. The thought of what he might do during the black darkness of the night terrorized me. At any cost we must have him within our control; we dare not even wait to hope that the man might reveal himself—we must go after him, crawling in the dark, feeling within crevice and cavity, until we uncovered his hiding place.



I Stopped at the Foot of the Steps.

I explained this quickly to the two men, hiding none of my own fear, but making them comprehend the desperate need of thorough and ceaseless search. The look on their faces evidenced that my words had gone home.

"He's forward, sir; that's clear enough," insisted Leayord. "We'll nab the fellow in the fo'castle yonder accordin' to my notion. What do yer say, Red?"

"That's how I lay it out," coincided the big sailor, clinching and unclinching his hands. "He sure ain't aft; thar ain't no way I know how he could git into the hold with the hatches down; so thar ain't nothin' left except the fo'castle, an' the forepeak. We'll find the cuss thar all right, sir."

Their confidence had its effect on me.

"Good; White and McCann will guard every inch of the deck, while we take the forecastle first. Bring the lantern, Leayord."

The door was two-thirds shut, and we slid it wide open to gain entrance, feeling our way cautiously down the steps. The place had never been a sea-parlor, but now, deserted by the crew, it presented as dismal a scene, in the dim light of the lantern, as ever I put my foot into. The air was foul with bilge-water, while rotting garments hung to the beams above, or were strewn along the deck. The shadows were grotesque and hideous, and much of the space was cluttered up by discarded sea boots, battered chests and miscellaneous riffraff which the men had left behind in their flight. I stopped at the foot of the steps, but Leayord and Red advanced to the tier of bunks, the former lifting the lantern, while the latter took survey within each. We found no trace of Bascom, but at that I was glad enough to be back again on the open deck, breathing in the fresh night air. It was like a tonic.

Lady Chauffeurs.

As a general thing, the hand that rocks the cradle is a stranger to the foot that kicks the clutch out.—Dallas News.

Brief Items of State News

The East Grand Forks high school debating team will meet the Red Lake Falls high schoool team at the former city on Jan. 8.

Chief Berg of the International Falls fire department is congratulated over the fact that that city escaped a fire on Christmas day for the first time in a good many years.

The first state convention Minnesota advertising men ever have held will be at the Saint Paul, January 22 and 23, and 700 men and women from all sections of the state are expected to attend.

Co-operating with the needy poor of Bemidji on Christmas day, the Associated Charities distributed between thirty and forty baskets, Chief Ripple and his men of the police department doing the work for the association.

Trapped with three small children on the second floor of their Minneapolis home by fire, and with her husband lying unconscious in the hallway from shock suffered in an oilstove explosion, Mrs. Otto Knoblauch threw her children into an improvised net held by two policemen and jumped to safety.

Mille Lacs lake has been opened by the Minnesota Public Safety commission for commercial fishing during the period of the war. Charles E. Lucas of Wahkon has been appointed by the commission as a buyer for the entire Mille Lacs lake country and the state will buy all the marketable fish offered for sale.

The winter term of the Northwest School of Agriculture at Crookston opened Jan. 1 and will continue until March 28. The usual courses are offered this year and will include work in the various branches of agriculture, home economics, farm economics, gasoline and auto engineering, music and farm accounts.

John Bettendorf, son of Peter Bettendorf of St. Paul has been ordained by the Rt. Rev. Bishop Joseph F. Busch, D. D. Rev. Bettendorf celebrated his first solemn mass at the cathedral. He was born and received his early education in St. Cloud and was for some time the assistant cashier of Security State bank.

Edith Lindblom, Minneapolis, was killed and Olga Bolimgren, Minneapolis, seriously injured when an automobile in which they were riding was struck by a Lake Superior transfer freigh train at a Superior, Wis., crossing. Florence Winters, Carl Elgstrom and Robert Lyons, all of Duluth, also were seriously injured. Lyons was driving the car.

Motion for a new trial for Jacob O. Bentall, Socialist nominee for Governor in 1916, who was sentenced to one year in Crow Wing county jail for obstructing the draft, was denied by Federal Judge Wilbur F. Booth. T. E. Latimer, attorney for Bentall, announced he would appeal and a seven day stay of execution of sentence was granted to enable him to perfect the appeal.

Ole Samuelson, an old resident of Thief River Falls was fined $75 and costs for leaving an aged and decrepid horse to die.

Brainerd and Crow Wing county subscribed heavily to Red Cross and countless windows glowed with Christmas candles and the Red Cross service flags.

More than 600 of the 1,100 drafted men in Anoka county have responded voluntarily to a call to organize and begin semi-weekly drills to equip themselves for military service. They will procure their own uniforms and finance the plan themselves.

Miss Doris Conroe Doe, an 18-year-old Hutchinson, Minn., girl took examinations before the state automobile examining board at the state house and was granted a chauffer's license. She said it was her first step towards gaining admission to ambulance work in France. Miss Day was given a 100 per cent score, officials said. She is a daughter of Bert W. Day, editor of the Hutchinson Leader.

A profit of $73,035, the largest in years, was returned by the Minnesota State Fair of 1917, according to the annual report of Secretary Thomas H. Canfield, presented to Governor Burnquist. The secretary said that the year showed a net profit of $33,000 on the Fair grounds property, after making allowances for depreciation and all other items, and asserted that the showing was remarkably successful.

Between 1,500 and 2,000 retail lumber dealers are expected to take part in the patriotic program which will occupy one of the sessions of Northwestern Lumbermen's association in Minneapolis, Jan. 15 to 17. It will be the purpose to bring home to every lumberman his personal responsibility in financing the war, and there will be practical ideas for patriots in the speeches. It is also promised that an officer just recently back from service in the front line trenches will be on the program to give some of the "real dope" on the war.

Bricklayers among Minnesota men subject to draft are in special demand because of a special call for fifty men of that trade received from Provost Marshal General Crowder. General Pershing wants 1,000 bricklayers in France, the message explained, and it is planned to get them from among the draft registrants who have been certified but not yet called for service.

The Rev. Levi Gilbert, editor of the Western Christian Advocate, formerly a Methodist pastor in several Minnesota towns, died at his home in Cincinnati a few days ago.

GERMAN CALLS ON HIS COUNTRYMEN TO OUST KAISER

Bitter Arraignment of Hohenzollernism Written to Be Read by Germans.

EMPEROR ALONE TO BLAME

Senseless and Extravagant Lust for War Plunges World Into Sea of Blood and Tears—Soldiers Urged to Join Entente and Wrest Land From Claws of Destroyer.

> **This article was written by a German to be read by Germans. It was circulated in Germany through the efforts of German republicans in Switzerland who are working for the overthrow of Hohenzollernism and the establishment of a German republic. A copy has just been received in this country and has been translated for the use of the press.**
>
> **COMMITTEE ON PUBLIC INFORMATION.**

By SIEGFRIED BALDER.

Comrades in war!

Three years have passed since the German emperor plunged the world and his people into this most groundless, senseless and impious of all wars, into a sea of blood and tears.

Trained from childhood to be a soldier, brought up amid the perverted views of the junker and officer caste, dreaming of the laurels of the conqueror as the highest ideal, counseled by generals, befriended by war contractors, and even with a financial interest in their profiteering, he has since 1905 systematically paved the way for the war. He desired this war, he permitted the systematic cult of war in Germany by the Pan-Germanists, and he has encouraged it. He supported and fomented the almost daily quarrels of the other powers through the Pan-German press by his inflammatory speeches. Last of all he affixed his signature to the various declarations of war; he is fully and entirely responsible for them.

For nine years the diplomacy of our neighbors, consistently anxious for peace, succeeded in averting this disaster from the world. This was the policy which was falsely presented to your ignorance as the "isolation policy," in reality, a peace policy in which Germany was always most heartily invited to participate. Germany was not isolated, but the German government, and in its wake the Austrian government, deliberately and maliciously withdrew from the circle of civilized nations, as criminals from human social circles.

But not only the diplomatic circles of foreign states, but also German men of insight and lofty ideals have placed themselves firmly in opposition to the emperor's senseless and extravagant lust for war, in spite of his wrath, and have sacrificed their positions rather than their convictions. This was true in the case of the president of the Reichsbank, Doctor Koch, and even of the emperor's brother, Prince Henry of Prussia. On the 31st of July, 1914, he urged the emperor to desist from the war, and when he failed in his attempt he flung at the emperor's feet his commission as grand admiral and commander in chief of the German navy.

FACTS NOT GIVEN TO GERMAN PEOPLE.

Up to the last moment (England even held out until noon of the 4th of August, 1914, when the German army had already swept like a torrent over the boundaries of the neighboring countries on every side) the rulers, ministers and diplomats of England, Russia, France and Serbia did all that lay within human power, even to the utmost self-abnegation, in order to preserve peace for the world. This fact is clearly manifest; the documents concerning it set it forth in black and white to the gaze of the world. They are acknowledged as authentic by the German government, but they are naturally withheld from the German people. **No one wished to attack us, either then or at any later time. All that Austria could ask of Serbia with even the slightest semblance of justice was freely granted.**

Thus from the very beginning of the war the sympathy of the entire world belonged properly to our neighbors who had been so wantonly attacked. But it did not stop at sympathy; the scoundrels who govern you and control you, by the colossal atrocity of their methods of warfare, by such brutality as in itself to be a menace to the whole neutral world, by disregard of all established treaties, managed step by step to enrage all civilized humanity to war against us.

If a bloodthirsty maniac should be let loose on the streets those whom he attacked would defend themselves. All peace-loving men would hasten to their rescue; only cowards would slink timidly away. This is today the attitude of the world toward Germany. **There will be no peace, and justly so, until the murderer is imprisoned and shorn of his power to harm.**

THIS MURDERER IS GERMAN EMPEROR.

Comrades in war, this murderer is the German emperor and his government; that is to say, the men whom he himself has chosen for his infamous plan, without consulting the people and without regard for their wishes, and these are accomplices he has selected after men of honor have refused their services. In the spring of 1914, by an overwhelming vote of lack of confidence, the reichstag showed its distrust of the only man whose signature the emperor needed for mobilization and declaration of war, Bethmann-Holweg, his imperial chancellor. In no modern civilized state would it be possible for a minister to remain in office after being openly branded by the representatives of the people as unfit, but in Germany any criminal may become and remain imperial chancellor at the will of the emperor alone. Punishment has already found him out. Another lackey has been promoted to lackey-in-chief, without consultation with the German people and their representatives.

This murderer is the German emperor with his accomplices; but not the German people, the poor people defrauded and exploited by their government; not the poor soldiers, who are driven to slaughter by these knaves under the iron shackles of military law, like the miserable galley slaves of old.

Comrades, how long is it your wish to put up with this? When will you rouse yourselves? When will you take arms on the side on which every man of honor must now fight; on the side of humanity and civilization against this gang of slayers? When will you free our poor, down-trodden, famished people from its tyrants, and again establish justice, liberty, morality, reason and civilization in Germany?

JOIN FIGHT ON SIDE OF JUSTICE.

Why not come over to fight on the side of justice, of truth, of freedom, all of you; the side on which all civilized nations as well as the noblest and most far-seeing of your own people have taken their stand?

I know the reasons which hold you back:

1. Your ignorance; the false doctrines with which you were inoculated in your school days in all matters of history, civil life and politics; the pretentious lies of the German press, whipped into line by a military dictator; your implicit confidence in your "God-given" leaders.

2. Fear of your masters, especially of the officers. But these hangmen of the kaiser are cowardly and hide themselves in time of danger behind cover. Shoot them down like mad dogs if they get in your way. Rather that they die than the hundreds of thousands of honest, industrious fathers of families whom they have already hunted into the jaws of death; a hunt which day by day goes on.

3. Fear of committing an unpardonable crime, and of being unable to return home even if you escape punishment. **BUT THE LAWS BY WHICH THE MURDERERS MAINTAIN THEIR POWER AND MAKE YOU TRUCKLING SLAVES SHALL BE BLOTTED OUT BEFORE THE WAR IS AT AN END, AND YOU WILL BE JOYFULLY WELCOMED HOME WITHOUT DISGRACE, AND MORE THAN THAT, WITH THE HIGHEST HONOR, AS TRUE HEROES AND LIBERATORS OF YOUR COUNTRY.**

4. Fear of injuring our fatherland if you go over to the French and English, and more than that if you fight on their side, which is a matter for your own choice.

Comrades, I pledge you by all that we hold holy, I am a son of the German people, I love them with every fiber of my being, more than ever a Hohenzollern loved them; and the honor and welfare of my fatherland stand above all else, and are the only lodestars of my destiny. I know the war, the events leading up to it, its causes, and its progress—more than the kaiser's government likes. I assure you that **the welfare of the German people demands that you come over; aye, that you turn your cannon around, that you join the entente and march with them to the Rhine and over it, and wrest our land from the claws of its destroyer, for now and for all time.**

FREE MANKIND FROM AN INSANE CRIMINAL.

There are only two possible ways of ending this war: Either humanity, without you, without the co-operation of the German people, will annihilate Prussian junkerdom, and will starve out the German people that thus they may free mankind, for now and forever, from a curse which rests upon them with the weight of Alpine snows; from any insane criminal on a throne who, by a stroke of the pen, may change millions of men into corpses and cripples, and ruin the industry and welfare of a nation; either this or you yourselves will assist in the task of freeing mankind. **PEACE WILL NOT COME ONE HOUR BEFORE THIS GOAL IS REACHED, BUT NOT ONE HOUR LATER.** But if this goal should be reached without you and in spite of you you will be ground down into ruin, and what is more, the people of our German fatherland will be given over to the will of the conquerors. Then your intellectual and political leaders, the true leaders who are not the lackeys of the emperor, will have no right and no opportunity to interpose a word concerning the future order of the world and of Germany. But if you co-operate, and that with all your might, to carry out this purpose, the honor of the German people, which is today scorned as merely an insensate tool in the hands of murderers, will be restored; and more than that, you will have a voice in the establishment of the new order of the world and of Germany. And take my word for it we shall have peace, and we can have it on such terms that the German people will be happier in the future than they ever were before the war. But leave us in the lurch, and we must recognize with sullen rage and scorn that we are the fellow countrymen of hopelessly deluded slaves, upon whom will rest the blame for their own ruin and for the annihilation of Germany.

EMPEROR WICKEDLY DECEIVED YOU.

Comrades in war, you have taken an oath of allegiance to your flag. But the emperor, too, took an oath at the beginning of his reign, an oath of allegiance to the German constitution. The confederation which forms the German empire was established according to this constitution, **"TO PROTECT THE UNITED PROVINCES AND THE LEGAL RIGHTS THEREOF, AND TO PROMOTE THE WELFARE OF THE GERMAN PEOPLE."** To guard it is the foremost, indeed the only, duty of the German emperor. If this purpose cannot be accomplished without war, then the emperor may declare war, but not until then. But the **emperor wickedly, wantonly, by deceiving the German people, by misrepresenting facts and by forging official documents, by breaking sacred treaties which he as the defender of justice should have observed, has overthrown Belgium, declared war on Russia, France and Serbia, and has thereby violated the laws of justice and the constitution; has hurled the German empire down to ruin and has wrecked the welfare of the German people.** The oath which you have taken means allegiance merely to an emperor who is the protector of the German people, the guardian of their constitution, the true preserver of their welfare; it does not mean allegiance to burglars, murderers, rascally drummers for greedy cannon makers. But you took no oath against the German people whom it was this emperor's duty to protect; whom you must now protect without him and against him, a miserable wretch who betrays his country in the hour of greatest danger, who either from stupidity or from cowardice works against the good of his people.

KNIFE AT GULLET OF SCOUNDRELS WHO RULE.

Let every man who loves the German people and the German fatherland come over! The password which is to be given at the French posts is:

REPUBLIC!

He will meet not only French and English and Americans, but also German patriots, whose concern it is that our fatherland, the fatherland so shamefully and treacherously sold by its rulers by divine right, should not be annihilated; and he will be welcomed with honor by the French if he gives this password, and will be well treated.

Comrades in war, the knife is at the gullet of the scoundrels who rule you, **and they would rather starve and bleed the German people to death to the last man than make peace, or even make known the object of their war.** For they know very well that the hour of reckoning has struck for them when they can no longer suppress the truth beneath their martial law, and trample freedom in the dust. Before we make peace, therefore, and in order to make peace, we must first reckon with them.

DUCHESS OF ABERCORN

England's titled men and women are in this war to win, and are actuated by the same motives and feelings as the humblest Tommy. The noblemen of England have as a whole gone into the army or navy and have proved their courage and sacrifice as evidenced in the day's citations and casualty lists. The women are also doing their bit. Few of England's prominent women are not enrolled and actively working in the various service leagues assisting the government. The Duchess of Abercorn has two daughters in war service. One is working in a munition factory and the other is in the Red Cross service.

Dog Saves Three.

Altoona, Pa.—A barking dog saved Mr. and Mrs. Scott Steele and their baby from probable cremation recently, when their home at Lakemont was burned.

The dog barked, whined and scratched at their bedroom door until the family was awakened. The lower portion of the house filled with smoke. Steele had just time to guide his family to safety when flames cut off the stairway.

What
Can
We
Do?

Trained nurses are urged by the Red Cross to enroll for service in European hospitals. Nurses who can leave this country at any time, for foreign service, are needed or will be, and it is very necessary that they should enroll at once.

The woman's bureau of the Red Cross has published a leaflet which may be had by applying at any chapter, describing layettes for French or Belgian mothers who may need them. With regard to these simple outfits of warm baby clothes the Red Cross has issued the following:

"The articles and garments in the layette have been chosen upon the advice of the woman's bureau representatives who have returned from a two months' investigation of allied needs in France. The Red Cross is anxious that these baby clothes be made by women working at home instead of in the chapter workrooms.

"The garments are very simple. Great emphasis is laid on the purchase of extremely durable materials, since owing to the coal shortage in France, hot water is available in most villages only twice a week, while the greater part of the laundry work is done in icy streams. The method of cleansing is by pounding with stones. Warm baby clothes will save many a child who otherwise might perish this year.

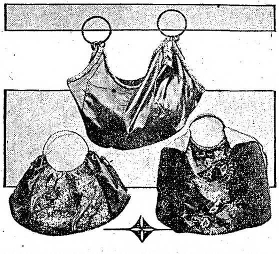
"The layette will, if necessary, serve also for civilian relief here in America.

"Patterns described in the leaflet can be obtained at Red Cross chapters, and at practically every retail dry goods store with a pattern counter. The outfit calls for:

"Two daisy-cloth or outing flannel dresses, one flannel or knitted or crocheted jacket, three bleached muslin jackets, three thin white flannel brassieres, one flannel or daisy-cloth hood, two pairs of bootees, two swaddling cloths or woolen blankets, three flannel binders, twelve diapers, three undershirts, one bonnet and a bag filled with sundries for the little newcomer into a warring world. Wherever possible the Red Cross urges that the layette be completed before it is turned over to the chapters for shipping. Where this is not possible, single articles will be acceptable.

"Members of the Junior Red Cross, little girls in the grammar grade sewing classes, have offered to help with the baby clothes; and many women in rural districts will find these simple contributions to the winning of the great war and the comforting of French motherhood, easier to make than cutting hospital garments for men or struggling with the wool scarcity when they have volunteered to knit."

Attending to Our Knitting



There is no prospect now of a respite from the necessity to knit and if such a respite were in sight there are many women who would not take advantage of it. This knitting for the soldiers turns out to be a fascinating occupation that quiets the nerves and satisfies the heart's desire to do something worth while.

There is no end to the demand for warm sox, for scarfs and sweaters and helmets, and there is no limitation to the willingness of women to make them; so we are destined to go on knitting. Even the end of the war will hardly see the end of our devotion to the good, old-fashioned art. By that time we shall have become addicted to it—and also to the necessity of being useful.

The knitting bag is the outward and visible sign of our patriotic industry and every day brings out new ones. The last arrivals are somewhat smaller than the sweater bags that were so numerous in the summer and fall followed by knitting bags patterned after them. Satin and ribbon are used for making many of these new bags, in plain and printed weaves and in brocaded and embroidered patterns. They are designed so that they can be easily carried on the arm and to make the knitting so accessible that everywhere their wearers sit down for a quarter of an hour, or even less time, the knitting goes faithfully on. Three ribbon bags are shown in the group illustrated. The largest bag is made of rose-colored ribbon in five strips, herringbone-stitched together. The end strips are trimmed in a curve and the edges are finished with a narrow plaiting of inch-wide satin ribbon matching the bag. Small rings with cover of crocheted silk floss suspend the bag from large metal ring handles.

The bag at the lower left of the picture is made of black satin ribbon set at each side of a handsome brocaded ribbon, with black ground and flowers in many rich colors. It is suspended from two narrow metallic rings, one of them set with a few mock jewels in colors. A handsome black silk tassel finishes each end of this dignified bag.

Wide black velvet ribbon at each side of a richly embroidered satin ribbon serves to make the handsome bag at the right. The trumpet flowers embroidered in red silk in a black ground are enriched with silver threads entwining their stems and foliage and brightening the blossoms. This bag is lined with soft green satin and is suspended from large satin-covered rings.

Julia Bottomley

Feather Hats.

The feather hat for afternoon deserves a place all by itself. All the best French milliners have sponsored it and, what is more to the point, have sent over such models that they are sure to be taken up and worn.

After all, in a new mode the principal thing to make it a success is that it shall be so new and attractive that a woman just cannot ignore it.

Embroidery on Velour.

Women are used to wool embroidery on street suits. And now they find floral designs, worked in silk, on suits of velour—floral designs such as once could have been considered suitable only for centerpieces!

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

EMEU AND OSTRICH.

"The emeu family," said Daddy, "look a little like the ostrich family. At any rate they are similar in size.

Mrs. Emeu.

"They have very long legs and instead of beautiful feathers their bodies are covered with something which looks very much like gray hay. Their necks, which are long, also have the same kind of hay covering.

"They are becoming very rare and are such strange creatures that sometimes they are called birds and sometimes they are called just 'Creatures.'

"Mr. and Mrs. Emeu were calling on Mr. and Mrs. Ostrich one day when Mr. Ostrich began talking of the children.

"'You see,' he said, 'we looked after them together, and so they are very fine—our children. In the daytime Mrs. Ostrich would sit on the eggs and at night I would tell her to rest and I would sit on them.'

"'Yes, we divided our time over the children,' said Mrs. Ostrich. 'In fact it's usual with our families for the fathers and mothers to share the attention given to the children.'

"'Our children speak well for our training,' said Mr. Ostrich. 'They like being pets of both their daddy and mother and even though they are only eggs at first and know nothing about it, they feel, when they reach the open world, that they are as fine as they can be.'

"'It's good of Mr. Ostrich to help me,' said his wife. 'I get tired enough sitting on the eggs all day. I'm glad of the rest when night comes.'

"'Of course,' said Mr. Emeu, 'it is something the way with you as it is with us. I help Mrs. Emeu, but then I find she lets me take over all the work to do.'

"'To be sure,' said Mrs. Emeu. 'And why not? I always say to myself, that if you're willing to work, it would be foolish of me to stop you. Yes, that is what I always say.'

"'You certainly do,' said Mr. Emeu, 'and you live up to your words too.'

"'Don't you sit on your eggs during the days?' asked Mrs. Ostrich. 'I like to have a hand in the hatching out of the eggs.'

"'I hardly call it having a hand in the hatching when you sit on the eggs, my love,' said Mr. Ostrich with a foolish smile. 'And besides you haven't a hand.'

"'I know,' said Mrs. Ostrich, 'but it's something creatures and people say so I thought I would too.'

"'You asked me a question,' said Mrs. Emeu. 'Do you or don't you want to have it answered? From the way you are going on talking it would appear that you do not wish to be informed.'

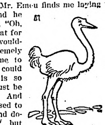
"'How grandly you talk, Mrs. Emeu,' said Mrs. Ostrich. 'To be sure I do wish to have my question answered.'

"'She talks grandly,' said Mr. Emeu, 'because she can spend her time thinking of words and so forth. She does not have to work, nor even look after her children.'

"'Right, my dear,' said Mrs. Emeu, 'but as I said before you always offer to help me, so I give right up to you.'

"'You give work right up to me,' agreed Mrs. Emeu.

"'You see it is this way,' Mrs. Emeu explained. 'Mr. Emeu finds me laying the eggs and he always says, "Oh, can't I do that for you?" Now wouldn't it be extremely foolish of me to say that he could not. If he is so willing, I must be willing too. And then I get used to being idle and doing nothing but wander about and I forget about Mr. Emeu until I find he is looking after the children.'



With a Foolish Smile.

"'I think you forget about me on purpose,' said Mr. Emeu, 'but it makes no difference—for I do not mind hatching the eggs in the least.'

"'Do you hatch the eggs?' asked the ostrich.

"'Yes,' said Mr. Emeu, 'Mrs. Emeu lays them, then I hatch them out and what is more I look after the children until they are able to care for themselves.'

"'Well, that is strange,' said Mrs. Ostrich. 'We like to divide the time.'

"'It all simply means,' said Mrs. Emeu, 'that you follow the ways of the ostrich family and I follow the ways of the emeu family.'"

As a Starting Point.

There are some people who make their start just about the time that others are giving up. When everything looks dark and discouraging they roll up their sleeves and pitch in. People who have the root of success in them never think of surrendering because they have failed once. They make that failure the starting point of another effort, and hold to it with a persistence and a determination which are bound to win in time.—Girl's Companion.

DAIRY FACTS

WHAT MAKES YELLOW BUTTER

Real Source and Nature of Natural Color Found by Dairy Department of Missouri College.

Everybody likes yellow milk and butter, but sometimes the color is absent. This absence is especially noticeable in butter. Chemists investigated the cause of this variation in color as long ago as 1830, but it remained for the dairy department of the University of Missouri college of agriculture to determine the real source and nature of the natural color of dairy products. Three years of investigation not only showed the cause of the natural color but made clear the nature and source of the yellow color that is found in the body fat of cattle. The color in the tallow is exactly the same as that found in butter. Cows that give yellow butter have yellow body fat, while those which give a whiter butter have whiter body fat.

The coloring matter in both cases is carotin, so-called since it was first found in carrots. The yellow color in milk and butter is not made by the animal but comes from the feed. This coloring substance is found in all green leaves, which accounts for the yellow butter in summer. By continued feeding of feeds free from coloring matter it was possible, in the experiments conducted by the Missouri college of agriculture, to obtain white butter from a Jersey cow. As a result of the work a list of feeds that will give yellow butter and those that will not is available.

ABORTION DOES GREAT HARM

Disease Disappears Automatically Provided No New Susceptible Animals Are Added.

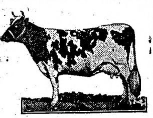
(By H. C. NEVIUS, Colorado Agricultural College, Fort Collins, Colo.)

Contagious abortion does much damage in some herds. It has been found that infected cows do not continue to abort. When it first breaks out in the herd a considerable number usually throw their calves. During the second year the abortions will be less, and the third year the cases will be few. In this way the disease disappears automatically, provided that no new susceptible animals are added to the herd. Disposing of the cows that have aborted and buying new ones usually results in prolonging the disease in the herd. The contagious abortion germs are often spread by the bull, so great care need be exercised in purchasing a sire to make sure that he is free from the contagion and also not to allow him to serve cows that are affected.

GOOD JUDGES OF DAIRY COW

Training Enables Farmer to Make Few Mistakes in Buying Stock and Building Up Herd.

Successful dairymen are nearly always good judges of dairy stock. Training in judging cattle enables one, first, to make few mistakes in buying stock; second, to get better prices for animals he has to sell; and, third, to breed more skillfully, thus building up a profitable herd in the shortest possible time.



High-Producing Guernsey.

Judging receives such prominence at shows and fairs that the casual observer sometimes carries away the idea that it is a field for experts rather than for the practical farmer. This is an incorrect conclusion. Practically everyone who handles dairy cattle is benefited by studying the art of judging cattle.

WATER NECESSARY FOR COWS

Often Profitable to Use Tank Heaters With Dairy Cattle to Keep Up Good Milk Flow.

Dairy cattle should be given water free from ice. This is necessary if they are to drink freely and often, and the dairy cow must take in plenty of water if she is to keep up her milk flow. It will often pay to use tank heaters with the dairy cattle where it would not pay to use them in the fattening pens, due to the limiting influence which the amount of water taken has upon the amount of fat produced.

BETTER TO RAISE PUREBREDS

Excellent Prices Obtained by Cornell College of Agriculture for Holstein Bulls.

Does it pay to raise purebred stock? The college of agriculture at Cornell recently sold at auction one Holstein bull for $1,500 and three of his brothers for a total of $1,200. The bull who sired these four youngsters cost only $1,200.

AGRICULTURAL DEPARTMENT

USE WOOD FOR FUEL

Many Farmers Can Relieve Heavy Demand for Freight Cars.

NEEDED FOR WAR SUPPLIES

In Many States It Is Entirely Practicable to Replace Coal with Wood—Saving Would Amount to 70,000 Cars.

(Prepared by the United States Department of Agriculture.)

Farmers frequently are situated so they can profitably supply fuel from their woodlands and thus relieve, to a considerable extent, the heavy demand for coal.

A maximum price for coal has been fixed by the Government. This does not mean, however, that the railroads will be able to transport all of the coal which the consumers may desire or want. Every freight car is performing a heavy duty; and the fewer the cars that are used for coal the greater will be the number available for carrying other war commodities.

Manufacturers, of course, cannot substitute wood for coal; neither can city people, because this would result in even greater railroad congestion. Nor is it likely that in either the South or the West the use of wood for fuel can be greatly increased. But in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, and Missouri it ought to be entirely practicable in many cases to replace coal with wood for fuel. In these 17 states is a rural population of about 20,000,000, which, it is estimated, uses annually about 18,000,000 tons of coal. If, by substituting wood, one-quarter of the coal burned by farmers and one-tenth of the coal burned in villages could be saved, the total saving would amount to nearly 3,000,000 tons, or between 65,000 and 70,000 carloads.

Reduce Coal Consumption.

It is where team-hauled wood can be used in place of railroad-hauled coal that the change should be made. Farmers who own woodlands and people in villages who can purchase wood from nearby farms are the ones in the best position to reduce their consumption of coal. It is not expected substitution of wood for coal will be complete or universal; for many purposes coal is much more convenient. But for heating many kinds of buildings wood is the more convenient and cheaper fuel. This is particularly true in the case of churches, halls, summer cottages, and other buildings for which heat is required only occasionally; but is then wanted in large volume at short notice.

Furnaces are built especially for burning wood in 3 or 4 foot lengths. Short lengths, of course, can readily be burned in an ordinary coal furnace or in a box stove, though this is rather wasteful of fuel. Many furnace manufacturers, however, make a special wood grate for use in their furnaces. One advantage in burning wood is that on moderately cool days the furnace can be run at a lower ebb than when coal is used, consuming only enough fuel to remove the chill. When wood is used in a round pot furnace, care should be taken to have each piece lie flat.

If a stove grate is too coarse for wood, a sheet iron cover over a good part of the surface will make it suitable, or a few fire bricks can be used.

Relative Heating Value of Wood and Coal.

In the matter of heating value, one standard cord of well-seasoned hickory, oak, beech, birch, hard maple, ash, elm, locust, or cherry is approximately equal to one ton (2,000 pounds) of anthracite coal. It takes a cord and a half of soft maple and two cords of cedar, poplar, or basswood, however, to give the same amount of heat.

One cord of mixed wood well seasoned equals in heating value at least one ton (2,000 pounds) of average-grade bituminous coal.

If the consumer can buy coal at $8 a ton, it would hardly be worth his while to burn first-class wood at $8 a cord, except in an open fireplace, because coal is a more convenient fuel. If, however, coal becomes so scarce that it cannot be secured in sufficient quantities, the consumer will, in some cases, have to burn wood at $10 or even $15 a cord.

Methods of Making Cordwood.

The most common method of making cordwood is to cut the trees into 4-foot lengths with the ax and split the larger pieces. The pieces are then piled in a standard cord, which is 8 feet long, 4 feet high, and 4 feet wide. The contents are 128 cubic feet, of which about 70 per cent is wood and 30 per cent air. Wood cut 4 feet long can be sold to brickyards, limekilns, metal-working plants, and other industries, but is too large for household use. This method is used chiefly where the tree growth is comparatively small, as in second growth, because such wood splits easily.

Another method, and one better adapted for old growth hardwoods, which are difficult to split, is to saw the tree into logs of convenient lengths, say from 10 to 15 feet. These are "snaked" out to the edge of the woodland and there sawed and split into lengths proper for the stove or furnace. The sawing is usually done by machine, driven either by gasoline or by electricity. The wood is sawed into 16-inch lengths, as is customary with stove material, three runs are theoretically equivalent to one cord. Actually they contain somewhat more wood, since small pieces can be packed more closely than larger ones.

Wood a Profitable Farm Crop.

Firewood ought to bring a better profit this year than ever before, on account of the higher prices which are likely to prevail. Wood is a much less perishable crop than many which the farmer raises. When properly piled, the better kinds of wood will last from two to three years, though it steadily deteriorates after the first year. To have the best heating value, as well as to reduce the cost of hauling, wood should be thoroughly seasoned, which means air-drying it from six to eight months. When piled so as to get a good circulation of air, however, 50 per cent of the moisture may be removed in three months. Wood cut in October and November, therefore, may be burned the latter part of the winter.

Formerly it was common practice to have wood cut by contract for from $1 to $1.50 per cord. With the present high price of labor, however, the cost may exceed $2 a cord. The great difficulty in securing farm labor is during the harvesting period. If farmers can secure sufficient labor to harvest their crops, they should be able to keep enough men to cut and haul wood later in the season. In fact, the profitable employment of one or two extra men on the farm during the winter may help to solve labor difficulties during the rush season.

The prices which cordwood will likely bring this year offer an opportunity for the farmer to improve his woodland. Improving the woodland means taking out the poorer trees. In the past this has seldom been practicable, for the inferior wood was not marketable. With wood bringing only from $4 to $5 a cord, there is very little opportunity to secure a profit of even $1 a cord. But with the prices indicated for the coming winter, thinnings become practicable over a wide range of country in the vicinity of good markets.

Life of a Fresh Egg.

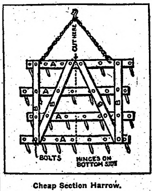
Three days is about the life of a fresh egg.

MAKING A SECTION HARROW

Any Farmer Handy With Tools Can Put Implement Together at Home—It Can Be Folded Up.

A writer in Southern Peeralest in giving a plan for making a section harrow says:

Take four pieces, 2½x8 inches, 4 feet long, marked A; three pieces 2½x3 inches, 3 feet long, marked B; two pieces 2½x3 inches, 4 feet long, marked C; 25 feet of ⅝-inch steel rod for teeth; four strap hinges to fasten on underside. Bore seven holes in each piece, a little smaller than the teeth, equal distance apart. After driving the teeth arrange the swivel bars after the manner of a section harrow, and then fasten the braces as shown. Place hooks or chains equal distance from center for hitch chain. Now cut the harrow through center and fasten the hinges on the under side. If teeth are in the way punch hole in hinge for teeth. Put on the hitch chain, and the harrow is ready for work. Any man handy with tools can make this tool, and it can be folded up and carried anywhere. All I bought for mine was the hinges; made the teeth from old rake teeth. This harrow placed over a row, and a little weight added, will do better work than any tool I ever saw. Laid flat with man on it it is equal to an iron harrow.



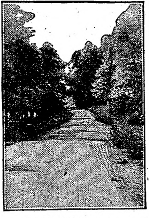
Cheap Section Harrow.

ROAD BUILDING

BOOSTER FOR BETTER ROADS

Danger of Going Too Fast in Construction of Highways—Mistakes Liable to Be Costly.

The automobile is becoming a very important factor in the movement for better roads. Every auto owner, be he farmer or city man, is a booster for better roads, but the city man is probably more impatient with our present roads than the farmer. In our political life the farmer has always been the conservative while the city man has been the radical, the progressive. It takes the two factions to bring about well balanced political conditions; one is as much needed as the other.



Good Road in Iowa.

Since the road supervisors at their last annual meeting took the stand they were not in favor of paving country roads at the present at least, they have been rather severely censured by the daily press and told that they are behind the times, trailing in the dust. That hard roads of some kind will be built throughout the country some time cannot be questioned, and the supervisors recognized that fact when they said that they were not in favor of loading the counties down with road debts at the present time. We are inclined to commend the supervisors for the stand they took, because there is danger of going too fast with expensive methods of construction until the different kinds of roads that are practicable for different localities have been more fully tested, says Farmer and Breeder. Mistakes made in permanent road construction are liable to be rather expensive.

Iowa has made rapid progress in road improvement during the past two years, and while no permanent roads have been built the work of grading and draining at least two principal roads through each county and the construction of cement culverts and bridges is something that will have to be done everywhere before permanent roads can possibly be built. Then, too, in many sections at least, when our roads are brought to a grade, are well drained, and then properly cared for with the road drag, they become very passable indeed. We believe that it is not a bad plan to use them for a few years in that condition and give the drag a good chance to show what it will do for them when used as frequently as it should be.

BUILDING MORE GOOD ROADS

Enormous Increase in Total Expenditures for Highways and Construction of Bridges.

"There has been an enormous increase in the total expenditures for road building and bridge construction marking the development of highway work in the United States during the past 12 months," said J. A. Rountree, secretary of the United States Good Roads association.

"Statistics compiled and reports received at the headquarters of the United States Good Roads association show that the expenditures for the building of good roads and bridges for the year 1915 were $282,000,000, or an increase of 250 per cent over the amount spent for similar purposes in 1914. In addition, more than $27,000,000 of local funds were spent under state supervision in 1915, bringing the total road and bridge expenditures managed by the states to $80,514,699. This amount is greater than the total expenditures for roads and bridges from all sources in 1904."

Galvanized Iron Culverts.

The cost of high-grade, pure iron galvanized culverts is not more than 10 per cent higher than ordinary steel, and experts claim the life of the pure iron to be many times that of ordinary steel.

Culverts Too Short.

Do not get your culvert too short. Be sure that it extends the full distance of the road embankment. It should be placed as near as possible in the direction of the flow of water it is intended to carry.

Goodridge Hotel and Restaurant

Board by the day or week. Meals or lunches served at all hours. Good Rooms. Confectionery, Soft Drinks, Cigars, Pipes and Tobaccos

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

REVIEW OF THE WORLD WAR AND OTHER HISTORY MAKING EVENTS OF YEAR 1917

Entrance of United States Into Conflict Outstanding Development of Past Twelve Months—Political Upheaval in Russia Affects Struggle—British and French Smash Teuton Lines on West Front—Austro-Germans Launch Drive Against Italy.

By DONALD F. BIGGS.

THE WORLD WAR.

After three and a half years of the most sanguinary fighting in history, the great nations of the world, together with many of the smaller ones, are still at death grips, with less prospect of an early peace than was thought to exist a year ago.

Undoubtedly the greatest development of the year was the entrance of the United States of America into the conflict. The throwing of the tremendous resources and man power of the American republic into the balance on the side of the entente allies, in the opinion of military experts, has more than off-set the advantages gained by Germany and her allies during the past twelve months and has made possible the continuance of the conflict until a time when a definite military decision can be obtained.

There have been a half dozen or more outstanding events in the past year. Some of these have been of purely military significance and others have been occurrences of a political nature which have had a far-reaching effect upon the titanic conflict.

Chief among the political upheavals of the year was the Russian revolution which resulted in the overthrow of Czar Nicholas and culminated during the closing months of the year in a counter-revolution which practically eliminated Russia from the ranks of the nations opposed to the central powers. From a military standpoint the chief events of the year have been the launching of the German ruthless submarine campaign, which was directly responsible for the entry of the United States into the war; the British offensives on the west front, first in the Arras sector, later in Flanders and still later on the 35-mile front between Arras and St. Quentin; the Italian offensive against Austria from Tolmino to the Adriatic and the subsequent offensive of the Germans and Austrians against Italy, which resulted in the overrunning of northern Italy by the Teutonic allies.

The entry of China, Cuba, Brazil, Siam and other countries into the war on the side of the entente allies, the overthrow of King Constantine of Greece on the demand of France and her allies and other events important in themselves were overshadowed by the greater developments of the year.

American Peace Effort Fails.

As the year opened the only military movements of importance in progress were those aimed by Germany and her allies to complete the annihilation of Roumania and attention was centered upon the request that had been made by President Wilson that the various belligerent nations state the terms upon which peace might be discussed. The replies seemed to preclude any further action by the United States as a peacemaker, but on January 22 President Wilson in an address before the senate laid down the principles which he declared should guide the United States in participating in a league to enforce peace at the close of the present war.

On January 31, Germany announced the inauguration of ruthless submarine warfare.

President Wilson acted promptly, severing diplomatic relations with Germany on February 3.

The Cunard liner Laconia was sunk without warning off the Irish coast February 25 with the loss of 13 lives, including those of two American women.

On February 28, it was announced that the United States government was in possession of a communication addressed by the German foreign minister to the German minister at Mexico City, instructing him to propose an alliance between Germany and Mexico, and to suggest that as soon as war with the United States was certain, the president of Mexico communicate with Japan, offering to mediate between Japan and Germany. As a reward Mexico was promised general financial support from Germany and the reconquest of lost territory in Texas, New Mexico and Arizona.

The United States department of state announced, March 12, that it had determined to place armed guards upon all American merchant vessels sailing through the German war zone. March 14, it was learned that the American steamship Algonquin had been sunk without warning by a German submarine. On the same day China severed diplomatic relations with Germany and seized German merchant ships in the harbor at Shanghai.

Czar Nicholas Dethroned.

On March 15, the Russian revolutionary movement, which had begun with food riots and strikes, culminated in the abdication of Czar Nicholas both for himself and his son. Pending the meeting of a constituent assembly the government was vested in the executive committee of the Duma and a newly chosen council of ministers with Prince Lvoff as premier.

The German forces on the west front, on March 17, began a general retirement on a front of 85 miles from south of Arras to Soissons, falling back to new lines which had been prepared.

The relations between Germany and the United States were further strained March 18 by the receipt of reports of the sinking of three American steamers, the City of Memphis, Illinois and Vigilancia, fifteen of the latter's crew being lost.

On March 21, President Wilson issued a proclamation calling congress in special session on April 2.

The American steamer Healdton was torpedoed without warning, March 22, 21 men including seven Americans, being lost.

United States Declares War.

On April 2, President Wilson appeared before a joint session of congress and called for a declaration of a state of war with Germany. On April 4, the senate passed a resolution declaring the existence of a state of war. The resolution was adopted by the house of representatives April 6 and was signed by the president the same day. At the same time 91 German-owned vessels in American ports were seized by the government. Cuba declared war on Germany on April 7. The following day, Austria-Hungary severed diplomatic relations with the United States.

The British forces on the west front began the first great offensive of 1917 on April 9, penetrating the enemy positions north and south of Arras to a depth of from two to three miles.

The French forces launched an offensive against the enemy on a 25-mile front between Soissons and Reims, April 16, and after three days' fighting reported the capture of more than 17,000 prisoners.

The first American casualties in the war were reported April 28, when the armed American tank steamer Vacuum was sunk by a submarine and several American gunners were lost.

American Fleet in Action.

It was learned on May 16, that a squadron of American destroyers under Rear Admiral Simms had safely crossed the Atlantic and had been patrolling the seas in war service since May 4.

The United States army draft bill became a law May 18 when President Wilson affixed his signature to the measure and issued a proclamation fixing June 5 as registration day.

During the early part of June growing unrest in Russia began to attract the attention of the allies. On June 1, workmen and soldiers seized Kronstadt, the Russian fortress defending Petrograd, and repudiated the provisional government. On June 3, the American commission to Russia, headed by Elihu Root, and the American railroad commission, headed by John F. Stevens, arrived safely at Russian ports. On June 7, the Russians in possession of Kronstadt yielded to negotiations and recognized the provisional government.

In the meantime the American preparations for the war were proceeding rapidly. On June 5, nearly 10,000,000 men of military age registered for military service under the selective draft law. On June 8, Major General John J. Pershing, who had been selected to head the American expeditionary forces in France, arrived with his staff in London. On the same day Washington reported the safe arrival in France of 100 American aviators, the first American fighting forces to reach that country.

King Constantine Dethroned.

A solution of the Greek situation, which had endangered the operations of the allies in the Balkans, was reached June 12 when on the demand of France, Great Britain and Russia, King Constantine abdicated in favor of his second son, Prince Alexander, who was known to be favorably inclined toward the allies. London reported another big raid by Zeppelins on June 13, in which 157 persons were killed and many injured.

The subscriptions to the first American Liberty loan closed June 15, the loan being oversubscribed by $750,000,000.

On June 26, it was announced that the first contingent of American troops, under command of Major General Sibert, had arrived safely in France.

The new Greek cabinet, headed by Eleutherios Venizelos, went into office on June 27 and two days later the new government severed diplomatic relations with Germany, Austria-Hungary, Bulgaria and Turkey.

On the first of July, the Russian forces, under the personal leadership of War Minister Kerensky, electrified the allies by launching a powerful offensive on an 18-mile front in Galicia, capturing many strongly fortified towns and taking thousands of prisoners. For two weeks the Russians continued to advance along a front that widened to 100 miles, but on July 19 the Russian offensive collapsed and turned into a rout, when many Russian regiments mutinied and fled. Kerensky succeeded Prince Lvoff as premier of Russia on July 20.

The first political crisis in the German cabinet during the war resulted on July 14 in the resignation of Chancellor von Bethmann-Hollweg and the appointment as his successor of Dr. Georg Michaelis. On July 22, Siam declared war against Germany and Austria-Hungary, bringing the number of the allied nations to sixteen.

British Launch Great Offensive.

The British launched their second great offensive of the year on the Flanders front on July 31, attacking on a 20-mile front from Dixmude to Warneton, after three weeks of intense artillery preparation. The British forced their way into the German lines to a depth of two to two and a half miles, taking ten villages and more than 5,000 prisoners.

Pope Benedict, on August 14, transmitted peace proposals to all belligerent and neutral governments.

The Italian forces opened a grand offensive on August 19, attacking on a front 40 miles long from Tolmino to the Adriatic sea. On August 25, the Italians captured Monte Santo, an Austrian stronghold on the Isonzo front. Two more nations entered the war on the side of the allies in August. Liberia declaring war on Germany August 7, and China declaring war on both Germany and Austria-Hungary August 14. On August 28, President Wilson's reply to the peace proposals of Pope Benedict was made public. It declared that "we cannot take the word of the present rulers of Germany as a guarantee of anything that is to endure, unless explicitly supported by such conclusive evidence of the will and purpose of the German people themselves as the other peoples of the world would be justified in accepting." Other allied governments later adopted President Wilson's note as their own reply to the pope.

Early in September the Italians continued to make progress in their drive on the Isonzo front, announcing on September 1 the capture of 14 strongly fortified mountains, causing an 11-mile breach in the Austrian lines and resulting in the capture of 27,000 prisoners.

Chaos Threatens in Russia.

Conditions in Russia grew more chaotic during the month of September. General Korniloff, commander in chief of the Rusian armies, on September 10 demanded that all civil and military powers be placed in his hands. Premier Kerensky immediately deposed General Korniloff and civil war threatened as Korniloff, at the head of a large force of troops, marched on Petrograd. The rebellion collapsed, however, on September 13 when General Korniloff agreed to surrender to General Alexieff, chief of staff of the Russian army.

The first American casualties in France were announced on September 4, when four Americans were killed in a German raid on American hospitals in France. America's war preparations were continued rapidly, the first contingent of five per cent of the new National army arriving at their cantonments September 5.

The replies of Germany and Austria-Hungary to Pope Benedict's peace proposals were made public September 21. They accepted the pope's offer as a basis for the beginning of negotiations, but made no definite concessions.

Italians Driven Back.

The great Austro-German offensive against the Italians was launched along the Isonzo front October 24, and within ten days the Teuton forces had retaken all the territory won by the Italians in two months' fighting and had overrun all of northern Italy.

The United States began to take a more active part in the fighting during October, the first American troops going into the first line trenches in France on October 23. On October 17 the American transport Antilles, returning from France, was torpedoed and sunk, with a loss of 67 lives. The second American Liberty loan of $3,000,000,000 closed October 27 with an oversubscription of nearly $2,000,000,000. Several more South American nations took a decided stand in favor of the allies in October. Peru broke off diplomatic relations with Germany October 6 and Uruguay took similar action the following day. On October 26 Brazil declared the existence of a state of war with Germany.

There were evidences of internal disturbances in Germany during the month, a mutiny of German sailors at Ostend being reported October 18. On October 30 Count George von Hertling was made imperial chancellor of Germany, Chancellor Michaelis having resigned.

On the sea the chief event of the month was the sinking by two German raiders of two British destroyers and 12 Scandinavian merchantmen they were convoying in the North sea on October 17. On October 31 the American transport Finland, returning from France, was struck by a torpedo and eight men were killed.

Italians Stop Invaders.

Big events crowded fast upon each other during the month of November. The Italians, after reforming their lines back of the Tagliamento river, were forced to execute a further retreat, falling back to the Piave river. The Italians, re-enforced by British and French armies, which reached the Italian front November 25, withstood repeated attacks launched by the Austro-German armies, holding their lines at all points along the Piave.

On November 20 the British opened the greatest offensive of the year on the west front between St. Quentin and the Scarpe. In a surprise attack, begun without the usual artillery preparation, the British infantry under General Byng, headed by a large force of tanks, smashed through the Hindenburg line toward Cambrai, taking many towns and thousands of prisoners.

Russia was thrown into civil war during the month by a counter-revolution by means of which the bolsheviki, under the leadership of M. Lenine, seized the government at Petrograd on November 8. Premier Kerensky fled from Petrograd, and other members of the cabinet of the provisional government were arrested. On November 10 the rebel government made Lenine premier. Kerensky, at the head of a body of loyal Cossack troops, attacked Petrograd November 12, but was badly defeated. The bolsheviki were apparently in full control of Russia by November 22, when the Lenine government proposed a general armistice to all belligerents.

American troops on the west front suffered their first casualties on November 3 when German troops raided a salient held by the Americans, killing three, wounding five and taking 12 prisoners. On November 5 the American patrol boat Alcedo was sunk by a torpedo and 21 were lost.

During the last days of November and the early part of December the Germans made determined efforts to regain some of the territory captured by the British around Cambrai but the British held a large portion of the ground taken, inflicting heavy losses on the Germans. The Austro-German forces began a new offensive in Italy early in December, forcing the Italian lines back for a distance of several miles at some points.

Early in December it was announced that a large number of national guard troops from the United States had arrived in France, units from every state being included. On December 7, the United States congress declared the existence of a state of war with Austria-Hungary. The following day it was announced that the American destroyer Jacob Jones had been sunk by a German submarine with a loss of 64 men.

The Russian situation was further complicated by a new revolt against the bolsheviki government launched by Generals Kaledines and Korniloff, Cossack leaders.

British, French and Italian troops on December 10, captured Jerusalem, which for 673 years has been under the undisputed sway of the Moslems.

On December 16, it was announced that Russian and Teuton emissaries had signed a four-weeks' armistice, one provision of which was that peace negotiations should begin immediately.

THE WAR CONGRESS

The first "war session" of the Sixty-fifth congress which opened on April 2, was the most momentous session in the history of the United States up to that time.

The first war bill passed by congress was one authorizing the issuance of bonds to an amount not exceeding $5,000,000,000 and authorizing the secretary of the treasury to purchase securities of governments at war with Germany to the amount of $3,000,000,000.

The army conscription act was passed by the house April 28 by a vote of 397 to 24 and by the senate on May 1 by a vote of 81 to 8.

The first big war appropriation bill, carrying appropriations aggregating $3,281,094,541.60 for the army and navy, was passed in the house May 2 with one opposing vote and in the senate May 19 without a roll call.

The measure known as the espionage act, intended to prevent disloyal acts on the part of residents of the United States and also containing provisions giving the president power to place an embargo on exports, was signed by the president June 15.

A bill appropriating $640,000,000 for the development of the air service was passed without a record vote by the senate on June 18 and by the house on June 28.

The food control act, under which broad powers were given to the president for the regulation of the sale of food and fuel, was passed in the house June 23 by a vote of 365 to 5 and in the senate July 21 by a vote of 81 to 6.

The second great bond issue act, authorizing the issuance of bonds to the amount of $7,538,945,640 and war-savings certificates to the amount of $2,000,000,000, was passed in the house September 6 and in the senate September 15.

The revenue act, first introduced in the house May 9, was passed by the house May 23, but was not passed by the senate until September 10. The conference report was accepted October 2. The message provides for the raising of nearly $3,000,000,000 annually, largely from income and excess profits taxes.

The second big war appropriations act, carrying a total of $5,356,666,016.93, including $635,000,000 additional for the emergency shipping fund, was approved by the president October 6.

The second session of the war congress opened December 3, and the following day President Wilson delivered a message declaring that nothing will turn the United States aside from its task until the war is won.

During December both houses of congress opened far-reaching investigations into the war preparations of the war and navy departments.

DISASTERS ON LAND AND SEA

The year 1917 was marked by many disasters on land and sea, aside from those resulting from the land and naval operations of the countries at war. Thousands of lives were lost and millions of dollars worth of property was destroyed by fires, explosions, earthquakes, tornadoes and other destructive agencies in all parts of the world.

On January 5, an earthquake in Formosa caused the death of 300 persons. On January 25, an earthquake killed 50 persons on Bali Island, Malay archipelgo.

On February 2, an explosion and fire in a Chicago tenement killed 25. On February 3, 30 were killed and 344 hurt in a ship explosion at Archangel. On the same day an explosion at Yokohama killed 100. On February 21, the British transport Mendi was sunk in a collision, 625 South African laborers being lost.

On March 11, a tornado in east central Indiana killed more than 20 persons and on March 23, 38 were killed and more than 200 injured when a tornado wrecked part of the city of New Albany, Ind.

Explosions in a Russian ammunition plant near Chester, Pa., killed 112 persons April 10. An explosion in the Hastings mine near Ludlow, Colo., April 27, caused a loss of 119 lives.

May 22, the city of Gyoenyoes, Hungary, was devastated by fire. Thirty lives were lost and great damage was done by a storm in Kansas May 25 and the following day tornadoes in central Illinois killed 150 persons and destroyed property worth millions of dollars. May 29, many persons were killed in tornadoes in southern Illinois, Kentucky, Tennessee, Alabama and Arkansas.

San Salvador, capital of Salvador, and a number of surrounding towns were partially destroyed by volcanic eruption, earthquake and fire June 7. More than 150 men perished in a blazing mine at Butte, Mont., June 9. Thirteen were killed and many injured when a water tank fell on the steamer Christopher Columbus at Milwaukee, Wis., June 30.

A Niagara Gorge trolley car plunged into the rapids, July 1, and 28 were killed. A mine explosion at New Waterford, Cape Breton, killed 62 men on July 25.

A mine explosion at Clay, Ky., caused the loss of 31 lives on August 4. Nineteen were lost when the British steamer City of Athens, carrying missionaries to Africa, was sunk by a floating mine on August 10. Eighteen were killed in a trolley car collision near North Branford, Conn., August 13. On August 18, a disastrous fire swept Saloniki, Greece, destroying a large part of the city.

Many persons were killed in a typhoon and flood at Tokio, October 2, and a thousand persons were reported drowned in great floods in Natal, South Africa, October 28.

About 1,200 persons were killed and millions of dollars worth of property destroyed December 6 by an explosion and fire which followed a collision in the harbor at Halifax, N. S., between Mont Blanc, a French munition ship, and the Imo, laden with supplies for the Belgian Relief Commission.

INDUSTRIAL AND ECONOMIC

Industrial unrest was apparent in the United States throughout 1917, largely as a result of war conditions and in spite of efforts made by the government, aided by leaders of organized labor, to prevent strikes which would delay the nation's war preparations.

Early in the year a nation-wide strike of the skilled railroad employees, which had been averted in 1916 by the passage of the Adamson law, providing indirectly for an increase in wages, was again threatened, owing to the fact that the placing of the Adamson law in operation was delayed pending a decision by the United States Supreme court on its validity. The threatened strike was averted March 18 by the capitulation of the railroad managers. On the following day the United States Supreme court handed down a decision holding the Adamson law constitutional.

Serious troubles were precipitated in the Arizona copper fields July 1 when the miners struck. Disorders were reported from several points and on July 12 the people of Bisbee, Ariz., deported 1,200 members of the Industrial Workers of the World, who it was charged had fomented the strikes in the copper mines. On July 31, 32 I. W. W. leaders were deported from Gallup, N. M. On August 1, Frank Little, I. W. W. leader, who had been prominent in the Arizona troubles, was lynched at Butte, Mont., where he had gone to take part in a strike of miners and where he was alleged to have made speeches attacking the government.

A serious tie-up of all shipbuilding plants in the country was threatened in August and September. Machinists and boilermakers in Eastern shipyards went on strike August 21 and 25,000 skilled mechanics and other workmen struck in San Francisco September 17. On September 20, President Wilson named a commission, headed by Secretary of Labor Wilson and representing both employers and employees, to act as his personal representatives in allaying labor troubles during the war. The strike in the San Francisco shipyards was ended September 26 through the efforts of the government mediators.

Leaders of organized labor in the United States took a decided stand throughout the year in support of the government preparations for war and against antiwar propaganda. At the annual meeting of the American Federation of Labor in Buffalo in November, union labor pledged its solid support to the government in the prosecution of the war.

The railroads of the country faced another crisis during the closing months of the year when demands were made by the four brotherhoods for wage increases averaging 40 per cent, affecting, directly and indirectly, approximately 2,000,000 railroad employees.

Labor troubles of the year were closely allied with economic developments, growing out of the increased cost of living in the United States. In order to prevent further increases in prices government regulation of many industries was undertaken as a war measure. On May 19, President Wilson selected Herbert C. Hoover, chairman of the Belgian relief commission, as head of a food control board, and later, on August 11, following the passage by congress of a food-control bill, Mr. Hoover was made food administrator. On August 21, President Wilson issued an order fixing the basic prices for bituminous coal in the producing districts of the country. On August 23, President Wilson appointed Dr. H. A. Garfield fuel administrator for the United States. On August 30 the United States wheat committee fixed the basic price for the 1917 crop at $2.20 a bushel.

DOMESTIC AFFAIRS

The Danish West Indies, purchased from Denmark for $25,000,000, passed under the jurisdiction of the United States January 27, and were renamed the Virgin Islands.

Serious race riots in East St. Louis, Mo., July 2, resulted in the killing of more than 20 negroes and two white men and a heavy property loss by fire. The riots were followed by prosecutions by state officials and a congressional investigation.

Soldiers of the Twenty-fourth U. S. infantry (colored) started a race riot at Houston, Tex., August 23, resulting in the death of 15 whites and several negroes.

Interest in the general elections on November 6 was centered in New York and Chicago, where Socialist tickets were defeated by large majorities. Judge Hylan, Democratic nominee, was elected mayor of New York over fusion, Republican and Socialist candidates.

In Milwaukee, Wis., November 23, ten policemen and a woman were killed by the explosion of a bomb found in a church and taken to police headquarters.

Thirteen negroes, convicted by court martial of participating in the race riots at Houston, Tex., August 23, were hanged at San Antonio, December 11. Forty-one others were given life sentences.

The house of representatives, on December 17, adopted a resolution, already adopted by the senate, submitting to the states a constitutional amendment for national prohibition.

MEXICO AND UNITED STATES

The friction between the United States and Mexico, which had threatened for two years or more to result in open warfare, began to disappear early in 1917 and when the attention of the people of the United States was focused upon more important matters by the entrance of the United States into the world war, the Mexican "crisis" faded from the public view.

Despite the failure of negotiations with the Carranza government President Wilson ordered the withdrawal of the American troops from Mexico and on February 5, General Pershing and his troops marched out of Mexico after having been in that country almost a year.

On March 11, General Carranza was formally elected president of Mexico. From this time on conditions in Mexico became more tranquil and there were evidences that President Carranza was succeeding in restoring order in the republic. It was not until late in the year that Villa again became active. On November 13, troops led by Villa's aids, captured Ojinaga, on the American border, after a hard fight. Several hundred Carranza soldiers fled across the border and were interned in the United States.

POLITICS IN FOREIGN LANDS

A spirit of unrest was apparent in many widely separated countries in 1917, leading in some cases to revolution and civil war. The revolution in Russia, resulting in the abdication of Czar Nicholas and the forced abdication of King Constantine of Greece were events closely allied with the war. Disturbances in China, including an attempt to restore the monarchy, were influenced partly by the war. Conditions in China were unsettled until June 30, when under the influence of monarchists, Hsuan Tung, Manchu emperor, announced his resumption of the throne of China. Civil war immediately broke out and on July 10 the attempt to restore the monarchy collapsed. On July 13 the monarchist army, led by Chang Hsun, surrendered after a battle at Peking. The republican government was firmly established again and later declared war on Germany and Austria-Hungary.

Civil war in Cuba threatened to disrupt that country during the early months of the year. The rebels were badly defeated in several engagements and on March 7, Gomez, their leader, was captured. The rebellion was stamped out quickly after the capture of Gomez.

Great Britain continued to wrestle with the Irish problem throughout the year. The Irish nationalists, on March 7, demanded immediate home rule and marched out of the house of commons in a body. On July 25 a convention proposed by Premier Lloyd George and representing all factions in Ireland met for the purpose of drafting a home rule constitution for Ireland.

Some misunderstandings between the United States and Japan over far Eastern matters were cleared away by the signing by diplomatic representatives of the two countries on November 2 of an agreement by which the United States recognizes the fact that Japan has special interests in China because of its proximity but guaranteeing the territorial integrity of China and the maintenance of the open door policy in that country.

RELIABLE PRESCRIPTION FOR THE KIDNEYS

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Some men's heads are so soft that a shadow from a brick wall produces a serious impression.

Lots of people look thoughtful—then let it go at that.

Too Big to Work With Pencil.

Bruce Barton, author of "More Power to You," spent six months in a Montana construction camp. He left to take up newspaper work in Chicago.

"Ain't you ashamed of yourself?" said the foreman of the camp, when he left. "A big feller like you makin' your livin' with a little thing like a lead pencil! You're big enough to swing a pick."

Saves 90 Slices in 90 Days.

Sergeant Gellentheim was sitting behind the desk at the Philadelphia police station recently when he beheld a negro struggling with a suitcase. The sergeant asked his business. The negro replied:

"Boss, I want you to answer me a question. The food administration wants us to save a slice of bread a day, and I been doing it for the last three months. I got 'em all here in the suitcase, and now I wants to know what am I going to do with 'em?" He opened the suitcase and revealed about ninety slices of stale bread. Gellentheim recovered, and gave the negro a little lesson on real conservation."

Cups From Tin Cans.

The resourcefulness of women as war workers was given exemplification recently by the Red Cross canteen workers in France. Seven of the women were operating a rest station at one of the aviation camps. Having an insufficient number of cups for the use of the canteen the head worker discovered that there were several plumbers among the German prisoners working about the camps. She gathered a quantity of empty tin cans and set the plumber prisoners to work making drinking cups. The canteen was quickly supplied with plenty of well-made cups with neat handles made from the covers.

Even a crook can hand out a straight tip if he wants to.

MUST FILE RETURN

ALL SUBJECT TO INCOME TAX REQUIRED TO SUBMIT STATEMENTS BY MARCH 1.

HEAVY PENALTY FOR FAILURE

Returns Will Be Rigidly Checked and Assistance Given Taxpayers by Officials in Every County—Tips to Farmers.

Washington.—All good Americans who are making a fair living are now called upon to pay, in the way of an income tax, their share of the cost of the war. Whether or not he is subject to this tax is the question every man must settle at once. In a few words this is the answer: Every unmarried man whose net income is $1,000 or more and every married man or head of a family whose income is $2,000 or over must pay the tax. Before March 1, 1918, he must file his return with the collector of internal revenue in the district in which he lives or has his principal place of business.

The man who thinks to evade this tax is making a serious error. Revenue officials will be in every county to check returns. Failure to make a correct return within the time specified involves heavy penalties.

"Net income" means gross income less certain deductions provided for by the act. The law defines income as profit, gain, wages, salary, commissions, money or its equivalent from professions, vocations, commerce, trade, rents, sales and dealings in property, real and personal, and interest from investments except interest from government bonds, or state, municipal township or county bonds. Incomes from service as guardian, trustee or executor; from dividends, pensions, royalties, or patents, or oil and gas wells, coal land, etc., are taxable.

Normal Rate Is 2 Per Cent.

The normal rate of tax is 2 per cent on net incomes above the amount of exemptions, which is $2,000 in the case of a married person or head of a family and $1,000 in the case of a single person. A married person or head of a family is allowed an additional exemption of $200 for each dependant child if under eighteen years of age or incapable of self-support because defective. The taxpayer is considered to be the head of a family if he is actually supporting one or more persons closely connected with him by blood relationship, or relationship by marriage, or if his duty to support such person is based on some moral or legal obligation.

Debts ascertained to be worthless and charged off within the year and taxes paid except income taxes and those assessed against local benefits are deductible. These and other points of the income tax section of the war revenue act will be fully explained by revenue officers who will visit every county in the United States between January 2 and March 1 to assist taxpayers in making out their returns.

Officers to Visit Every Locality.

Notice of their arrival in each locality will be given in advance through the press, banks and post offices. They will be supplied with income tax forms copies of which may be obtained also from collectors of internal revenue.

The bureau of internal revenue is seeking to impress upon persons subject to the tax the fact that failure to see this official in no way relieves them of the duty imposed by law to file their returns within the time specified.

The government is not required to seek the taxpayer. The taxpayer is required to seek the government.

The penalty for failure to make the return on time is a fine of not less than $20 nor more than $1,000, and in addition 50 per cent of the amount of the tax due. For making a false or fraudulent return, the penalty is a fine not to exceed $2,000 or not exceeding one year's imprisonment, or both, in the discretion of the court, and in addition 100 per cent of the tax evaded.

As to the Farmers.

The number of farmers who will pay income taxes has not been estimated by the government officials, but it is certain they will form a large percentage of the 6,000,000 persons assessed who never before have paid an income tax. The average farmer does not keep books but if he avails himself of the services of government experts who will be sent to aid him, it will not be difficult for him to ascertain the amount of his net income.

The farmer is making out his return may deduct depreciation in the value of property and machinery used in the conduct of his farm, and loss by fire, storm or other casualty, or by theft if not covered by insurance. Expenses actually incurred in farm operation may be deducted, but not family or living expense. Produce raised on the farm and traded for groceries, wearing apparel, etc., is counted as living expenditures and cannot be deducted.

Take the Short Route.

When you talk, observes an educator, whether in conversation or in meeting, use short words, of which there are more than there are of long ones, and take the most direct road to your meaning. Your meaning's the same.

Cook Makes Good Start.

"I see you have a new cook." "You are right." "Is she experienced?" "I surmise so. She started the first day by coming late, and then asking for the afternoon off."

GREEN'S AUGUST FLOWER

Has been used for all ailments that are caused by a disordered stomach and inactive liver, such as sick headache, constipation, sour stomach, nervous indigestion, fermentation of food, palpitation of the heart caused by gases in the stomach. August Flower is a gentle laxative, regulates digestion both in stomach and intestines, cleans and sweetens the stomach and alimentary canal, stimulates the liver to secrete the bile and impurities from the blood. Sold in all civilized countries. 30 and 90 cent bottles.—Adv.

Most things will come your way if you go after them.

Cured Balking.

Redd—Saw a veterinary surgeon going into your place this morning. Anything sick?

Greene—Yes, the car. Something's the matter with its insides.

"But what does a veterinary surgeon know about a car?"

"I don't know. Only I do know that once he cured a horse I owned of balking, and I thought it wouldn't do any harm to let him try his hand on the car."

Chile is erecting from 60 to 70 new school buildings each year.

Henry Flagler's New York-Florida estate is found worth $75,000,000.

At Any Drug Store

ATTENTION! Sick Women

To do your duty during these trying times your health should be your first consideration. These two women tell how they found health.

Hellam, Pa.—"I took Lydia E. Pinkham's Vegetable Compound for female troubles and a displacement. I felt all run down and was very weak. I had been treated by a physician without results, so decided to give Lydia E. Pinkham's Vegetable Compound a trial, and felt better right away. I am keeping house since last April and doing all my housework, where before I was unable to do any work. Lydia E. Pinkham's Vegetable Compound is certainly the best medicine a woman can take when in this condition. I give you permission to publish this letter."—Mrs. E. R. Crumling, R. No. 1, Hellam, Pa.

Lowell, Mich.—"I suffered from cramps and dragging down pains, was irregular and had female weakness and displacement. I began to take Lydia E. Pinkham's Vegetable Compound which gave me relief at once and restored my health. I should like to recommend Lydia E. Pinkham's remedies to all suffering women who are troubled in a similar way."—Mrs. Elise Heim, R. No. 6, Box 83, Lowell, Mich.

Why Not Try

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

LYDIA E. PINKHAM MEDICINE CO. LYNN, MASS.

Friendly.

Sentry (to bosom pal)—Halt! Who goes there?

Bosom Pal (contemptuously)—Idiot!

Sentry—Pass, idiot!

ECZEMA CAUSED YEARS OF INTENSE AGONY

"I have suffered intense agony from Eczema on my leg and other parts of my body for years, and received only temporary relief from other preparations. It is only a month since I started to use PETERSON'S OINTMENT, and there is no sign of Eczema or itching. You can refer to me."—Geo. C. Talbot, 27 Penfield St., Buffalo, N. Y.

I've got a hundred testimonials, says Peterson, just as sincere and honest as this one. Years ago, when I first started to put out PETERSON'S OINTMENT, I made up my mind to give a big box for a small price, and I'm still doing it, as every druggist in the country knows.

I guarantee PETERSON'S OINTMENT because I know that its mighty healing power is marvelous. I say to every one who buys a box that it is rigidly guaranteed for Eczema, Pimples, Salt Rheum, Old Sores, Blind, Bleeding and Itching Piles, Ulcers, Skin Diseases, Chafing, Burns, Scalds and Sunburn, and if not satisfactory any druggist will return your money. 30 cents. Adv.

Outclassed.

"Well, old Crimson Gulch seems very quiet and orderly," said the traveling man.

"Yes," replied Broncho Bob. "When so many of the boys is away handlin' machine guns, it doesn't seem worth while foolin' with a little toy like a six-shooter."

Catarrhal Deafness Cannot Be Cured by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.

ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

All Druggists 75c. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

Light Economy.

Bill—Do you know that turning down the gas saves matches?

Co-ed—No, I thought that turning down the gas frequently made matches.

Moral—Turning off an electric light often causes sparking. Turning off a gas light causes an increase of pressure. An increase of pressure causes a lessening of the waste.

Cuticura Is So Soothing

To itching, burning skins. It not only soothes but heals. Bathe with Cuticura Soap and hot water, dry gently and apply Cuticura Ointment. For free samples address, "Cuticura, Dept. X, Boston." At druggists and by mail. Soap 25, Ointment 25 and 50.—Adv.

The Bad Debt.

Bob—You owe me ten dollars. Let me have five of it?

Jim—What security?

The ideal wife and the ideal husband are two of a kind that never make a pair.

Will They Wear?

"This is a special flour for making flannel cakes."

The young housewife was trying to appear wise.

"Does it make good cakes?" she asked.

"Excellent flannel cakes, mum."

"Ah, um. Will they shrink?"

Only One "BROMO QUININE"

160 ACRE
FARMS IN
WESTERN
CANADA
FREE

Scenes of Prosperity

Are Common in Western Canada

The thousands of U. S. farmers who have accepted Canada's generous offer to settle on homesteads or buy farm land in her provinces have been well repaid by bountiful crops of wheat and other grains.

Where you can buy **good farm land at $15 to $30 per acre—get $2 a bushel for wheat and raise 20 to 45 bushels to the acre** you are bound to make money—that's what you can do in Western Canada.

In the provinces of Manitoba, Saskatchewan or Alberta you can get a

HOMESTEAD OF 160 ACRES FREE

and other land at very low prices.

During many years Canadian wheat fields have averaged 20 bushels to the acre—many yields as high as 45 bushels to the acre. Wonderful crops also of **Oats, Barley, and Flax. Mixed Farming** is as profitable an industry as grain raising. Good schools, churches; markets convenient, climate excellent. Write for literature and particulars as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

Pigs Feed on Nut Trees.

It is an undisputed fact that in Morocco pigs climb trees in search of nuts, says the Los Angeles Times. Not only pigs but goats. The puzzle is not in the pigs and goats, however, for they are of the common variety that we see here. It is the tree that is strange. It is called the argan nut tree and it grows near Agadir. Usually it shoots out from a steep hillside. The trunk is broad and flat and almost horizontal, and so are the main branches, forming ample and solid foothold for any animal that may be tempted by the olive-shaped nuts growing within easy reach of the main branches.

Kissing.

An optimist holds this pleasant prospect out to engaged couples: "Unmarried couples kiss and forgive. Married couples kiss and declare a truce while the heavy artillery is being moved up."—Kansas City Star.

Word From Br'er Williams.

"Pay as you go" is a mighty good principle, but de price has got you goin' so fast you des throw 'em de money an' holler: "Keep de change!"—Atlanta Constitution.

Aspen Wood for Matches.

Aspen wood is used almost exclusively in making matches in Sweden as it is easily cut and porous enough to be readily impregnated with sulphur or paraffin.

IN EXILE WITH HER FATHER

Daughter of Millionaire of Kieff, Accompanies Parent to Save Him From Dreaded Loneliness.

Children in the exile districts seem grotesquely misplaced, yet there were many. Sometimes the gendarmes' magic would lift a father from his too liberal fireside in Russia and set him down, without the humiliation of a trial in the glorious Narym solitude, writes Fortier Jones in the Century. "Not infrequently his family followed him in order to share the new life, for, as elsewhere, fathers are loved in Russia. Particularly among educated men the continual, unrelieved loneliness tended to bring on insanity.

"I know one fine business man, a millionaire of Kieff, and a direct descendant of Rouget de Lisle, whose little daughter came into exile with him to save him from this dreaded loneliness. She was fourteen years old, and they lived in a dreary village by the great old river, in a log cabin with pink chintz curtains and a piano. She was a winning little thing, with happy brown eyes and long curls, and to all appearances was no whit the worse for her exile existence. The fascinating life of the forest was familiar to her, the birds and flowers, and her father cared for her French and history. What a bright spot she was in that wretched place, and what a curious life for a little girl whose illustrious forefather had composed the 'Marseillaise!' Her mother, who joined them later when her health would permit, and they had gained permission to live in a town on the railway, was a sister of Mme. Curie."

PIDGIN ENGLISH IS POPULAR

In China the Lingo Is Used by Both Servants and Employers in Speaking to Each Other.

In China servants speak pidgin, or business, English to their employers; and servants from different parts of China will use this weird language in speaking to each other. The formation of the sentence is the same as in Chinese; the language itself is an extraordinary mixture of English, Portuguese, French and Chinese. Some of the phrases, says Mrs. De Burgh Daly in An Irishwoman in China, are very quaint and amusing.

A bishop is called "No. 1. top side joss-pidgin man." "Top side" means heaven, "joss," god, "pidgin," business.

There is a story of two men who came to call upon the king of Siam when he was staying in Shanghai. They entered the hotel and asked the proprietor, a courteous American, if his majesty were at home.

"Boy," called the proprietor, "one piecee king have got?"

"Have got, sir," replied the boy cheerfully.

"His majesty is at home, gentlemen," translated the proprietor.

One day, says Mrs. Daly, a large party assembled on a steamer to bid farewell to homeward-bound friends. Wishing to make certain that the steamer should not carry us off, we informed the steward in excellent Mandarin that he was to come and warn us of her departure. He stared blankly. Some one tried Ningpo dialect—no use; Shanghai—still a blank stare. At last my husband called out:

"Boy!"

"Yessir."

"Wantchee walkee can come talkee! Savvee?"

"All right, sir; my savvee."

Servants quickly find out our likes and dislikes in food, and act accordingly. A friend of mine was fond of snipe, and often ordered them for dinner. One evening, when an unexpected guest arrived, she told Boy that since there were not enough snipe she would not eat one. Presently Boy nudged her and remarked in a loud whisper:

"Missee can have snipe; one piecee man no chow!"

BESSEMER IRON AND STEEL

Original Process Involved Decarbonization, or Burning Out of Excess Carbon, by Blowing Air.

Henry Bessemer, who invented the method named for him in the manufacture of iron and steel, which revolutionized the industry, was granted a patent by the British government on October 17, 1855. This was the first patent given him, notes an exchange. Additional patents were taken out in the following December and February, covering improvements. Bessemer's original process involved decarbonization, or the burning out of the excess carbon, by blowing air through pig iron. This revolutionary invention was due indirectly to the Crimean war.

Bessemer undertook to invent an improved cannon, but found all available metals too weak for the gun he sought to make. He then began experiments in steel making, with the ultimate result of the production of "Bessemer steel." His invention won for him fame and fortune and the honor of knighthood. Sir Henry Bessemer was born in England, but was of French Huguenot descent. Since his pioneer invention, the process of converting iron into steel has been vastly improved.

That Bore of a Fond Parent.

Of course, you have a bright youngster who says and does amusing things, asserts a writer.

But all children do.

Your child has not a monopoly.

If you wish to be classed with the worst of bores, continue your constant eulogy of all that your child says or does.

If, for instance, some other child said or did what your boy or girl does, would you think it so excruciatingly funny?

Every bright, healthy, intelligent child is delightful in the unfolding.

To each fond father and mother the particular angles of understanding, as they come to light, are most interesting.

But the youngster is chiefly interesting to yourself.

You see traits and characteristics in the light of what you know you are yourself. That is what makes it sound so funny.

How about the mean little tricks that your own child has and that you cannot get away from? They all have them, too. Do you tell these things? No.

Then your wonderful tales are merely another form of braggadocio. How about it?

Everything in Its Place.

Mrs. H. had just employed a new maid, fresh from the old country. She asked the girl to take the baby out in the baby carriage. Gunhilde was delighted. She had never seen a baby before and from her articulate joy one might think that she had waited for this moment all her life. Mrs. H. was pleased to see that the girl was so willing. The baby was wrapped up and they started. Two minutes later Mrs. H. looked out of the window and her face froze with horror. Instead of rolling gently down the sidewalk the way a baby should her child was being piloted majestically down the middle of the street in the midst of automobiles and delivery wagons. From Gunhilde's expression one could see that she knew that her carriage was better than any coach on the Avenue.

EARLY MAN FIGHTING ANIMAL

Ancestors of Present People Were Called Upon to Face Beasts That Inhabited Plains and Rivers.

The first houses were caves. Early man was a fighting animal, and had to contend against the huge and ferocious beasts that infested the plains and rivers, observes a writer. His dwelling naturally had to be a place of security as well as a habitation. Caves were natural and artificial, the latter being hollowed out of solid rock by rude flint instruments. Most of them were formed in the sides of cliffs and among high, rugged hills.

To those early ancestors of ours, the primeval men and women who secured, as one would think, but scanty shelter and protection from these stone caves and holes in the rock, we apply the generic term of cliff dwellers.

They were entirely ignorant of agriculture, and subsisted by hunting and fishing and on the natural products they found growing in a wild state.

What is very remarkable, at our very doors can still be seen the typical houses and handiwork of those pre-historic tribes in the caves of the Lancos river in southern Colorado. These, in most instances, are as well preserved as when their ancient occupants deserted them—perhaps 10,000 years ago. When inhabited they were reached quite frequently by notches cut in the rock, and at other times rope ladders must have been used.

Gladstone a Hard Worker.

Gladstone was a hard worker, with no dreads with regard to work, says the American Magazine.

He turned from political responsibilities of the heaviest to Greek for recreation, and lived his four-score years and more, just as Pope Leo XIII, turned to Latin poetry for his relaxation from world-wide burdens, and lived on beyond four-score and ten, living so hopefully that when, at the little dinner given him on his ninetieth birthday, one of the cardinals said, in proposing a toast to him, "Here's that you may live to be a hundred, holy father," the old pontiff replied: "But why limit me to a hundred?"

They were contemporaries of Ranke, the German historian, who at the age of ninety-one proposed to write a history of the world in 12 volumes, one volume to be completed each year, and actually lived, I believe, to complete nearly half of it.

These men had no dreads; but they allowed their energies to work on, without any fear of exhausting their vitality.

Almost the Speed Limit.

"At Chattanooga," said a veteran of the Civil war, "one of the men in my company left early in the action, and no one saw him 'till after the battle, when he appeared in camp unwounded and unabashed. Some of the boys accused him of running away, but he wouldn't admit it.

"'I only retreated in good order,' he declared.

"I heard of the matter, and a few days later I asked him if he had any idea how fast he had 'retreated.'

"'Well, I'll tell you, cap'n,' he said. 'If I had been at home, and going after the doctor, folks that see me passin' would have thought my wife was right sick!'"—Harper's Monthly.

History of the Louvre.

The Louvre was originally a royal residence. Napoleon turned it into a museum and deposited in it the finest collection of paintings, statues and art treasures known in the world. Many of those brought from Italy have been restored to their rightful possessors. The magnificent buildings of the new Louvre, begun by Napoleon I and completed by Napoleon III, were inaugurated in 1857.

Ox, Slowest Animal.

There is no animal possessing less speed than an ox. In the old days, the days before the advent of railroads it would take a farmer and his ox team two weeks to make a round trip with twenty-five or thirty bushels of grain to market, a trip that can now be made by rail in half a day. Then the patient animals did well to jig along at the rate of two or three feet a second.

Severe Test.

Perhaps no test of one's poise and manual dexterity is more difficult for a man of sedentary and intellectual pursuits than the effort to pick up seven or eight newly released watermelon seeds from the tablecloth with his left hand without arousing so much as a passing suspicion in his wife's breast that they're there at all.—Ohio State Journal.

Edward's Diplomacy.

Edward had been told repeatedly not to say he did not like food which was passed to him at the table. He was invited to a neighbor's to dinner and was offered cherry pie, which he did not care for. He tactfully said, "Well, I'm just crazy for cherry pie, but won't you just save it for supper?"

Vocal Duet, Mabel and Myrtle Iverson.
Comic reading, Prof. A. O. Halvorson
Impromptu debate
Song by audience

Fire at Reson & Yohn Livery Barn.

Wednesday forenoon at about 11 o'clock the fire bell rang calling the fire department to the Reson & Yohn Livery barn where it was found that the front part of the barn was afire caused by an overheated stove in the office.

The department responded quickly to the alarm and was soon on the scene with the chemical engines and had the fire under control in no time. Goodridge can consider itself lucky in the line of fires for out of six fires we have had they have all occured in the day time and all have been put out before very much damage had been done.

Annual Meeting.

Notice is hereby given that the Annual meeting of the Bray Mutual Fire Ins. Co., will be held at St. Hilaire, Minn., on Monday, Jan. 14th, 1918, for the purpose of electing officers for the coming year and also to transact other business which may come before said meeting.
John O. Swanson, Secretary.

3,000,000 MEN FOR WAR WORK

To Be Mobilized At Once By Government Into Great Industrial Army

DENSMORE IS DIRECTOR

Aim Is To Show That Labor Draft Is Unnecessary—Employers, Employees and Business All Back Project.

Washington, Jan. 9.—The department of labor has entrusted to the United States employment service the mobilization of 3,000,000 workers for agriculture, ship building and war contracts plants.

Tremendous expansion of the service is in progress in preparation for recruiting men necessary to carry on economic work in support of military force in the war.

Solution of the labor shortage problem by this means is confidently proposed by the department and co-operating labor organizations in answer to suggestions that conscription of labor is necessary.

One early result is expected to be the placing of 400,000 mechanics in ship-building plants to aid in hurrying to completion the merchant marine program.

John B. Densmore of Montana, solicitor for the department of labor, will be national director of the employment service by appointment of Secretary Wilson.

He will have as his assistants Robert Watson of Massachusetts and Charles T. Clayton of Maryland.

Samuel J. Gompers of New York, son of the labor leader, will succeed Mr. Watson as the department's chief clerk.

Plans Outlined.

Organization plans of the new service were described in an official statement, which said:

"The United States employment service has been divorced from the bureau of immigration, under whose control it has been since its establishment, made a separate arm of the department and one of the largest and most important war-prosecuting organizations of the national government.

"Through utilization of existing and projected federal, state and municipal employment offices and labor supplying facilities of various state councils of defense, the federal employment service will cover the entire continent with a network of inter-related labor exchanges.

"These will 'recruit' and transfer workers from one section to another and eliminate the present chaotic situation of a surplus of workers in one region and a shortage in another.

"Since the entrance of the United States into the war, the American Federation of Labor and the Chamber of Commerce of the United States, speaking for employers and business generally, both have sought the action announced."

DENY MINISTER'S CHARGES

Officers Resent Allegations of Drunkenness Among Sammies.

London, Jan 9.—Much indignation has been caused among American army and navy officials and other Americans in London because of reports circulated in the United States that American soldiers and sailors in Europe were drinking to excess. This feeling has been intensified by a charge made in his sermon at the City Temple, by the Rev. Dr. Joseph Fort Newton of Iowa, the pastor, of drunkenness among the American soldiers in England.

Vice Admiral William S. Sims, commander of the American naval forces, and Col. S. L. H. Slocum, military attache of the American embassy in London, declared that the charges of drunkenness were false.

Admiral Sims said there never was a time in American history when there was so little drunkenness among the American fighting forces.

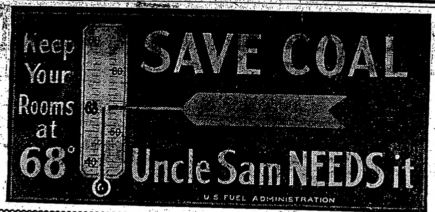
COAL LAND BILL IS PASSED

Senate Takes Action After Elimination Is Made.

Washington, Jan. 9.—The Walsh-Pittman oil and coal land leasing bill has been passed by the Senate by a vote of 37 to 32. It now goes to the House. The oil land leasing bill has been pending in the Senate for four years. Its passage at this session was made possible by an agreement to eliminate from its provisions the naval oil reserves, which was urged by the Navy department, and which will be included in a separate measure.

Wilson Backs War Movies.

Washington, Jan. 8.—Official recognition of the moving picture campaign which has been carried on by the committee on public information to stimulate war interest has been given by President Wilson. By executive order he has created a division of foreign picture service under jurisdiction of the committee. For some months the committee has been putting out motion picture films for the purpose of furnishing entertainment and instruction to American soldiers at home and abroad and soldiers of the Allies.



BIG BATTLES COMING

Artillery Duels Seen As Forerunners of Conflicts.

Flanders, France and Italy Expected Soon to be Scenes of Fierce Fights.

London, Jan. 9.—Signs are not wanting that big battles are in process of making in Flander, France and Italy, although infantry operations in the major war theatres are just now of a minor character.

At various points in these three war zones intensive artillery duels are going on day and night. They are particularly severe in the Pres and Cambrai sectors, where British are facing Germans along the Aisne, on the Verdun sector, and along the Moselle river, where forces of the German crown prince and Grand Duke Albrecht of Wurttemburg are opposing the French, and in the Italian highlands from the region of Lake Garda, eastward to the Piave river, where the Austro-German troops are aligned against the Italians, French and British.

FOR LABOR LOYALTY WEEK

Call For Observance With Lincoln's Birthday.

New York, Jan. 8.—A proclamation calling for the observance of a national labor loyalty week in connection with the celebration of Lincoln's birthday, with the additional purpose of "combatting the insidious forces of pro-German and anti-American propaganda" has been issued by the American 0Alliance for Labor and Democracy.

Copies were sent to the alliance's branches and all central labor bodies affiliated with the American Federation of Labor over all the country. The proclamation was signed by Samuel Gompers, as president of the ican Alliance for Labor and Democ-Democracy.

WAR HUSHES "KAISER'S BELL"

Need of Guns Necessitates Remelting —Weighs 56,000 Pounds.

The Hague, Jan. 8.—The great "kaiser's bell," whose sonorous voice many Americans have heard above the roars of Cologne, has now been removed from its cage in the southern tower of the great cathedral to be melted for war uses. It rang its funeral chant on New Year's night.

The bell weighs 56,000 pounds and it was necessary to saw it in pieces to get it down.

French guns captured in 1870 and 1871 were the material from which the bell was made, and it was first sounded on March 21, 1877, the birthday of William 1. It took 27 bellringers to operate it.

COMPULSORY CONSERVATION

Obligatory Food Saving Legislation Being Prepared.

Washington, Jan. 8.—Legislation looking to the compulsory conservation of food—possibly some system of enforced rationing—is being prepared.

Under the proposed legislation wheatless days, meatless days, as well as other regulations for food conservation will be made imperative.

This can be stated on the highest authority. Voluntary conservation has failed to produce the quantities of feed desired for movement overseas, although the campaign for food saving is being supported loyally by hundreds of thousands of persons throughout the country.

COAL BARGES REACH GOTHAM

Warmer Weather Also Helps To Relieve Situation.

New York, Jan. 8.—Ninety-two barges, laden with approximately 55,000 tons of coal, have docked in New York, and, coupled with warmer weather assured relief for the city's population from cold and scarcity of fuel, which it had undergone for more than a week.

Wisconsin Solon Commits Suicide.

Manitowoc, Wis., Jan. 7.—Assemblyman Carl Hansen, Democrat, 55, committed suicide at his home here. He was a bachelor and lived alone. Mr. Hansen has been a member of the assembly for Manitowoc county since 1910. Hansen apparently shot himself while in his house alone. The chief of police became suspicious when he did not hear from Hansen, as the assemblyman always notified the police when he was leaving town. The chief broke in and found him dead on the floor

PEACE PARLEYS ARE SUSPENDED

Russia and Germany Break Off Negotiations When Foe Refuses Transfer.

FEAR ALLY INFLUENCE

"Temporarily Suspended' are Words Used In Announcement—Trotzky Insists Parley Must Go To Stockholm.

Stockholm, Jan. 8.—The Germans have "temporarily suspended" peace negotiations between the Central powers and the Bolsheviki government in Russia.

From the meager advices received, it appears the rock upon which a continuation of the pourparlers split was the demand of the Russians that the conference be resumed at Stockholm, instead of at Brest-Litovsk.

Trotzky Is Insistent.

Dissatisfied with the proposals for peace made by the Teutonic allies before the recess of the Brest-Litovsk conference, Leon Trotzky, the Bolsheviki foreign minister, had been insistent on the deliberations being held on neutral soil instead of at the German eastern headquarters. The Germans, however, had been equally as firm in their determination not to treat with the Russians at any other place than Brest-Litovsk.

The decision of the Germans to discontinue the sittings was arrived at during a crown council held in Berlin which was attended by Field Marshal von Hindenburg and General von Ludendorf, first quartermaster general.

Fear Allies' Influence.

A belated dispatch from Berlin gives as the reason for the refusal of the Germans to consider Stockholm as a place where peace might be advantageously discussed the fear that British, French and American diplomats in the Swedish capital would by intrigue render all endeavors futile.

PERSHING SUPPLY SHIP SUNK

Sent Down by U-Boat and Eight of Crew Missing.

An Atlantic Port, Jan. 8.—The Harry Luckenbach, an American steamer, was torpedoed and sunk with loss of life, probably in the English channel, according to cable advices received by her owners.

The vessel's crew consisted of 30 men, exclusive of the United States naval guards. Further details are lacking in the report.

The Harry Luckenbach was the second steamer owned by the Luckenbach steamship line to be sunk within three months. The first was the D. N. Luckenbach, five of whose crew perished when she was torpedoed on Oct. 27th.

RAIL CONTROL BILLS COME UP

Measures To Perfect Federal Operation Under Way in Congress.

Washington, Jan. 8.—Legislation asked by President Wilson to perfect government control of railroads has started on its way in Congress under consideration by the Interstate Commerce committee of both houses. The Senate committee met to hear statements from railroad executives, while the House committee was mapping out a plan of action and deciding whether hearings would be held.

Would Limit Coal Exports.

Washington, Jan. 8.—Strict limitation of coal exports to shipments for war purposes or in exchange for commodites needed in the United States has been recommended to the war trade board by Fuel Administrator Garfield. A statement by the administrator of the amount of coal available for export during the coming year shows the supply smaller than for 1917.

U. S. Ship Torpedoed, Then Beached.

An Atlantic Port, Jan. 8.—The Suruga, an American steamship of 4,374 gross tonnage, was run ashore after being torpedoed in the Mediterranean on December 27, according to information received in shipping circles here. Her crew is believed to have been saved. The Suruga was owned by the New York and Oriental Steamship company and cleared from New York late in October for Italian ports. She is believed to have been on her way home when torpedoed just before she was beached.

U. S. DRAFT LAW UPHELD

Found Constitutional By Country's Highest Court.

Selective Service Act Objectors' Cases Declared "Absolutely Devoid of Merit"—Four From Minnesota.

Washington, Jan. 9.—The supreme court has upheld as constitutional the Selective Service act.

The government's contention that power given Congress to declare war includes power to compel citizens to render military service both at home and abroad. was sustained.

Arguments Lack Merit.

Chief Justice While, who delivered the unanimous opinion in a brief statement, declared that after considering the various contentions the conclusion had been reached that most of them were imaginary rather than real.

Chief Justice White, in handing down the decision on the nine cases against the draft law that reached the supreme court, said the arguments of all the objectors were "absolutely devoid of merit."

Thirteen Appeals Decided.

"Our mind is unable to conceive that raising armies by draft is slavery and violates the Thirteenth amendment," Chief Justice White said.

The decision resulted from the special appeals of 13 cases growing out of convictions under the selective service act, four coming from Minnesota, five from New York, three from Ohio and one from Georgia. Constitutionality of the act was made the basis for all of the appeals.

U. S. CONTROLS BINDER TWINE

Food Administration Takes Over Supply—To Regulate Prices.

St. Paul, Jan. 8.—Minnesota's leading industry at the state prison and farmers throughout the state, and in neighboring states, are affected by the report from Washington that the United States food administration has arranged to control supply of binder twine for this year and to regulate prices to consumers. Henry Wolfer, former warden of Minnesota prison, will have charge of this work for the food administration.

The control, dispatches state, will be effected through voluntary agreements binder twine makers have made with the food administration, which will centralize buying and eliminate competition. An official announcement by the administration says the arrangements will stabilize prices, prevent undue advances, eliminate waste, speculation and hoarding and give the product to the ultimate consumer at the lowest possible price.

BERLIN GRIPPED BY HUNGER

Young Boston Woman Suffers for Need of Nourishing Food.

Boston, Mass., Jan. 8.—Berlin is a brooding, grim city of despair today, according to Miss Josephine Marzynski, a young Boston soloist just arrived from the German capital, where she has been studying music for 15 months. She left Berlin November 25. Miss Marzynski declared in an interview that Germans still believe in their hearts they can win the war.

"During my 15 months in Berlin I lived among very wealthy people. Had I been dependent upon my own efforts and purse for food, I would have suffered even more than I did for want of nourishing food."

JAP WARSHIPS BEAT U-BOATS

Repulse Submarine Attacking Transports in Mediterranean.

Tokio, Jan. 7.—Enemy submarines which attempted to attack British transports convoyed by Japanese warships in the Mediterranean on Dec. 30 were repulsed, says an announcement from the Japanese admiralty. The warships were not damaged.

$5,000,000 War Order for Stillwater.

Stillwater, Jan. 7.—George H. Atwood, president of the Twin City Forge and Foundry company, who has been in Washington for the past week in connection with government contracts which will be filled at the new munition plant, the machinery of which is now being installed in a building secured for that purpose, has advised business associates that he has secured an additional $5,000,000 contract. The new contract, added to those already secured, will give employment to 300 more men.

IS TO PUSH WAR; PEACE UP TO FOE

America Not to Slacken Preparations Because of Germany's Peace Proposals.

READY FOR SACRIFICE

Allies Determined Central Powers Must Accept Terms or Fight to Finish—Conference of Premiers Expected Soon.

Washington, Jan. 9.—Without a thought that peace may be drawing near America will push her war work.

Secretary of War Baker and other officials hold there must be no letting down in preparations. Peace, they say, now is up to Germany. Lloyd George has stated Allied terms and insofar as unofficial expressions here go these are America's terms, too.

Foolhardy to Slow Up Now.

If Germany wants to reform herself and accept those terms the way is open, but if she wants to fight on the Allies and America are fully aware of and ready for the bloody sacrifice involved, all officials agree.

They added it would be little short of treasonable and foolhardy for this nation to slow up now, merely because of growing convictions Allies and Teutons are getting more nearly together through a process of unofficial statement of peace aims.

Shift Into Diplomatic Field.

True, authorities here, including men high in the military councils, do believe peace is coming more rapidly than is the general belief. But if they had their way wholly there would not even be a statement of war aims. Instead there would be a policy of blood and iron which would ultimately make the German lines crumble and the kaiser beg for peace.

Some military men, however, are inclined to feel that already the war is shifting into the diplomatic field, that by the mere fact of a statement of terms from both sides a desire for peace is manifest which sows the seed for actual negotiations.

Sees Long War or Quick Peace.

Not that they think Germany is going to accept Lloyd George's terms right away, but they believe Germany now knows she cannot win, and is willing, therefore to go far to get an adjustment.

A neutral diplomat sized up the situation as a case of peace in three or four months, or war for three or four years. That may be said to be a more or less prevalent opinion here, though those who venture into prophecy vary in their maximum and minimum figures considerably.

LANSING MAY GO TO EUROPE

Considered For Permanent Commissioner, According to Gossip.

Washington, Jan. 8.—With administration officials viewing the Lloyd George speech as a renewed pledge by the Allies to fight on until the German military autocracy is crushed. President Wilson now is expected to shake up the American war organization and make it possible for the United States to give effective aid on the western front this year.

It is reported that one of the first steps taken by the president will be to send Secretary of State Robert Lansing to Europe as a permanent high war commissioner. Mr. Lansing professes ignorance of the plan, but other government officials think the move not unlikely.

It has been presumed up to date that Colonel E. M. House, the head of the recent America war mission to London and Paris, would be sent back to Europe by the President at an early date.

SERB ENVOYS PAY TRIBUTE

Place Wreath on Tomb of Washington at Mt. Vernon.

Washington, Jan. 8.—In the presence of a gathering representative of official Washington, Dr. Milenko Vesnitch, head of the Serbian war mission to the United States, laid a wreath on the tomb of Washington at Mount Vernon, with a tribute to the patriarch of liberty from "a small and hardly known nation."

Dr. Vesnitch spoke of his people's love of liberty.

Germans Execute 22 for Espionage.

Amsterdam, Jan. 8.—Twenty-two persons, among them four from Antworp, eight from Ghent and a Dutch skipper, were executed by the Germans at Ghent, December 20, for alleged espionage, according to the Telegraaf's correspondent at Flushing.

Three Billion in Military Policies.

Washington, Jan. 8.—More than $3,000,000,000 worth of government insurance has been bought by American soldiers and sailors, Secretary McAdoo announced in a statement urging on men the necessity for filing applications for soldiers' policies before expiration of the time limit set by law. Men who joined the colors before last October 15 must apply for insurance before February 12, 1918, and those joining after October must apply within 120 days after entering the service.

Neglected Colds bring Pneumonia

HILL'S CASCARA BROMIDE QUININE

The old family remedy—in tablet form—safe, sure, easy to take. No opiates—no unpleasant after effects. Cures colds in 24 hours—Grip in 3 days. Money back if it fails. Get the genuine box with Red Top and Mr. Hill's picture on it 24 Tablets for 25c.

At Any Drug Store

Object to Sunday Work.

Abolishing Sundays resulted in rioting in Augsberg, Bavaria, and as a result a compromise is now being tried. Sunday work henceforth including rest hours, will only cover six hours. Youthful workers of both sexes will be permitted to go to church. The Bavarian munition manufacturers also agree to limit work to 54½ hours a week for which 56½ hours pay will be given. It is promised that Sunday work shall cease by March, 1918.

Soothe Itching Scalps.

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. For free samples address, "Cuticura, Dept. X, Boston." At druggists and by mail. Soap 25, Ointment 25 and 50.—Adv.

Mahogany Embargo Removed.

Consul General Skinner reports from London that the controller of timber supplies announces the withdrawal, until further notice, of the restriction on sales of mahogany of all kinds. Notice was given recently that the board of trade had taken possession of all stocks of mahogany exceeding 5,000 feet.

PROVEN SWAMP-ROOT AIDS WEAK KIDNEYS

The symptoms of kidney and bladder troubles are often very distressing and leave the system in a run-down condition. The kidneys seem to suffer most, as almost every victim complains of lame back and urinary troubles which should not be neglected, as these danger signals often lead to more dangerous kidney troubles.

Dr. Kilmer's Swamp-Root which, so many people say, soon heals and strengthens the kidneys, is a splendid kidney, liver and bladder medicine, and, being an herbal compound, has a gentle healing effect on the kidneys, which is almost immediately noticed in most cases by those who use it.

A trial will convince anyone who may be in need of it. Better get a bottle from your nearest drug store, and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Tea Leaves in War.

Instructions have been sent to all English army and navy canteens to save all used tea leaves, which are to be carefully kept in muslin bags and forwarded to central depots. The old leaves are not to be used again in making beverages, but are needed in connection with munition making.

Important to Mothers

Examine carefully every bottle of CASTORIA. that famous old remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher

In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

Regulation Rescue.

"I was in a train the other day when a spark from a cigar fell on a lady's dress and set her on fire."

"How was she saved?"

"She happened to be in the smoking car, and so the conductor put her out."

BOSCHEE'S GERMAN SYRUP

Why use ordinary cough remedies, when Boschee's German Syrup has been used so successfully for fifty-one years in all parts of the United States for coughs, bronchitis, colds settled in the throat, especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectoration in the morning, gives nature a chance to soothe the inflamed parts, throw off the disease, helping the patient to regain his health. Sold in all civilized countries. 30 and 90 cent bottles.—Adv.

To Clean Furniture.

If, instead of spirits of camphor, camphorated oil be used in cleaning furniture, it will not only remove the white stains, but restore the polish as well.

Look at a picture in the best possible light, and be as courteous to your fellow men as you are to a picture.

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.—Adv.

Natural Presumption.

"What do you want to know, son?"

"Are barks the kind of vessels they have dog watches on?"

Wish to win the suffrage of your own inward approval, wish to appear beautiful to God.—Epictetus.

When Your Eyes Need Care Try Murine Eye Remedy

No Smarting—Just Eye Comfort. 50 cents at Druggists or mail. Write for Free Eye Book. MURINE EYE REMEDY CO., CHICAGO

CHAPTER XXIX—Continued.

—19—

The pain room and the forepeak came next, and I explored the latter myself, as there was scarcely room in the narrow space for even one to creep about. Pushing the lantern before me, every nerve singing like a copper wire, I crawled out at last, dripping with perspiration, and as black as though I had been for half a day in the coal hole. To Leayord's inquiries I could only shake my head.

"Well, sir," he said obstinately, "I'm a sailorman, but I never did believe in ghosts, an' I ain't a-goin' fer ter believe in 'em now. It warn't no spooks what did this job. This yere Bascom was a sure enough human the last time I put eyes on him, an' I don't reckon he's changed much since, 'cept maybe in his line o' brains; do you, sir?"

"He's flesh and blood, all right, if that is what you mean; only insanity makes them cunning."

"That's what I sed to Red here while you was crawling 'round in the forepeak, lappin' up bilge-water. He reckoned it might o' bin a ghost a doin' these things; but I claimed thet ghosts don't shove knives into sailormen; leastways I never heard o' none that did. So it naturally stands to reason, sir, that this bloomin' lunatic is still aboard somewhere."

He leaned forward, striking one hand on the other to better express his argument. I was thinking, paying little attention to his words, my eyes unconsciously viewing the ship aft. The deck was so wrapped in gloom that outside the radius of our lantern I could perceive no movement, not even determine the presence of the two men left on guard. The two masts, with their heavy spars, cast all below into dense shadow, but beyond, on the poop, the faint rays of the binnacle lamp reflected softly on the face of the girl at the wheel, making her appear almost as a vision. The sight for an instant fascinated me.

"Ain't thet so, sir?"

"Why, yes, Leayord; I am unable to see it any other way—but where?"

"Well, there ain't but one place aboard unexplored, sir. Hanged if I know how he ever got there, but he's either there, overboard, or aloft; or else I've got to take off my hat to Red here, an' acknowledge it's a real ghost we've got aboard the old hooker."

"The cargo hold?"

"Aye, aye; I'm fer takin' off the hatches, and letting a man or two creep down there; we've got to find out where that devil is."

There was no answering his logic, and a determination to complete the job was already in my own mind.

"Get the tarpaulin out of the way, Liverpool," I said sharply, throwing the lantern where the light was needed. "Cut it loose, man; don't waste time with the lashings; there's plenty of spare canvas in the sailroom. What's stowed first below, Mr. Leayord?"

"That's the devil of it, sir," he replied soberly. "I never told you, for I didn't see no cause. There was a lot o' boxes come on board, sir, maybe a thousand of 'em, the ends clamped with iron, an' they was almighty heavy. We had to load 'em with the donkey engine, an' most of 'em were dumped in jist below the main hatch."

"Do you know what they contained?"

"Mr. Bascom told me they was army stores, sir, and maybe he thought they was, fer he seemed sure about it; but along at the last the hook slipped off one of them, an' the box dropped about thirty feet, smashin' the whole end in—it was plumb full o' loaded shells."

"Loaded shells?"

"That's what; there was powder enough scattered about there ter blow the whole ship to Hades an' back."

"No doubt other explosives are aboard. The greater reason for us to lay hands on Bascom. Take hold there with Red and help rip up that tarpaulin; now get the point of this capstan bar under the hatch closings; here's your lever—it'll take the weight of the three of us to move the iron—now, heave ho!"

We bent to it, exerting every ounce of strength, encouraged by the fact that the heavy hatch yielded to our combined effort, and began to move, to lift over the grooves, and shove back slightly. With no other thought but to gain opening enough for another insertion of the lever, we bent to the task. Something caught, rendering the great iron lid immovable.

"White," I called, "come over here, and give us a hand."

I heard him patter across the deck in his bare feet, but before he reached the bar, the fellow stopped, staring at the narrow opening, and sniffing like a pointer dog.

"Lay hold!" I called out angrily. "The weight is breaking our backs."

"But there's fire below, sir," he roared excitedly. "That's smoke a risin' out the hatch—the cargo's afire!"

I saw it now, and so did Red, and the mate—a thin, circling vapor barely perceptible in the night, curling up through the hole we had succeeded in forcing. For an instant I hardly knew it as smoke, but the fresh draught of air had already worked its miracle, and the wisp thickened as I stared into a threatening black coil, darting upward into our very faces. I dropped upon my knees, shading my mouth as best I might, and sought to peer down into the black void between decks. Away forward a red eye winked out of the darkness, then another, and a third. I leaped to my feet, realizing there was no hope, nothing we could do but get away alive—and, if we were even to do this, every second was worth a king's ransom.

"She's afire forward!" I exclaimed, striving to control my voice. "That is where the fellow was, and he's done the job; there's no stopping her now."

"There's plenty of hose forward."

"But the donkey engine is not connected, and we dare not take chances with all those explosives below. Heavens, man, we may go sky high any second. Don't stand talking; get over the dinghy, it's the only boat we have; haul her aft and swing her to these falls below the after-hatch—that will give us a chance to get away, perhaps. Jump now, the three of you. No! wait! Red and Leayord can rig the boat, and I'll give you a hand when you hook on. McCann, get a beaker of water in, and some biscuits, we'll have no time for anything else. Hurry men! there's flame breaking through now!"

There was; a red serpent, sticking its ugly head up the hatch opening, the ghastly light glimmering in our faces. The men seemed fairly paralyzed at this sudden outburst of new horror, but I drove them, even using hands and feet in my mad desire for action.

"Aft with it now—aft with it. All will be a mass of flames amidship in five minutes. Is there water in that keg, McCann? Then throw it in!—now the biscuits. Miss Carrington—Vera!"

"Yes, Captain Hollis."

"Can you hold to the wheel a few moments longer?—till I come for you?"

"Yes."

"Call down the tube to the engine-room; tell Masters and Olson to come on deck at once—as quick as they can foot the ladder."

"Yes, sir."

The cool quietness of her voice calmed me as though she had pressed her hand on my brow in fever. I sprang to the help of the others, assisted to hook the light dinghy onto the falls, lifted it clear of the deck, and swung it outward over the rail. The flame streaming up the main-hatch by this time gave us light enough, and helped hurry our movements. I saw Masters and Olson emerge from the shaft, stare at the red glare, and run toward us. I have a vague impression that McCann burst out of the companion, a bag of sea-biscuits in his arms, and flung it into the stern-sheets of the dinghy. He must have done so, for later the biscuits were there. But it was impossible to think of these things, to see clearly, to realize just what was happening. Every second I expected the ship's deck to rend asunder under our feet, blowing every human being aboard into atoms.

"Overhaul those pulleys, Leayord; no, we'll load at the rail, and lower the boat itself—are there oars? that's it; stow 'em. Olson, to the wheel with you; take a couple turns about it with a rope's end, and help the girl down. Over the side Red, and ship the tiller; now lads, over with you. Masters, you and Leayord lay hold of the ropes—don't lost your heads now and lower too fast. Here, Red, help the lady; step quick, dear; yes, I'll come—are you all in? now where's McCann?"

CHAPTER XXX.

—

A Day in the Boat.

I turned, my fingers yet gripping the rail. Before then I had had no time to think, to appreciate the full terror of our situation, to realize the horror of the spectacle. In that last instant this burst upon me in all its vivid horror. Between the two hatches the deck was a sheet of flames; already the canvas of the lower yards had caught, and was blazing fiercely. The red writhing serpents, fanned by the wind, were sweeping aft in billows, tipped with black smoke, dense and suffocating. All about us the glare of dancing fire, the swirl of shadowy smoke clouds; the air was hot, almost blistering. I saw nothing of McCann.

"He isn't in the boat?"

"No, sir."

"Well, we can't wait—lower away—yes, I'm coming."

They must have unhooked the falls at my first word, for the boat sank just as I swung to the rail. This, and a sight suddenly revealed against the front of the cabin, held me there, clinging to a stay, struck motionless with horror. I heard Vera cry out from below:

"Robert—Robert! Don't wait—jump!"

But the words seemed to have no meaning, no power to impress me; for an instant the sight I beheld paralyzed my brain. The lashed wheel still held the ship to the wind, and the clouds of smoke belched aft, becoming so dense I could not see across the deck to the port rail. I knew not where they came from, nor how they had met in that last death grapple. All I know is, that suddenly, both bodies wrapped in flame, and half shrouded in wreaths of smoke, the glare of fire on their faces, every muscle straining in the intensity of struggle—McCann fighting desperately to escape; Bascom exercising all the mad strength of insanity to retain hold of his victim. If either uttered a sound, I heard it not. It was like a horrid picture projected from out the smoke cloud, and as instantly fading. I saw the men's faces, exultant hatred in one, unspeakable terror in the other; I witnessed the strain of muscle, the awful effort to rend apart arms and limbs. It was a vision of hell, yet almost before I could thus vision it, the two figures were engulfed in a sea of flame; where they went—into the seething caldron, or over the rail into the depths of ocean—I can never tell. They were there, struggling like fiends, a horror unspeakable in a frame of smoke and fire; then that curtain of death and fire dropped—and they were no more.

I may have jumped; I may have released my hold upon the backstay, and fallen. The deck planks were hot to my feet, and serpents of flame crept along the seams as though reaching for me with tongues of fire. I staggered back with hands held before my eyes, half blinded with the glare, still seeing, in crazed memory that awful spectacle of death and horror. From far below a cry reached my ears—a woman's agonized cry shrieking upward through the crackle and roar of flames until it even penetrated my brain, and brought me life again:

"Robert! Robert! Come to me!"

I turned, and gripped the rail. With one swing I was over it, my body hurtling through the air, down into the black sea. As I came back to the surface, every numbed faculty restored by the plunge, the icy grip of the water, the glow of the flames above me revealed the small boat. Dashing the moisture from my eyes, conscious only of the pleading in her extended arms, I swam toward it. Then behind me the ship burst into a thousand fragments, rending apart with the report of a mighty gun, and shooting upward in a volcano of flame. I went down—down—down, and knew no more.

If one could be in an instant transferred from the most fantastic depths of an inferno to the heavenly delights of paradise, his experience would not seem stranger, or more impossible than mine. I had sunk to death, about me every horror of noise and sight; the black night, the glare of flame, the roar of explosion, the icy clutch of water; what followed that plunge into the depths was unconsciousness. I awoke with Vera's eyes smiling into mine, her face bent above me, the golden sunlight of a new dawn resting on her hair. I could but stare up at her, unable to comprehend, half believing it all a vision to as quickly dissolve into mist. Yet I was rational, my brain swiftly clearing to the truth. The hand which held mine was of flesh and blood; those were no dream eyes smiling their welcome, and I was lying in a boat, bobbing up and down to the surface of the sea. Words came to my lips, a whispered question:

"You—you picked me up? we are still at sea?"

"Yes, dear; oh! I am so glad! Lie still, you are not strong enough to sit up yet."

"Oh, yes I am; see, I will lean against your shoulder. Why, it is actually morning; the sun is an hour high."

My eyes left her face to survey the others, and the cockleshell in which we floated. The little boat bore up bravely under its load, although White and Olson were both bailing, and my eyes took note of several charred spots along the gunwale showing the touch of fire. Leayord was at the tiller, and seemed to comprehend all that I was most eager to learn.

"Yes, we're still afloat, sir," he said, with a sailor's hopefulness. "But it's God's mercy. By every token we should have been blown out of the water when the Indian Chief exploded, but somehow the gust of it didn't hit us. We was showered with fire, an' hit by a lot of flyin' stuff, but nuthin' to wreck the boat. White had his arm broke by a piece o' timber, an' an oar went overboard. But how we ever kept right side up in this little dinky boat when thet big iron pot sunk is more'n enybody but God could tell. We just couldn't do nuthin' but just hang on. We wus way up there, sir, a scrapin' the clouds, an' then down in a hollow that seemed a mile deep; an' when we come up out o' that, there you was, sir, shootin' out o' the waves straight at us. The girl, she saw you an' screamed; she'd have gone over after yer, if I hadn't grabbed her, an' then Red he got a boat hook inter the collar of yer jacket, an' we hauled yer in over the side."

"That must have been hours ago."

"Quite a spell, sir. Something hed hit yer head, an' it bled a bit. The young lady has been a-holdin' yer on her lap ever since; she tore her skirt—"

"Never mind that, Mr. Leayord," she interrupted, "we all of us did what we could. Olson, will you pass back a biscuit and a water bottle; Captain Hollis will regain strength if he has something to eat."

I smiled at her, and accepted the biscuit.

"How are we fixed on food? I only want my share."

"We have had one apiece; there were two bags thrown in; we can thank McCann for that, the poor devil."

The memory of that spectacle of horror witnessed on the blazing deck came suddenly back to me, and I hid my eyes, every muscle of my weakened body trembling. I felt Vera's arms hold me tight.

"What is it, Robert? You are in pain?"

"No; the suffering was mental, not physical. I—I saw McCann's death; that was what held me on board so long. Bascom got him; they—they went down together, fighting in each other's arms, in a sheet of flame. No words can picture the horror of it. Let's not talk of that any longer. I—I must keep my mind."

"Yes, dear, we will not talk of it," tenderly. "Our own situation is surely bad enough; you must tell the men what to do."

I lifted myself, strengthened by the appeal, eager to be diverted.

"The boat is taking in water?"

"Not a great deal, sir; she is so deep loaded some splashes over the gunwale. We're all right so long as the sea keeps like it is now."

"Are you steering by compass?"

"No, sir, by sun. I just naturally headed west; that's the nearest coast, I reckon? Are these fishing seas, sir?"

"The best in the world. I've often read of dory crews being lost in the winter fog, and yet making land in spite of the storm and cold. If they can do it in such weather, there is no call for us to give up while the boat floats. The first job should be to rig a sail; there is one oar left?"

"Aye, sir, and a paddle."

"Good enough. Red, cut a hole in that forward thwart with your sheath knife; not too large now. Any canvas aboard?"

"Only these strips."

"They'll do for stays, and to make secure. The sail will have to be a shirt—Olson, how about yours?"

He peeled it off without a word, and helped me fasten it to the oar blade. It was a rough bit of work, yet served the purpose, and when we had stepped the improvised mast, bracing it as best we could with the paddle, and the outspread garment bellied out in the fairly fresh wind, the sight put new heart into all of us. I could but note the fellows staring at it, and then at the rushing green water alongside, as though calculating our progress. No doubt it was small enough, yet the very knowledge that we were moving at all tended to bolster our courage, and arouse hope.

There was nothing more to be done; the boat rode fairly steady, and one man could easily keep her clear of water. The others disposed themselves as best they might, occasionally exchanging a word or two, but mostly staring about at the expanse of sea. Leayord hung on to the tiller, while I held to Vera's hand, and we spoke in low voices for each other alone.

"What a mistake we made when we chose this voyage," I said regretfully. "It has brought only hardship and peril."

"I do not regret," and her eyes gazed frankly into mine. "Truly, I do not. There was no other way for us to know and love. Robert, if this was the end, I should be glad of my choice. I would rather go down here in these waters clasped in your arms, than to be compelled to live on in the world without you."

"My sweetheart; but I will not imagine such a fate. We have struggled on through too much to have the end come in this desolate ocean. We must win—the Newfoundland coast is not so far away, and these are sailors with us. You trust, and love me?"

"With all my heart."

"Together we will have faith in God."

Her hand softly stroked my temples, her shoulders shielding me from the sun; her sweet face bending over me; her eyes smiling confidently into mine my own grew misty, and I finally lost consciousness even to her presence.

She told me later that I lay there motionless for two hours, so still, so softly breathing, as to almost frighten her. Twice she leaned close to assure herself that I did actually breathe, and her fingers felt for the beat of pulse at my wrist. It was the coma of sheer exhaustion. The bull-like roar of a startled voice forward awoke me. I caught no word, only the sound, but there was a note to it like the violence of a blow. I sat up, staring about, the entire scene within the range of vision photographing itself upon my brain. The ocean heaved in long green billows, crested with foam, the boat rising and falling as steadily as a rocking chair; the sun no longer beat down upon us from a cloudless sky, but appeared as a fiery red disk through a cloud of vapor, which swept along the surface of the water obscuring the circle of horizon. Liverpool stood erect in the boat's bow, holding himself firm by gripping the inverted oar, his free hand hollowed to make a trumpet of his voice. Every other face was turned forward, yet for an instant, the flapping shirts, improvised for sails, prevented my seeing the cause of excitement. Then Leayord, with an oath, jammed down his helm, and the dinghy swept to port, mounting a wave crest like a bird in flight, and there burst out directly ahead the sharp prow of a two-masted schooner, bearing straight down toward us, sailing before the wind.

"Ahoy there! Ahoy!" yelled Red and Olson, almost in one voice. "Port your helm! Curse you, port your helm!"

It was almost like a vision, that vessel—a grim, menacing specter, leaping straight on toward us out of the mist, the white foam circling from her sharp cut-water, her spars and ropes silhouetted against the gray fog, her main sheets reefed, but with topsails bellying to the sharp breeze, yet with not a sign of human life visible.

"Put your helm down, Leayord! Hard down, man," I sobbed. "She'll be into us in a minute! Ay! that's better; stand by, forward. If there is any chance lay hold."

CHAPTER XXXI.

A Death Ship.

It was God's miracle that we lived and kept afloat; that we were not sucked under, or crushed into driftwood. To this day I know not what occurred, or how we held upright. There was a crash, a crunching sound, a mad plunging of the tortured boat under us. My hands gripped vainly at the steel sides slipping past—then suddenly the wild race ended with a jerk, with a leap of the boat through a surge of water drenching us to the skin, and we struck the schooner's side a blow which, it seemed to me must crush every plank into atoms. I held Vera to me ready for the end, but Leayord yelled wildly:

"That's it Red! make fast there! make fast! Lively now, before we go down. The mizzen chains, Olson! Up you go, my lad—by heaven! he made it!"

I was on my feet now, understanding it all, realizing the value of each second, knowing that the shattered boat must be sinking under us. I also got grip on the chains, and the three of us held on desperately, Red hauling the single rope end taut, and looping it about the thwart.

"Here, Olson; reach your arms down; take the woman first—there's no time to wait for help. Now, Vera—quick, girl; the boat is sinking under us."

She stepped onto my shoulders, grasped the chains to steady herself; then gripped Olson's hand, sprang upward, and was drawn safely in. I turned to the others.

"Make fast, Red. There is nothing more to be done but get out. One at a time now; here, White, you're crippled, go first—hoist him up, Masters; now ease in there, Olson—good enough. You're next, Masters."

(TO BE CONTINUED.)

Carbolic Acid.

The use of carbolic acid as a disinfectant should be discouraged, but when it is used it must be borne in mind that to be efficacious it must be diluted in about twenty times its bulk of cold water.

Platinum Substitutes.

Since the development of "palau," the palladium-gold substitute for platinum, trials have been made with mixtures of these two metals in varying proportions. The alloy containing 60 to 90 per cent of gold is to be known as "rhotanium," and has a specific gravity of 16 to 18.5, is malleable and ductile and can be welded without flux or other agent. It proves entirely satisfactory for most chemical and electrical purposes for which platinum is used, though it is not suitable for use with hot concentrated nitric acid, nor for electrolytic anodes. For jewelry it is thought to be even superior to platinum, as it is harder and stronger and takes a better finish and it has practically the same color, can be worked as readily and does not tarnish or corrode.

Boy Strangles Leopard.

Strangling a leopard with his bare hands was the feat performed by a lad in South Africa. The leopard, a full-grown female, had in the course of a few nights destroyed as many as seven calves, writes a correspondent. Ultimately the spoor was found, and a chase resulted in her being brought to bay by a large hunting dog owned by the farmer, and which was then with one of his native boys some little distance from the line taken by him in the pursuit. The leopard made no attempt to take refuge in a tree, as is usual, but halted. The dog immediately tackled her, gripping the hindquarters. With the dog still hanging to her she sprang at the boy, carrying him to the ground. The boy, who is of unusually powerful build, succeeded in gripping the animal by the throat, and the two struggled on the ground. When the farmer arrived the leopard had been effectually strangled and was relaxing its grip of the boy, who was badly injured.

Be Contented.

Let none repine at their station and waste their time longing for other things than such as they have, greater things, more congenial, or things of apparently superior promise. The scale of our stewardship may be small, the items of it meager, the situation obscure, the duty to which we are called insipid and irksome in the extreme, yet in the faithful discharge of our obvious calling lie all the possibilities of discipline, all that is necessary to fit us for great destiny. Our consuming solicitude should be that we grasp the circumstances of the hour, learn their lessons, extract whatever they have to give of knowledge and strength.—Exchange.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

THE CUCKOO CLOCK.

Julius was very sleepy and he could hardly keep his eyes open. The whole trouble was that he hated to do things on time. He did not like to go to bed at the house he was supposed to and he never, never wanted to get up in the morning when his mother said, "Time to get up Julius. You'll be late for school."

And now he was sleepy, now in the middle of the afternoon. It was raining hard outside and in the big library where he was sitting a large open fire was burning merrily. Near the fireplace was a cuckoo clock and Julius always loved to watch the little cuckoo come out and tell anyone who happened to be listening just what time it was.

"It's almost time for the cuckoo to come out," said Julius. "But oh gracious, how sleepy I am. I know I was late in going to bed last night but I don't see why I should be so dreadfully sleepy. I do hope I will stay awake until the cuckoo says five o'clock. It is so much nicer to hear him on the hour than at other times, because he only says 'cuckoo' once when the hand is at the half hour."

"Cuckoo," said the cuckoo bird in the clock. And then he said it four times more. Each time he made a little bow as he spoke and when he had said "cuckoo" for the fifth time, Julius was waiting to watch the little door close.

The cuckoo in the clock always lives behind a little door over the face of the clock, and when he is not telling the time he is in there.

But this time the door did not close. And the cuckoo stayed out of his little home bobbing and saying "cuckoo" many times over, until at last it sounded like "Julius, Julius, Julius."

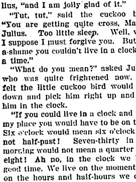
"Yes," said Julius, "you are calling me by my right name. How are you, Mr. Cuckoo Bird of the clock?"

The little bird was made of wood, to be sure, but he seemed so certain of himself and so well satisfied that Julius felt he must be alive.

"I am well, I thank you kindly," said the cuckoo bird. "But I don't have to ask you."

"Why not?" asked Julius.

"Because I know," said the cuckoo bird. "You are sleepy. And it's not the time to sleep. Ha, ha, ha. Whatever would you do if you were a clock, or if your home was at the top of one?"



"Tut Tut," Said the Cuckoo Bird.

"Well, I am not in a clock," said Julius, "and I am jolly glad of it."

"Tut, tut," said the cuckoo bird. "You are getting quite cross, Master Julius. Too little sleep. Well, well, I suppose I must forgive you. But it's a shame you couldn't live in a clock for a time."

"What do you mean?" asked Julius, who was quite frighened now. He felt the little cuckoo bird would hop down and pick him right up and put him in the clock.

"If you could live in a clock and take my place you would have to be on time. Six o'clock would mean six o'clock and not half-past! Seven-thirty in the morning would not mean a quarter past eight! Ah no, in the clock we keep good time. We live on the moment and on the hours and half-hours we come out to tell people to remember that the time is going by and they mustn't waste it for it is so extremely precious."

"Don't you believe in people sleeping?" asked Julius.

"To be sure, to be sure," said the cuckoo, "but I believe they should sleep at the right time. They should not choose another time for it, such as the middle of the afternoon, because they sat up too late the night before."

Julius was very much ashamed. He felt the cuckoo bird knew that he had been doing all that and he wished the cuckoo bird would go back in his little home and shut the door. He was getting more afraid every second that he would be taken back there. And oh dear, how he would hate to live in a clock!

"Just suppose," said the cuckoo bird, "that I did things at the wrong time. Suppose I should come out at six o'clock and tell everyone it was eight? You can't imagine it, can you? And why not? Because I have had the training of a clock. I have been an assistant in keeping the time and if I don't notice that you think more of the time I will put you back of the clock." The cuckoo bird banged his little door, and Julius, awaking with a start, rubbed his sleepy eyes, and said,

"I shall always do things on time from now on for how dreadful it must be to live back of a clock and have the hours depend so much on you."

EUROPE FACES DIRE FOOD AND FUEL SHORTAGE

Inadequate Supply of Heat Expected to Cause Much Suffering.

HOW THE ENEMY STANDS

People Have Less to Eat This Winter Than Last, Is Belief—Two Fodder Discoveries—Disaffection in Austria.

London.—Europe is going to lead the simple life this winter and for a long time thereafter. There is not a country that does not now realize the real danger of extreme food shortage.

But food shortage is not the only or in most cases the worst of the menaces. The nations face and realize as never before the exhaustion of all necessary supplies. Although food will be scarce in all countries, whether belligerent or neutral, it is doubtful whether that will impose as much hardship on people as the shortage of fuel, writes Judson C. Williver in the New York Sun.

In Europe's climate food is fuel to the body quite as much as it is nourishment. Sharply restricted supplies of food, and that of a doubtful quality and poor variety, might be endured if there were plenty of fuel. It is when the supply of fuel, both outside and inside, falls below the necessities of physical effort that people begin to suffer.

Europe has neither carbon for its food nor carbon for its fireplaces, and in some respects the northern neutrals are even worse off than the belligerents. Rations of important food necessaries have been reduced by some of them even below the amounts allowed in Germany. England is by far the best supplied country in the matter of food, and the authorities are making desperate efforts to make the population, realize that rationing will soon be compulsory unless food consumption is considerably reduced. The food authorities have announced a policy of accumulating sufficient reserve to feed the country for three months, even if no imports shall be received during this time.

Question of Shipping.

In the case of England it is entirely a question of shipping. Big stocks of food have been gathered in Australia, New Zealand, Canada and elsewhere, but there are no ships to bring them here. England is probably better situated in the matter of coal supplies than any other country, but must divide with its allies, France and Italy, and so far as possible some of the neutrals hope to be taken care of from the English mines.

The German food situation is puzzling. Apparently the authorities are not nearly so confident about it as they would like the public to believe. The year's harvest turned out more satisfactory than seemed probable during the period of droughts and hailstorms in midsummer, but on the other hand reserves were heavily drawn upon before the harvest of 1917 was gathered. Reserves, indeed, may fairly be said to have disappeared.

The carefully cultivated official understanding in Germany is that there will be a better food supply this winter than last. The specific statements justifying this expectation are highly unsatisfactory. The Munich Medical union has declared that there will be less food, except potatoes, this winter than last. Throughout Germany there is apparently a pretty general belief that this is true, and widespread demand is voiced for an increase in the allowance of potatoes.

In Germany, as in England, the immediate result of the harvest was a great increase in the marketing of potatoes with the consequence that in many places there were not storage facilities to take care of them. The fear is expressed that a not inconsiderable portion of the potato yield will be wasted, partly because of overconsumption in the agricultural areas and partly from inadequacy of storage facilities. So from many German authorities comes the warning that despite a big yield of tubers the coming winter is likely to see conditions quite as bad regarding them, and worse as to many other things than last winter.

Ominous Suggestion.

The ominous suggestion is made by some of the German food authorities that it will not do to be too free with potatoes, because later it will be necessary to mix more potato flour with cereal flour to stretch the supply. Also as there was a short crop of fodder throughout the country potatoes are likely to be required to feed domestic animals.

The fear of such an event has caused widespread demand that more hogs be slaughtered that they may not require to be fed with potatoes that the people will need. The number of hogs in the country has been increasing this year, and the fact gives concern because the pig is an active competitor of a munition worker or anybody else in the matter of food requirements.

German authorities have determined that beyond providing a moderate meat ration the transmutation of vegetable into animal food is a dangerously wasteful process. So there is an effort to induce farmers and village dwellers to restrict the number of hogs and cattle to the point where it will be just possible to raise the absolutely necessary meat ration.

The relation of the general economic breakdown to agriculture is indicated in both England and Germany by matters affecting the supply of agricultural machinery. In Germany there is a most serious shortage of all kinds of agricultural tools and machines, because the old ones have worn out and there is neither metal nor manufacturing capacity to provide new ones.

In England the complaint particularly concerns the supply of motor plows. The government long ago promised that thousands of these would be furnished in time to put a greatly increased acreage in cereals under cultivation in 1918. Now when the fall plowing season is on it develops that want of shipping or other reasons have prevented the delivery of anything like an adequate number of these machines.

A Dresden physician who is quoted as an authority, has recently discussed the German food situation as regards the requirements and supplies of various classes of consumers. He finds that children up to eight years of age are receiving a reasonably satisfactory ration, but the amount allowed to those from eight to eighteen is utterly insufficient and that the shortage seriously threatens the physical vitality of the next generation.

Some of the German jurisdictions have recently announced that newly married couples will be granted a double food allowance for the first six weeks of their married life! Elsewhere provision has been made to double the food allowances of nursing and expectant mothers.

PRINCESS JEANNE

Little Princess Jeanne, youngest member of the Italian royal family, photographed while, on a visit to wounded soldiers recently, returned from the Italian battlefront. The princess is one of the most popular members of the king's family, especially with the Italian public. She is idolized by the soldiery.

The effort to find fodder for animals has started the professors on many investigations and inquiries. Doctor Degen, director of the seed testing station in Budapest, claims to have discovered two valuable articles of fodder. He writes:

"The searush (Bolboschaenus maritimus) was known, as regards the part above ground, as a fodder equal in value to straw. Recent experiments have, however, shown that the tubers growing on the roots underground are far more valuable. They come very near to the horse chestnut in the amount of raw protein, raw fat and starch contents, without the bitterness. If they are used for the manufacture of spirits the wash, either wet or dried, can also be used for fodder.

"The pond bullrush (Schaenoplectus lacustris) also contains a valuable underground organ. The horizontal roots, containing a great quantity of starch, form a good concentrated fodder. If used in distilleries the wash is not so valuable as that from the searush. But in a time of need it is a raw material that can be used for various purposes."

Milk famine confronts all Europe. The situation has long been bad, and grows steadily worse everywhere. There is constant and increasing conflict between the various state and municipal authorities dealing with the food question throughout Germany. In this regard the German situation is much more complicated and difficult to handle than the English.

The state and municipal governments in Germany are very jealous of their authority in their respective jurisdictions, and the federal authorities dare not or cannot impose universal regulations upon them. In Saxony arrangements have been made to reimburse farmers who would import from other states cows and heifers in calf. Farmers making such purchases will receive a premium of 20 per cent of the price paid, not to exceed 300 marks. This arrangement has caused violent complaint because the prices of butter and milk are already fearfully high and the consumers complain that the farmers are making immense profits from producing them.

From Frankfurt comes the report that at present milk deliveries in that city amount to about one-sixth those of peace times. Receipts scarcely suffice to take care of the privileged customers, invalids, nursing and expectant mothers, and so forth. A large share of what is actually obtained is produced by the municipal authorities from their municipal dairies and farms. It has been a very expensive method, yet the situation is so bad that the town has decided to extend it still further.

German speaking Austria has long been jealous of the comparatively favorable food situation in Hungary, and recently the disaffection has become acute. It is charged that Hungary is feeding herself bountifully and leaving the rest of the empire to shift as it can. For whatever Hungary is willing to send into the German speaking regions outrageous prices are charged, and the subject has been discussed with painful frankness in the legislative bodies of both states.

It was said that recently lard from Hungary had been sold in Austria at nearly eight times the price it would have cost in Hungary. The same general situation prevails as to many other Hungarian food supplies.

The Hungarians complain with equal rancor that they are charged excessive prices for all manufactured articles produced in Austria. The two governments have been trying to agree upon a general policy of leveling down the prices of both. But at this point they are confronted by the same difficulty which has been so many times experienced in Germany; no system of price control will stretch inadequate supplies to the point of adequacy.

In Holland the state's control is being extended to almost all food supplies. There are indications that the rationing system is going to be established before winter shall have far advanced. The use of fat and margarine by bakers and confectioners and by hotels, restaurants and clubs in preparing food has been prohibited. The government has guaranteed prices for wheat, rye, oats, barley, etc.

As to crops not available for food the areas that may be planted have been strictly limited; in some cases to not more than 40 or 50 per cent of the plantings of normal years. A premium has been offered for increased areas of land under the plow. The government is going to requisition the entire crop of sugar beets, the factories will convert them into sugar, and this will be turned over to the government at a fixed price for distribution. The price demanded of the public will not be increased.

Although Denmark is, in proportion to area and population, one of the greatest agricultural producing and exporting countries in the world, it is now confronted with shortage of almost everything. The country's butter production has decreased alarmingly, and there is a demand for rationing. The government is undertaking to subsidize the production of butter so as to reduce prices; that is, to apply to butter practically the same rule that was applied to bread in England. The English government is subsidizing bread to the extent of about $40,000,000 a year, thus making it possible to sell the English loaf of war bread for four and one-half cents.

In Norway the government and the local food authorities are working to perfect a rationing system in time to save the country from disaster this winter. At Christiania a big scheme for storing reserves of food has been worked out and some 25 warehouses in various parts of the city are being stocked. Under a law passed last May the government has established a monopoly of the import of wheat, barley, oats, rye, beans, peas and lentils and other grains and meal used for human food except rice and potatoes.

Chance to Marry Free.

Lorain, O.—Mayor L. M. Moore of Lorain has been mayoring two years, and has not yet performed a marriage ceremony. Now he wants to marry some couple before he becomes an "ex" and before his powers as a matrimonial splicer expire.

"I have read up on the requirements and believe I can do a good job," said the mayor.

"All that I need is a couple. To the first applying I will marry them free, and give the bride a present."

JAPANESE BUILD 250 SHIPS A YEAR

Tokio.—Japan is able to build 250 ships a year, their tonnage totaling 1,000,000, according to a government statement. The shipbuilding business of Japan has had an unprecedented growth since the beginning of the war, and on September 1 there were 113 shipbuilding slips owned by 42 firms, besides 24 slips which are building and will be ready before the end of the year. These facilities are more than three times as great as at the beginning of the war. Each slip is capable of turning out a ship of more than 1,000 tonnage in less than a year.

MAKES WARSHIP LOOK LIKE TUB

Painters Disguise Craft to Deceive Foe Lurking in Enemy Waters.

CAMOUFLAGE IN THE NAVY

Even Dreadnaughts Made to Appear as Something but the Monsters They Are—Navy Men Like Gray the Best.

By J. M. DAIGER,
Correspondent Chicago News.

Norfolk, Va.—"And what is that old tub lying over there, captain?"

"That happens to be a brand new torpedo boat destroyer that has just arrived to be manned and put into immediate service."

The thing that made me call the new destroyer an old tub is the thing that makes the commander of a German U-boat look through his periscope and remark: "A fine morning, but not a ship in sight." If the next instant finds the submarine banked straight down into Davy Jones' locker, it is because the commander failed to launch a torpedo at the "fine morning" and because the "fine morning" got in its shot first.

It is the naval camouflage—the painting of ships to look at a short distance like what they are not and at a long distance like nothing at all.

Even a Superdreadnaught.

Impossible as it might seem to make superdreadnaughts appear anything but the monsters they are, there are nevertheless processes of camouflage for them. It is obvious that details as to what designs are being used on various types of ships are not for publication, especially in view of the fact that experimental schemes for having ships sail in false colors—not under them—are constantly being tried out.

I saw one of the largest of the naval colliers, which has several times crossed the Atlantic since America's entry into the war, that had a very simple scheme of camouflage in which only grays were used. Simple in conception and execution, apparently, but it had an amazing effect on the appearance of the ship a short distance at sea, and from what happened at that short distance I have no doubt the collier was lost to the eye when it got much farther away.

The older naval officers incline to the opinion that the regulation navy gray by itself is better than any camouflage that the artists have invented, and they are frankly skeptical about these riots of color and freak designs that the scientific application of one of the fine arts is smearing over their ships.

The camouflage used by a great many merchantmen is familiar to everyone who has observed the shipping in the harbors along the Atlantic coast. These vessels close up look like scrambled rainbows or like the palette of an artist in his cups. The weather has much to do with the power of these gay colors to create optical illusions.

It is almost impossible for people living comfortably in large cities to imagine the hardships which the men who watch our coasts are suffering at this time of year. Twenty degrees below zero in the Rocky mountains is not so cold as the weather around the capes. The government has supplied the hundreds of men on the patrol boats, the submarine chasers and the mine sweepers with their allotment of winter clothing, but they need knitted articles.

Sometimes Must Let It Sink.

Should disaster overtake a ship the rules in the district office at Norfolk say the first consideration must be the war needs of the country. One vessel must not risk danger to save another. The conservation of ships and of men, not the chivalry and the courage and the heroism of the sea, must guide the decision of those who would save a shipwrecked crew. If the number of lives involved is very great—great enough to justify the risk of a smaller number of lives—then the rescue may be attempted. But if there is doubt that a rescuing party will itself return from a perilous journey to save a small number of lives, then the war time rule is firm.

Early every morning the ships go out in pairs, sister ships, with their huge "broom" stretched across from one vessel to the other, to make clear the path for the merchantmen and warships that must pass through the capes and out to sea and for those that come in during the day. Do they find any German mines? I don't know. But if there are German mines to be found near our coasts, the work of the mine sweepers is a risky business indeed. Even if there are no German mines, I suppose it is quite possible for an American mine—there are thousands of them planted in the district—to break loose from the great mine field in Hampton Roads, or elsewhere, and drift in the way of unsuspecting ship. And there is always the possibility of the enemy within doing what unceasing vigilance in the naval district is trying to prevent him from doing.

Damages for Being Called Traitor.

St. Louis.—John H. Boyer has been awarded $1 actual and $200 punitive damages from Gus V. R. Mechin, who tried to force Boyer to stand while "The Star-Spangled Banner" was being played. Boyer testified that he was called a traitor and assaulted.

Coal Gas for Motors.

The use of coal gas instead of gasoline for motor fuel is rapidly increasing in English cities despite the fact that engines that are driven by it develop but 90 per cent of the power obtained from gasoline.

DOES HER BIT AT 95

Mrs. Thomas Edwards of Oberlin, O., at the age of ninety-five years has supplied her four sons and numerous grandchildren with enough canned stuff from her own garden to supply them for the winter. She did all her garden work except the plowing, and canned her products under the direction of manuals furnished by the national emergency food garden commission.

Edith Cavell's Cousin in Army

Seeks Vengeance for Brutal Murder of His Boyhood Companion.

NOW IN THE SIGNAL CORPS

Rejected Many Times by Recruiting Officers in United States and Canada on Account of Small Size —Wants Blood for Blood.

Camp Gordon, Ga.—There is one lad wearing khaki in this camp who entered the army with a fixed determination to avenge a deeply seated private wrong.

He is Lawrance R. Cavell of Chicago, first cousin and boyhood companion of Edith Cavell, the English Red Cross nurse whose execution at the hands of a German firing squad in Brussels sent a thrill of horror through the world.

It was no easy matter for young Cavell to break into the army. Not until after several vain attempts, both in the United States and in Canada, did he succeed in getting himself straightened out on the first quarter of the course which he expects to lead to the satisfaction of his desire for revenge.

At the time of the murder of his cousin he was only eighteen and small for his years. His father had been engaged in business in Chicago since he had transplanted the family from the native heath in the county of Kent, England, some years before. Kent was also the ill fated nurse's home, and as a very small boy young Cavell had developed an admiration and affection for his cousin, some ten or fifteen years his senior, that bordered almost on adoration.

Inexpressibly shocked by the news of his cousin's atrocious death, the boy immediately presented himself to the agents of the Canadian recruiting forces in Chicago for enlistment in the overseas service, but he was rejected on account of his age and size—he was many pounds underweight. He even went to Canada and brought all the political influence he could compass to bear in order to carry out his purpose, but again was turned down.

No one could have hailed the entrance of America into the war with more real joy than he. It would give him his long awaited opportunity to gain some recompense for the murder of his cousin, he thought. He was again doomed to disappointment. A recruiting officer told him that he was too small. Nothing daunted, he carried his case to Washington in person and the matter was placed before the war department through an influential army officer in Chicago.

Permission was given him to volunteer in the signal corps, and this he did in Chicago last June. He has just been transferred to Camp Gordon as a member of the outpost company of the 317th signal battalion under Major Hemphill. Eagerly devoting himself to his duties and apt to learn, he already has been scheduled for the rank of top sergeant in his company. He also has developed his physique until now he is as hardy as the best soldier in the army. He hopes for a transfer to the aviation section, as it is the goal of his ambition to hurl bombs on the Boches from the air.

A visitor to Camp Gordon this week to see his son, Cavell's father called on Captain Allen of the outpost company and recited the story of Lawrence's long baffled determination of revenge, a thing the boy himself had been too modest to do.

The father said the lad had been brought up in the same house in Kent with Miss Cavell, and that her relationship to him was rather that of a devoted elder sister than of a cousin.

"It matters not what branch of service I am in," the boy told his father. "I shall die satisfied only when I have drawn blood for blood, and I pray God to live to see that day. I expect to. He will answer my prayer.

"Edith was murdered without a hearing in cold blood by the kaiser. She was an English girl, and they sang the hate song over her dead body. I expect to sing the song of hate over the dead bodies of Germans. No sacrifice is too great, no punishment too severe, no hardship too trying; death itself a coveted reward, just so I am permitted to put bullets into German hearts as that firing squad under orders put them into my cousin's heart. I am in the war for a purpose and I shall accomplish it."

Deeply grained as his hatred of the Teuton race had grown, Mr. Cavell said that his son had no quarrel with individual Germans. Scores of them in Chicago, he added, had expressed to his family their horrified resentment of the execution of Miss Cavell.

"MILITARISM" IN THE CONGO FREE STATE

Scene in the Congo Free State showing native soldiers riding on a flat car which is propelled by native civilians.

'FAMILY HISTORY' LOSES SUIT

New York Wife Charging Husband Flirted With Her Sister Is Denied Divorce.

Cold Spring, N. Y.—Justice J. A. Young of the supreme court, denied in Dutchess county an application made by Mrs. W. A. Deyo of Verplank, for a separation from her husband, whom her sister accused of flirting with her.

The justice refused a decree after the plaintiff's sister, Lillian, admitted Mrs. Deyo was the fourth of their family to bring marital actions, two sisters having received divorces and two having sued for separations.

The plaintiff's sister declared that on two occasions when she called on Mrs. Deyo, Mr. Deyo forced his attention on her and made proposals to her. Mr. Deyo absolutely denied the accusations of the sister-in-law, who was divorced some time ago from her husband, and he won the action.

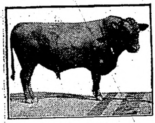
The DAIRY

FIRST-CLASS BULL FAVORED

Associations Are Now Making It Possible for Farmer to Secure Service of Purebred Sire.

The owner of a large herd of grade cows can well afford to own a first-class bull, and bull associations are now making it possible for the owner of a small herd to own a share in a good, well-bred bull. A co-operative bull association is a farmers' organization the chief purpose of which is the joint ownership, use, and exchange of high-class, purebred bulls. If skillfully managed, these associations should be eventually the greatest single factor in the upbuilding of our dairy herds.

To build up a valuable and profitable dairy herd, careful and intelligent management must be combined with selection and breeding. Ill treatment and insufficient or unsuitable feed have made many a well-bred and carefully selected herd unprofitable. All cows should be well bred and well fed. It never pays to keep a cow that does not pay a fair return for first-class feed and care.



Animal of High Class.

URGE CLEAN DAIRY UTENSILS

Dirt Is Cause of Production of Much Poor Milk, Cream and Butter—Wash Separator.

Much poor milk, cream and butter are produced because of dirty utensils. It is not necessary that the dirt be present in sufficient quantities to be seen by the naked eye in order to render the can unfit for use.

The unclean separator is another common source of contamination. The separator should be taken apart and carefully washed and scalded after each separation. After the separator parts and utensils have been cleaned and dried, they should have a clean, dry appearance and should not be greasy to the touch.

A greasy coating on the interior of a milk can will spoil milk or cream in a very few hours. It doesn't cost any more to keep the utensils clean and the results obtained are more satisfactory in every way.

WATER GIVEN MILKING COWS

Test Proves That Animals Drink at Pond or Creek Only Enough to Satisfy Cravings.

It stands to reason that in winter the water given milking cows should not be icy. Many farmers boast of the fact that they own creeks or ponds to which their cows have access in cold weather. And while this saves work and expense, it is hard on the cows, though the farmers claim it is not. If you want to test the matter, let your cows go to the pond or creek and drink through the ice. Then, when you have returned to the stable, carry in water that is not lower than about 60 degrees Fahrenheit, and see how your cows will go after it. This proves that they drink at the pond or creek only enough to satisfy their immediate cravings and not enough to fill their bags with milk.

MAKE DAIRY BUSINESS PAY

Raise All Heifer Calves From Good Cows and Keep Purebred Sires—Have Good Silos.

To make the dairy business pay the best, raise all the heifer calves from good cows and keep purebred sires, is the advice of Wear Brothers of Illinois who speak from experience. Have good silos and put all corn raised in the silo. Have plenty of alfalfa and clover hay. Cows must be well housed and given plenty of water to get best results.

LIGHT FOR WINTER MONTHS

Darkness Has Deteriorating Effect on General Health of Herd and Affects Eyesight.

The dark dairy stall is more likely to be in evidence during the winter months than in the summer, as some farmers seem to think the barn must be closed as tightly as possible. Still, light is not only an essential to comfortable quarters, but darkness has a deteriorating effect on the general health of the herd, the eyesight being especially affected.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

WORMS IN HOGS ARE INJURIOUS

Infected Animals Develop Into Pot-Bellied Runts.

SUCH PIGS DO NOT THRIVE

Mixtures Containing Charcoal, Copperas, Etc., Are Believed to Be of Value as Preventives—Santonin Is Scarce.

(Prepared by the United States Department of Agriculture.)

Intestinal worms are common in hogs and are particularly injurious to growing pigs. Insufficiently fed, neglected pigs living in dirty pens and yards, fed from filthy troughs, drinking contaminated water, bathing in old hog wallows, and rooting and sleeping in manure piles and stack bottoms soon become infested with worms. Such pigs do not thrive, but develop into pot-bellied, profitless runts. Pens should be kept clean and dry and the manure frequently removed.

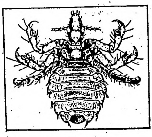
Mixtures containing charcoal, copperas, etc., are believed by some to be of value as preventives and destroyers of worms, but their usefulness probably depends upon their general effect on the condition of the pig and not upon their action on the worms. Other things being equal, a pig in good condition is better able to resist the attacks of worms than one that is not in good condition. Mineral mixtures may, therefore, by helping to balance the ration, tend to increase the powers of resistance to the ill effects of worms and other parasites. They should, however, be classed as tonics or conditioners rather than as worm preventives or destroyers.

Santonin, which was formerly widely used as a remedy for worms in hogs, is practically unobtainable at the present time owing to foreign trade conditions.

Effective Treatment.

The following treatment has been found to be very effective in expelling intestinal worms in experiments conducted by the zoological division of the bureau of animal industry:

Withhold all feed and water for 24 hours, then give each pig from 1 to 2 ounces of castor oil to which has been added oil of American wormseed as follows: Pigs weighing less than 50 pounds, one-half teaspoonful; pigs weighing 50 to 100 pounds, one teaspoonful; large hogs, two teaspoonfuls. Each pig should be dosed separately if the best results are to be obtained. Castor oil should always be given with oil of American wormseed. Other laxatives are not satisfactory.



Male Hog Louse.

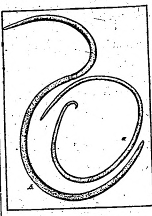
Dangerous to Drench Hogs.

Drenching hogs is dangerous, as they are liable to get the remedy into the lungs. With sufficient assistance pigs may be held, the mouth kept open by means of a couple of loops of wire or rope, or leather straps, and the medicine given in a tablespoon or a large kitchen spoon. By this method, though it is troublesome, one may be certain that each pig gets his proper dose. After dosing with the above mixture pigs may be fed and watered. Repeat the treatment in ten days.

Change Pastures Frequently.

Healthy hogs become infected with intestinal worms from feed, water and soil which have been infested by the droppings from infected hogs. Frequent change of pasture is one of the best means of reducing worm infestation to a minimum. Hogs, however, should not be allowed to run at large on open range, as this favors the spread of hog cholera.

Swine can be raised when they are confined in limited quarters if the quarters are kept clean, but they will do much better and stay in better health if they have plenty of pasture. Divide the pasture into convenient areas, so that the hogs can be shifted from one pasture to another. This not only provides fresh pasture, but affords an opportunity to disinfect the pastures by plowing and reseeding or by exposure to the sun and weather.



Common Roundworms of Hogs—a, Male; b, Female.

ADD TO OUR MEAT SUPPLIES

Quickest and Cheapest Way Is to Increase Poultry and Egg Production—Eat Less Meat.

The quickest and cheapest way of adding to our meat supplies is to increase poultry and egg production. To double this production next year will give us 6,500,000,000 pounds of meat food in the form of poultry and eggs. By having this amount of poultry food for domestic consumption we will eat less pork and beef, and can send almost that many pounds of meat to Europe. We cannot increase any of the meat animals as rapidly or economically as poultry.

Poor Place for Honey.

The worst place imaginable to put honey for storage is in the average cellar, says a bee expert.

Good Stock at Start.

"It pays to start with good stock" is an axiom with many men of successful experience.

SUCCULENT FEED IN WINTER

Acre of Corn Can Be Placed in Silo at Cost Not Exceeding That of Shocking and Husking.

Silage is the best and cheapest form in which a succulent feed can be provided for winter use. An acre of corn can be placed in the silo at a cost not exceeding that of shocking, husking, grinding and shredding. Crops can be put into the silo during weather that could not be utilized in making hay or curing fodder. There is less waste in feeding silage than in feeding fodder. Silage is very palatable and like other succulent feeds silage has a beneficial effect on the digestive organs. More stock can be kept on a given area of land with silage.

CURING AND STORING SEEDS

Soy Bean Spoils Rather Easily Unless Properly Handled—Avoid Heating and Molding.

Soy bean seed spoils rather easily if not properly handled, and care should be used in curing and storing. After threshing the beans should be watched carefuly to avoid heating and molding. When good and dry there is no such danger. A good plan is to spread the beans out on the floor immediately after threshing and shovel them over from time to time until they are thoroughly dry, then they may be safely be put into socks or bins. The storeroom should be dry and have a free circulation of air. Soy bean seed loses vitality very rapidly and it is not safe to hold seed for planting purposes for more than two seasons.

Feeds for Bone and Muscle.

While corn is the best fat producer, young growing pigs to thrive best must have other foods for making bone and muscle.

GUARD AGAINST HIGH PRICES

One of the Best Ways to Grow as Much Food on Farm as Facilities Will Permit.

One of the best ways to be insured against high prices for food is to raise as much of it on the farm as facilities will permit. Both meat and bread will be important next year. When we think of the importance of milk pork, poultry, eggs, butter, beef, mutton and other foods derived from animals we are sure to be impressed with live-stock raising.

Buying Seed Corn.

If you must buy seed corn pay your neighbor a reasonable price for selected dried seed of a variety that has made good in a neighboring field; but don't pay a stranger a fancy price for seed claimed to give miraculous yields.

Ailments Are Preventable.

Chickens are subject to a large number of ailments, most of which are preventable.

GOOD ROADS

IMPORTANCE OF WAGON ROAD

One Drawback to Fall of Rain Is That Roads Are Made Impassable for Several Days.

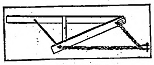
But for one fact, all of us could rejoice in this rain, meaning as much as it does to the growing crops. The one drawback is the unfortunate fact that the rain will make the roads almost impassable for several days. But the rain is not to blame for this state of affairs. We are. We ought to have roads on which the only effect of rain would be to wash them clean—just as it does with the city pavements. And it's not for the joy-riders alone that we need such roads, says Wichita Eagle. If we had good roads, farmers, who can't work in their fields after a rain, could do their hauling on such days. Now the rain that prevents working the fields prevents hauling to market, except light loads, and at a prohibitive cost. The wagon haul of agricultural products is infinitesimal in distance, as compared with the rail and water haul, yet it costs actually more, according to government statistics. For the benefit of the farmer we need good roads.

MAINTAIN ROADS WITH DRAG

No Better or Cheaper Way of Keeping Highways in Good Order Than by Using Implement.

Road dragging is so simple an undertaking, providing the road to be dragged is first graded, drained and shaped properly, that a summary of its benefits cannot be presented too often, writes George B. Harrison in Farmers Mail and Breeze. Anyone can make a drag and even a boy can keep a piece of road in good shape with the proper instruction at the beginning. A 10-inch or 12-inch log between 8 and 9 feet long or two 8 by 12 planks with 2 by 6 reinforcing strips of the same length, four cross sticks, a chain, boards for the platform and a metal wearing strip are certainly procurable anywhere.

The theory in road dragging which has proved practicable for road improvement is to smooth and shape up the puddled earth of a road to fill the ruts and holes and force the water off the roadway. "Puddled" earth on a road is the wet earth which has been worked up by traffic so that it is dense and when compacted will not let the water seep away. If this compacting is done without any direction ruts and holes appear and hold the water and make a bad road. But if the puddled earth be spread smoothly over the surface of the road with somewhat of a rounded effect it dries firm and hard, and the water, instead of standing in the road and making the holes deeper, must run off to the side—and the traveler has a good road.



Road Drag Hitch.

The road dragger, or "dragman," as he usually is called, is like a clay worker when he shapes up the puddled earth and smooths the road. He puts the surface in condition and gets the standing water off, and the roadbed dries in that condition instead of holding the water and letting the traffic work the ruts deeper. The dragman could not shape this up with dust any more than the clay worker could fashion his image with dry dirt. But if he gets out right after a rain, while the earth is puddled, he can work his road and the traffic will help him, for the water will be forced out and off the surface. That is why it is so important to drag when the roads are not too dry to puddle or compact. Perhaps the traffic is sufficient to cut up the road after it is dragged, and this discourages the man who does the dragging. But in that case he should follow over the road and do it again if necessary and win the fight for a good road. If he waits until the road is dry because the vehicles rut up his dragged road he will simply plane off the surface and not remove the trouble. If he drags a second or perhaps a third time he will work toward a hard surface, impervious to water and with a minimum of dust, which is the evidence of a well-dragged highway. Perhaps, if the vehicles cut a road when it is first being dragged, the drivers may be persuaded to drive by the side, if that is feasible, while the road is first drying out or freezing.

Follow the Good Road.

Follow the good road and it will lead to a good town and by many a good farm.

Dragging Public Roads.

It is not difficult to prove that dragging the public roads regularly at the proper time probably is the most economical method of highway improvement.

Road Dragging Is Ahead.

Even at maximum costs road dragging is ahead of other maintenance both as to results and for economy.

Use Full Width of Road.

Get the traffic to use the full width of the roadway.

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter
We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most [illegible] too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

News of the State

Condensed for Busy Folks

Clay county has paid $10,120 to mothers under the provisions of the mothers' pension act of 1913. In the last year $3,176 has been paid. Payments to mothers now range from $4 a month to $36 a month.

Red Lake county went "over the top" in the recent membership campaign for the Red Cross, 428 members being secured for the Red Lake county chapter. This county is one of the smallest in the state.

Francis E. Shenehan, former dean of the engineering college of the state university, has been retained by the city of Natchez, Miss., for work on the problem of water supply and protection against floods from the Mississippi river.

Croatians of the Hibbing district belonging to the Croatian Benefit society will meet at Hibbing Jan. 13 to elect officers and adopt loyalty resolutions. The local society is one of the old foreign societies on the range and has a big membership.

A. D. Smith, St. Paul, investment clerk in the state treasury department for nine years, has resigned. He was recently admitted to the bar and will go into the office of James J. Giblin, city attorney of Eveleth. Carl J. Eklund will succeed Smith.

Hiram Olsen, son of Mr. and Mrs. Olsen of Welch, died at Camp Cody, N. M., of pneumonia, following an attack of measles, being the second Goodhue county boy to die in his country's service during the present war. The body was brought home for burial.

The Federal food administration wants to know if food is wasted in Hibbing, and what, if any, finds its way to the incinerator plant. Mayor Victor L. Power has received a blank which is to be filled out and returned to the garbage utilization division at Washington, giving the information.

C. W. Anding, county auditor of Winona county, was arrested at Winona by Deputy United States Marshal Joseph Buisson and charged with an attempt to cause insubordination, disloyalty and refusal of duty. Specifically, Anding is accused of urging Kurth Shellhas, Clarence Crawford and others to refuse to take the federal oath if drafted.

The Hibbing village council has decided that the village needs a police matron and has appointed Miss Vashta Gilpatrick to the position. She will particularly look after the children. She will see that the youngsters behave themselves at the postoffice, and that those too young do not frequent pool halls, and that young children are kept off the streets at night.

Hotels and restaurants throughout Minnesota generally are complying with the rules and regulations laid down by the state food administrator, Walter A. Pocock, member of the investigating committee, said. No complaints have been received by Mr. Pocock from traveling men who have enlisted in the interests of conservation and who are to report any disregard to the rules.

A woodsman, believed, from the name on a hospital ticket found in his pocket, to be H. J. Turner, was found frozen to death on the ice about one-half mile from Glengary point, near Walker. He appeared from tracks in the snow to be going to Walker. The man was evidently going to the hospital from Robinson's camp and becoming confused wandered about in a circle.

Directors and other interested in the seventh annual farm crop show and the second annual live stock show to be held at Crookston Feb. 11 to 15, met and perfected plans to make the two shows the biggest ever held. Senator Saugstad, secretary of the Northern Minnesota Poultry association, was also present to plan for holding a poultry show in connection with the livestock exhibits.

Chairman Hare of the county Red Cross drive reports that 7,120 is the record of Mower county's Red Cross membership contest.

W. B. Lindell, the second of the two prisoners who escaped from the Fort Snelling guard house Dec. 22, gave himself up at the fort Sunday night.

O. E. Reiersgard of Ulen was elected president of the Clay County Editorial association, Ray B. Osborn of Glyndon vice president and J. H. Freeman, of Moorhead, secretary-treasurer.

Breeders of fancy poultry from Canada and the East competed with Minnesota poultry fanciers at the state poultry show which was held at Minneapolis. The show this year was larger than for several years past.

Daniel S. Hayward, proprietor of the Grand Central hotel, St. Cloud, has leased the hotel for twelve years to W. S. Beard of Minneapolis, former proprietor of the Hotel Nicollet. Mr. Hayward has left for Riverside, Cal., to spend the winter.

Five Winona boys, all classmates, have arrived in France, according to messages received by their parents. They are: Privates William Riley, Arthur Gallien, Paul Baumgartner, Stanley Ollhoff and Corporal Clarence B. Barth. All were enlisted early in the spring and left New York as members of the aviation corps two weeks ago.

During the past thirty days 263 lumber-jacks have been shipped from Stillwater to Satona, Minn., where they are employed by J. E. McGrath of Stillwater in a big lumber camp near that place that he is operating.

USE MORE CORN WILSON EXHORTS

State Food Administrator Announces Coming Drive For Greater Use of Grain.

CHILD LAWS IN FORCE

New Statutes Giving Protection to Illegitimates, Dependents and Delinquents Now Effective.

St. Paul.

Minnesotans as well as Iowans are to be cornfed folk if the Federal Food administration for Minnesota has its way. A. D. Wilson, state food administrator, has announced that corn was to be the subject for the next big food drive.

"American housewife, use more corn!" is Mr. Wilson's exhortation.

"'We have 30 bushels per person for this year, and our average consumption is less than one bushel per person. Four-fifths of all the farmers in America grow corn and one-third of all the land under cultivation is in corn. Corn cannot be shipped for two reasons: There are no mills over seas for grinding of whole grain, and cornmeal grows rancid in passage. This is due to the large amount of fat which detracts from its keeping qualities, while it adds to its food value. What is the 'bit' for the housewife of today? Corn saves wheat for soldiers.

✣ ✣ ✣

New Child Laws in Force.

With the war making more urgent the necessity of child conservation, authorities will begin enforcement of Minnesota's new child welfare laws which give children born out of wedlock a better chance; place guardianship over all dependent and delinquent children; broaden the jurisdiction of the juvenile court and increase the scope of the mothers' pension law.

Under the terms of the new laws, the maternity hospitals and infant homes in the state also must be incorporated and licensed annually.

William W. Hodson of Minneapolis, who has been named director of the children's bureau, which will be conducted by the State Board of Control, said that he will confer at once with Mrs. R. J. O'Connor and Miss E. Hayes of St. Paul, Miss Florence Monahan of Minneapolis, and Miss Lucile Way of Northfield, field agents, on their duties.

They will begin their work in the Twin Cities, reporting all unlicensed hospitals and infant homes to the Board of Control so that they can be licensed under the terms of the act passed at the last session of the Legislature.

Under the illegitimacy section of one of the statutes, the father is made responsible in the same degree as though the child were legitimate.

✣ ✣ ✣

May Charter No More Banks.

With a view toward conserving Minnesota's financial power to aid the government in winning the war, F. W. Pearson, state superintendent of banks states that he has planned to suggest to the State Public Safety commission an order to prohibit chartering new state banks until the end of the war. The results, Mr. Pearson said, would be that prospective stockholders in new banks would be influenced to buy Liberty bonds and use their funds in other ways which would help the government. The Public Safety commission has been passing on applications for charters for new state banks for some weeks, but only with a view of determining the loyalty of the project.

In one instance the commission directed the superintendent to refuse a charter for a new bank on the ground that it was backed in some measures by parties who became displeased with other banks in the same town which had aided in Liberty Loan and other patriotic undertakings.

✣ ✣ ✣

1918 Crop Survey Unlikely.

No special survey of Minnesota's crops likely will be made next summer other than the customary crop report estimate, A. D. Wilson announced after a conference with Paul H. Kirk, field agent in the crop reporting service of the Department of Agriculture.

The conference came as a result of a letter to Mr. Kirk from Washington, urging him to consult with Mr. Wilson as to the advisability of conducting a state-wide survey of crops, yield, acreage, labor and general resources next summer. It was proposed to do this work through the schools. Several hundred high school agricultural students were to be enlisted in this work.

✣ ✣ ✣

Delinquents Face Suit.

Hotel and restaurant keepers who failed to pay the state license fee of $2 for 1917 will not escape payment, it has been announced by W. A. Wittbecker, state hotel inspector. Fifteen or twenty places in St. Paul are delinquent and prosecutions may start this week. By February delinquent lists will have been mailed certifying hotel and restaurant keepers to county attorneys for prosecution. Further inspections will be made soon of St. Paul hotels and restaurants, Mr. Wittbecker announces.

IS HONORED BY FRANCE

Copyright,
Underwood & Underwood

France has honored another American for serving her in the struggle against autocracy. Doctor Irwin of New York, shown in this photograph, has just been decorated by the French government for the zeal he has shown in treating French wounded.

Cotton in Australia.

Chiefly because of the war cotton growing is being taken up with increased vigor by farmers in Queensland, as shown by the large amount of raw material which the department of agriculture is receiving for ginning purposes. To foster the industry the department has been buying all the raw cotton grown in the state, ginning it and selling it on behalf of the growers. Last year the amount ginned up to June 30 was 20,485 pounds, including 8,500 pounds from New Guinea. Up to June 21 this year the department has received 34,805 pounds from Queensland growers alone, and farmers are still sending in their pickings. Growers are guaranteed three and one-half cents a pound and any balance made after the department has paid the expense of ginning. Last year growers received a fraction under five cents a pound. This year's cotton is from seed obtained from the United States.

HEALTH WAS WRECKED
Nothing Brought Relief Until Doan's Were Used. Wonderful Improvement Was Effected.

"I had such awful cutting pains in the small of my back and hips, I often had to cry out," says Mrs. Ernest Wiethoelter, 550 Madison St., St. Charles, Mo. "The pain was knife-like and I couldn't turn in bed, in fact I was almost helpless. My feet and ankles swelled badly, my hands were puffed up and there were swellings under my eyes.

Mrs. Wiethoelter

"I often got so dizzy I had to sit down to keep from falling and my health was completely broken down. The kidney secretions pained terribly in passage and in spite of all the medicine I took, I kept getting worse until I was a wreck.

"By chance I read about *Doan's Kidney Pills* and bought some. After I had used half a box there was a change and I continued to improve; the pains, aches and swellings left and my health returned."

Sworn to before me,
WM. F. WOLTER, *Notary Public.*

ALMOST TWO YEARS LATER, May 25, 1917, Mrs. Wiethoelter said: "I think as highly of *Doan's* as ever. Whenever I have used them, they have benefited me."

When Sin Will Decrease.

Sin will never be legislated away. It will never be rubbed or scoured from the texture of society. But its black and hideous stains will be wonderfully diminished when the church of Christ shall understand its own potency in social salvation.—J. M Dean.

Catarrhal Deafness Cannot Be Cured
by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.
ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.
All Druggists 75c. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

Silvering Mirrors.

This is by no means an easy business, but if you want to try it, the following method may be used: Place the mirror face downward on a table and clean off the part to be silvered by rubbing it with a pledget of clean cotton. Now spread over the spot a piece of tinfoil, a little larger than the part to be repaired and, after spreading it out carefully and smoothly, let drop on the center of it a drop of metalic mercury, and with a piece of chamois rub the foil until it becomes brilliant. Now place over the new amalgam a sheet of smooth writing paper, and pile books, or weights of any kind upon it, and leave over night. The amount of mercury to be used should correspond as nearly as possible to three drachms to the square foot of surface.

While the above reads "easy," the job itself is one which requires considerable practice to do neatly.

Scarcity of Oil.

Large numbers of Danish lighthouses will shortly be extinguished, or else will show a greatly diminished light, owing to the shortage of oil. This, it is declared, will mean additional difficulty in the way of Danish navigation and Danish exportation towards the west. In addition the allowance of oil for domestic lighting has been greatly curtailed.

No Patriotism There.

There is no patriotism in the man who cannot be cheerful when clipping Liberty bond coupons.

The Rich Flavor of Grape-Nuts
is due to the blending of malted barley with whole wheat flour.
Wheat alone does not possess this rich flavor.
The wonderfully easy digestion of Grape-Nuts is also partly due to the barley for the barley contains a digestive which wheat lacks.
"There's a Reason" for Grape-Nuts

TEXT OF WILSON'S TALK TO CONGRESS ON RAIL CONTROL

President Wilson has laid before Congress, assembled in joint session, his recommendations for carrying out government operation of railroads.

Bills to carry out the President's ideas already had been prepared under the supervision of the Department of Justice and were immediately introduced with plans for prompt consideration in both House and Senate.

The President spoke as follows:

Gentlemen of the congress:

I have asked the privilege of addressing you in order to report that on the 28th day of December last, during the recess of congress, lasting through the secretary of war and under the authority conferred upon me by the act of congress approved Aug. 29, 1916, I took possession and assumed control of the railway lines of the country and the systems of water transportation under their control. This step seemed to be imperatively necessary in the interest of the public welfare in the presence of the great tasks of war with which we are now dealing.

As our experience develops difficulties and makes it clear what they are, I have deemed it my duty to remove those difficulties wherever I have the legal power to do so. To assume control of the vast railway systems of the country is, I realize, a very heavy responsibility, but to fail to do so in the existing circumstances would have been a much greater. I assumed the less responsibility rather than the weightier.

Must Mobilize Resources.

I am sure that I am speaking the mind of all thoughtful Americans when I say that it is our duty to do everything that it is necessary to do to secure their complete mobilization of the whole resources of America by as rapid and effective means as can be found. Transportation supplies all the arteries of mobilization. Unless it be under a single and unified direction the whole process of the nation's action is embarrassed. It was in the true spirit of America and it was right, that we should first try to effect the necessary unification under the voluntary action of those who were in charge of the great railway properties; and we did try it. The directors of the railways responded to the need promptly and generously. The group of railway executives who were charged with the task of actual co-ordination and general direction performed their difficult duties with patriotic zeal and marked ability, as was to have been expected, and did, I believe, everything that it was possible for them to do in the circumstances.

If I have taken the task out of their hands it has not been because of any dereliction or failure on their part, but only because there were some things which the government can do and the present management cannot. We shall continue to value most highly the advice and assistance of these gentlemen and I am sure we shall not find them withholding it.

Government Control Only Solution.

It had become unmistakably plain that only under government administration can the entire equipment of the several systems of transportation be fully and unreservedly thrown into a common service without injurious discrimination against particular properties. Only under government administration can an absolutely unrestricted and unembarrassed common use be made of all tracks, terminals, terminal facilities and equipment of every kind. Only under that authority can new terminals be constructed and developed without regard to the requirements or limitations of particular roads. But under the government all these things will be possible—not instantly, but as fast as practical difficulties, which cannot be merely conjured away give way before the new management.

The common administration will be carried out with as little disturbance of present operating organizations and personnel of the railways as possible. Nothing will be altered or disturbed which it is not necessary to disturb. We are serving the public interest and safeguarding the public safety, but we are also regardful of the interest of those by whom these great properties are owned and glad to avail ourselves of the experience and trained ability of those who have been managing them.

War Traffic First Consideration.

It is necessary that the transportation of troops and of war materials, of food and of fuel, and of everything that is necessary for the full mobilization of the energies and resources of the country should be first considered, but it is clearly in the public interest also that the ordinary activities and the normal industrial and commercial life of the country should be interfered with and dislocated as little as possible and the public may rest assured that the interest and convenience of the private shipper will be as carefully served and safeguarded as it is possible to serve and safeguard it in the present extraordinary circumstances.

Wants Investors Protected.

While the present authority of the executive offices for all purposes of administration, and while of course, all private interest must for the present give way to the public necessity, it is, I am sure you will agree with me, right and necessary that the owners and creditors of the railways, the holders of the stocks and bonds, should receive from the government an unqualified guarantee that their properties will be maintained throughout the period of federal control in as good repair and as complete equipment as at present, and that the several roads will receive under federal management such compensation as is equitable and just alike to their owners and to the general public. I would suggest the average net railway operating income of the three years ending June 30, 1917. I earnestly recommend that these guarantees be given by appropriate legislation and given as promptly as circumstances permit.

Move Is Mere Justice.

I need not point out the essential justice of such guaranties and their great influence and significance as elements in the present financial and industrial situation of the country. Indeed, one of the strongest arguments for assuming control of the railroads at this time is the financial argument. It is necessary that the values of railway securities should be justly and fairly paid and that the large financial operations every year necessary in connection with the maintenance, operation and development of the roads, should, during the period of the war, be wisely related to the financial operations of the government.

Conserve Common Safety.

Our first duty is, of course, to conserve the common interest and the common safety, and to make certain that nothing stands in the way of the successful prosecution of the great war for liberty and justice, but it is an obligation of public conscience and of public honor that the private interests we disturb should be kept safe from unjust injury, and it is of the utmost consequence to the government itself that all great financial operations should be stabilized and coordinated with the financial operations of the government. No borrowing should run athwart the borrowings of the federal treasury, and no fundamental industrial values should anywhere be unnecessarily impaired. In the hands of many small investors in the country, as well as in national banks, in insurance companies, in saving banks, in trust companies, in financial agencies of every kind, railway securities, the total of which runs up to some $10,000,000,000 or $11,000,000,000, constitute a vital part of the structure of credit, and the unquestioned solidity of that structure must be maintained.

McAdoo Is Agreed Upon.

The secretary of war and I easily agreed that, in view of the many complex interests which must be safeguarded and harmonized, as well as because of his exceptional experience and ability in this new field of governmental action, William G. McAdoo, was the right man to assume direct administrative control of this new executive task. At our request he consented to assume the authority and duties of organizer and director general of the new railway administration. He has assumed those duties and his work is in active progress.

It is probably too much to expect that even under the unified railway administration which will now be possible, sufficient economies can be affected in the operation of the railways to make it possible to add to their equipment and extend their operative facilities as much as the present extraordinary demands upon their use will render desirable without resorting to the national treasury for funds.

Congress Must Provide.

It is not possible. It will of course, be necessary to resort to the congress for grants of money for that purpose. The secretary of the Treasury will advise with your committees with regard to this very practical aspect of the matter. For the present, I suggest only the guarantees I have indicated and such appropriations as are necessary at the outset of this task. I take the liberty of expressing the hope that the congress may grant these promptly and ungrudgingly. We are dealing with great matters and will, I am sure, deal with them greatly.

BLAST KILLS 2,000 SOLDIERS

Munitions Depot On Russian Front Reported Blown Up.

Stockholm, Jan. 5.—A Haparanda dispatch to the Tidningen says the munitions depot on the Russian southwestern front was blown up recently and that all buildings within a radius of two kilometers were destroyed. Two trains loaded with Cossacks on the way to the Don district were wrecked causing the death of 2,000 men.

BELGIANS HERDED IN CATTLE PENS

Participant's Testimony of Degradation Accompanying Deportation From Mons.

SCENES OF FIENDISH CRUELTY

Women Forbidden to Give Food and Clothing to Men Facing Privation and Cold—United States' Appeal Unheeded.

Conspicuous among cold-blooded acts of cruelty committed by the Germans, to their everlasting disgrace, the deportation from Mons is prominent. Official documents published by the committee on public information tell part of the harrowing story.

A vivid sketch of the deportations from Mons, ordered by German authorities, drawn by a participant, may well be cited here:

"I will take the 18th of November of last year [1916]. A week or so before that a placard was placed on the walls telling my capital city of Mons that in seven days all the men of that city who were not clergymen, who were not priests, who did not belong to the city council, would be deported.

"At half past five, in the gray of the morning on the 18th of November, they walked out, 6,200 men at Mons, myself and another leading them down the cobblestones of the street and out where the rioting would be less than in the great city, with the soldiers on each side, with bayonets fixed, with the women held back.

"The degradation of it! The degradation of it as they walked into this great market square, where the pens were erected, exactly as if they were cattle—all the great men of that province—the lawyers, the statesmen, the heads of the trades, the men that had made the capital of Hainaut glorious during the last 20 years.

"There they were collected; no question of who they were, whether they were busy or what they were doing, or what their position in life. 'Go to the right! Go to the left! Go to the right!' So they were turned to the one side or the other.

"You saw the women in hundreds, with bundles in their hands, beseeching to be permitted to approach the trains, to give their men the last that they had in life between themselves and starvation—a small bundle of clothing to keep them warm on their way to Germany. You saw women approach with a bundle that had been purchased by the sale of the last of their household effects. Not one was allowed to approach to give her man the warm pair of stockings or the warm jacket, so there might be some chance of his reaching there. Off they went!"—John H. Gade, in the National Geographic Magazine, May, 1917.

The Belgian women sent a touching appeal to Minister Whitlock:

Appeal of Belgian Women.

"Brussels, Nov. 18, 1916, 46 Rue de la Madeleine.

"His Excellency, Mr. Brand Whitlock, Envoy Extraordinary and Minister Plenipotentiary of the United States of America.

"Mr. Minister:

"From the depths of our well of misery our supplication rises to you.

"In addressing ourselves to you, we denounce to your government, as well as to our sisters, the women of the nation which you represent in our midst, the criminal abuse of force of which our unhappy and defenseless people is a victim.

"Since the beginning of this atrocious war we have looked on impotently and with our hearts torn with every sorrow at terrible events which put civilization back into the ages of the barbarian hordes.

"Mr. Minister, the crime which is now being committed under your eyes, namely, the deportation of thousands of men compelled to work on enemy soil against the interests of their country, cannot find any shadow of excuse on the ground of military necessity, for it constitutes a violation by force of a sacred right of human conscience.

Called "Monstrous Extremity.

"Whatever may be the motive, it cannot be admitted that citizens may be compelled to work directly or indirectly for the enemy against their brothers who are fighting.

"The convention of The Hague has consecrated this principle.

"Nevertheless, the occupying power is forcing thousands of men to this monstrous extremity, which is contrary to morals and international law, both these men who have already been taken to Germany and those who tomorrow will undergo the same fate, if from the outside, from neutral Europe and the United States, no help is offered.

"Oh! The Belgian women have also known how to carry out their duty in the hour of danger; they have not weakened the courage of the soldiers of honor by their tears.

"They have bravely given to their country those whom they loved. . . . The blood of mothers is flowing on the battlefields with that of their sons.

"Those who are taken away today do not go to perform a glorious duty. They are slaves in chains who, in a dark exile, threatened by hunger, prison, death, will be called upon to perform the most odious work—service to the enemy against the fatherland.

Rights of Honor and Conscience.

"The mothers cannot stand by while such an abomination is taking place without making their voices heard in protest.

"Be good enough to accept, Mr. Minister, the homage of our most distinguished consideration."

(Signed by a number of Belgian women and 24 societies.)

The United States government did not fail to respond to this touching appeal and to others of a similar nature. The American embassy at Berlin promptly took up the burning question of the deportations with the chancellor and other representatives of the German government. In an interview with the under secretary of state for foreign affairs, Mr. Grew was handed an official statement of the German plans, which is, in translation, as follows:

German Camouflage.

"Against the unemployed in Belgium, who are a burden to public charity, in order to avoid friction arising therefrom, compulsory measures are to be adopted to make them work so far as they are not voluntarily inclined to work; in accordance with the regulation issued May 15, 1916, by the governor general. In order to ascertain such persons the assistance of the municipal authorities is required for the district of the governor general in Brussels, while in the districts outside of the general government, i. e., in the provinces of Flanders, lists were demanded from the presidents of the local relief committees containing the names of persons receiving relief. For the sake of establishing uniform procedure the competent authorities have, in the meantime, been instructed to make the necessary investigations regarding such persons also in Flanders through the municipal authorities; furthermore, presidents of local relief committees who may be detained for having refused to furnish such lsits will be released."

Mr. Grew pointed out that the deportations were a breach of faith and would injure the German cause abroad. In his official summary of the negotations which he carried on he says:

"I then discussed in detail with the under secretary of state for foreign affairs the unfortunate impression which this decision would make abroad, reminding him that the measures were in principle contrary to the assurances given to the ambassador by the chancellor at general headquarters last spring and dwelling on the effect which the policy might have on England's attitude towards relief work in Belgium. I said I understood that the measures had been promulgated solely by the military government in Belgium and that I thought the matter ought at least to be brought to the chancellor's personal attention in the light of the consequences which the new policy would entail. Herr Zimmermann intimated in reply that the foreign office had very little influence with the military authorities and that it was unlikely that the new policy in Belgium could be revoked. He stated, however, in answer to my inquiry, that he would not disapprove of my seeing the chancellor about the matter."

Solemn Protest by United States.

The formal protest of the United States was as follows:

"The government of the United States has learned with the greatest concern and regret of the policy of the German government to deport from Belgium a portion of the civilian population with the result of forcing them to labor in Germany, and is constrained to protest in a friendly spirit but most solemnly against this action which is in contravention of all precedent and those humane principles of international practice which have long been accepted and followed by civilized nations in their treatment of noncombatants in conquered territory. Furthermore, the government of the United States is convinced that the effect of this policy if pursued will in all probability be fatal to the Belgian relief work, so humanely planned so successfully carried out, a result which would be generally deplored and which, it is assumed, would seriously embarrass the German government."

This protest was followed by those of the pope, the king of Spain, the government of Switzerland and other neutrals. They were of no avail, except, perhaps, to lead the German authorities to draw a tighter veil over their detestable proceedings. But the evidence has in some measure come through, although the full facts will not be known until the liberation of heroic Belgium.

To Prove Labor Draft Unnecessary.

Washington, Jan. 5.—Unions affiliated with the A. F. of L. have agreed to co-operate with the plan of the U. S. public service reserve for voluntary assignment of labor forces of the country into jobs where the government most needs them. This was announced by the Department of Labor which said thousands of skilled workmen had enrolled and trade unions had begun to urge members to do likewise to demonstrate that conscriptions of labor would be unnecessary.

Alien Enemies Lose Citizenship.

Milwaukee, Jan. 5.—Citizenship of three enemy aliens granted since the war began has been revoked in United States District Court here. So far as is known it is the first case in the United States of this kind. Hans Kamm, Oshkosh; Tador Grahl, Fond du Lac, and Frank Thomas, Waukesha, lost their papers and may be interned. Action was taken under Section 2171 of the United States statute preventing issuance of citizenship papers to enemies during war.

DO YOU KNOW THAT—

Block magnesia rubbed on a light carpet will clean it beautifully.

Starfish are known to contain nearly 5 per cent of nitrogen and a small quantity of phosphoric acid. In Japan they are used as a manure.

Double-ended plows that can be operated equally well in either direction are being employed on the sugar plantations of Porto Rico.

Linseed oil on a soft rag will polish fireplace tiles.

The earliest designs used for china in Worcester were copied from the Chinese.

It takes a ton of apples to make about one hundred and fifty gallons of cider.

The Gems, ornaments and precious stones belonging to the Shah of Persia are estimated at about $35,000,000.

Eat Fruit to Save Flour.

The people of the United States have bananas, apples and a dozen perishable foods that are denied our soldiers and the soldiers of our allies in France. If one person will do without a biscuit a day by eating the equivalent in fruit or perishable vegetables, in one year the wheat in 365 biscuits will have been saved for shipment to Europe. And the fruit and vegetable eater will be happier and healthier for the practice. Surely that is worth the doing. Instructions from the government tell exactly what is to be conserved. When those instructions are not observed the consumer is helping Germany to his best ability.—Houston Post.

Must Have the Bronze.

A second requisition of church bells has taken place in Austria to the sorrow of the Catholic population of that country, according to advices received. The government came to the conclusion that further requisitioning was necessary, with the result that the church has had to sacrifice many more of its familiar and cherished bells to the never-satisfied Moloch of war.

The idea of substituting steel bells for bronze has not yet eventuated, owing to the onerous conditions stipulated by bell manufacturers, who demanded, among other things, that the price should be paid in foodstuffs for the workmen in the factories.

RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and ¼ oz. of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Full directions for making and use come in each box of Barbo Compound. It will gradually darken streaked, faded gray hair, and make it soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off. Adv.

Anti-Leak Device for Brushes.

The following is a good method for preventing the color or wash from running down over the handle of a large brush when overhead work is being done. Take a good, large sponge, oblong in shape, if possible, and cut a slit in it to allow it to slip over the brush handle. Push it up as far as it will go and tie a cord on the handle to prevent it from slipping back. The sponge, we are assured, will take care of all the leaking color, and it can be wrung out at any time while on the brush.

Keeping the Quality Up

LAXATIVE BROMO QUININE, the World-Famous Cure for Colds and Grip, is now 30c per box. On account of the advance in the price of the six different Medicinal, Concentrated Extracts and Chemicals contained in LAXATIVE BROMO QUININE, it was necessary to increase the price to the Druggist. It has stood the test for a Quarter of a Century. It is used by every Civilized Nation.

"Pieless Day" Now.

The horrors of war are making themselves felt in Minneapolis, Minn. Restaurant keepers in that town have inaugurated a pieless day, in order to save wheat, sugar and lard. If this experiment proves successful a doughnutless day will be inaugurated.

Scots Are Tallest.

Among the natives of Great Britain the Scotch average the tallest, the Irish are next, then come the English and Welsh.

True patriots work for this country's future, instead of boasting about its past.

Some men are kept so busy maintaining their dignity that they haven't time to earn a decent living.

A FIGHT FOR LIFE

It has been fight or die for many of us in the past and the lucky people are those who have suffered, but who are now well because they heeded nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's called "An-u-ric." You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as stone in the bladder.

To overcome these distressing conditions take plenty of exercise in the open air, avoid a heavy meat diet, drink freely of water and at each meal take Dr. Pierce's Anuric Tablets (double strength). You will, in a short time, find that you are one of the firm indorsers of Anuric, as are thousands of neighbors.

Step into the drug store and ask for a 60c bottle of Anuric, or send Dr. V. M. Pierce, Buffalo, N. Y., 10c for trial pkg. Anuric, many times more potent than lithia, eliminates uric acid as hot water melts sugar.

Not Fond of Army Life.

Army life did not agree with Ginger, a Boston bull. After a three-weeks' career as mascot in the Canadian army, he has returned to his old haunts, and is happy again. The dog is owned by John Hamilton, a Los Angeles resident of fifteen years' standing, who recently enlisted in the Canadian forces. He took Ginger along, but the dog did not take to the army life. In fact, he was wasting away, until Hamilton decided to send him back to Los Angeles. On his arrival he ate six meals in three hours and now has a joyous bark for all his old friends.

Unconscious Insult.

"Miss Bings is very sensitive about her large feet."

"That accounts for it."

"Accounts for what?"

"Why, she got so angry when I asked her if Santa Claus had put an automobile in her stocking."

His Game.

"How did he make his fortune?"

"Promoting bazaars for worthy charities."

Some people's good points seem to have been broken off.

Fireproof buildings are protected with fire escapes, just the same.

"BEST MEDICINE FOR WOMEN"

What Lydia E. Pinkham's Vegetable Compound Did For Ohio Woman.

Portsmouth, Ohio.—"I suffered from irregularities, pains in my side and was so weak at times I could hardly get around to do my work, and as I had four in my family and three boarders it made it very hard for me. Lydia E. Pinkham's Vegetable Compound was recommended to me. I took it and it has restored my health. It is certainly the best medicine for woman's ailments I ever saw."—Mrs. SARA SHAW, R. No. 1, Portsmouth, Ohio.

Mrs. Shaw proved the merit of this medicine and wrote this letter in order that other suffering women may find relief as she did.

Women who are suffering as she was should not drag along from day to day without giving this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial. For special advice in regard to such ailments write to Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of its forty years experience is at your service.

Indefinite.

"Does Doctor Skillem still think all appendicitis cases demand immediate operations?"

"I believe he has cut all that out."

Same Thing.

"A lyric was a poem intended for use by a lyre."

"Just like a modern fish story?"

Genius is the ability to make other people furnish the money to carry out your plans.

WHAT NEIGHBORS SAY

Sioux City, Iowa.—For some time I have been having kidney trouble. My kidneys seemed to be congested and my back would ache and be so sore that I could scarcely stand my clothes bearing on it. When I stooped over I could hardly straighten up again, and my bladder bothered me—frequent excretion. Just about ten days ago I began taking the Anuric Tablets and my back has quit aching and this bladder weakness has left me. Anuric is the best kidney medicine I have ever used."—MRS. MARY DU BARRY, 1013 5th St. —Adv.

Brotherhood of Man.

The ideal brotherhood man must have a clear aim before him, and having this clear aim, he must interpret it in action.

After a girl has married for money and becomes a widow she is very likely to be married for her money.

No matter how pretty the band, many a Christmas cigar is an integral part of the smoke nuisance.

May Enlist in Navy.

The recent announcement by Provost Marshal General E. H. Crowder to the effect that no more formal calls for deffered percentage of the present draft quoto would be sent out before February 15th, makes it possible for more drafted registrants to enlist in the Navy than any time since December 15th.

The Navy is greatly in need of apprentice seaman, the quota of 800 for this district being far from filled. This number must be obtained by February 22nd. Men enlisted now are being sent home on furlough, subject to call, because the training stations are filled. Pay $32.60 a month to start, begins the day of enlistment. Men enlisted after their periods of training, are put in branches they are best qualified to fill.

Recruiting offices at the Minneapolis station, 304 Marquette Ave., says that there are very few instances where registrants in the draft have not been able to secure certificates stating they are not needed for current draft quotas. These are required of all those registered and are obtained from the applicant's local draft board. Even many who have been called and examined by their local draft boards are eligible to enlistment in the Navy

Men can enlist at the Minneapolis station or any of its branches. Substations are located at Fargo, Grand Forks, Duluth and St. Paul.

Council Meeting.

At a regular meeting of the Village council of the Village of Goodridge h. d Jan. 7th 1918.

The following ordinance was approved:

Ordinance No. 10.

An Ordinance to adopt order no. 14, Minnesota Public Safety Commission in regard to public dances, pool halls, billiard halls etc. within the Village of Goodridge, Minn.

Sec. 1. Any person or persons Violating Order No. 14, of the Minnesota Public Safety Commission, shall be guilty of misdemeanor and and subject to a fine of not less than $25 00 nor more than $100.00

Sec. 2. This or in nce shall take effect and be in force on and after its Publication.

Dated January 10th, 1918.

H. A. Halvorson,
Pres. of Council.

Carl Christianson,
Village Clerk.

Fires at Thief River.

During this week several fires have occurred in Thief River Falls. Early Monday morning the fire department of that city was called to the residence of Dr. H. W. Froelich. The building although gutted was saved but very little of the contents was gotten out.

Early Tuesday morning the Gullingsrud residence, north of the "Big Wheel" blacksmith shop, was completely destroyed by fire, and later in the morning the department was called to the Park Hotel and in the evening to the Vigness Meat Market but these two fires did not amount to much and was soon put out.

TELLS ABOUT JOHN RANDOLPH

Thomas H. Benton Relates Interview With Eccentric Man, in Which He Depicts His Melancholy Mood.

Thomas H. Benton in his "Thirty Years' View" gives an interesting account of an interview he had with the eccentric John Randolph of Roanoke.

The interview was at Mr. Benton's room in Crawford's hotel, in Georgetown. It was in the gloom of the evening, before the lamps were lit. Mr. Randolph, reclining on a soft, silent and thoughtful, repeated, as if to himself, Johnson's lines on "Senility and Imbecility," that show his life under its most melancholy form:

"In life's last scenes what prodigies surprise,
Fears of the brave and follies of the wise.
Down Marlborough's eyes the streams of dotage flow,
And Swift expires a driveller and a show."

When Mr. Randolph finished repeating these lines, Mr. Benton said to him: "Mr. Randolph, I have often heard you repeat these as if they could have an application to yourself, while no one can have less reason than yourself to fear the fate of Swift."

To this Randolph replied: "I have lived in dread of insanity."

While Randolph was not insane in the ordinary sense of the word, it is certain that he had occasional temporary aberrations of the mind, and it was during such times that his talk was most brilliant, a copious flow for hours of wit and classic allusion, a perfect scattering of the diamonds of the mind.

His will was contested on the ground of insanity, but it was not set aside.

MIX DOUGH WITH SEA WATER

Wider Adoption of the Practice Is Recommended by French Naval Pharmacist, Health Advantages.

It has long been a custom in certain parts of France to make up the dough for bread with sea-water instead of using, as is customary, fresh water, with the addition of salt required to make bread both healthful and appetizing, says the Literary Digest. M. Abert Saint Sernin, a French naval pharmacist of the first class, urges the wider adoption of the practice, which has, according to him, several advantages; the bread keeps moist longer, owing to the affinity for water, possessed by the magnesium chloride seawater contains; it is very wholesome, since it provides not only the chlorides of sodium and magnesium, but other mineral substances which the body can make use of.

The water must be collected at a suitable distance from land and should be taken from a depth of six or seven yards if possible. The yeast must be prepared with fresh water and the salt water used for mixing the dough. The French writer adds:

"Bread made with sea water, useful for everybody, is to be recommended especially for growing children, for convalescents, and for all those who need to repair the wastes due to fever or to hard labor."

Half-Way Work.

We are, none of us, so good architects as to be able to work habitually beneath our strength; and yet there is not a building that I know of, lately raised, wherein it is not sufficiently evident that neither architect nor builder has done his best. It is the especial characteristic of modern work. All old work nearly has been hard work. It may be the hard work of children, of barbarians, of rustics; but it is always their utmost. Let us have done with this kind of work at once; cast off every temptation to it; do not let us degrade ourselves voluntarily, and then mutter and mourn over our shortcomings; let us confess our poverty or our parsimony, but not belie our human intellect. It is not a question of doing more, but of doing better. Do not let us boss our roofs with wretched, half-worked, blunt-edged rosettes; do not let us flank our gates with rigid imitations of medieval statuary. Such things are more insults to common sense, and only unfit us for feeling the nobility of their prototypes.—Ruskin.

Four-Arc Rainbow.

A four-arc rainbow was seen by a vessel at sea recently, one pair intersecting the other pair. Two arcs are often seen on land, and three are sometimes seen; but the invariable rule is that these arcs all have a common center lying below the horizon. The explanation of the two pairs of arcs was, however, quite simple. The sea at the time was exceptionally calm, and acted as a gigantic mirror. Two of the arcs, which had a common center below the horizon, were due to the sun itself; the other two arcs, which had a common center above the horizon, were due to the reflection of the sun in the sea.

Rust Dissolver.

An Italian inventor has patented a method of cleansing iron and steel from rust. By his process the metal is made the cathode in a phosphoric acid electrolyte. It is claimed this acid, unlike others, dissolves away the rust without attacking the solid metal, and also tends to prevent subsequent rusting. The electrolyte is made by adding 10 parts of phosphoric acid to 90 parts of water, or by adding a 10 per cent solution of sodium phosphate to 10 per cent of the acid. A temperature between 50 and 70 degrees Centigrade is recommended.

Buds and Flowers in Cooking.

The French Canadians are said to use the acid flowers of the redbud, or Judas tree, in salads, while the buds and tender pods are packed in vinegar. Honey locust pods, often locally called "honey-shucks," contain a sweetish, thick, cheeselike pulp, which is often eaten. Those of the mesquite furnish the Mexicans and Indians with a nutritious food. The Creoles of Louisiana, famous for their cookery, are reported to use the young buds of the sassafras as a substitute for okra in thickening soups.

Nova Scotia's Fish Army.

Nova Scotia is literally "the land of fish"—cod, herring, mackerel and the giant albacore or tuna. Nova Scotia is so much a land of fish, says a writer, that it produces over one-fourth the value of the entire Canadian catch, or $9,166,851 worth. Every tiny haven around the extensive Bluenose Land coast harbors fishing smacks galore, while Lunenburg, Canso, Liverpool and Chester are home ports for hundreds of fleet-winged deep-sea banking schooners.

Reason and Emotion.

What a mysterious conflict that is between the reasoning power, which keeps pointing out the right road, and an ill-regulated emotional faculty, which seeks to draw one along the wrong road! Indulging the wrong habits always makes the upward path so much steeper and the downward path so much easier. How fortunate that man is whose false steps are arrested by a friendly touch of common sense disguised in a flash of satire!—Sir George Reid.

Goodridge: Morning Services, Sunday at 10:30 a. m. All are welcome.
Rev. G. A. Tungseth.

Notice.

All owners of business places and residences are to have their chimney's cleaned as soon as possible, if not they will be cleaned by the marshall and charged to each individual or firm.
By order of Fire Department,
G. C. Gulrud, Chief.

Defective Flues Caused $339,738 Loss In State Last Year, Says Fire Marshall.

Defective flues and sparks from neglected chimneys caused a property fire loss in Minnesota of $339,738 in 1917.

This enormous loss is entirely unnecessary, says George A. Nettleton, assistant state fire marshal.

"It is one of the easiest things in the world for a fire to start from a defective flue, and one of the easiest matters to be corrected. Such fires are entirely unnecessary. It is carelessness which is almost criminal at this time in the state and nation's history to allow an accumulation of soot in the chimney or to neglect to see that the flue is proof against accidental fire."

The losses mentioned were caused from 156 defective flues and 251 cases where sparks caused by such defects resulted in fires.

In commenting on this loss of more than a third of a million dollars in one year from these causes, Mr. Nettleton says that now— during the winter months— is the season when such fires occur, and that every precaution should be taken at once by every householder, manufacturer or occupant of a factory or dwelling to see that the danger is eliminated.

John Mostrom Loses Home.

Fire originating from a defective flue early last Wednesday evening totally destroyed the home of John Mostrom, a well known farmer and merchant living at Neptune in Hickory township.

The fire had gained considerable headway before it was discovered by Mrs. Mostrom and several small children who were there alone at the time, were driven from their home out in the cold winter winds. They were unable to get out any of the contents.

The house, which was a six room frame structure was uninsured and the loss will be a heavy blow to the owner.

Basket Social a Big Success.

The basket social and dance given for the benefit of the Red Cross Friday evening Jan. 11th, was a splendid manifestation of the patriotism and loyalty of the people of Goodridge and vicinity. In spite of the inclement weather a fairly good sized crowd gathered, had the weather been more favorable, the crowd as well as the receipts would easily have been doubled. But even as it was the results were more than satisfactory. The people present displayed and enthusiasm which outweighed the comparatively small number in attendance. The bidding for the baskets was briskly done under the able auctioneering of Jesse LaBree, our genial combination of crier of wares and presence of the peace. His smiling countenance and pointed remarks were alike irresistible and eticited quick responses from the masculine members of those in attendance. The total receipts for the baskets and the dance tickets was $77.30 an exceptionally large sum considering the circumstances.

Thanks are due to all who took part and did their best to make the event a success, both those who were present and brought either eatables or money and those who could not be present on account of the weather, but contributed to the affair just the same. Special mention ought to be made of the following besides Mr. LaBree, the members of the orchestra for the free music, the merchants for their donations; Mr. Patrick Brick, for the free use of his hotel kitchen and dining room, and of Mr. P. P. Palmer for the gratis use of the hall. The success of the event shows that we in Goodridge and vicinity are willing to stand back of our boys who are offering everything they have for their country and ours.

The eatables left over from the midnight lunch were disposed of at an afternoon lunch which was given in the schoolhouse. The receipts was a little over six dollars.

COMING.

The Battle of Gettysburg to the Grand Theatre, Saturday and Sunday Feb. 2nd and 3rd. Matinee at 2:30 Saturday afternoon. Don't miss it.

Women Better or Worse.

Women, when they are bad, are worse than men and more disposed to commit crime. When the sex which is sweet by inheritance once becomes degraded it falls into greater excesses than the other. Women are always either much better or much worse than men.—Bonaparte.

A Commuter's Ambition.

We'd like to be in a financial position when we take a meal out, as we do once every two or three months with all the regularity of clockwork, to go to some place where "fruits in season" on the menu doesn't mean chiefly bananas.—Ohio State Journal.

U. S. SUPPLY SHIPS ARE WITHOUT COAL

TRANSPORT DEMANDS FOR FUEL MUST PRECEDE THOSE OF MUNITION MAKERS, IS RULNIG

FACTORIES TO BE CLOSED UP

Private Plants in East Must Give UP Stocks—Householders to Get Relief First, Less Essential Industries Last.

Washington, Jan. 15.—Ships transporting supplies to Europe have been added by Fuel Administrator Garfield to the list of essentials that must be supplied with coal. They were put ahead even of war industries after reports were received that a million tons of shipping is held at New York for a lack of bunkers.

The shortage in the New York area is due to the railroad tieup. William G. McAdoo, director general of transportation, also took drastic steps to afford relief.

Disregarding all other demands, the railroads in this district were directed to move coal for households and food and coal for the bunkers of European bound munition ships.

The storm conditions responsible for the tie-up are described by railroad officials as the worst in 50 years.

Smith Urges Drastic Action.

The director general's action was taken following a conversation over the telephone with A. H. Smith, assistant to the director general in charge of transportation in the Northwest.

Mr. Smith recommended getting service, "even if manufacturing industries close down for a few days until the effect of this storm can be cleared away, and working room be afforded."

Mr. McAdoo's action also followed a long conference of the war council at the War department. With little prospect of a relief from the blizzard conditions, representatives of the War and Navy Departments, the Shipping board, Councils of Defense, Food and Fuel administrations, discussed the greatest needs facing the country at the present time.

A general plan of coal distribution designed to relieve the East, as outlined by Dr. Garfield, gives preference first to householders; second, to public utilities supplying light and heat; third, to ships transporting food and war materials to the American army and to the Allies; fourth, to war industries, and fifth, to all other classes of industry.

The program will be put into force with the aid of state fuel administrators. It will apply probably to all the states east of the Mississippi.

RUSSIANS ASSURED OF U. S. FRIENDSHIP BY FRANCE

Slav People Greeted on Occasion of Russian New Year By American Ambassador—Statement to Press.

Petrograd, Jan. 15.—David R. Francis, American ambassador, in greeting Russian people on the occasion of the Russian new year, issued a statement to the Russian press in which he says:

"The best greetings I can give Russian people from American people is President Wilson's message to Congress on January 8 (December 26, old style, which has been given in full to the Russian press."

The ambassador says the message expresses clearly the friendship of America for Russia.

1,600,000 RELEASED FOR DUTY ON WEST FRONT

Germans Heretofore Stationed in East Now Available For Service in France.

London, Jan. 15.—Russian withdrawal from the war relieves 1,600,000 Germans for use on the Western front, according to Brig. Gen. Sir. A. C. Geddes; minister of national service, in a "man-power" statement to the house of commons.

"It is necessary for Britain to recruit forthwith 450,000 men from civil life," the minister added. "It has been decided not to introduce compulsory service into Ireland."

Two Cent Fare Law Upheld.

Washington, Jan. 15.—The two-cent fare law of Illinois has been upheld by the supreme court with the exception that where it discriminated in favor of some cities because of the higher interstate rate, the interstate commerce commission has power to make necessary adjustments.

Accused of Treason; Clears Counsel.

New York, Jan. 15.—Paul Hennig, German-born American citizen and foreman in a torpedo manufacturing plant, indicted last month charged with treason in tampering with torpedoes for the United States navy, signed an agreement with his American counsel releasing them from further conduct of his own case in event evidence was disclosed pointing to his guilt. He suggested the agreement to protect his counsel from the possible accusation that they had defended a traitor.

DR. K. IGNATIUS

Dr. K. Ignatius, commissioner from the new republic of Finland to the United States, has spent a busy two months in Washington. His principal efforts have been directed to securing foodstuffs for his countrymen for immediate relief. At the same time he is attempting to secure recognition from the United States for his government. He will be joined soon by a colleague.

BRITISH IN REPRISAL AIR RAID

SUCCESSFUL DAYLIGHT ATTACK IS MADE ON KARLSRUHE.

Bombs Hit War Plants and Start Large Fires—Eight Enemy Machines Downed.

London, Jan. 15.—A successful daylight reprisal air raid has been made in Karlsruhe, according to a British official communication.

Karlsruhe is the capital of the Grand Duchy of Baden. It is situated about 50 miles from the French border and has a population of between 75,000 and 100,000.

The text of the statement says:

"Today our squadrons carried out a most successful raid into Germany in broad daylight, their objectives being the railway station and munitions factories at Karlsruhe. One and a quarter tons of bombs were dropped, with excellent results. Bursts were observed on buildings and sidings of the main railway junction in the center of the town, on railway workshops and a small junction in the town.

Large Fire Started.

"Observers report that a very large fire was started in factories alongside the railway, which was confirmed by photographs taken after the raid.

"The anti-aircraft fire was very heavy and accurate over the objectives and several hostile machines attacked our formation without success. All our airplanes reached their objectives and returned safely.

"In combats seven hostile machines were driven down out of control. Another was forced to land intact behind our lines by anti-aircraft fire; the pilot was captured. Three of our machines are missing.

BIG AMERIAN TANKER SINKS IN COLLISION

Warships Rushing to Rescue of Possible Survivors of Accident.

Washington, Jan. 15.—Warships are rushing to the rescue of possible survivors of the American oil tanker Texan, reported to have sunk at sea following collision with another vessel.

Official report of the accident was received at the Navy department following a day of unconfirmed rumors.

The Texan and the vessel she collided with are reported to have been under convoy.

FREIGHT WEEK BEGINS RATHER UNFAVORABLY

Snow Blocked Yards Hamper Efforts To Clear Railroads of Country.

Washington, Jan. 15.—Freight moving week" opened under rather inauspicious circumstances with drayage and unloading facilities at terminals occupied with other tasks made necessary by the storm, but the rising temperatures over the country gave officials hope that the latter days of the week would be open for a great clearance movement to release cars.

Wholesale Coal Seizure Planned.

Washington, Jan. 15.—Wholesale confiscation of coal from industries in sufficient quantities to meet domestic requirements has been decided upon by the fuel administration it is announced. This action it was said, was made enecessary because of the emergency caused by the freight congestion in the East and prospects of a fortnight of extremely cold weather. Seizure of coal will affect less essential factores and even war industries may be forced to curtail consumption n favor of household needs.

TAKE SPY SUSPECT AS BLAST PLOTTER

NAVAL INTELLIGENCE OFFICERS ARREST ALIEN TRYING TO BLOW UP ARMY MAGAZINE

FIND INCRIMINATING PAPERS

Letters Show Connection With Captain Boy-ed and Payments of $90-000—Posed as U. S. Army Officer.

Norfolk, Va., Jan. 15.—Naval intelligence officers have left here for Baltimore with Walter Sporemann, suspected of being an active figure in plots launched here by Captain Boy-Ed, the former German military attache, and believed to have been a captain in the German army.

The alleged spy was arrested while attempting to blow up a magazine at the army aviation field under construction near Newport News.

The prisoner will be turned over to officers of the Department of Justice at Baltimore for a hearing. So far the only charge formally lodged against him is understood to be that he is a dangerous enemy alien.

Others Persons Incriminated.

Documents found on his person and in his rooms in Baltimore tend to reveal his connection with Boy-Ed and former German Ambassador Bernstorff and to incriminate persons in Washington, Baltimore and other cities. It is understood a number of arrests may be made in a day or two.

Documents found on the prisoner show that he began his work some time before the United States entered the war. In one letter from Boy-Ed there is said to have been reference to $90,000 Boy-Ed advanced Sporemann.

Posed as Army Officer.

Officers followed Sporemann night and day through several cities and to at least two army camps. Frequently, it is said, the prisoner posed as an officer of the United States army. Finally he visited the great army and navy base on Hampton Roads, but before that a young naval agent, posing as a friend of Germany, had made himself acquainted with Sporemann. The officer followed his man in Newport News and finally to the aviation field where the arrest was made.

HERTLING'S SPEECH MAY BE REPLY TO WILSON

Address Before Reichstag Expected To Mark Crisis Between Teutons.

London, Jan. 5.—The climax of a death struggle between the Reichstag peace majority and the German annextionists is expected before the Reichstag by Chancellor von Hertling.

The present conference in Berlin of military and political leaders is regarded as an effort to obtain some agreement among German parties as to war aims.

In many quarters it is believed annexationists, headed by Von Ludendorff and Von Hindenburg, will be victorious and that the chancellor will proclaim new war aims with intended annexations both on the east and west fronts as their basis.

The slated speech is also expected to take the form of a reply to the recent addresses of President Wilson and Premier Lloyd George. Upon it may also rest the ultimate result of the peace conferences with Russia.

FORMER CONGRESSMAN DIES AT CAMP WHEELER

Major A. P. Gardner Succumbs to Pneumonia After Short Illness.

Washington, Jan. 15.—Maj. Augustus P. Gardner of Hamilton, Mass., died at Camp Wheeler base hospital after a short illness from pneumonia.

After continuous service of 15 years as representative from the Sixth Congressional district of Massachusetts, Major Gardner resigned when war was declared to enter the army.

Major Gardner was commissioned a colonel, but at his request was reduced to major in order that he might be sent to France.

Kentucky Ratifies Dry Amendment.

Lexington, Ky., Jan. 15.—Kentucky is the second state in the United States to ratify the national prohibition amendment. The legislature has ratified the prohibition amendment by the following votes: Senate, 27 to 6, House, 66 to 10.

"Garabed" Resolution Reported.

Washington, Jan. 15.—The resolution giving federal protection for development to "Garabed," an illegal new free emergency patent, was favorably reported today by the Senate patents committee.

Call Skilled Workers for Ship Yards.

Washington, Jan. 15.—A call for 50,000 volunteers, a reserve army of skilled workers for ship yards, has been issued by Chairman Hurley, of the shipping board.

REAR ADMIRAL GRIFFIN

Rear Admiral Robert S. Griffin has been named to succeed himself as chief of the bureau of steam engineering of the navy department instead of receiving another assignment, as is customary in the department.

BRITAIN CALLS 500,000 MEN

NEEDED TO HOLD ENEMY UNTIL UNITED STATES GETS IN.

Empire Has Enrolled 7,000,000 Men in Fighting and Labor Battalion Forces During War.

London, Jan. 15.—Nearly half a million men from Great Britain alone are to be recruited into the British army at the earliest date possible, and it is probable many more will be added to that number in the next few months.

These will comprise younger men, who up to the present have been exempt because of their employment in industries essential to the war service.

This announcement was made in the House of Commons by Sir Auckland Geddes, minister of national service, whose statement of the governments man-power proposals was replete with interesting details of Britain's strength in the struggle into which she means to throw her full resources.

The minister set forth the status and needs of the British forces, and measures the government is taking after agreement with most of the labor leaders for recruiting from classes of skilled workers who were promised exemption when conscription was adopted.

The empire has enrolled 7,500,000 fighting and labor battalion forces during the war, according to the statement of the minister, and now has more than 4,000,000 in arms, but needs more men to hold its own against the enemy until American strength is available.

ANOTHER HEAVY GALE SWEEPING ON CHICAGO

Coal Famine Closes Blasta Furnaces And Large Packing Plants.

Chicago, Jan. 15.—Chicago, just recovering from the most severe blizzard in 50 years, is gripped by a coal famine that closed the blast furnaces of South Chicago, shut up the world's two greatest packing plants, and threatened another tieup off the railways.

The Chicago, Milwaukee & St. Paul issued orders to division superintendents that every possible train be cancelled to save fuel. The Armour and Swift packing plants closed and put every employe to work clearing the tracks of snow so that coal and cattle could be moved.

Meanwhile the weather forecaster issued a warning that another heavy gale was sweeping toward the city, leaving in its wake snow-covered states throughout the Southwest.

Indianapolis Schools Close.

Indianapolis, Ind., Jan. 15.—Eighteen hundred cars of coal are needed immediately in Indiana to relieve the situation, according to figures compiled by the fuel administration. Requests for immediate relief from 15 counties totalled more than 400 cars. Thirty-five schools in Indianapolis alone have closed on account of the lack of fuel.

Recognizes Finland Independence.

Amsterdam, Jan. 15.—Austria-Hungary has officially recognized the independence of Finland, according to a dispatch received here from Vienna.

Soldiers Killed in Texas Wreck.

Calvert, Tex., Jan. 15.—The northbound "owl" passenger train on the Houston & Texas Central railroad split an open switch at Hammond five miles from Bremond, killing 16 persons and badly injuring 14 others. The second coach, which was a chair car, was smashed into splinters. The dead include four soldiers, three women, two babies and seven men. When the train hit the switch, the steel sleeper telescoped the chair car next to it. All the occupants of this car were either killed or injured.

LUMBERMEN TO HELP WIN WAR

HEAR TALK ON CONSERVATION AT OPENING MEETING.

Registration of 2,000 From Northwest Expected—Governor Harding of Iowa on List of Speakers.

Minneapolis, Minn., Jan. 15.—Charles Webster of Waucoma, Iowa, president of the Northwestern Lumbermen's association, opened the twenty-eighth annual convention of the association at the West hotel here late Tuesday with an address devoted mainly to telling what lumbermen and other folks at home can do to help win the war. His speech was followed by a patriotic address by Governor W. L. Harding of Iowa. Indications pointed to a registration of nearly 2,000 lumbermen from the states of Minnesota, Iowa, South Dakota and North Dakota. The convention will be in session three days, and Tuesday was made "Patrictic Day"

"Eighteen billions of dollars will be required to finance the country until June, 1918," said President Webster. "Our net savings for the year 1917 are estimated to be approximately that amount. As this war continues, our expenses will, naturally, become more burdensome, but there is no question but that we shall be able to finance, and it goes without saying, win the war. In order to do this, there must not be one slacker left in all the United States."

Conservation of coal Mr. Webster dwelt on as one of the pressing tasks in which everybody can take part.

"About 15,000,000 people," he said, "shovel the 20 per cent of our coal used for domestic purposes. Only about 250,000 firemen shovel the 60 per cent of our coal used by power plants and railroads. The householder must realize that when he throws a shovelful of anthracite into the furnace, its value is equivalent to half a pound of sugar, or a half a loaf of bread, or a pint of milk. The fireman is, however, the biggest single factor to be considered in a campaign to secure saving of coal."

Mr. Webster denounced receivers who are slow in unloading cars and thus tie up railroad equipment.

"The Lumberman" he said in conclusion, "can and should lend all his influence, his time and energy in assisting in the conservation of food and fuel, in the prompt unloading of all cars, and he should give every dollars he can possibly spare to the Red Cross, Y. M. C. A. and kindred institutions.

Former French Premier Jailed.

Paris, Jan. 15.—Joseph Caillaux, former premier and minister of justice of France, has been formally imprisoned as outgrowth of charges of treason lodged against him in connection with the Bolo Pasha case.

Cattle receipts, 2,000; firm, native steers, $8.20@13.00; stockers and feeders, $6.80@10.85; cows and heifers, $5.80@11.75; calves, $8.75@16; sheep receipts, 2,000; strong;; wethers, $9.60@13.25; lambs, $14@17.40.

Butter Eggs and Poultry.

Minneapolis, Jan. 15.—BUTTER—Creamery extras, per lb., 47c; extra firsts, 46c; firsts, 45c; seconds, 44c; dairy, 39c; packing stock, 34c.

EGGS.—Receipts of fresh too light to make a quotation. Most arrivals are country held, selling in a small way at from 50c to 51c per dozen. Refrigerator, candled, doz., 42c; checks and seconds, doz., 32c; dirties, candled doz., 32c. Quotations on eggs include cases.

POULTRY.—Turkeys, fat, 10 lbs. and over, 22c; thin, small, 10@12c; cripples and culls, unsalable; roosters, 14c; hens, 4 lbs and over, 20c; hens, under 4 lbs, 16c; ducks, 18c; geese, lb. 16c; springs, 20c.

100,000 Attack Chicago Drifts.

Chicago, Jan. 15.—An army of more than 100,000 workers including 60,000 schoolboys, has resumed the attack on the great snow drifts which for 48 hours tied up railroad traffic and caused what the health authorities termed an alarming shortage of fuel and milk. Everyone of the 27 steam railroads has resumed limited service but officials said it would be at least two days before normal passenger schedules could be established, and perhaps a week before freight trains could be run as usual.

Back Lame and Achy?

There's little peace when your kidneys are weak and while at first there may be nothing more serious than dull backache, sharp, stabbing pains, headaches, dizzy spells and kidney irregularities, you must act quickly to avoid the more serious trouble, dropsy, gravel, heart disease, Bright's disease. Use Doan's Kidney Pills, the remedy that is so warmly recommended everywhere by grateful users.

A Minnesota Case

"Every Picture Tells a Story"

H. De Voice, Marshall St., Springfield, Minn., says: "For years I had a constant, dull pain in my back and kidneys. The attacks were so severe that it seemed as if a sharp instrument was piercing my kidneys, first on one side and then the other. Four boxes of Doan's Kidney Pills cured me and since then I have had no further trouble."

AN ATTACK OF GRIP USUALLY LEAVES KIDNEYS IN WEAKENED CONDITION

Doctors in all parts of the country have been kept busy with the epidemic of grip which has visited so many homes. The symptoms of grip this year are often very distressing and leave the system in a rundown condition, particularly the kidneys which seem to suffer most, as almost every victim complains of lame back and urinary troubles which should not be neglected, as these danger signals often lead to dangerous kidney troubles. Druggists report a large sale on Dr. Kilmer's Swamp-Root which so many people say soon heals and strengthens the kidneys after an attack of grip. Swamp-Root, being an herbal compound, has a gentle healing effect on the kidneys, which is almost immediately noticed in most cases by those who try it. Dr. Kilmer & Co., Binghamton, N. Y., offer to send a sample size bottle of Swamp-Root, on receipt of ten cents, to every sufferer who requests it. A trial will convince anyone who may be in need of it. Regular medium and large size bottles, for sale at all druggists. Be sure to mention this paper.—Adv.

CHAPTER XXXI—Continued.

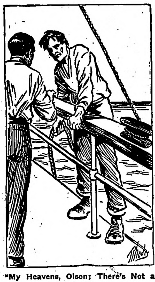
—20—

Leayord and I were the last, and we left the dinghy swamped behind us, dangling and crushed against the steel side of the schooner, upheld only by the strength of the rope. It was all the work of a feverish minute, in which thought was impossible because of the stress of action. But now, as I clung breathless to those lower mizzen ratlines, the seven of us jammed upon the little platform, the green surge of water below slushing against the wreck we had just left, the strange silence of this vessel which we had boarded struck me with full force. In heaven's name, what could it mean? It was broad daylight; if there was a man alive aboard, he could never have failed to see or hear us in this fierce struggle for life. Yet no one was visible; no sound of voice was heard; no face peered over at us above the rail. It was like a ghost schooner, and I felt the very heart of me chill as I stared into the blank faces of my huddled companions, and along the shiny sides, and the deserted rail.

"This is a rum go, sir," ventured Leayord soberly. "Ain't she got no crew?"

"I don't know what to make of it," I confessed, "but we'll soon find out. Help the lady, Leayord. Olson, come with me."

We footed the ropes, and swung up to the rail, clinging there long enough to gain swift view of the deck beyond. It was as clean as a millionaire's yacht, and had the appearance of one, with brasswork glistening, and paint fresh and bright. Every rope seemed coiled in place, the sail gaskets firmly tied, the planks spotless, the canvas as white as though just out of the sail-loft. My eyes surveyed the whole fore and aft—the low forecastle, the cook's galley, with door standing wide open, revealing a fireless stove, the boats in chocks, not one missing, the after cabin on the deck level, its companion door ajar, the wheel astern, outlined against the sky, swinging slightly to a lashing of rope—and nowhere a human being. I could scarcely believe the evidence of my own eyes.



"My Heavens, Olson; There's Not a Sailor on Deck."

"Heavens, Olson; there's not a sailor on deck," I gasped.

"No, sir; it beats me; I've been at sea a long time, sir, but I never see nothin' like this—they ain't left, fer the boats are all there, an' the wheel is lashed. She's just a sailin' herself."

"There's no sign of any trouble aboard. Why, those decks are scrubbed like a Dutchwoman's floor. Hurry up, Leayord; the schooner seems deserted. Come on, mate, we shall have to clear this mystery up."

We sprang down on the deck, and the others came tumbling over the rail after us, each face expressive of mystification. Vera touched my sleeve, her eyes searching mine.

"What can have happened?"

"I do not in the least know," I answered. "The mystery is too deep to guess at. There has been no storm, no fire, no evidence of desertion, every boat seems to be in its proper place. The only thing I can think of as possible is drink. The whole crew may be drunk, but that seems like a dream. However, we can't stand here doing nothing. White, you are not of much use with that broken arm, so remain alongside Miss Carrington. Keep your eyes open. Leayord, you and I will have a peep into that cabin; the rest of you take the forecastle. Be careful, lads, but don't miss anything—scatter now."

I slid back the companion door, and entered slightly in advance. The cabin floor was on a level with the main deck, and its glass front flooded the interior with light. A glance revealed everything, and I stood motionless, my breath caught in my throat, my hand still gripping the edge of the door. I was aware that Leayord peered in across my shoulder, and heard his startled lips utter one muffled exclamation. It was a low-ceiled apartment, painted white, with ports along the sides, the only staterooms being aft. A bright-hued rug covered the floor, and there were leather divans under the ports. The table in the center was fully set for a meal, covered with a white cloth, and glistening bravely with china and glass. There was food in abundance, partially eaten, and wineglasses half filled. I saw all these details; I recalled them afterwards, yet in that first instant of horror, the impression left upon me was merely of those silent, motionless figures sitting upright in their chairs. It was a gruesome sight! A great monster of a man faced me, his white, ghastly face appearing above a shaggy gray beard, his sightless, open eyes, staring full into mine. A wineglass had fallen from his opened fingers, and lay broken on the deck. Indeed, everyone had apparently died as by a stroke, retaining exactly the posture last assumed in life.

To the right of the broad-shouldered giant was a thin, young fellow, scarcely out of his teens, but with a hard, repulsive face, and at his left a dark-faced man almost a negro, grinned horribly, as though death had stricken him even as he laughed. Nothing could be more awful to look upon than the gleam of his teeth, beneath the fantastic curl of his mustache. There were six altogether, five sitting upright in swivel chairs, screwed to the deck, or leaning forward with heads resting on the table. The sixth, gray-haired and partially bald, had fallen sideways, and lay in a shapeless heap on the rug. They had the look of seamen, and were roughly dressed, three of them plainly foreigners, one with rings in his ears. The big man alone possessed the appearance of leadership.

I saw all this in that one swift glance. Breath had not come sobbing back to me, when Leayord's hand crushed my arm and his voice rumbled in my ear:

"See, captain! they're dead; they're all dead!"

"Yes," I answered, choking over the words, "there is no doubt of that. Something terrible has occurred here. Call—call the other men."

I heard him stumble out through the companion door, and the roar of his voice as he shouted to those forward; I could distinguish the sound of their feet on the deck, but could not remove my gaze from that awful sight in the cabin. The eyes of that giant dead man, staring at me so fixedly across the table, held me as in a vise—there was something so ghastly, so terrible, about their expression, as to rob me of all sense, all courage. The men joined me, Liverpool entering in advance, and pushing past where I stood. I have no recollection of seeing the others, although I felt and heard their presence. But I saw him—marked his sudden stop, the quick blanching of his face, and the sharp oath which burst from his lips, the swift, incredulous look of surprise, of recognition, which leaped into his eyes. He was staring straight into the ghastly face of the giant opposite. I doubt if he even saw any of the others.

"Heart of the devil!" he shouted. "If it isn't Gaston de Lys! So you've got it at last, you old hound."

He leaped forward, circled the table with a single stride, hate, memory, whatever the impulse might be, conquering all fear, and gripped his hand hard on the dead man's shoulder. And then he stiffened, every muscle of his body stricken; I could see death strike him, his jaw set, his eyes fixed—an instant he stood rigid; then his whole form seemed to contract and he fell lifeless to the deck.

I sprang toward him, but Masters gripped me, and hurled me back.

"Hands off — all of you!" he screamed. "Wait! Don't lay a finger on any of them; you are dead men if you do."

"What do you mean? What is it?"

"The most diabolical bit of deviltry ever contrived," he answered. "These men have been killed by electricity; the current is still on. I heard the whir of the dynamo as I came aft. Don't move until I find the switch and disconnect; for God's sake stand where you are."

Perhaps he was gone five minutes; I could never tell; I saw nothing but those dead men; heard nothing but the heavy breathing of my mates in the doorway. No one spoke; but once, it seemed to me, I caught the throb of that deadly dynamo, yet even as I seemed to distinguish the faint sound, it ceased abruptly. Masters pushed in past me.

"Ay, that was the truth," he said, "but it's safe enough now. Lord; did you ever hear of such a d——, cold-blooded crime. See here, men, the villain planned his job well—here are the wires along the deck, pressed into a seam, and connected to each swivel chair. See, the circuit is complete, and no one would ever suspect. All he had to do was stand back there in the steward's pantry and press the switch. Those six men died before they could wink an eye."

"But the fellow who did it? What has become of him?"

Masters shook his head.

"I don't know, sir; but there must have been one; there ain't none o' these dead men could have turned the trick."

"Perhaps it was that cuss dangling over the side, captain," said White's voice, from back behind the others.

"What is that?"

"There's a fellow got jammed in a small boat alongside, sir. I just happened to look over, and saw him a-hangin' there."

We were glad enough to escape that cabin of horror, and I slid the companion door to, and bolted it, before following White across the deck to the starboard rail. Excited as I was, obsessed by this awful tragedy, my mind yet grasped every detail—the shining brasswork, the spotless decks, the white boats in their davits, the snowy canvas aloft. The very immaculateness of the vessel seemed to add to the horror, and it was a shock to even read the schooner's name, painted on a lifebuoy—Rose of Gaspe.

A glance below revealed the whole story of the accident. It was clear enough to be read instantly by a sailor's eyes. The man in his efforts at escape had chosen one of the smaller boats, but one staunch and well equipped. No doubt it had been secretly prepared in advance, for the lockers contained food, and a beaker of fresh water was securely lashed to a front thwart. There was also a spar and sail aboard, safely secured, together with a pair of serviceable oars.

What had happened, as seemed clear to us, was this: a heavy brass-bound chest, of odd workmanship and dingy appearance, had been stowed away in the bows. It must have been placed there with rope and pulley, for no single pair of arms could ever have lifted it over the rail. Then the fellow had clambered in, eager to be off, no doubt, and undertaken to lower the boat, standing probably amidships, where he could manipulate both ropes. But the forward rope must have jammed in the pulley, permitting the stern of the suspended boat to sag suddenly enough to send the heavy chest sliding aft. Before he could check the fall, or save himself by leaping overboard, it had pinned his legs against the stern sheets; and there he dangled still, his face buried in the green water alongside, his knees crushed helplessly beneath the weight of the chest—an inert dead body.

"The fellow got his, sir," said Leayord solemnly. "Likely enough killed by the very thing he was tryin' to git away with. What shall we do with the boat and what's in it, sir?"

"Untangle that pulley slowly, and hoist up even with the rail," I answered. "We'll have a look at the man, and find out what's in the chest; it's an odd-looking affair."

I helped balance it, and with White using his uninjured arm, we drew the dead man's body in over the rail. The two mates released his limbs from the grip of the chest, and we laid him out on the deck. He was an ill-looking fellow, deeply tanned, with a livid scar across one cheek, and an anchor tattooed on his forearm. Leayord drew a paper out of the inner pocket of his shirt, and passed it over to me. It was a letter with no dateline or signature, and had been so soaked in salt water as to be almost illegible. The only connecting words I could study out were: "De Lys has all his men but a cook; try to get on! He'll never know you after these years."

"Does it tell you anything, sir?" asked Olson anxiously.

"Not much; only this fellow sailed as cook, and got the job for a purpose. He had known De Lys years before."

"De Lys?"

"Yes; that was the name of the big fellow in the cabin; he must have been at the head of the party; the one Liverpool knew as Gaston de Lys. Get that chest onto the deck; no doubt the secret is there."

CHAPTER XXXII.

A Secret of the Sea.

We were compelled to resort to rope and pulley, and then search through the dead man's clothes to discover the key. Even with that found, it required the sharp edge of a hatchet to force open the cover. As it lifted, the sight was greeted with cries of astonishment.

"Good Lord, sir, it's money, and a stack of it!"

"English and French coins!"

"Aye, and Spanish!"

White's voice broke in above the babble, the old harsh croak I remembered so well:

"Well, see here, lads," he shouted, "whose is all this gold, anyhow? Ain't it just naturally ours? It's sure no good to these yere dead men, an' there wa'n't nuthin' else good aboard when we come. Then why ain't it ourn now to divide share an' share about?"

"We undoubtedly have a claim," I answered, "for salvage; and if the heirs of the rightful owners are unable to prove themselves justly entitled to the gold, perhaps we might hold the entire amount."

"Piffle!" snorted White, "what's the use o' all that poppycock! These fellows likely enough stole the money, or else dug it up somewhere. It never belonged to them eny more'n it does to us. Nobody knows the stuff even exists. Why should we go around tellin' about it? I'm fer dividin' it up square between the five o' us—no, by heavens, I'll count the girl for a full share—the six, and never sayin' nuthin' about it when we go ashore. Ain't that the best way, mates?"

"Do you agree to this, Mr. Leayord?" I asked suddenly.

He lifted his eyes to mine in bewilderment.

"I don't just know, sir," he stammered. "It doesn't seem exactly the square thing—is it, sir?"

"No, it's not," I answered firmly, and I slammed down the cover, locked it, and put the key in my pocket. "Now look here, men, and you particularly, Jim White—this isn't our gold. I do not know who it belongs to, or how these dead men ever came into its possession. But there is a curse on the stuff, which has already cost the lives of eight men that we know of. No one has touched it but to die. I'll tell you fellows plainly just what I'm going to do. I'm going to sail this schooner straight into St. Johns harbor, with those dead men locked in the cabin, and this chest of gold here unopened on the deck. It is going to be English courts which will decide the ownership of this chest and its contents—not Jim White. Are you with me, Leayord?"

"Aye, aye, sir!"

"And you, Olson?"

"I suppose that's best, sir," reluctantly. "I don't want any trouble."

"I thought not; now fall to, all of you, and shake the reefs out of those topsails. I'll take the wheel, and we'll point the bow toward port."

The morning of the second day the speeding Rose of Gaspe rounded the northern head, and swept like a fair, white bird into the beautiful harbor of St. Johns. We tied up at Long Wharf, and, within an hour, I had told our story to the port captain, and officers of the marines had taken possession of the vessel. That very afternoon the five of us gave our testimony before the maritime court, and were permitted to go free. Before leaving the courtroom the judge spoke with me privately.

"This is indeed a strange case, Captain Hollis," he said, "and, perhaps, the truth will never be learned, yet it is evident that you and your crew had nothing to do with the death of these men, or the possession of this chest of money."

"May I ask, judge, if anything has been discovered tending to explain the voyage of the Rose of Gaspe?"

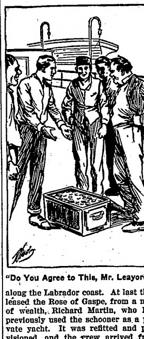
"Nothing satisfactory as yet. There were no papers of value found in the cabin—an excellent chart of the Labrador coast, a memorandum in French, so discolored as to be almost unreadable, accompanied by a rudely drawn map, and a list of the schooner's crew."

"What was the name of the cook?"

"He shipped as Gustave Montain of St. Clair. There is no such man known in that village."

"And the leader, Gaston de Lys?"

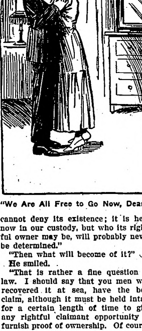
"We find trace of him only for a few months, Mr. Hollis. Where he came from, and whither he went are thus far unknown. Gaston de Lys appeared in Placentia some two months since, accompanied by one of the men who died with him in the schooner's cabin—the one dark-faced—like an Indian—and sought among the fishermen there for a certain type of boat. They were very particular, stating they wished to leave for a voyage of three months, representing themselves merely as travelers for pleasure who desired to cruise along the Labrador coast. At last they leased the Rose of Gaspe, from a man of wealth, Richard Martin, who had previously used the schooner as a private yacht. It was refitted and provisioned, and the crew arrived from Halifax. None among them was known in Placentia, but the inhabitants say that only two or three among them had the appearance of sailors. They put to sea seven weeks ago. Beyond that we know absolutely nothing."



"Do You Agree to This, Mr. Leayord?"

"But the chest of coins? have you no knowledge as to where it came from?"

"No more than a mere guess; there is no guide. Beyond doubt this Gaston de Lys learned of its existence somewhere in Labrador, and planned its recovery. The men with him also knew what it was they sailed to seek. In my judgment this must be a treasure of the old Hudson's Bay company, lost and hidden a hundred years ago, yet we can get no trace of such a disappearance of coin in the records. We cannot deny its existence; it is here now in our custody, but who its rightful owner may be, will probably never be determined."



"We Are All Free to Go Now, Dear."

"Then what will become of it?"

He smiled.

"That is rather a fine question of law. I should say that you men who recovered it at sea, have the best claim, although it must be held intact for a certain length of time to give any rightful claimant opportunity to furnish proof of ownership. Of course, in case no such claimant appears, the government takes its share."

"And the amount contained in the chest?"

"Exceeded seven hundred thousand dollars."

I rejoined Vera at the hotel, standing beside her in a window looking out upon the harbor. Below us was the white schooner in which we had ended our strange voyage.

"We are all free to go now, dear," I said. "The examination is all over.

"Have they found the owner of the money?"

"No; they have not even the slightest conception as to whom it originally belonged, or where it came from. The law compels them to hold it intact for the present."

"For how long?"

"Two years, I think, then the greater proportion is given to those who recovered it—the state retaining a certain share."

Her eyes met mine.

"I wonder if you know where my share will go, if I ever receive it?" she asked softly.

"I think I do, and mine will be added to it—to the mother and sister of Philip Bascom."

"Yes; and—and we may never know who these men were, or the story of their quest?"

"Most likely not; it will remain a secret of the sea. Who was Gaston de Lys? Where, and how did he learn of this hidden treasure? From where in the Seven Seas did he gather together the men who went with him? To what strange coast did the peaceful Rose of Gaspe sail? What motives of hate, or cupidity, led to the murderous crime of Gustave Montain? and how much of the truth did Liverpool Red know? had he lived, could he have lifted the veil?"

She was silent a long while, her hand clasped in mine; then she lifted her face, and smiled.

"It—it has been full of hardship, of sorrow, yet, Robert, I love the sea."

"And I, sweetheart," I answered earnestly, "for out of its mystery into my heart has come the one woman."

(THE END.)

Carnauba Wax.

Carnauba wax is made from the leaves of the carnauba plant, indigenous to the state of Piauhy, Ceara, and Rio Grande do Norte, in northeastern Brazil, whose roots are used locally as medicine, whose branches are used for bridge and housebuilding because they resist the attacks of insects, and whose fibers are used in rope and papermaking; the wax has been used extensively in adulterating beeswax, but is finding an honest market on its merits, not only for candle manufacture, but for coating the insulating material of electric wires, etc.; the annual production of wax in Rio Grande do Norte is about 450 tons a year, valued at about $250,000; perhaps three-fourths of this is exported; but the forests of carnauba plant can produce, if developed, many times this quantity.

TWO DOLLAR WHEAT

This Price Will Hold For Some Years.

A well advised commercial authority gives it as his opinion, "as a slow descent may be counted on in the prices for grain when the war ends—it may take several years to restore the world's stock of foodstuffs to normal—there is good ground for confidence in the outlook for rapid development in agriculture."

If this be correct, it follows that the profession of farming will materially increase its ranks in the next few years.

Today, the price of wheat is set by the United States government at $2.20 per bushel, and in Canada the price has been set at $2.21. This, of course, is less freight and handling charges which brings the average to the farmers at about $2.00 per bushel. This price will pay so long as land, material and labor can be secured at reasonable prices. It remains for the would-be producer to ascertain where he can secure these at prices that will make the production of grain profitable. He will estimate what price he can afford to pay for land that will give him a yield of wheat which when sold at $2.00 per bushel, will return him a fair profit. Local and social conditions will also enter into the consideration. Finding what he wants he would be wise to make his purchase now. Land prices in some portions of the country are low, certainly as low as they will ever be. City property and town property will fluctuate, but farm property will hold its own. The price of grain is as low as it will be for some years. Therefore it would be well to look about, and find what can be done.

There are doubtless many opportunities in the United States, especially in the Western States, to purchase good agricultural lands, that will produce well, at reasonable prices. If the would-be buyer has the time to investigate, and that is needed, for these lands do not exist in any considerable area, he would be well repaid. Not only will his land certainly increase in value—the unearned increment would be an asset—while under cultivation he can find nothing that will give better results. He will at the same time be performing a patriotic act, a needful act, one that would meet with the food controller's plea to increase agricultural production and assist in reducing the deficit of 75 million bushels of wheat reported by the controller.

In addition to the vacant lands in the United States which should be brought under cultivation, Western Canada offers today the greatest area of just the land that is required, and at low prices—prices that cannot last long. Even now land prices are increasing, as their value is daily becoming more apparent, and their location desirable.

As to the intrinsic value of land in Western Canada, hundreds of concrete cases could be cited, which go to prove that at fifty and sixty dollars per acre—figures that have recently been paid for improved farms—the crops grown on them gave a profit of from twenty to thirty per cent and even higher, on such an investment. One instance, is that of a young Englishman, unaccustomed to farming before he took his seat on the sulky plow with which he does most of his work, after allowing himself $1,000 for his own wages last year, made a profit of $2,200 on a $20,000 investment. His total sales amounted to $5,700 and his expense, which included the $1,000 wages for himself, was $3,500. The interest was 11½ per cent.

To the man who does not care to buy or who has not the means to purchase, but possesses wealth in his own hardihood, his muscle, and determination, there are the thousands of free homesteads of which he may have the pick on paying an entry fee of ten dollars. These are high class lands and adapted to all kinds of farming. Send to your nearest Canadian Government Agent for literature, descriptive of the splendid opportunities that are still open in Western Canada. Adv.

To accuse her of meaning every word she says is a serious charge to bring against a woman.

GREAT FOR ECZEMA AND OLD SORES

I Guarantee My Ointment, Says Peterson. Stops Itching Instantly.

"If you are responsible for the health of your family," says Peterson. "I want you to get a large 30 cent box of Peterson's Ointment today.

"Remember, I stand back of every box. Every druggist guarantees to refund the purchase price if Peterson's Ointment doesn't do all I claim.

"I guarantee it for eczema, old sores, running sores, salt rheum, ulcers, sore nipples, broken breasts, itching skin, pimples, blackheads, skin diseases, blind, bleeding and itching piles as well as for burns, scalds, cuts, bruises and sunburn."

"I had 30 running sores on my leg for 11 years, was in three different hospitals. Amputation was advised. Skin grafting was tried. I was cured by using Peterson's Ointment."—Mrs. F. E. Root, 287 Michigan St., Buffalo, N. Y. Adv.

"Do you believe in signs?" "Not in electric light signs," replied the fuel administrator.

ICE GIVES ENGINEERS GOOD TRAINING

© HARRIS & EWING

Abundant ice on the Potomac river has given engineer troops in training near Washington an excellent opportunity for overcoming obstacles. This picture shows "pontoniers" breaking the ice preparatory to building a bridge.

13 MILLION MEN IS COST OF WAR

Figures Stupendous Beyond Power of Human Mind to Compass.

MOST OF THEM ARE KILLED

Big Price Being Paid for the World's Future Security — Money Cost Nearly $175,000,000 a Day—Capital Cut Down.

By FREDERIC J. HASKIN.

(Correspondent of the Chicago News.)

Washington, D. C.—The figures relating to the cost of this war are stupendous beyond the power of the human mind to compass.

The number of men killed in battle has been between 7,500,000 and 8,000,000. Offsetting the number of deaths which would have occurred in times of peace, it is safe to set the war loss at more than 7,000,000 men. This is about one man in twenty for each year of the whole number mobilized.

The figures are large, but they are based on the greatest armies the world has ever seen. Moreover, the death rate has been falling steadily throughout the war, as methods more economical of human life are adopted and hospital efficiency increases. The well-prepared nations lose least. Russia has suffered casualties disproportionately large because in the first year of the war her troops were sent to the front poorly supported by artillery and sometimes literally unarmed. On the western front the French losses were heaviest for the first two years, but as England takes over the bulk of the fighting her casualties increase and those of France fall off.

Total of 5,250,000 Disabled.

In addition to the dead, the permanently disabled total about 5,250,000 men. Thus the net loss in men amounts to about 13,000,000. There have probably been about 10,000,000 men less seriously wounded in such a way that they have either been returned to the front or able to pursue some useful occupation in civil life.

Some realization of the meaning of these totals may be gleaned from the reflection that the dead and the totally disabled equal more than half the able-bodied men in the United States.

The money cost is a vastly more confusing problem. The total is beyond all comparison with any national debts, loans or expenditures of the past. At the beginning of the war the cost of $30,000,000 a day. It was predicted Europe could not stand it for six months. Now, well along in the fourth year, the cost is nearly $175,000,000 a day and there are no signs of a financial breakdown.

It has become increasingly evident that lack of "money" will never make any nation surrender. As long as sufficient economic resources actually exist in the shape of men and munitions, food and beasts and iron and steel, so long can the nation in question continue to make war. In looking for a German breakdown the eye should turn not toward the absurdly depreciated German mark, but toward what Germany has left in men and food and steel.

Its Future Mortgaged.

This is because a nation can mortgage its future like a man who enters a shop with empty pockets and pays for goods with signed notes pledging the labor of his children. The world's debt since the war has increased by $90,000,000,000. The total cost has exceeded this figure by at least $15,000,000,000, the difference representing the amount levied in taxes in excess of the interest requirements.

It is easy to see that if all the interest is paid to people living in the United States, and the principal at the end of the term also paid to residents in the United States, the United States as a nation is no weaker financially for having borrowed $20,000,000,000 than if it had never borrowed a cent. Such enormous loans will probably effect a redistribution of wealth, for the interest charges will be met by taxation, and provision made for a sinking fund in the same way. By redistributing this taxation wisely and equitably, the end of the period that the Liberty bonds have to run may well see a more efficient balance of wealth than the present.

As in reckoning war strength, the basic realities of the problem are economic rather than financial. Such part of the great war loans as is invested in convertible factories, in increase of food production and similar real assets, cannot be regarded as lost. On the other hand, the dollars that are spent for shells which explode and ships that sink are lost in fact.

World's Capital Cut Down.

Moreover, the cost in dollars is no measure of the real economic cost of the war, because it takes no account of the enormous destruction of property that has taken place. This represents a cutting into the capital of the world. The sinking of millions of tons of shipping, the destruction of cities, the ravaging of farm lands, the deterioration of industrial equipment in the last three years, are only a few of the items that must be charged to this account. One huge item is the labor of 55,000,000 men who have been taken completely from productive occupations. Even reckoning their value to industry at the moderate sum of $1 a day, in four years of war the industrial loss mounts up to $75,000,000,000.

There is no disposition on the part of the allies to begrudge the expenditure. It is the highest price that has ever been paid in history for anything but the thing purchased is security for the application of these same forces to peaceful aims in the future. It is literally true that the men and money spent in this war could have transformed the earth. They could have established universal sanitation, universal education, eliminated barbarism and savagery, reclaimed all the waste lands, established communications by rail and steam with every corner of the globe, and brought the millennium nearer by a long stride. At least, the human race has ceased to be awed by the magnitude of any project. In the hell of war, men have learned that no task is too great for them, and that is a thought worth carrying into times of peace.

A WAR PRAYER

By James Waterman, Wise of the Vigilantes.

Father, we beseech thee
Guard our boys tonight.
Keep, we pray, their footsteps
On the paths of right.

We have sent them gladly,
For the fight is just,
Yea, their cause is holy,
Glorious their trust.

Hold their fates, O Father,
In thy wondrous hand,
Bring them back, if may be,
Back to grace our land.

For we loved them dearly
But our path was clear;
Honor bade us send them,
Father, be thou near!

But if they must leave us,
If it be thy will,
Father, we implore thee,
Guide and guard them still.

USE APPLES IN TOBACCO

Peels and Cores Take Place of Time-Honored Cabbage in Smoking Mixture.

Hood River, Ore.—Apple peels and cores are now taking the place of the time-honored cabbage leaf in the finest smoking tobacco, according to Hood River people. Formerly the supply was obtained from eastern fruit districts, but hereafter Oregon dried apple pomace is to add flavor to smoking mixtures.

Spies Trained from Boyhood

Secret Activities of German Women Told by Dr. Arthur Lynch, M. P.

SYSTEM IS FAR REACHING

Eyes of French People Suddenly Opened to Extent of the Organization and Its Studied and Elaborate Character.

London.—Dr. Arthur Lynch, M. P., writing under a Paris date to the Daily Chronicle on German spies in France, says:

"In Marcel Prevost's Les Anges Gardiens' (The Guardian Angels, otherwise governesses) he depicts an English governess who is fond of drink, an Italian whose beauty wins the affections of the son and heir, and a German, Meg by name—a jolly and attractive young woman, unembarrassed by moral scruples, but capable and shrewd. Meg is a spy, and her spying is the more dangerous for the fact that she is the 'guardian angel' of the daughter of the French war minister.

"This story, written with a certain grace of style, set all France talking, and many a bourgeois family scrutinized with horror their stockish, stupid-looking but hardworking Westphalian maid, who knew little outside the small household and who, moreover, had conceived a real affection for the children.

"I confess I was inclined to laugh at the spy scare, but some time before the war I used to meet on the staircase of a modest and quiet little private hotel the dame who stood for the original of Meg. She had an apartment adjoining mine. There was nothing about her appearance or her manners to attract attention. Meg had, in good German style, grown imposing though still attractive in the German fashion.

"One evening, on returning to my rooms, I saw Meg's lady companion, a dragon looking person, camped on a chair on the landing near Meg's door, and presently three middle-aged gentlemen left Meg's rooms. Meg knew that the war was coming, and no doubt serious business was on hand that night.

Abused by German Husband.

"Parisians have become very suspicious of late, but the surprise was general nevertheless when they discovered that their exotic favorite, Mata Hari, the Hindoo dancer, was a German spy. This lady with the dusky skin and flexible wrists and languorous graces of Eastern dancing women turned out to be a formidable personage. At the age of seventeen she married a German who had obtained Dutch nationality in order to mask his spying work. The marriage was rather in the nature of a formal business transaction, but this did not prevent the one-time German officer from brutally ill-treating his young wife.

"Nevertheless she entered into the spy system with zest, became duly registered and paid, amused and delighted Paris for some years with her audacious performances, became acquainted with various highly placed officials and politicians and found means, it is said, to make known to the Germans some of the most important French plans in the first months of the war.

"Certainly it is absurd to find a spy in every German kitchen maid or hall porter or barber's apprentice, but eyes have been opened to the extent of the organization, its studied and elaborate character and the cleverness of the German spy system.

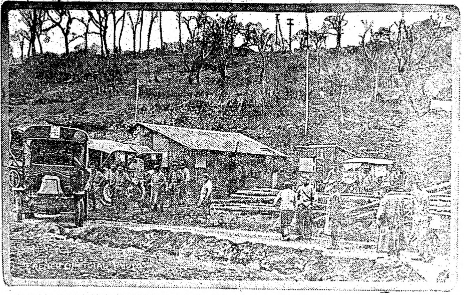
"Here in Paris is a type very different from Meg, but one who employs the Megs as his agents—the count of W——, 'Old Adolph,' as he was familiarly called, half in affection and half in contempt. Adolph was, not so many years ago, a dashing officer of the Guards, a great rider, a beau, a lady killer. Certain histories in this latter direction cut off his career as a Guardsman and he came to Paris. Old Adolph had then nothing of the beau cavalier of old; he seemed good natured, but stupid; he did not look as if he could mount a horse, for he moved all in a block, like a piece of wood.

Had Hired Chateau.

"Old Adolph incidentally had hired a chateau which commanded a great range of country and which possessed a real value for war purposes. To this chateau he made several additions and improvements, which were thought to be a fad of dear, stupid old Adolph; they could be used as excellent gun emplacements. It is still a moot point in the circles that old Adolph frequented whether he really was a fool or only had that appearance. But it is not remote from this question to remark that at one point the disastrous flight of the Germans from the Marne was brought to an end by the fact that they arrived at positions which had been carefully noted and prepared by Germans before the war.

"I have lifted the veil here and there upon the types; the framework of the system is no less edifying to study. For the past two generations the Germans have been extending and perfecting their spy system; it has now become one of the important functions of state. A spy is not taken at haphazard and asked impromptu to undertake difficult and hazardous work."

FRENCH SUPPLY DEPOT IN THE MEUSE SECTOR



A supply depot behind the French lines in the Meuse sector. It is connected by telephone with a [illegible] at the front, and when emergency supplies are needed they are rushed from this depot by means of auto trucks.

THESE ARE THE THINGS THE SUBMARINE FEARS

EVEN THE CHILDREN WEAR GAS MASKS IN REIMS

Copyright, Underwood & Underwood

The clouds of asphyxiating gases with which the Teutons drench the allied lines are no respecters of persons, so even the little children in the districts close to the fighting lines must wear gas masks to protect themselves from Hun frightfulness. The tots in this group on their way to school in Reims are all provided with masks.

COMMANDS DEATH COMPANY

This Italian officer, clad in steel armor and helmet, is the commander of a "company of death," made up of men of greatest courage whose task is always most dangerous.

The Opal.

The opal, owing to its beauty, has banished the evil spell given it through the centuries. It seems that its wonderful play of colors made the ancients believe that it reflected the eternal fires of Hades. Fashions introduced by jewelers in recent years have greatly assisted the superstitious to throw off old world ideas.

KAISER IN TURKISH FIELD MARSHAL UNIFORM

Copyright, Underwood & Underwood

The most recent picture of Kaiser Wilhelm to arrive in the United States shows him in a Turkish field marshal uniform while he was visiting the German nurses serving at the mosque of Saint Sophia in Constantinople during his diplomatic trip to Turkey.

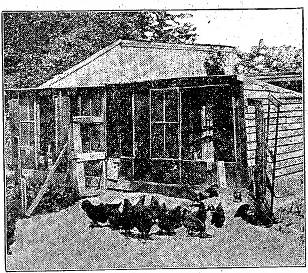
PUTTING A HENNERY IN THE BACK YARD



A Double Yard—Alternating the Flock Allows Green Feed to Grow.

PROCEED WISELY WITH CHICKENS

Suggestions of Specialists of Department of Agriculture.

MAKE START WITH PUREBRED

Householders Usually Desire Not Only Eggs for Table, But Also an Occasional Chicken to Eat—Light Breeds for Eggs.

You want to start a backyard hennery or improve the one you have—you have gone that far in your determination to help the meat and egg supply—how shall you begin? What kind of fowls shall you keep, how many and how shall you procure them? These are your next considerations. Here are the suggestions of specialists of the United States department of agriculture on these points. They will help the beginner especially, but should also help the town householder to make his flock more serviceable. First, the kind of breed.

This will depend somewhat on whether you desire eggs, meat or both eggs and meat. Householders usually desire not only eggs for the table and for cooking, but also an occasional chicken to eat. If this is your desire one of the general-purpose breeds, such as Plymouth Rock, Wyandotte, Rhode Island Red or Orpington, is preferable to the smaller egg breeds, such as the Leghorns. Not only do the mature fowls of these breeds, because of their larger size, make better table fowls than the Leghorns, but the young chickens for the same reason make better friers and roasters. Chickens of the egg breeds are suitable only for smaller broilers. Hens of the general-purpose breeds also are more "broody," making good sitters and mothers, which is a decided advantage when it is desired to hatch and raise chicks. Hens of the egg breeds seldom become broody and are in any event rather unreliable sitters and mothers.

Lighter Breeds for Eggs.

If, however, the desire for eggs outweighs that for an occasional table fowl the lighter egg breeds undoubtedly will be more practicable because they lay as many eggs and eat less feed, with the result that they produce the egg more cheaply. It is by all means advisable to keep some pure breed or variety. If this is done sales at a profitable figure often can be made of breeding stock which it is intended to market or of eggs for hatching.

The size of the flock which can be most efficiently kept will depend, first of all, upon the space available and, secondly, upon the amount of table scraps or waste which is available for feed. It is a mistake to try to overstock the available space. Better results will be obtained from a few hens in a small yard than from a larger number. The backyard poultry flock rarely will consist of more than 20 to 25 hens, and in many cases of not more than eight or ten, or occasionally of only three or four. For a flock of 20 to 25 hens a space of not less than 25 feet by 30 feet should be available for a yard. If less space is available the size of the flock should be reduced. allowing, on the average, 20 to 30 square feet for each fowl. A few hens sometimes may be kept successfully with a smaller yard allowance than this, but if the space is available a yard of the size indicated should be used.

Ordinarily, the best way for the city poultry keeper to start a flock is to buy pullets in the fall when they are cheaper. Unless there is a scarcity in the community now, however, there is likely to be little trouble in securing a few hens at this time, although prices probably will be higher. Pullets obtained at this time will give better returns if eggs are desired, while if the intention is to raise chicks older laying hens may be used, or day-old chicks can be purchased and a start made in that way.

How to Buy Hens.

When pullets or hens are to be purchased it is well, if possible, to go to some farmer or poultryman who is known to the prospective buyer. If there is no opportunity to go into the country for pullets, they often can be selected from among the live poultry shipped into the city to be marketed. The advice of some one who knows poultry should be sought in making such a purchase to make sure that pullets or young hens are obtained and that the stock is healthy. Often the local poultry associations are glad to help the prospective poultry keeper to get stock by putting him in communication with some of its members having stock for sale. Sometimes the local board of trade or chamber of commerce is glad to help in bringing together the prospective purchaser and the poultry raiser.

In a later article suggestions as to how an inexpensive poultry house may be built or converted from an unused shed will be given.

BEGIN WISELY WITH CHICKENS—BUT BEGIN.

If you have not kept chickens before ask advice from trustworthy sources before you launch the backyard venture. Get in touch with the local poultry association, the county agent and some successful poultrymen. Write your state agricultural college and the United States department of agriculture for bulletins on poultry raising. Don't be discouraged if the advice is a bit conflicting. There are several ways to succeed with chickens, as with anything else.

Feeding Ducks.

Ducks may be fed on the rations recommended for fowls and chickens, but better results are usually secured by feeding more green and vegetable feeds and a larger proportion of mash. Eggs from Pekin ducks are used largely for hatching, and the profit is secured in producing green ducklings (ducks fattened and marketed at the age of eight or twelve weeks); therefore these ducks are fed a maintenance ration after they stop laying in the summer until about December 1, when a laying ration is given and the amount of mash increased. Indian Runner ducks have been introduced as producers of commercial eggs, so they should be fed laying rations throughout the year if kept for egg production.

DAIRY

CALVES WITH WHITE SCOURS

Result of Inflammation of Lining of Fourth Part or True Digestive Stomach.

White scours in calves is a form of diarrhea. It is the result of an inflammation of the lining of the fourth part or true digestive stomach, and is generally caused by changing the calf's milk or giving cold or skim milk when not used to it. The manure is very thin and of a yellowish-white color. The calf has pains, breathes heavily and groans at times, grits its teeth and keeps looking around at its sides. Try to discover the cause of the trouble, and if from a change of milk or giving it too cold, apply this treatment:

Give the calf good, warm milk to drink, following with two ounces of raw linseed oil, two ounces of lime water, one dram of laudanum. Mix and give as a drench. If this does not give relief follow with one dram of laudanum and two ounces of lime water. Mix and give three times a day in a little milk as a drench. Keep up this treatment and see that the animal is kept dry and warm until it is better.

WARM WATER FOR DAIRY COW

Cheaper to Heat Supply Than for Animals to Do It Themselves With Expensive Feeds.

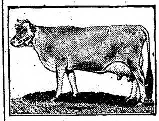
(North Dakota Agricultural College Bulletin.)

A good supply of clean, fresh water should always be at hand for dairy cows. Much water is needed for the high-producing milch cow owing to the nature of her product, about 87 per cent of which is water. It should be handy at all times, and in the winter, if the tank is outside, heat should be applied to take the chill off the water. Cows will drink more water if warmed to 60 to 70 degrees Fahrenheit than if made to drink ice water. A tank heater can be provided at low cost that will keep water at proper temperature, thereby saving feed and energy of the animal. It is cheaper to warm ice water than to allow the cow to warm it with high-priced feed.

LEADING CLASSES OF COWS

Jersey Produces Lightest Calves and Holsteins Heaviest—Average Weight of Animals.

Taking the leading classes of dairy cows, the Ayrshire, Jersey, Holstein and Guernsey, we find the Jersey produces the lightest calves and the Holstein the heaviest. They rank about as follows: Holstein, Ayrshire, Guernsey and Jersey. The male calves are the heaviest, running as an average 90 pounds for the Holsteins, 78 pounds for Ayrshire, 70 pounds for the Guernsey and 62½ pounds for the Jersey, while the heifer calves average 88, 71½, 69 and 60.7 pounds.



Champion Jersey Cow.

REMEDY FOR CHAPPED TEATS

Carefully Wash With Warm, Soft Water Containing Disinfectant—Dry and Apply Salve.

Chapped and sore teats of any kind should be carefully washed with warm soft water containing a little disinfectant. Dry them carefully and apply a little salve. The salve may be just ordinary vaseline; it may be any of the carbolic acid salves purchased in the drug store, or it may be made up of three parts of lard and one part of turpentine.

This salve protects the teat during the time between milkings. It excludes air and keeps the teats from drying and cracking and the surface of the teats become smooth and soft. Instead of being uneasy during milking, the cow will stand quietly and show no discomfort of any kind from this source.

ADD SUCCULENCE TO RATION

Where Corn Silage Is Not Available Feeding Small Potatoes Will Increase Milk Flow.

Potatoes add succulence to the dairy ration. Where corn silage is not available and there are plenty of small potatoes, a peck a day will give a marked increase in milk flow. They should be introduced into the ration gradually, and should be run through a root cutter to avoid the possibility of choking the animal.

Roughage for Cows.

Give the cows all the fodder-corn or second-crop clover hay they will eat at night, and let them run on the pastures as long as they can get a good bite, and do not poach the soft ground.

JOB PRINTING

We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

"BARBAROUS AS SLAVE DRIVERS"

Methods of Exponents of German "Kultur" in Carrying Out Deportation Order.

ADD HYPOCRISY TO CRUELTY

Officers of "Modern Attila" Gave Attitude of England as Excuse for Repeating in France Atrocities Practiced in Belgium.

The course of the German armies in France was marked with the same brutalities that characterized the occupation of Belgium. Ample proof has been produced that the entire proceedings were a deliberate part of the calculated system of "frightfulness."

In France the German system of forced labor and deportations, with its horrors, was the same as in Belgium. In this article is shown the real identity of German practice in both occupied regions. This can be done from the official documents and from a summary by Ambassador Gerard. The harrowing details may be gathered from the scores of depositions which accompany the note addressed by the French government to the governments of the neutral powers July 25, 1916. These are on file in the state department, and have also been translated, along with the official documents, in "The Deportation of Women and Girls From Lille." (New York, Doran.)

German Proclamation at Lille.

"The attitude of England makes the provisioning of the population more and more difficult.

"To reduce the misery, the German authorities have recently asked for volunteers to go and work in the country. This offer has not had the success that was expected.

"In consequence of this the inhabitants will be deported by order and removed into the country. Persons deported will be sent to the interior of the occupied territory in France, far behind the front, where they will be employed in agricultural labor, and not on any military work whatever. By this measure they will be given the opportunity of providing better for their subsistence.

"In case of necessity, provisions can be obtained through the German depots. Every person deported will be allowed to take with him 30 kilograms of baggage (household utensils, clothes, etc.), which it will be well to make ready at once.

"I therefore order that no one, until further orders, shall change his place of residence. No one may absent himself from his declared legal residence from 9 p. m. to 6 a. m. (German time), unless he is in possession of a permit in due form.

"Inasmuch as this is an irrevocable measure, it is in the interest of the population itself to remain calm and obedient.

"COMMANDANT.

"Lille, April, 1916."

Notice Distributed in Lille.

"All the inhabitants of the houses, with the exception of children under fourteen and their mothers, and also of old people, must prepare themselves for transportation in an hour and a half's time.

"An officer will decide definitely what persons will be taken to the concentration camps. For this purpose all the inhabitants of the house must assemble in front of it; in case of bad weather they may remain in the passage. The door of the house must remain open. All protests will be useless. No inmate of the house, even those who are not to be transported, may leave the house before 8 a. m. (German time).

"Each person will be permitted to take 30 kilograms of baggage; if anyone's baggage exceeds that weight, it will all be rejected, without further consideration. Packages must be separately made up for each person and must bear an address legibly written and firmly affixed. This address must contain the surname and the Christian name and the number of the identity card.

"ETAPPEN-KOMMANDANTUR.

(Lille, April, 1916.)

Belgian Address to French President.

"To Monsieur Raymond Poincare,
President of the French Republic,
Paris.

"Sir: We have the honor to express again our most sincere gratitude to you for your most kind reception, a few days ago, of the deputation which went with feelings of legitimate emotion to inform you of the deportation of lads and girls, which the German authorities have just carried out in the invaded districts.

"We have collected some details on the subject from the lips of an honorable and trustworthy person, who succeeded in leaving Tourcoing about ten days ago; we think it our duty to bring these details to your notice by reproducing textually the declarations which have been made to us:

"'These deportations began towards Easter. The Germans announced that the inhabitants of Roubaix, Tourcoing, Lille, etc., were going to be transported into French districts where their provisioning would be easier.'

"'At night, at about two o'clock in the morning, a whole district of the town was invested by the troops of occupation. To each house was distributed a printed notice, of which we give herein an exact reproduction, preserving the style and spelling.' (See document, above.)

"'The inhabitants so warned were to hold themselves ready to depart an hour and a half after the distribution of the proclamation.'

"'Each family, drawn up outside the house, was examined by an officer, who pointed out haphazard the persons who were to go. No words can express the barbarity of this proceeding nor describe the heartrending scenes which occurred; young men and girls took hasty farewell of their parents—a farewell hurried by the German soldiers who were executing the infamous task—rejoined the group of those who were going, and found themselves in the middle of the street, surrounded by other soldiers with fixed bayonets.'

"'Tears of despair on the part of parents and children so ruthlessly separated did not soften the hearts of the brutal Germans. Sometimes, however, a more kind-hearted officer yielded to too great despair and did not choose all the persons whom he should—by the terms of his instructions—have separated.'

Herded Like Cattle.

"'These girls and lads were taken in street cars to factories, where they were numbered and labeled like cattle and grouped to form convoys. In these factories, they remained 12, 24 or 36 hours until a train was ready to remove them.'

"'The deportation began with the villages of Roncy, Halluin, etc., then Tourcoing and Roubaix. In the towns the Germans proceeded by districts.'

"'In all about 30,000 persons are said to have been carried off up to the present. This monstrous operation has taken eight to ten days to accomplish.

"'The reason given by the German authorities is a humanitarian (?) one. They have put forward the following pretexts: provisioning is going to break down in the large towns in the north and their suburbs, whereas in the Ardennes the feeding is easy and cheap.'

"'It is known from the young men and girls, since sent back to their families for reasons of health, that in the department of the Ardennes the victims are lodged in a terrible manner, in disgraceful promiscuity; they are compelled to work in the fields. It is unnecessary to say that the inhabitants of our towns are not trained to such work. The Germans pay them 1.50 m. But there are complaints of insufficient food.'

"Barbarity of Slave Drivers."

"'They were very badly received in the Ardennes. The Germans had told the Ardennais that these were "volunteers" who were coming to work, and the Ardennais proceeded to receive them with many insults, which only ceased when the forcible deportation of which they were the victims became known.'

"'Feeling ran especially high in our towns. Never has so iniquitous a measure been carried out. The Germans have shown all the barbarity of slave drivers.'

"'The families so scattered are in despair and the morale of the whole population is gravely affected. Boys of fourteen, schoolboys in knickerbockers, young girls of fifteen to sixteen have been carried off, and the despairing protests of their parents failed to touch the hearts of the German officers, or rather executioners.'

"One last detail: 'The persons so deported are allowed to write home once a month; that is to say, even less often than military prisoners.'

"We do not wish here to enter into the question of provisioning in the invaded districts; others, better qualified than ourselves, give you, as we know, frequent information. It is enough for us to describe in a few words the situation from this aspect:

Entire Population in Misery.

"The provisioning is very difficult; food, apart from that supplied by the Spanish-American committee, is very scarce and terribly dear. . . . People are hungry and the provisioning is inadequate by at least a half; our population is suffering constant privations and is growing noticeably weaker. The death rate, too, has increased considerably.

"With all confidence in the sympathy of the government we venture to address a new and pressing appeal to your generous kindness and far-reaching influence in the name of those who are suffering on behalf of the whole country."

"Paris, 15th June, 1916, 3, rue Taitbout."

(Signed on behalf of various specified organizations by Toulemonde, Charles Droulers, Leon Hatine-Dazin and Louis Lorthiois.)

AMPLE PROOF OF ATROCITIES

Committee Appointed by the Belgian Government Collected Facts as to German War Practices.

In the hope of arousing the sympathy and securing the aid of the neutral nations, the Belgian government appointed a committee to ascertain the facts about German war practices. The evidence collected by the Belgian commissioners is detailed and explicit, and their reports give names, places, and dates. The following is a summary of the charges made:

"That thousands of unoffending civilians, including women and children, were murdered by the Germans.

"That women had been outraged.

"That the custom of the German soldiers immediately on entering a town was to break into wineshops and the cellars of private houses and madden themselves with drink.

"That pillage had been accompanied by wanton destruction and by bestial and sacrilegious practices."

SAVE INNER TUBES

Theme of Educational Campaign Instituted for Economy.

CAN SAVE MOTORIST MONEY

Undue Haste in Replacing Punctured or Blown-Out Tube Is Responsible for Multitude of Sins—Pinching Is Mistake.

Ways and means of procuring the longest service from inner tubes—an appurtenance of the automobile's mechanism that is most neglected—is the theme of an educational campaign instituted by a big rubber concern in the interests of war economy. Many unexpected outbursts from air-containers originate from "sins of omission" and "commission," and by emphasizing the more glaring ones the company believes it can save the motorist dollars that otherwise would pour into the abyss of waste.

Undue haste in replacing a punctured or blown-out tube is responsible for a multitude of the "sins." The most common mistake is pinching the tube. The tube is inserted in an uneven or twisted manner. This causes it to overlap or wrinkle, with the result that in a short time it will cut through where it has been overlapped and we have a leak.

Pinches New Tube.

The same trouble is also caused sometimes by putting a new tube into the tire just as it is taken from the box. When the tube is applied after mounting there is such an inrush of air that it will often buckle up the tube, thereby forcing a tiny section beneath the bead spreader.

Especially will this occur if the valve stem is not pulled out to its proper position. The operator should proceed slowly when applying the tube. Before putting it into the casing it should be given a couple of "shots" of air, then it should be applied carefully, the inside—the side on which the stem occurs—being always kept inside.

When it is in the casing it should be "talced" carefully and the fingers forced all around the tire to make sure that the talc has been evenly distributed, and then, before the loose bead is applied, the tire should be given a little more air—enough to round it out nicely and prevent pinching.

How to Use Talc.

The motorist should be cautioned against using too much talc. There are several powders procurable for keeping the tube from sticking to the casing, among these being soap stone, graphite and talc, but the use of too much of any of these proves disastrous, as a collection of substance in one place eats into the rubber. If, on the other hand, no powder be used, it will be only a short time before the heat generated will cook the tube.

Under-inflation is equally injurious to tubes. When the under-inflated tire passes over a stone both casing and tube are jolted against the rim, and sooner or later a leak will develop. All tires should be inflated to the standard prescribed by manufacturers.

All tubes should be carried in a waterproof bag or well wrapped in newspaper.

ENGINE TROUBLE IS ELUSIVE

Dirty Distributor or Collector Ring Cause of Much Worry—Parts Should Be Wiped.

A simple defect that has caused many a car owner much fruitless investigation results from a dirty distributor or collector ring. It is natural that in the course of time dirt should accumulate on these parts, and when it does, the result is ignition troubles that are difficult to locate, as there is no easily recognized symptoms that is characteristic. It may cause a knock, or any one of a number of varieties of irregular firing. These parts should be carefully wiped at frequent intervals, and in doing this no metal tool should be used. If it is necessary to use some implement to reach narrow spaces with the wiping cloth, a soft piece of wood should be employed.

TROUBLE IN STARTING A CAR

Difficulty Generally Due to Fact That Gasoline Will Not Vaporize at Low Temperature.

The easiest way to overcome starting difficulties with an automobile in cold weather is to apply heat to the intake manifold, in the opinion of E. V. Collins, instructor in steam and gas engineering in the Kansas agricultural college.

Trouble in starting a car in cold weather is generally due to the fact that the ordinary low grade of gasoline will not vaporize readily at low temperatures.

The intake pipe leading from the carburetor is usually vertical so that gasoline will not pass through unless it is vaporized. The velocity of air through the carburetor and intake pipe will hold the vaporized gas in suspension when the motor is once started.

By applying heat to the intake manifold enough liquid will be vaporized so that the motor will start readily. In this case the entire mixture is warmed rather than just the gasoline. Better results will be obtained than where the motor is primed with heated gasoline and the air is allowed to enter the cylinders cold.

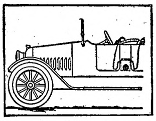
The simplest way to apply heat to the manifold is to pour hot water over it, care being taken not to get it into the carburetor. Putting hot water into the cooling system warms the cylinder walls, but does not help to get the mixture from the carburetor to the cylinder and should not be necessary if the intake is warmed.

DEVICE TO PREVENT THEFT

Each Article in Car Is Attached to Chain, Pulling of Which Sets Signal in Operation.

In illustrating and describing a theft preventing and signaling device, invented by S. A. Deanes of West Point, Miss., the Scientific American says:

An object of this invention is to provide a device which may be used in connection with automobiles by means of which theft may be prevented of overcoats, suitcases, umbrellas and like, the object is to provide an audible signal when an attempted theft takes place, thus calling the attention of the owner or driver to the attempt. A further object is to provide a device which may be so disposed in an automobile, that articles in the front and rear seat, may be readily protected. To accomplish this each article is secured to a chain, which is connected with an electric bell, the removal of an article will pull the plug, and thus set the signal in operation.



Theft-Signal Device.

BLUE ILLUMINATION IS BEST

Is Brilliant Enough to Afford Reading of Various Instruments—Back Glare Eliminated.

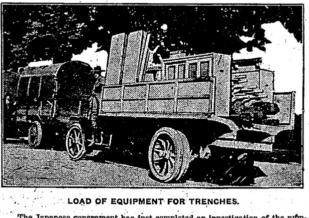
The substitution of a blue bulb for the ordinary clear one, which illuminates the dash, has certain advantages. The blue light is brilliant enough to afford reading of the various instruments and yet all back glare is eliminated. Moreover, the blue light rather improves the appearance of the compartment at night.

IN DESCENDING A LONG HILL

To Save Gasoline Supply Shut Off Ignition—Good Plan Also to Close Throttle.

When going down a long hill shut off ignition. This also saves gasoline. Even if you use the engine as a brake, with throttle closed, you draw very little gasoline. If throttle is opened, however, you draw out a great deal, so keep the throttle closed.

THERE ARE 300,000 MOTORS AT FRONT



LOAD OF EQUIPMENT FOR TRENCHES.

The Japanese government has just completed an investigation of the number of motorvehicles now in use by the armies at war, says Power Wagon. It finds that the central powers have about 131,500 machines, including 100,000 owned by Germany, 30,000 by Austria-Hungary, 750 by Turkey and 300 by Bulgaria. The entente allies have 172,125, including 30,000 owned by England, 80,000 by France, 40,000 by Russia, 10,000 by Italy 10,300 by Belgium, 1,700 by Roumania and 125 by Serbia.

Brief Items of State News

The funeral of Colonel Charles H. Barnard, former commandant of the Minnesota Soldiers home at Minnehaha Falls, who died unexpectedly in St. Paul, took place in Duluth, his former home. Colonel Barnard fell dead of apoplexy on the street.

The Swedish Lutheran church of Mankato considered at its annual meeting the advisability of changing its name so as to make it thoroughly American and it was decided to hold an adjourned meeting early in February to decide upon a new title.

A Polk county grand jury, sitting at Crookston, Minn., failed to indict John H. McInerny and the East Grand Forks Brewery company for having violated the county option law. This follows the acquittal of McInerny by a federal jury on charges of violating the bone dry act.

W. T. Parry, director of agriculture of the St. Cloud high school, will be given one of the government positions as county agricultural agent in one of the Minnesota counties, but he will remain at the local school until the close of this semester. The semester will close in three weeks.

Arguments in Duluth's case against the Northern Pacific railway to obtain better rates and service for that city and tributary territory were heard by the Minnesota Railway and Warehouse commission at the Commercial club in Duluth. The matter will not rest, awaiting a decision by the commission.

Loyal citizens of Granada caused the arrest of Walter Meyers, of German ancestry, on a disloyalty charge. The warrant asserts that he made the statement: "They can never whip the kaiser. The United States will get all that is coming to it. They better take care of their own people before they send food to England."

The America First Association is the one live issue in every county of the state, is rapidly sweeping Minnesota clear of Pro-German sentiment and is binding the various peoples into one mighty concourse of active loyalty, according to the reports of 200 officers of the association, who held their first general meeting at St. Paul since the drive began.

J. E. Morrisey has been formally sworn in as mayor of Crookston to succeed Harvey Misner. Only two changes were made in appointments, the other officers holding down the same posts as they did in Mayor Misner's administration. Dave Saunders was appointed chief of police in place of Aaron Eick. Dr. A. H. Dunlop, health commissioner in place of Dr. C. E. Dampeier.

President E. G. Quamme of the St. Paul Federal Land bank, has gone to Washington to attend the convention of land bank presidents. Proposed amendments to the land bank law to give aid to the farmers in their war emergency are to be backed. Mr. Quamme will favor the establishment of a $100,000,000 revolving fund to relieve the bond situation, resulting from the general refusal of Eastern financiers to take up the Farm Land Bank bonds.

The Red Cross day at Barnesville proved to be the biggest event of its kind ever pulled off so far in that section, over $2,500 in cash being realized from the auction sale.

Cleveland boasts it is 100 per cent loyal. At a recent Red Cross drive the city raised over $2,300 for the local Red Cross and more than $700 for the Y. M. C. A.

George M. Leahy is Northfield's first victim in the war for democracy. Word was received from the War department by his parents that he had died of pneumonia in France. He enlisted with Canadian forces shortly before America entered the war, but at his request was transferred to the Montana national guard and went over seas with the Rainbow division.

"The Ten Thousand Minnesota Lakes, incorporated," was the name selected for the association to boost Minnesota as a summer resort by the board of directors, at their meeting in the Saint Paul hotel. The association will be incorporated with a capital stock of $100,000 and it will boost for the development of the state generally, as well as for the summer resorts.

W. W. Stockwell, for the past four years postmaster at Anoka, has been relieved of his office through a letter received by him from First Assistant Postmaster General Coons. Postoffice Inspectors Carl Eggs and W. J. Earles made an investigation of alleged disloyalty ten days ago and reported their findings to Washington. The complaints were that a lot of advertising matter for the second issue of Liberty bonds had been sent to Mr. Stockwell and had received no attention but had been thrown aside in the postoffice and never distributed. Jessie G. Brooks, formerly assistant postmaster, has been appointed temporary postmaster.

D. L. Durkin's general store at Frazee was totally destroyed by fire. Mr. Durkin estimated his loss at $20,000, withh $4,200 insurance. The building was owned by Marx Jess, and the loss on the building was placed at $2,000, with $1,500 insurance. placed at $2,000, with $1,500 insurance.

Representatives of the National Nonpartisan league have rented the opera house at Mankato for a meeting Jan. 16. The meeting will be a protest, it is said, against the people of Mankato who have refused the Nonpartisan representatives a place in which to meet.

Talk Praised.

the result of the par-
itovsk, whatever the
unsel and purpose of,
the utterances of the spokesmen of the Central Empires, they have again attempted to acquaint the world with their objects in the war and have again challenged their adversaries to say what their objects are and what sort of settlement they would deem just and satisfactory. There is no good reason why that challenge should not be responded to with the utmost candor. We did not wait for it. Not once, but again and again we have laid our whole thought and purpose before the world. Not in general terms only, but each time with sufficient definition to make it clear what sort of definite terms of settlement must necessarily spring out of them. Within the last week Mr. Lloyd George has spoken with admirable candor and in admirable spirit for the people and government of Great Britain. There is no confusion of counsel among the adversaries of the Central Powers, no uncertainty of principals, no vagueness of detail. The only secrecy of counsel, the only lack of fearless frankness, the only failure to make definite statement of the object of the war, lies with Germany and her allies. The issues of life and death hang upon these definitions. No statesman who has the least conception of his responsibility ought for a moment to permit himself to continue this tragical and appalling outpouring of blood and treasure unless he is sure beyond a peradventure that the objects of the vital sacrifice are part and parcel of the very life of society and that the people for whom he speaks think them right and imperative as he does.

Definitions Called For.

There is, moreover, a voice calling for these definitions of principle and of purpose which is, it seems to me, more thrilling and more compelling than any of the many moving voices with which the troubled air of the world is filled. It is the voice of the Russian people. They are prostrate and all but helpless, it would seem, before the grim power of Germany, which has hitherto known no relenting and no pity. Their power, apparently, is shattered. And yet their soul is not subveient. They will not yield either in principle or in action.

Their conception of what is right, of what is humane and honorable for them to accept has been stated with frankness, a largeness of view, a generosity of spirit and a universal human sympathy which must challenge the admiration of every friend of mankind; and they have refused to compound their ideals or desert others that they themselves may be safe.

They call on us to say what it is that we desire; in what, if anything, our purpose and our spirit differ from theirs. And I believe that the people of the United States would wish me to respond, with utter simplicity and frankness.

Wants Processes Open.

Whether their present leaders believe it or not, it is our heartfelt desire that some way may be opened whereby we may be privileged to assist the people of Russia to attain their utmost hope of liberty and ordered peace. It will be our wish and purpose that the processes of peace, when they are begun, shall be absolutely open and that they shall involve and permit henceforth no secret understandings of any kind.

The day of conquest and aggrandizement is gone by; so is also the day of secret covenants entered into in the interest of particular governments and likely at some unlooked for moment to upset the peace of the world. It is this happy fact now clear to the view of every public man whose thoughts do not still linger in an age that is dead and gone which makes it possible for every nation whose purposes are consistent with justice and the peace of the world to avow now or at any other time the objects it has in view.

We entered this war because violations of right had occurred which touched us to the quick and made the life of our own people impossible unless they were corrected and the world secured once for all against their recurrence.

Safe World To Live In Is Demand.

What we demand in this war, therefore, is nothing peculiar to ourselves. It is that the world be made fit and safe to live in; and particularly that it be made safe for every peace loving nation which, like our own, wishes to live its own life, determine its own institutions, be assured of justice and fair dealing by the other peoples of the world as against force and selfish aggression. All the people of the world are in effect partners in this interest and for our own part we see very clearly that unless justice be done to others, it will not be done to us. The program of the world's peace, therefore, is our program; and that program, the only possible program, as we see it, is this:

First—Open covenants of peace, openly arrived at, after which there shall be no private international understandings of any kind but diplomacy shall proceed always frankly and in the public view.

Second—Absolute freedom of navigation upon the seas, outside territorial waters, alike in peace and in war, except as the seas may be closed in whole or in part by international action for the enforcement of international covenants.

Third—The removal, so far as possible, of all economic barriers and the establishment of an equality of trade conditions among all the national consenting to the peace and associating themselves for its maintenance.

Fourth — Adequate guaranties given and taken that national armaments will be reduced to the lowest point consistent with domestic safety.

Fifth—A free, open minded and absolutely impartial adjustment of all colonial claims, based upon a strict observance of the principles that in determining all such questions of sovereignty the interests of the populations concerned must have equal weight with equitable claims of the government whose title is to be determined.

Sixth—The evacuation of all Russian territory and such settlement of all questions affecting Russia as will secure the best and freest cooperation of the other nations of the world in obtaining for her an unhampered and unembarrassed opportunity for the independent determination of her own political development and national policy and assure her of a sincere welcome into the society of free nations under institutions of her own choosing and, more than a welcome, assistance also of every kind that she may need and may herself desire. The treatment accorded Russia by her sister nations in the months to come will be the acid test of their good will, of their comprehension of her needs as distinguished from their own interests, and of their intelligent and unselfish sympathy.

Seventh—Belgium, the whole world will agree, must be evacuated and restored, without any attempt to limit the sovereignty which she enjoys in common with all other free nations. No other single act will serve as this will serve to restore confidence among the nations in the laws which they have themselves set and determined for the government of their relations with one another. Without this healing act the whole structure and validity of international law is forever impaired.

Eighth—All French territory should be freed and the invaded portions restored, and the wrong done to France by Prussia in 1871 in the matter of Alsace-Lorraine, which has unsettled the peace of the world for nearly 50 years, should be righted, in order that peace may once more be made secure in the interest of all.

Ninth—A readjustment of the frontiers of Italy should be affected along clearly recognizable lines of nationality.

Tenth—The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and assured, should be accorded the freest opportunity of autonomous development.

Eleventh—Rumania, Serbia and Montenegro should be evacuated. Occupied territories restored; Serbia accorded free and secure access to the sea; and the relations of the several Balkan states to one another determined by friendly counsel along historically established lines of allegiance and nationality; and international guaranties of the political and economic independence and territorial integrity of the several Balkan states should be entered into.

Twelfth—The Turkish portions of the present Ottoman empire should be assured a secure sovereignty, but the other nationalities which are now under Turkish rule should be assured an undoubted security of life and an absolutely unmolested opportunity of autonomous development, and the Dardanelles should be permanently opened as a free passage to the ships and commerce of all nations under international guaranties.

Thirteenth—An independent Polish state should be erected which should include the territories inhabited by indisputable Polish populations, which should be assured a free and secure access to the sea, and whose political and economic independence and territorial integrity should be guaranteed by international covenant.

Fourteenth—A general association of nations must be formed under specific covenants for the purpose of affording mutual guaranties of political independence and territorial integrity to great and small states alike.

In regard to these essential rectifications of wrong and assertions of right we feel ourselves to be intimate partners of all the governments and people associated together against the imperialists. We cannot be separated in interest or divided in purpose. We stand together until the end.

Foe to be Equal But Not Master.

For such arrangements and covenants we are willing to fight and to continue to fight until they are achieved; but only because we wish the right to prevail and desire a just and stable peace such as can be secured only by removing the chief provocations to war, which this program does remove. We have no jealousy of German greatness and there is nothing in this program that impairs it. We grudge her no achievement or distinction of learning or of pacific enterprise such as have made her record very bright and very enviable. We do not wish to injure her or to block in any way her legitimate influence or power. We do not wish to fight her either with arms or with hostile arrangements of trade, if she is willing to associate herself with us and the other peace loving nations of the world in covenants of justice and law and fair dealing. We wish her only to accept a place of equality among the peoples of the world—the new world in which we now live—instead of a place of mastery.

Must Know Who Is Represented.

Neither do we presume to suggest to her any alterations or modification of her institutions. But it is necessary, we must frankly say and necessary as a preliminary to any intelligent dealings with her on our part, that we should know whom her spokesmen speak for when they speak to us, whether for the reichstag majority or for the military party, and the men whose creed is imperial domination.

Aims Clear; Ready for Test.
